Fundamentals of grammar, composition, and oral skills. Readings carefully selected for comprehension and simple conversation. 1105 for students with no high school Spanish; 1106 for students who have completed 1105 or who have less than three years of high school Spanish.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 1106 - Elementary Spanish (3 credits)
Fundamentals of grammar, composition, and oral skills. Readings carefully selected for comprehension and simple conversation. 1105 for students with no high school Spanish; 1106 for students who have completed 1105 or who have less than three years of high school Spanish.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 1114 - Accelerated Elementary Spanish (4 credits)
Condenses SPAN 1105 and 1106. Proficiency-oriented approach to elementary Spanish, designed for learners with some prior experience in the language or for those who wish to progress rapidly through the beginning stages of language learning. Supplemented with a self-instructional electronic component. Meets University and college foreign language requirement. SPAN 1114 duplicates SPAN 1106.
Instructional Contact Hours: (3 Lec, 2 Lab, 4 Crd)

SPAN 2105 - Intermediate Spanish (3 credits)
Review of grammar with increasing emphasis on reading, writing, and oral communication.
Prerequisite(s): SPAN 1106 or SPAN 1114
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 2106 - Intermediate Spanish (3 credits)
Review of grammar with increasing emphasis on reading, writing, and oral communication.
Prerequisite(s): SPAN 2105
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 2114 - Accelerated Intermediate Spanish (6 credits)
Proficiency-oriented approach to intermediate Spanish, designed for learners who wish to progress rapidly through the intermediate stages of language learning. Review of grammar with increasing emphasis on reading, writing, listening, and oral communication. Study of authentic materials and cultural artifacts in Spanish. Study of cultures, traditions, customs, and social conventions of the Spanish-speaking world. Not recommended for native speakers of Spanish. Accelerated version of 2105-2106. Duplicates 2105-2106.
Prerequisite(s): SPAN 1106 or SPAN 1114
Instructional Contact Hours: (6 Lec, 6 Crd)

SPAN 2124 - Intermediate Spanish for Building Construction (3 credits)
Proficiency-oriented approach to intermediate Spanish, designed for learners who wish to incorporate building construction topics at the intermediate stage of language learning. Review of grammar with increasing emphasis on reading, writing, listening, and oral communication applied to the field of Building Construction. Study of authentic materials related to personal and professional situations in the field of Building Construction. Development of communication strategies for risk assessment, health concerns, and basic instructions with Spanish-speaking workers in Building Construction. Duplicates Spanish 2105 Intermediate Spanish. Not recommended for native speakers of Spanish.
Prerequisite(s): SPAN 1106 or SPAN 1114
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 2744 - Topics in Spanish Culture (3 credits)
Examines fundamental concepts related to Spanish culture within a specific historical and geographical context. Interprets cultural artifacts of the period across selected genres, including drama, poetry, film, and/or art. Analyzes how cultural identity is constructed by multiple and diverse disciplinary perspectives and in response to global challenges and opportunities. Taught in English. Repeatable with different topics for a maximum of 6 credits.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

SPAN 2754 - Topics in Spanish American Culture (3 credits)
Examination of fundamental concepts related to Spanish American culture in variable historical and geographical contexts through the study of one or more of the following: narrative; essay; drama; poetry; film; and art. Emphasis on the interpretation and analysis of cultural texts and other creative artifacts in the context of key historical and political events, in order to understand shifting concepts of cultural identity, advantages and challenges of diversity and inclusion, and global challenges and opportunities in the human world. Taught in English. Course may be repeated, with different topics, for a maximum of 6 credits.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

SPAN 2764 - Introduction to Latino American Studies (3 credits)
Introduction to interdisciplinary field of Latino American Studies. Exploration of debates and problems of Latin American and Latina/o history and culture. Examination and analysis of transnational, social, and cultural trends. Emphasis on connections between United States and Latin America, and local and regional Latina/o communities. In English.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 3 Reasoning in Social Sciences, 10 Ethical Reasoning, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 2774 - Minority Languages in the Spanish-Speaking Context (3 credits)
Examination of language policies and practices with regard to minority languages across the Spanish-speaking context, histories of minority languages in Spanish-speaking areas, and the current socio-political situations of these languages and their speakers. Exploration of issues concerning linguistic rights, such as access to education, economic opportunities, and political status; analysis of the implications of restrictions on minority groups linguistic rights. Discussion of why some minority-language speakers have been more successful in their language conservation or revitalization efforts than others. Taught in English. Does not count toward the Spanish major or minor.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 2974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 3105 - Grammar, Composition and Conversation (3 credits)
3105: Practice in communication skills in Spanish. Development of reading, writing, listening and speaking skills. Review and use of grammar. Comprehension of the role of culture in communicating and in understanding cultural differences. Study of authentic materials in Spanish. Not recommended for native speakers of Spanish. 3106: Practice in communication skills in Spanish. Development of reading, writing, listening and speaking skills. Review and use of grammar. Comprehension of the role of culture in communicating and in understanding cultural differences. Study of authentic materials in Spanish. Not recommended for native speakers of Spanish.
Prerequisite(s): SPAN 2106
Pathway Concept Area(s): 1F Discourse Foundational, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3106 - Grammar, Composition and Conversation (3 credits)
3105: Practice in communication skills in Spanish. Development of reading, writing, listening and speaking skills. Review and use of grammar. Comprehension of the role of culture in communicating and in understanding cultural differences. Study of authentic materials in Spanish. Not recommended for native speakers of Spanish. 3106: Practice in communication skills in Spanish. Development of reading, writing, listening and speaking skills. Review and use of grammar. Comprehension of the role of culture in communicating and in understanding cultural differences. Study of authentic materials in Spanish. Not recommended for native speakers of Spanish.
Prerequisite(s): SPAN 2106
Pathway Concept Area(s): 1F Discourse Foundational, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3125 - Spanish for Oral Proficiency (3 credits)
For acquisition of measured levels of proficiency in speaking and understanding spoken Spanish. Content-based instruction in small groups. 3125: to achieve an oral proficiency rating comparable to Intermediate-high on the American Council on the Teaching of Foreign Languages Oral Proficiency Interview (ACTFL-OPI) or S-1+ on the Foreign Service Institute (FSI) scale. 3126: to achieve an oral proficiency rating comparable to Advanced on the (ACTFL-OPI) or a 2 on the FSI scale. Admission by oral exam.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3126 - Spanish for Oral Proficiency (3 credits)
For acquisition of measured levels of proficiency in speaking and understanding spoken Spanish. Content-based instruction in small groups. 3125: to achieve an oral proficiency rating comparable to Intermediate-high on the American Council on the Teaching of Foreign Languages Oral Proficiency Interview (ACTFL-OPI) or S-1+ on the Foreign Service Institute (FSI) scale. 3126: to achieve an oral proficiency rating comparable to Advanced on the (ACTFL-OPI) or a 2 on the FSI scale. Admission by oral exam.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3154 - Spanish for the Natural Sciences (3 credits)
Knowledge of the Spanish language and its cultures to the natural sciences. Study of scientific materials in Spanish. Practice in communication skills through contextualized use of specific vocabulary, idiomatic expressions, grammar structures and cultural practices in real-world situations. Discussion on scientific topics and debates of the Spanish-speaking world. Comparison of the practices and world views of scientists and clinicians in Hispanic and English-speaking countries. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 1A Discourse Advanced, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3224 - Topics in Latinx Culture (3 credits)
Transdisciplinary examination of fundamental concepts related to Latinx/Hispanic culture—among these, cultural hybridity, multilingualism, civil rights, activism, social justice, and marginalization—in variable cultural, historical, political, and geographical contexts. Study of one or more of the following: narrative, essay, drama, poetry, popular media and works of art. Emphasis on the interpretation and analysis of texts and other creative artifacts to understand Latinx culture's intersections with race, ethnicity, gender, sexuality, class, religion, indigeneity, nationality, disability, etc., challenges of diversity and inclusion, and the sociopolitical issues affecting those who identify as Latinx or Hispanic in the United States. Course may be repeated, with different topics, for a maximum of 6 credits. Taught in English.
Prerequisite(s): SPAN 2764 or SPAN 3106
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

SPAN 3304 - Introduction to Hispanic Literature (3 credits)
Introduction to Hispanic literary genres (poetry, narrative, essay, and drama) through analysis and discussion of the main historical, political and cultural concepts of Hispanic Literature from Spain and Latin America from the Middle Ages to the present. Identification of issues of diversity (race, gender, and social class) in the Spanish-speaking world. Methods, terminology, and practice of literary analysis. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3404 - Early Peninsular Culture and Literature (3 credits)
Examination of the culture and literature of Spain from the 9th century to the 18th century, including historical documents, narrative, poetry, theatre, and art. Emphasis on the interpretation and analysis of cultural texts in the context of key historical and political events. Examination of multiple levels of cultural identity, including advantages and challenges of diversity, found within the Iberian peninsula during that time frame. Reflection on similarities of intercultural exchange in medieval Spain and our own age. Taught in Spanish.
Prerequisite(s): SPAN 3304
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3414 - Modern Peninsular Culture and Literature (3 credits)
Examination of the culture and literature of Spain from 1700 to the present, including narrative, poetry, theatre, film, and art. Emphasis on the interpretation and analysis of cultural texts in the context of key historical and political events, in order to understand shifting concepts of cultural identity and advantages and challenges of diversity. Taught in Spanish.
Prerequisite(s): SPAN 3304
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3444 - Early Spanish-American Culture and Literature (3 credits)
Exploration of the cultural development of Spanish America from the pre-Hispanic era, the Encounter, the three hundred years of colonialism to Independence from Spain and nation- building in the 19th century; analysis of canonical as well as non-canonical texts, including historical texts, narrative, poetry, drama, art, architecture and music; interpret intercultural experiences from ones own worldview. Taught in Spanish.
Prerequisite(s): SPAN 3304
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3464 - Topics in Modern Mexican and Central American Cultures (3 credits)
Interdisciplinary exploration of concepts of Mexican and Central American cultures from the post-independence periods to the present. Analysis of cultural production within the historical, political, social, and intellectual contexts in which they were created. Interpretation of canonical and non-canonical texts, including historical texts, narratives, poetry, drama, film, art, architecture, and music. Analysis of current events and identification of changes brought on by globalization from an intercultural point of view. Articulation of advantages and challenges of cultural diversity. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3474 - Modern Spanish-Caribbean Culture and Literature (3 credits)
Exploration of the civilization, culture, and literature of the Spanish Carribbean, spanning the 19th century post- independence period to the present; analysis of literary and cultural texts within the historical, political, and social context in which they were created; interpretation of canonical as well as non-canonical texts, including historical texts, narrative, poetry, drama, film, art, architecture, and music; analysis of current events and identification of changes brought on by globalization; articulation of the advantages and challenges of cultural diversity. Taught in Spanish.
Prerequisite(s): SPAN 3304
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3484 - Modern Andean and Southern Cone Culture and Literature (3 credits)
Exploration of the civilization, culture and literature of the Andean and Southern Cone regions of South America, spanning the 19th century post-independence period to the present; examination of literary and cultural texts with the historical, political, and social context in which they were created; study of canonical as well as non-canonical texts, from both high and popular culture, including historical texts, narrative, poetry, drama, film, art, architecture, and music; analysis of current events and identification of changes brought on by globalization; articulation of the advantages and challenges of cultural diversity. Tuaght in Spanish.
Prerequisite(s): SPAN 3304
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3494 - Introduction to Hispanic Linguistics (3 credits)
Introduction to fundamental concepts of Hispanic linguistics. Examination of linguistic properties in Spanish (e.g.,morphology, syntax, and semantics/pragmatics). Exploration of context-appropriate language use. Interpret experiences with language from different perspectives. Examination of complexities of cross-cultural communication. In Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3514 - Spanish for Medical Professions (3 credits)
Specialized course applying knowledge of the Spanish language and its cultures to the medical professions. Contextualized use of specific vocabulary, idiomatic expressions, grammar structures, and cultural practices in real-world situations and written formats. Cross-cultural discussions on healthcare issues in the Hispanic world. Analysis of medical topics related to Spanish-speaking populations in a global context. Examination of Hispanic cultural artifacts such as film and narrative that explore issues of cultural and linguistic diversity in the medical professions. Analysis of political and cultural history of the Hispanic and Latino populations in the US. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3524 - Introduction to Spanish Translation (3 credits)
Introduction to the translation of various types of texts, such as literature, business correspondence, commercial advertising, and legal documents. Includes translation from English to Spanish and from Spanish to English, as well as a thorough review of Spanish grammar and idiomatic language. Taught in Spanish.
Prerequisite(s): SPAN 3106
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3534 - Spanish for Business Professions (3 credits)
Specialized course applying knowledge of the Spanish language and its cultures to the business professions. Contextualized use of specific vocabulary, idiomatic expressions, grammar structures, and cultural practices in real-world situations and written formats such as cover letters and business memos. Discussion on cultures of business in the Hispanic world. Analysis of business topics related to Spanish-speaking populations in a global context. Examination of Hispanic cultural artifacts such as film and narrative that explore issues of cultural and linguistic diversity in the business professions. Analysis of economic and political history of Spanish-speaking populations. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3544 - Sounds of Spanish (3 credits)
Provides students with an overview of phonetics and phonology in Spanish and familiarizes students with the articulatory descriptions of vowels and consonants of Spanish. Compares and contrasts the sound systems of Spanish and English. Analyzes the sound system using theories and methods in linguistics. Explores the social meaning of the phonetic variation that exists throughout the Spanish-speaking world. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3554 - Teaching Spanish (3 credits)
Examination of theories and approaches to second-language and heritage-language learning and teaching. Discussion of technological resources and authentic materials that promote language teaching and individual differences that affect language learning. Analysis of pedagogical materials for the Spanish-language classroom. Hands-on experience with lesson-plan design for teaching Spanish. Taught in Spanish.
Prerequisite(s): SPAN 3106
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3564 - Community through Service: Latino NRV (3 credits)
A service-learning course in Spanish. Exploration of Latino cultures in the U.S.; weekly service with members of local Latino communities who have requested help; reflection on community work and student citizenship; exploration of cultural factors involved in the construction of community, including the challenges of immigration, multiculturalism, and multilingualism within the U.S.; analysis of literary readings, films, and works of art from U.S. Latino communities; discussion of readings on Hispanic migrations and border studies, as well as articles on social privilege, service-learning, education, health care, language, and language learning. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3574 - Spanish for Legal Professions (3 credits)
Specialized course applying knowledge of the Spanish language and its cultures to the legal professions. Contextualized use of specific vocabulary, idiomatic expressions, grammar structures, and cultural practices in real-world situations and written formats. Cross-cultural discussions on legal issues in the Hispanic world. Analysis of legal topics and concepts related to Spanish-speaking populations in a global context. Examination of Hispanic cultural artifacts such as film and narrative that explore issues of cultural, ethical, and linguistic diversity in the legal professions. Analysis of political and cultural history of the Hispanic and Latino populations in the US. Taught in Spanish.
Prerequisite(s): SPAN 3106
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 4104 - Advanced Grammar and Style (3 credits)
Analysis of and practice with advanced grammatical and stylistic concepts, including idiomatic and colloquial usage. Intended to help advanced students achieve high levels of proficiency in writing and speaking Spanish.
Prerequisite(s): SPAN 3106
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 4114 - Topics in Spanish Linguistics (3 credits)
Variable content course that surveys linguistic concepts and methods as related to the Spanish language. Topics may include the study of the phonology, morphology, syntax, and semantics of Spanish; the pedagogical application of these language systems; the psychological and social context of language; and the development of Spanish from its origins to its modern form. May be repeated for credit with different content.
Prerequisite(s): SPAN 3494 or SPAN 3544
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 4124 - Spanish Translation: Theory and Technique (3 credits)
Introduction to translation theories and application of these theories to different types of texts, including literature, business correspondence, commercial advertising, and legal documents. Includes translation from English to Spanish and from Spanish to English, as well as a thorough review of Spanish grammar and idiomatic language.
Prerequisite(s): SPAN 3524
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 4304 - Topics in Early Modern Literature and Culture (3 credits)
Variable topics in Hispanic and/or Latin American literature and culture of the Early Modern period. Texts and/or cultural artifacts selected for aesthetic value, historical importance and thematic significance. Related scholarly criticism representing a variety of approaches. Emphasis on historical, social and cultural context. May be repeated twice for credit with different content. Taught in Spanish.
Prerequisite(s): SPAN 3404 or SPAN 3414 or SPAN 3444 or SPAN 3464 or SPAN 3474 or SPAN 3484
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

SPAN 4314 - Studies in 18th and 19th Century Literature (3 credits)
A variable content course devoted to Hispanic literature of the 18th and 19th centuries. The texts selected are studied not only for their aesthetic value but also in terms of their historical and cultural significance. May be taken twice for credit with different content. Taught alternate years. I
Prerequisite(s): SPAN 3414 or SPAN 3404 or SPAN 3444 or SPAN 3464 or SPAN 3474 or SPAN 3484
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 4324 - Studies in 20th and 21st Century Hispanic Literature (3 credits)
A variable content course devoted to Hispanic literature of the 20th and 21st centuries. Offers an in-depth literary exploration of a significant historical period, cultural movement, theme, or genre. Focuses on literary and cultural analysis from a variety of perspectives. Practices advanced Spanish oral and writing skills. Examines texts that have aesthetic value and historical and cultural significance. May be taken up to three times for credit with different content.
Prerequisite(s): SPAN 3404 or SPAN 3414 or SPAN 3444 or SPAN 3464 or SPAN 3474 or SPAN 3484
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 3 credit hours

SPAN 4334 - Special Topics in Hispanic Life, Literature, and Language (3 credits)
Broad central themes of Hispanic culture as manifested in creative and historical literature, music, art, film, etc., or in language, such as the history of the Spanish language, translation techniques, or the staging of dramatic works in Spanish. Historical and/or national boundaries are crossed whenever the nature of the topic permits. May be repeated for credit with different content. Taught alternate years.
Prerequisite(s): SPAN 3404 or SPAN 3414 or SPAN 3444 or SPAN 3464 or SPAN 3474 or SPAN 3484
Instructional Contact Hours: (3 Lec, 3 Crd)

SPAN 4344 - Hispanic Literature and the Representation of History (3 credits)
Focuses on the relationship between history and literature in the Hispanic world through an interdisciplinary lens. Examines different geographical regions of the Hispanic world, theoretical readings, and the ways that authors have used various literary styles to portray, re-write, subvert, and even contradict their countries official history. Examines texts that have aesthetic value and historical and cultural significance. Practices advanced Spanish oral and writing skills. This variable topics course may be repeated up to three times if topics are different.
Prerequisite(s): SPAN 3404 or SPAN 3414 or SPAN 3444 or SPAN 3464 or SPAN 3474 or SPAN 3484
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

SPAN 4794 - Senior Tutorial in Spanish Studies (1 credit)
Individual or small group sessions which give the student the opportunity to hone special language skills, with a focus on post-graduation application of these skills. May concentrate on areas such as technical or business language, linguistics, translation, interpreting, creative writing, specialized literary, or cultural studies. May be taken twice for credit with different content. Must be pre-arranged three weeks before end of previous semester. One 4000 level Spanish course required. Restricted to Seniors. Restricted to Spanish majors. Consent of Spanish Section required.
Instructional Contact Hours: (1 Lec, 1 Crd)

SPAN 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 4964H - Field Study (1-19 credits)
Honors
Instructional Contact Hours: Variable credit course

SPAN 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

SPAN 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Statistics (STAT)

STAT 1004 - The First Year Experience in Learning from Data (2 credits)
Introduction to the field of statistics and aspects of college life for first year students. Topics included: history of the statistics; key roles of statisticians in field, such as actuarial sciences, pharmaceutical, medical, and bioinformatics industries, governmental agencies, academia; fundamental principles of statistical fields of study and applications; exploring data sets; and aspects of college life for first-year students.
Instructional Contact Hours: (2 Lec, 2 Crd)

STAT 1014 - Data in Our Lives (3 credits)
Develop and practice the process of thinking critically with data in the context of real world problems. Import, manage, summarize, and visualize data using programmable, statistical software. Make data discoveries, make decisions, generate hypotheses, and/or communicate findings in data. Consider laws of probability and personal biases to weigh decisions. Recognize ethical issues and vulnerabilities in analyses when learning from data and extrapolating to large populations.
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 2004 - Introductory Statistics (3 credits)
Fundamental concepts and methods of statistics with emphasis on interpretation of statistical arguments and statistical reasoning. Using modern, accessible statistical software and technology, an introduction to design of experiments (including data collection), data analysis, data visualization, correlation and regression, concepts of probability theory, sampling errors, confidence intervals, and hypothesis tests. Include real-world applications to develop problem-solving skills and consider ethical implications within the context of learning from data. No credit will be given for 2004 if taken with or after any other statistics course, except STAT 2984.
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 2094 - Basic R for Statistics (1 credit)
Introduction to R/RStudio programming techniques with an emphasis on basic statistical visualizations, descriptive and summary statistics, and elementary inferential statistics. Topics include data types, data structures, importing/exporting, and manipulating datasets, functions, packages, and RMarkdown.
Instructional Contact Hours: (1 Lec, 1 Crd)

STAT 2274 - Basic Python For Statistics (1 credit)
Use of Python code and libraries (SciPy and NumPy) to support basic statistical tasks, create graphical displays, and perform statistical inference and hypothesis tests to evaluate datasets. Use of editors and AI to generate Python code.
Instructional Contact Hours: (1 Lec, 1 Crd)

STAT 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 2974H - Independent Study (1-19 credits)
Honors section.
Instructional Contact Hours: Variable credit course

STAT 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 2984O - Special Study (1-19 credits)
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv.
Instructional Contact Hours: Variable credit course

STAT 3005 - Statistical Methods (3 credits)
3005: Basic statistical methodology: exploratory data techniques, estimation, inference, comparative analysis by parametric, nonparametric, and robust procedures. Analysis of variance (one-way), multiple comparisons, and categorical data. Includes real-world examples. Develops problem-solving skills and ethical reasoning within the context of learning from data. 3006: Analysis of variance, simple and multiple, linear and nonlinear regression, analysis of covariance. Use of MINITAB. STAT 3005 duplicates STAT 3615 and STAT 4604, only one may be taken for credit. STAT 3006 duplicates STAT 3616, STAT 4604 and STAT 4706, only one may be taken for credit.
Prerequisite(s): MATH 1225
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3006 - Statistical Methods (3 credits)
3005: Basic statistical methodology: exploratory data techniques, estimation, inference, comparative analysis by parametric, nonparametric, and robust procedures. Analysis of variance (one-way), multiple comparisons, and categorical data. Includes real-world examples. Develops problem-solving skills and ethical reasoning within the context of learning from data. 3006: Analysis of variance, simple and multiple, linear and nonlinear regression, analysis of covariance. Use of MINITAB. STAT 3005 duplicates STAT 3615 and STAT 4604, only one may be taken for credit. STAT 3006 duplicates STAT 3616, STAT 4604 and STAT 4706, only one may be taken for credit.
Prerequisite(s): STAT 3005 or STAT 4705 or CMDA 2005
Corequisite(s): MATH 1206 or MATH 1226 for 3005.
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3094 - SAS Programming (3 credits)
Introduction to basic programming techniques: creating DATA and PROC statements, libraries, functions, programming syntax and formats. Other topics include loops, SAS Macros and PROC IML. Emphasis is placed on using these tools for statistical analyses. The pre-requisite may be substituted for an equivalent course.
Prerequisite(s): STAT 3005 or CMDA 2006
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3104 - Probability and Distributions (3 credits)
Probability theory, including set theoretic and combinatorial concepts; in-depth treatment of discrete random variables and distributions, with some introduction to continuous random variables; introduction to estimation and hypothesis testing.
Prerequisite(s): (MATH 1226 or MATH 1026) and (STAT 3005 or STAT 3615 or STAT 4705 or CMDA 2005)
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3204 - Data Visualization (3 credits)
Using quantitative and qualitative thinking to develop a working knowledge of data visualization considerations, methods and techniques that lead to: understanding the audience(s); creating ethical data stories; data visualization as a method of storytelling; ethical and appropriate data exploration, manipulation, and cleaning; design considerations; types of visualizations; tools and resources for creating visualizations.
Prerequisite(s): (STAT 1014 or STAT 2004 or STAT 3005 or STAT 3604 or STAT 3615 or STAT 4705 or STAT 4706 or STAT 4714 or CMDA 2005 or CMDA 2014) and (COMM 1016 or ENGL 1105)
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3274 - Introduction to Sports Analytics Research (3 credits)
Introduction to sports analytics, sources of sports analytics data and data collection methods, visualization techniques, game performance statistics, inferential statistics and predictive modeling techniques for sports data. Role and applications of data analytics in the sports industry.
Prerequisite(s): CMDA 2006 or STAT 3006
Corequisite(s): CMDA 3654 or CS 3654 or STAT 3654.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CMDA 3274

STAT 3504 - Nonparametric Statistics (3 credits)
Statistical methodology based on ranks, empirical distributions, and runs. One and two sample tests, ANOVA, correlation, goodness of fit, and rank regression, R-estimates and confidence intervals. Comparisons with classical parametric methods. Emphasis on assumptions and interpretation.
Prerequisite(s): STAT 3006 or STAT 3616 or STAT 4106 or STAT 4604 or STAT 4706 or CMDA 2006
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3604 - Statistics for Social Science (3 credits)
Statistical methods for nominal, ordinal, and interval levels of measurement. Topics include descriptive statistics, elements of probability, discrete and continuous distributions, one and two sample tests, measures of association. Emphasis on comparison of methods and interpretations at different measurement levels. Includes real-world applications to develop problem-solving skills and ethical reasoning within the context of learning from data.
Prerequisite(s): MATH 1014 or MATH 1025 or MATH 1214 or MATH 1225 or MATH 1524
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3615 - Biological Statistics (3 credits)
Descriptive and inferential statistics in a biological context with real-world examples. In analytical contexts, develops problem-solving skills and ethical reasoning. 3615: Fundamental principles, one- and two-sample parametric inference, simple linear regression, frequency data. 3616: One- and two-way ANOVA, multiple regression, correlation, nonparametrics, using a computer package. STAT 3615 partially duplicates STAT 3005 and STAT 4604, only one may be taken for credit. STAT 3616 partially duplicates STAT 3006, 4604 and 4706, only one may be taken for credit.
Prerequisite(s): MATH 1225 or MATH 1025 or MATH 1524 or ISC 1105
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3616 - Biological Statistics (3 credits)
Descriptive and inferential statistics in a biological context with real-world examples. In analytical contexts, develops problem-solving skills and ethical reasoning. 3615: Fundamental principles, one- and two-sample parametric inference, simple linear regression, frequency data. 3616: One- and two-way ANOVA, multiple regression, correlation, nonparametrics, using a computer package. STAT 3615 partially duplicates STAT 3005 and STAT 4604, only one may be taken for credit. STAT 3616 partially duplicates STAT 3006, 4604 and 4706, only one may be taken for credit.
Prerequisite(s): STAT 3615
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 3654 - Introductory Data Analytics and Visualization (3 credits)
Basic principles and techniques in data analytics; methods for the collection of, storing, accessing, and manipulating standard-size and large datasets; data visualization; and identifying sources of bias.
Prerequisite(s): (CS 1114 or CS 1044 or CS 1054 or CS 1064) and (MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005) and (STAT 3006 or STAT 4105 or STAT 4705 or STAT 4714 or CMDA 2006)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CMDA 3654, CS 3654

STAT 3704 - Statistics for Engineering Applications (2 credits)
Introduction to statistical methodology with emphasis on engineering experimentation: probability distributions, estimation, hypothesis testing, regression, and analysis of variance. Only one of the courses 3704, 4604, 4705, and 4714 may be taken for credit.
Prerequisite(s): MATH 2224 or MATH 2224H or MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005
Instructional Contact Hours: (2 Lec, 2 Crd)

STAT 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 4004 - Methods of Statistical Computing (3 credits)
Computationally intensive computer methods used in statistical analyses. Statistical univariate and multivariate graphics; resampling methods including bootstrap estimation and hypothesis testing and simulations; classification and regression trees; scatterplot smoothing and splines.
Prerequisite(s): STAT 4105 and STAT 4214
Instructional Contact Hours: (4 Lec, 3 Crd)

STAT 4024 - Communication in Statistical Collaborations (3 credits)
Theory and examples of effective communication in the context of statistical collaborations. Practice developing the communication skills necessary to be effective statisticians using peer feedback and self-reflection. Topics include helping scientists answer their research questions, writing about and presenting statistical concepts to a non-statistical audience, and managing an effective statistical collaboration meeting. Senior standing in the Department of Statistics.
Prerequisite(s): STAT 4214 and STAT 4204
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4094 - Introduction to Programming in R (1 credit)
Introduction to R programming techniques with an emphasis on statistical analyses. Topics include: data objects, loops, importing/exporting datasets, graphics, functions, t-tests, ANOVA, linear regression, nonparametric tests, and logistic regression.
Prerequisite(s): STAT 3615 or STAT 3005
Instructional Contact Hours: (1 Lec, 1 Crd)

STAT 4105 - Theoretical Statistics (3 credits)
4105: Probability theory, counting techniques, conditional probability; random variables, moments; moment generating functions; multivariate distributions; transformations of random variables; order statistics. 4106: Convergence of sequences of random variables; central limit theorem; methods of estimation; hypothesis testing; linear models; analysis of variance. STAT 4105 partially duplicates STAT 4705, STAT 4714, and STAT 4724, only one may be taken for credit.
Prerequisite(s): (MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005) and STAT 3104
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4106 - Theoretical Statistics (3 credits)
4105: Probability theory, counting techniques, conditional probability; random variables, moments; moment generating functions; multivariate distributions; transformations of random variables; order statistics. 4106: Convergence of sequences of random variables; central limit theorem; methods of estimation; hypothesis testing; linear models; analysis of variance. STAT 4105 partially duplicates STAT 4705, STAT 4714, and STAT 4724, only one may be taken for credit.
Prerequisite(s): STAT 4105
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4204 - Experimental Designs (3 credits)
Fundamental principles of designing and analyzing experiments with application to problems in various subject matter areas. Discussion of completely randomized, randomized complete block, and Latin square designs, analysis of covariance, split--plot designs, factorial and fractional designs, incomplete block designs.
Prerequisite(s): STAT 3006 or STAT 3616 or STAT 4106 or STAT 4706 or STAT 5605 or STAT 5615 or CMDA 2006
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4214 - Methods of Regression Analysis (3 credits)
Multiple regression including variable selection procedures; detection and effects of multicollinearity; identification and effects of influential observations; residual analysis; use of transformations. Non-linear regression, the use of indicator variables, and logistic regression. Use of SAS.
Prerequisite(s): STAT 3006 or STAT 3616 or STAT 4106 or STAT 4706 or STAT 5606 or STAT 5616 or CMDA 2006
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4274 - Sports Analytics Statistical Research (3 credits)
Statistical analysis of sports data. Game performance statistics and expected scores. Analysis of player performance, player tracking, team performance, and sports betting. Bayesian methods and prediction models applied to sports data. Decision-making. Assessing sports analytics research and literature.
Prerequisite(s): (STAT 4214 and STAT 4444) or (CMDA 4654 or CS 4654 or STAT 4654) or (STAT 3274 or CMDA 3274)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CMDA 4274

STAT 4364 - Introduction to Statistical Genomics (3 credits)
Statistical methods for bioinformatics and genetic studies, with an emphasis on statistical analysis, assumptions, and problem-solving. Topics include: commonly used statistical methods for gene identification, association mapping and other related problems. Focus on statistical tools for gene expression studies and association studies, multiple comparison procedures, likelihood inference and preparation for advanced study in the areas of bioinformatics and statistical genetics.
Prerequisite(s): (MATH 2224 or MATH 2224H or MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005) and (STAT 3104 or STAT 4105 or STAT 4705 or CMDA 2006) and (STAT 3006 or STAT 3616 or STAT 4706 or CMDA 2006)
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4444 - Applied Bayesian Statistics (3 credits)
Introduction to Bayesian methodology with emphasis on applied statistical problems: data displaying, prior distribution elicitation, posterior analysis, models for proportions, means and regression.
Prerequisite(s): (MATH 2224 or MATH 2224H or MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005) and (STAT 3104 or STAT 4105 or STAT 4705 or CMDA 2006) and STAT 3006 or STAT 3616 or STAT 4706
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4504 - Applied Multivariate Analysis (3 credits)
Non-mathematical study of multivariate analysis. Multivariate analogs of univariate test and estimation procedures. Simultaneous inference procedures. Multivariate analysis of variance, repeated measures, inference for dispersion and association parameters, principal components analysis, discriminate analysis, cluster analysis. Use of SAS.
Prerequisite(s): STAT 3006 or STAT 4706 or CMDA 2006 or STAT 3616
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4514 - Introduction to Categorical Data Analysis (3 credits)
Statistical approaches to analyze categorical data. Probability computation and distribution specification, interval estimation and hypothesis testing, formulating and fitting generalized linear models including logistic and Poisson regression, algorithms used for model fitting, variable selection, and classification trees and supervised learning.
Prerequisite(s): STAT 3006 or STAT 3616 or STAT 4106 or STAT 4706
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4524 - Sample Survey Methods (3 credits)
Statistical methods for the design and analysis of survey sampling. Fundamental survey designs. Methods of randomization specific to various survey designs. Estimation of population means, proportions, totals, variances, and mean squared errors. Design of questionnaires and organization of a survey.
Prerequisite(s): STAT 3006 or STAT 3616 or STAT 4106 or STAT 4706 or STAT 5606 or STAT 5616
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4534 - Applied Statistical Time Series Analysis (3 credits)
Applied course in time series analysis methods. Topics include regression analysis, detecting and address autocorrelation, modeling seasonal or cyclical trends, creating stationary time series, smoothing techniques, forecasting and forecast errors, and fitting autoregressive integrated moving average models.
Prerequisite(s): STAT 3006 or STAT 4104 or STAT 4706 or STAT 4714 or STAT 3616 or BIT 2406 or CMDA 2006
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4584 - Advanced Calculus for Statistics (3 credits)
Introduction to those topics in advanced calculus and linear algebra needed by statistics majors. Infinite sequences and series. Orthogonal matrices, projections, quadratic forms. Extrema of functions of several variables. Multiple integrals, including convolution and nonlinear coordinate changes.
Prerequisite(s): (MATH 1114 or MATH 2114 or MATH 2114H or MATH 2405H) and (MATH 1225) and (MATH 1226) and (MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005)
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4604 - Statistical Methods for Engineers (3 credits)
Introduction to statistical methodology with emphasis on engineering applications: probability distributions, estimation, hypothesis testing, regression, analysis of variance, quality control. Only one of the courses 4604, 4705, and 4714 may be taken for credit. STAT 4604 partially duplicates STAT 3005, STAT 3615, STAT 3006, STAT 3616 and STAT 4706. Only one may be taken for credit.
Prerequisite(s): MATH 1226
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4654 - Intermediate Data Analytics and Machine Learning (3 credits)
A technical analytics course. Covers supervised and unsupervised learning strategies, including regression, generalized linear models, regularization, dimension reduction methods, tree-based methods for classification, and clustering. Upper-level analytical methods shown in practice: e.g., advanced naive Bayes and neural networks.
Prerequisite(s): (STAT 3654 or CMDA 3654 or CS 3654) and (CMDA 2006 or STAT 3104 or STAT 4106 or STAT 4706)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CMDA 4654, CS 4654

STAT 4664 - Computational Intensive Stochastic Modleing (3 credits)
Stochastic modeling methods with an emphasis in computing are taught. Select concepts from the classical and Bayesian paradigms are explored to provide multiple perspectives for how to learn from complex, datasets. There is particular focus on nested, spatial, and time series models.
Prerequisite(s): (STAT 4106 or CMDA 3605) and (CS 1114 or CS 1064 or STAT 2005)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CMDA 4664

STAT 4705 - Probability and Statistics for Engineers (3 credits)
Basic concepts of probability and statistics with emphasis on engineering applications. 4705: Probability, random variables, sampling distributions, estimation, hypothesis testing, simple linear regression correlation, one-way analysis of variance. 4706: Multiple regression, analysis of variance, factorial and fractional experiments. Only one of the courses 3704, 4604, 4705, 4714, and 4724 may be taken for credit.
Prerequisite(s): MATH 2224 or MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4706 - Probability and Statistics for Engineers (3 credits)
Basic concepts of probability and statistics with emphasis on engineering applications. 4705: Probability, random variables, sampling distributions, estimation, hypothesis testing, simple linear regression correlation, one-way analysis of variance. 4706: Multiple regression, analysis of variance, factorial and fractional experiments. Only one of the courses 3704, 4604, 4705, and 4714 may be taken for credit.
Prerequisite(s): STAT 4705 or STAT 4105 or ISE 2024
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4714 - Probability and Statistics for Electrical Engineers (3 credits)
Introduction to the concepts of probability, random variables, estimation, hypothesis testing, regression, and analysis of variance with emphasis on application in electrical engineering. Only one of the courses 3704, 4604, 4705, 4714 and 4724 may be taken for credit.
Prerequisite(s): MATH 2224 or MATH 2204 or MATH 2204H or MATH 2406H or CMDA 2005
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4744 - Deep Learning (3 credits)
Introduction to deep learning, including algorithms, theoretical motivations, and implementation in practice. Basic neural network architectures and optimizations. Multilayer perceptrons, backpropagation, automatic differentiation, and stochastic gradient descent. Convolutional neural networks, recurrent neural networks and the attention mechanism. Generative models, variational autoencoders, and generative adversarial networks. Reinforcement learning, Q learning and design of simple AI systems. Python programming language. Emphasis on efficient implementation, optimization, and scalability. Creation of deep learning models in the context of different types of real applications such as image classification and language processing.
Prerequisite(s): (STAT 3104 or CMDA 2006) and (STAT 4214 or CMDA 4654 or STAT 4654 or CS 4654)
Instructional Contact Hours: (3 Lec, 3 Crd)

STAT 4804 - Elementary Econometrics (3 credits)
Economic applications of mathematical and statistical techniques: regression, estimators, hypothesis testing, lagged variables, discrete variables, violations of assumptions, simultaneous equations.
Prerequisite(s): AAEC 1005 and (STAT 3615 or STAT 3005 or STAT 3604 or BIT 2405)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AAEC 4804

STAT 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 4974H - Independent Study (1-19 credits)
Honors section.
Instructional Contact Hours: Variable credit course

STAT 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

STAT 4994H - Undergraduate Research (1-19 credits)
Honors section.
Instructional Contact Hours: Variable credit course

Summer Academy (SUMA)

SUMA 1004 - Summer Academy Placeholder (6 credits)
Instructional Contact Hours: (6 Lec, 6 Crd)

Sustainable Biomaterials (SBIO)

SBIO 1004 - Explorations in Sustainable Biomaterials (1 credit)
Topics and related career paths in Sustainable Biomaterials. Resources promoting academic success, personal improvement, and professional development. Problem solving, inquiry, teamwork, and oral, written, and visual communication applied to sustainable biomaterials issues.
Instructional Contact Hours: (1 Lec, 1 Crd)

SBIO 1014 - Introduction to Packaging Systems and Design (1 credit)
Information and skills necessary to succeed in the Packaging Systems and Design program; use of the library resources and use of intellectual property of others; laboratory reports, presentation skills, safe laboratory practices, and resume and packaging career portfolio.
Instructional Contact Hours: (1 Lec, 1 Crd)

SBIO 1024 - Systems Thinking in a Bioeconomy (3 credits)
Fundamental principles of a systems-thinking approach in evaluating complex systems related to a bioeconomy, which includes continued use and reuse of materials, chemical, and energy derived from natural materials within both industrial and natural environments. Systems mindset and frameworks, methodologies, and tools to contribute to discussions on solving complex problems integrating interconnected social, economic, and environmental factors while considering ethics. Case study-based approach to analyze and assess the impacts of conventional and alternative solutions to real-world challenges.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 1114 - A Sustainable Future through Circular Economy (3 credits)
Concepts, principles, and frameworks to understand sustainable production and consumption systems. Critical exploration of the six "R's": Reduce, Reuse, Repair, Refurbish, Remanufacture, and Recycle. Circular economy models for technical and bio-based materials to enable sustainable design. Special emphasis on systems-thinking methods for evaluating alternative/circular system design for sustainable biomaterials. Elements of sustainable biomaterial products and business models that optimize material efficiency and value-retention. Current initiatives by industry and governments to implement sustainable production and consumption practices and policies around the world.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 1234 - Introduction to Wood, Design and Craftmanship (3 credits)
Wood as a material. Introduction to laboratory techniques, wood processing, machining and woodworking, moisture interactions, species characteristics, microscopic techniques, measuring material properties, characteristics of forest products industry, career opportunities.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 2004 - Computer-Aided Design in Packaging (3 credits)
Principles of Computer-Aided Design (CAD) in the packaging industry. Basics of virtual primary package development, computer-aided design of the secondary package, computer-aided optimization of truck loading and palletization. Development of a comprehensive packaging system in a virtual environment.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 2104 - Principles of Packaging (3 credits)
History of packaging, structure of packaging industry, careers in packaging, packaging functions, materials and material properties, prototyping and manufacturing methods, packaging forms and types, distribution packaging, printing and decorating, packaging laws and regulations, sustainability issues, packaging design process.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 2124 - Structure and Properties of Sustainable Biomaterials (3 credits)
Macroscopic and microscopic structure and chemical composition of wood and other biomaterials such as grasses, bamboo, and bagasse. Relationships between anatomical structure and physical/mechanical behavior. Microscopic identification of commercially important biomaterials. Preparation and analysis of microscope slides and scanning electron micrographs.
Prerequisite(s): BIOL 1105 and CHEM 1035
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 2154 - Packaging and Culture (3 credits)
Explore packaging as a fundamental component of human culture. Survey the historical evolution of packaging as material culture and its influence across various domains using fundamental concepts such as cultural diffusion, functionalism, and systems thinking. Topics including the pivotal role of packaging in the transition to agriculture, significance in early legal systems, establishment of weights and measures, contributions to the development of global trade networks, and implications for food security, social institutions, and international conflicts. Identify interconnections in raw material access and cultural factors that influence packaging design, economic systems, trade and world views. Relationship between packaging and human health, equity, and the environment. Historical lessons will be used to analyze contemporary issues and emerging trends to forecast their potential societal impacts.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 2214 - Design Fundamentals for Packaging (3 credits)
Introduction to the foundation of packaging design, visual elements, design principles, and Adobe Illustrator. Basic studio workshop with focuses on packaging design processes, two-dimensional graphic work, and package design projects. Aesthetic judgment and critical thinking skills through practice in packaging design projects and critique. Design Lab/Studio. Course FEE $46.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

SBIO 2224 - Materials and Manufacturing Technology: from Nature to Innovation (3 credits)
Properties and characteristics of biomaterials (mechanical, chemical, thermal, etc.) that influence their production, application, value stream, and sustainability. Case-based approach to assessment and evaluation of basic manufacturing processes and the biomaterials used to make products. Perspectives on how manufacturing infrastructures and economies evolved based on the discovery of materials, from pre-industrial biological and nature-based systems to advanced technical materials used today. Manufacturing technology trends and how they are shaping economic, societal, and environmental impacts in biomaterials and related manufacturing technologies and packaging innovation.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 2314 - Building Information Modeling for Wood-Based Construction (3 credits)
Building information modeling (BIM), computer-aided design (CAD) and the role of BIM and CAD in wood construction. Use of BIM and CAD to improve construction efficiency. Study of REVIT use including building layout, family editor, detailing, schedules, material lists and 3-dimensional rendering. Discussion of construction documentation and plan reading. BIM methods and tools in the design and detailing of residential light-frame, mass timber, and historic buildings.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 2504 - Circular Economy Analytics for Sustainable Systems (3 credits)
Concepts, principles, and framework to understand systems level interactions in linear (cradle-to-grave) and circular (cradle-to-cradle) processes. Problem solving application and practice utilizing computational tools and data analytics. Special emphasis on quantifying and evaluating life-cycle circularity of common products and processes used to meet societys demand. Evaluation of case study results towards the planning of more circular business models in a complex global economy. Risks and ethical issues associated with decision making and policy based on results from computational models. Pre: Precalculus with Transcendental Functions (3 credits)
Prerequisite(s): MATH 1014 or MATH 1025 or MATH 1225 or MATH 1524 or MATH 1535 or MATH 1525
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 2514 - Introduction to Sustainability and Industrial Ecology (3 credits)
Explore fundamental sustainability concepts and industrial ecology principles, navigate the intricate interactions between natural and industrial environments. Discover how nature-based design and innovation inform industrial practices in food, water, transportation, and energy systems and contribute to more sustainable futures. Apply methodologies like Material Flow Analysis, Life Cycle Analysis, and handprint analysis to create decision-making tools for broadening positive impacts. Use data collection, analytics, and accounting techniques to assess conventional and nature-based industrial system performance. Develop innovative solutions to real-world sustainable challenges such as climate resilience, sustained food production, and improved well-being.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 2614 - Introduction to Forest Products Marketing (3 credits)
Study of marketing systems and methods used by North American primary and secondary forest product industries. Emphasis on wood product industries. Marketing of hardwood lumber, softwood lumber, panels, composites, furniture, and paper products. Role of North American industries and markets in world trade of forest products.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 2784 - Global Forest Sustainability (3 credits)
A socio-economic approach to examining the management and use of the worlds forests, enhance knowledge of global forest resources and products, and understand the roles and relationships of key stakeholders.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 2784

SBIO 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 3004 - Sustainable Nature-Based Enterprises (3 credits)
Planning for green and sustainability values for profit and non-profit enterprises that produce and market nature-based products and services (e.g., wood products, wildlife, fish, ecotourism). Understanding current green business environments to foster natural resource-based enterprises.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3005 - Sustainable Packaging Design and Innovation (3 credits)
3005: Principles of sustainability, laboratory packaging evaluation including testing procedures, simulation of physical hazards. Professional communications including laboratory reports and oral presentations. Development of comprehensive packaging evaluation plans. Evaluation of existing packaging systems and improving them from the sustainability perspective. 3006: Application of project management to the packing development process. Apply lean management principles to packing design process. Design of sustainable packaging solutions through industry sponsored projects.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 3006 - Sustainable Packaging Design and Innovation (3 credits)
3005: Principles of sustainability, laboratory packaging evaluation including testing procedures, simulation of physical hazards. Professional communications including laboratory reports and oral presentations. Development of comprehensive packaging evaluation plans. Evaluation of existing packaging systems and improving them from the sustainability perspective. 3006: Application of project management to the packing development process. Apply lean management principles to packing design process. Design of sustainable packaging solutions through industry sponsored projects.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 3014 - Life Cycle Assessment Field Course (1 credit)
Cultivate hands-on experience in defining the scope and system boundaries of life cycle assessment (LCA) to collect data for computational LCA work. Apply the step-by-step LCA methodology to real-world problems to develop a streamlined LCA impact assessment and interpret the results in simple language for discussions with stakeholders. Use feedback from stakeholder discussions to discover how to improve the LCA assessment process. Each class will concentrate on specific types of LCA applications, namely Social LCA, Economic LCA (e.g., Life Cycle Costing), or Environmental LCA (e.g., water or carbon footprinting). Students will have an opportunity to apply their LCA work across selected sectors such as manufacturing, transportation, agricultural and/or forestry, and energy. This course may be repeated two times with different content for a maximum of 3 credit hours.
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

SBIO 3104 - Packaging Design Applications (3 credits)
Design structure of packaging with Adobe Photoshop, Adobe Illustrator, and Esko. Lab course adapting typography, illustration, and photography to create packaging prototypes. Structural integrity and display ethics through practice in packaging design projects and research. Identify the product target market. Design/Lab Studio. Course FEE $78.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

SBIO 3124 - Paper and Paperboard Packaging (3 credits)
Paper and paperboard properties and types. Types and performance of flexible paper packaging, sacks, and wraps. Folding carton design, properties of corrugated fiberboard. Corrugated fiberboard container design and performance. Packaging regulations and hazards of the distribution environment. Printing, labeling and automatic identification methods.
Prerequisite(s): SBIO 2104
Corequisite(s): SBIO 2004
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 3224 - Packaging Distribution Systems (3 credits)
Unit load and parcel supply chains. Principles of operation and design of warehouse distribution and fulfillment centers. Principles of operation and design of shipping and distribution systems. The relation between packaging design, pallet design, and unit load design and the operation of industrial consumer goods supply chain.
Prerequisite(s): SBIO 2104
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3244 - Packaging Machinery and Production Systems (3 credits)
Selection of machinery systems to form, fill and seal packaging operations for multiple package and material categories; analysis of the effect of packaging design and material selection on production efficiency and manufacturing capacity; statistical process control for packaging systems; packaging line design.
Prerequisite(s): SBIO 2104
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3264 - Packaging Supply Chain (3 credits)
Supply chain strategies for packaging. Principles for planning and control of inventory, emphasis on dependent demand and material requirement planning for packaging materials in consumer-packaged goods companies; analysis and management of packaging components procurement, and supply contracts in a globalized environment; financial aspects of logistics and supply chain operations; logistics for returnable packaging containers.
Prerequisite(s): SBIO 3224
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3284 - Packaging Polymers and Production (3 credits)
Introduction to synthetic, natural and sustainable polymer science and engineering as applied to packaging systems. Morphology, rheology, physical and thermal properties, processing methods, and polymerization of traditional, natural and sustainable packaging polymers. Detailed study of relationships among materials, processing, and structural properties through hands-on experience. Both traditional and advanced industrial mass production technology, and global regulation and environmental impact of packaging articles.
Prerequisite(s): SBIO 2104
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

SBIO 3314 - Mechanics of Sustainable Biomaterials and Packaging (4 credits)
Mechanical properties of sustainable biomaterials and packaging materials including concepts of stress, strain, Poissons ratio, orthotropic properties, tension, compression, bending and effects of moisture on mechanical properties. Current issues related to sustainable biomaterial and packaging material use in industry. Standard methods of evaluating important mechanical properties of solid wood, composites, packaging, paperboard and fiber.
Prerequisite(s): PHYS 2205 or PHYS 2305
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

SBIO 3324 - Green Building Systems (3 credits)
Definition of green buildings with specific focus on wood frame single family housing and appropriate green building systems. Site specification, resource efficiency, water efficiency, indoor environmental quality, homeowner education and global impact. Certification in various green building systems.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3334 - Survey of Non-timber Forest Products (3 credits)
In depth study of non-timber forest products of NTFP throughout Appalachia with overseas example - their heritage, uses and markets, economic development opportunities, and sustainable management. Emphasis will be placed on utilization and management issues. Students will gain skills necessary to assess and plan for NTFP business opportunities.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3434 - Chemistry and Conversion of Sustainable Biomaterials (3 credits)
Chemical composition of plant matter. Chemistry and biosynthesis of plant components. Cellulosic biofuel technology. Industrial conversion of woody biomass: pulping, bleaching, papermaking. Industrial conversion of cellulose by chemical processes.
Prerequisite(s): CHEM 1036
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3444 - Sustainable Biomaterials and Bioenergy (3 credits)
Introduction to the structure and properties of natural composites, biobased polymers, and naturally-derived chemicals for materials and energy applications. Chemistry of biomass deconstruction. Industrial applications of biobased polymers, monomers, and chemicals.
Prerequisite(s): (CHEM 2514 or CHEM 2535) and (CHEM 3615 or CHEM 4615)
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3445 - Entrepreneurial Wood Design and Innovation (3 credits)
Concept to market business project applied to design and innovation of wood products. Product design based on consumer need and sustainable use of natural resources. Writing a business plan including, product innovation, resource sustainability, marketing, strategic planning, production planning, technology utilized, packaging and distribution to final market.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 3446 - Entrepreneurial Wood Design and Innovation (3 credits)
Students run teams and experiential learning to organize and deploy the project according to a business plan, measure key performance areas, and manage the quality of the product and process value streams necessary to sustain a profitable business.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 3454 - Society, Sustainability Biomaterials and Energy (3 credits)
Sustainability, raw materials and energy needs of society. Use of sustainable biomaterials to meet societys needs and reduce impact on the environment. Methods to evaluate and certify the sustainability of materials and consumer goods. Carbon sequestration and the use biomass for energy.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3464 - Sustainable Operations Management (3 credits)
Sustainable business management models of renewable-based materials organizations. Application of strategy deployment tools to sustainable bio business strategies. Analysis of financial statements of bio businesses using ratio analysis. Implementation of models and tools to analyze production systems based on cycle time, throughput, and inventory (factory dynamics). Simulation and optimization of manufacturing systems using probability function models. Statistical quality control charts for discrete and continuous variables.
Prerequisite(s): STAT 2004 or STAT 3615 or STAT 3005 or STAT 3604
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3524 - Manufacture of Sustainable Biomaterials for Structures (3 credits)
Principles of manufacturing sustainable biomaterials into primary and secondary products used in construction of buildings, houses and other structures; product demand and environmental impact; raw material quality and volume estimation; industry standards; manufacturing processes; and quality control methods.
Prerequisite(s): SBIO 2124
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 3554 - Sustainable Biomaterials Enterprises (3 credits)
Processes and techniques in manufacturing sustainable biomaterial-based products. Contemporary manufacturing, industrial engineering, and business practices in enterprises. Problem solving, operations management, and effective leadership in discrete products manufacturing and sustainable biomaterials production practices.
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 3964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course
Repeatability: up to 12 credit hours

SBIO 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 3994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 4004 - Senior Seminar in Forest Products Business (2 credits)
Integrated application of principles of management, manufacturing, and marketing as applied to wood-based and related industries. Case analysis, business planning and strategic decision making. Senior standing required.
Prerequisite(s): SBIO 3634
Instructional Contact Hours: (2 Lec, 2 Crd)

SBIO 4024 - Packaging Design for Global Distribution (3 credits)
Understanding, identification, and measurement of hazards in physical distribution including sea, air, and various land transportation, storage methods, and use of sanitation methods. Knowledge, analysis, and selection of sustainable protective packaging materials. Design and analysis of packaging protection against such hazards as shock, vibration compression, and climate. Laboratory testing of shock, vibration and compression, and performance testing of packaging and components. Packaging design in global context.
Prerequisite(s): SBIO 3224
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 4054 - Packaging Systems Design Practicum (3 credits)
Integrated application of principles of packaging design and manufacturing. Design briefs, package development process, structural requirements, manufacturing and distribution plans, target markets and positioning. Senior Standing required.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 4154 - Computer Application Systems in Forest Products (3 credits)
Computer control systems with applications in the forest products industry. Survey of systems for gathering, inputting, conditioning, and managing information. Hardware and software systems for computer control applications. Use of information technologies to integrate control subject to raw material, quality, and market fluctuations. Forest products case studies in data acquisition, data analysis, database management production planning, process control, inventory control, and systems specification. Junior standing is required.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 4164 - Sustainability Performance and Assessments (3 credits)
Data analytics, metrics, and tools essential for navigating sustainability standards, current policies, regulations, and reporting requirements, and their applications in sustainable investment. Explore innovations in sustainable investment strategies, emphasizing the integration of sustainability concepts and industrial ecology principles into business frameworks. Case studies approach to illustrate both successful and unsuccessful sustainability strategies across diverse contexts, such as energy sector, manufacturing, among other, providing insights into practical applications and outcomes.
Prerequisite(s): SBIO 2514
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 4214 - Food and Health Care Packaging (3 credits)
Designed for both current and advanced food and health care packaging. Covering the types of materials and their properties, fabrication, functions, distribution and packaging life cycle for food and health care packaging systems and design. Reviewing recent trends in food and health care packaging systems; sustainable food packaging, medical device packaging, aseptic packaging, package/product interactions, smart active packaging, handling of packages, and modified atmospheric packaging. Exploration to global food and health care packaging standards and compliance, safety issues, and environmental considerations.
Prerequisite(s): SBIO 3124 and SBIO 3284
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

SBIO 4224 - Industrial Packaging Systems (3 credits)
Principles of pallet design including material selection, pallet repair methods and recycling, properties and selection of pallet fasteners. Principles of industrial packaging systems including handheld containers, bulk bins, drums, pails, bags, intermediate bulk containers, flexible intermediate bulk containers. Principles of unit load design including unit load interactions and application of load stabilizers. Principles of reusable packaging systems, shipping laws and regulations.
Prerequisite(s): SBIO 4024 and SBIO 3224
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 4254 - Advanced Manufacturing with Sustainable Biomaterials (3 credits)
Modeling and visualization concepts in computer-aided design (CAD) that facilitate advanced manufacturing technologies. Advanced manufacturing tools such as computer-aided manufacturing (CAM) and computer-aided engineering (CAE) used to study the function, cost, and quality that may result from modeled product concepts. Interactions of model specifications and the materials and manufacturing methods utilized on production results. Data analytics to evaluate tradeoffs in the quality, cost, and sustainability of products utilizing sustainable biomaterials compared to other common materials utilized in manufacturing.
Prerequisite(s): SBIO 2004 and SBIO 3314
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 4314 - Design of Wood Structures (3 credits)
Analysis and design of wood structures comprised of solid wood and/or composite wood products. Evaluation of mechanical properties of wood materials. Design of individual tension, compression and bending members, and wood-steel dowel connections. Lateral loading design of diaphragms and shearwalls.
Prerequisite(s): SBIO 3314 or CEE 3404
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CEM 4314

SBIO 4384 - Biorefinery Science (3 credits)
Biomass utilization as an industrial resource. Biorefinery processes such as cultivation, harvesting, separation, and biomass processing into industrial products compared to the petroleum refinery. Routes to the production of bioenergy, biochemicals, and biofuels. Resource availability and energy consumption, environmental implications of a biorefinery system, public policy influence on development of biorefineries.
Prerequisite(s): SBIO 3434
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 4424 - Polysaccharide Chemistry (3 credits)
Structure, properties, and applications of natural polysaccharides. Natural sources and methods of isolation. Synthetic chemistry and important polysaccharide derivatives. Relation of structure and properties to performance in critical applications including pharmaceuticals, coatings, plastics, rheology control, and films. Conversion by chemical and biochemical methods of polysaccharide biomass to fuels and materials.
Prerequisite(s): CHEM 2536 or CHEM 2566
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CHEM 4424

SBIO 4444 - Plant Polymers & Biocomposites (3 credits)
Evolution of vascular plants and plant polymers in the context of materials science and biocomposites. Anatomical, physical, and mechanical properties of wood, bamboo, and hemp. Polymer science, plant polymer science, surface chemistry, and adhesion science for biocomposites made from wood, bamboo, and hemp. Contemporary adhesives and resins for biocomposites manufacture.
Prerequisite(s): CHEM 2514 or CHEM 2536
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 4514 - Wood Products Industry Studies (1 credit)
Field studies of the processing systems and product manufacturing procedures of various wood products industries.
Prerequisite(s): SBIO 3114
Instructional Contact Hours: (3 Lab, 1 Crd)

SBIO 4624 - Wood Industry Production Operations Management (3 credits)
Study of the operation of wood products organizations. Problems facing these organizations and current management practices used to address these problems. Investigation of the design and implementation of wood industry management improvement efforts. How organizations and groups design, implement, and evaluate improvements efforts. The application of techniques to production planning, financial management, inventory management, quality, human resources management, technology, performance measures, and assessment. Includes case studies of wood products manufacturing companies.
Prerequisite(s): SBIO 3544
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SBIO 4634 - Forest Products Business Management (3 credits)
This course will describe the allocation of resources within a forest products business. Students will determine how to allocate natural, human and financial resources to maximize profitability within the organization. How allocation decisions affect all stakeholders of the organization will be demonstrated and this allocations impact upon strategic planning will be discussed. The course will also show the impact of the external business environment on management decisions.
Prerequisite(s): SBIO 1234 and SBIO 2614 and SBIO 3114
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 4714 - Performance of Sustainable Biomaterials in Buildings (3 credits)
The use of manufactured sustainable biomaterials in the construction of buildings; interactions of building code requirements, sustainable biomaterials and bio-composite materials as components within houses; durability, deterioration, controlling moisture infiltration, preservatives and proper selection of materials, historic wood buildings, effectiveness and efficiency of sustainable biomaterial building systems; serviceability issues in buildings with sustainable biomaterials.
Prerequisite(s): SBIO 2124
Instructional Contact Hours: (3 Lec, 3 Crd)

SBIO 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SBIO 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Systems Biology (SYSB)

SYSB 2024 - Fundamentals of Systems Biology (3 credits)
Introduction to fundamental concepts of systems biology: biological systems, molecular regulatory networks, modeling approaches in systems biology with case studies, high-throughput data generation and bioinformatics data processing.
Prerequisite(s): MATH 1225 and (BIOL 1105 or ISC 1106H) and (CHEM 1036 or CHEM 1056 or CHEM 1056H or ISC 1106H)
Instructional Contact Hours: (3 Lec, 3 Crd)

SYSB 2034 - Mathematical Methods in Systems Biology (3 credits)
Fundamental mathematical methods in systems biology, including differential equations, graph theory, Boolean mathematics, and concepts of probability. Applications of these methods to developing models of biological regulatory networks and dynamical systems. Software tools for Systems Biology.
Prerequisite(s): SYSB 2024 and MATH 1226 and (CS 1064 or CS 1114)
Corequisite(s): MATH 2114, MATH 2114H
Instructional Contact Hours: (3 Lec, 3 Crd)

SYSB 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SYSB 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

SYSB 3035 - Genomics and Bioinformatics (4 credits)
Bioinformatic approaches in omics, namely genomics and transcriptomics. 3035: Genomic architecture and evolution. Gene expression and post-translational regulation. Structure and function of genes and other genetic elements. Experimental techniques for generating genomic and transcriptomic data. 3036: Statistical, evolutionary, and computational models and methods to analyze omics data. Techniques for visualization and biological interpretation of omics data derived from experiments. Application of Python and R to bioinformatics. Case studies and specific applications in molecular biology, including comparative genomics, cancer, and infectious diseases.
Prerequisite(s): BIOL 2004
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

SYSB 3036 - Genomics and Bioinformatics (4 credits)
Bioinformatic approaches in omics, namely genomics and transcriptomics. 3035: Genomic architecture and evolution. Gene expression and post-translational regulation. Structure and function of genes and other genetic elements. Experimental techniques for generating genomic and transcriptomic data. 3036: Statistical, evolutionary, and computational models and methods to analyze omics data. Techniques for visualization and biological interpretation of omics data derived from experiments. Application of Python and R to bioinformatics. Case studies and specific applications in molecular biology, including comparative genomics, cancer, and infectious diseases.
Prerequisite(s): SYSB 3035
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

SYSB 3115 - Network Dynamics and Cell Physiology (4 credits)
In-depth study of how molecular regulatory networks determine the physiological properties of prokaryotic and eukaryotic cells. 3115: Biochemical reaction networks, nonlinear dynamical systems, parameter estimation, bifurcation theory, switches and oscillators, gene regulatory networks, signaling pathways, metabolic networks, neural networks, applications. 3116: Stochastic effects, cell cycle and cancer, spatial effects, motility, development, tissue dynamics, applications.
Prerequisite(s): SYSB 2034
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

SYSB 3116 - Network Dynamics and Cell Physiology (4 credits)
In-depth study of how molecular regulatory networks determine the physiological properties of prokaryotic and eukaryotic cells. 3115: Biochemical reaction networks, nonlinear dynamical systems, parameter estimation, bifurcation theory, switches and oscillators, gene regulatory networks, signaling pathways, metabolic networks, neural networks, applications. 3116: Stochastic effects, cell cycle and cancer, spatial effects, motility, development, tissue dynamics, applications.
Prerequisite(s): SYSB 3115
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

SYSB 4024 - Careers and Professionalism in Systems Biology (2 credits)
Career planning, interviewing skills, and training in written and oral communication in systems biology. Critical evaluation of research, effective communication of scientific results, ethical standards in science, societal trends.
Prerequisite(s): SYSB 3036 and SYSB 3116
Corequisite(s): SYSB 4065
Instructional Contact Hours: (2 Lec, 2 Crd)

SYSB 4065 - Research Experience in Systems Biology (2 credits)
Training and practical experience in the conduct of systems biology research. 4065: Plan a research project, develop a research hypothesis, and perform preliminary testing and analysis. 4066: Execute, refine, complete, and document the projects results.
Prerequisite(s): SYSB 3036 and SYSB 3116
Corequisite(s): SYSB 4135
Instructional Contact Hours: (2 Lec, 2 Crd)

SYSB 4066 - Research Experience in Systems Biology (2 credits)
Training and practical experience in the conduct of systems biology research. 4065: Plan a research project, develop a research hypothesis, and perform preliminary testing and analysis. 4066: Execute, refine, complete, and document the projects results.
Prerequisite(s): SYSB 4065
Corequisite(s): SYSB 4136
Instructional Contact Hours: (2 Lec, 2 Crd)

SYSB 4114 - Applied Models of Gene Regulatory Networks (3 credits)
Dynamic modeling of gene regulatory networks. Gene regulatory networks with oscillatory and switch-like dynamic behavior. Design of synthetic genetic switches and oscillators. Modeling gene regulation controlling cell fate, cell differentiation, cell-to-cell communication, synchronization and developmental processes. Real-world research problems and applications.
Prerequisite(s): SYSB 2034 and SYSB 3116
Instructional Contact Hours: (3 Lec, 3 Crd)

SYSB 4224 - Big Data Analysis Methods in Systems Biology (3 credits)
Big data analysis in systems biology. Emphasis on data storage/retrieval and curation, statistical modeling of gene expression, enrichment analysis, clustering, parameter optimization and estimation in systems biology models, linear and nonlinear classification methods.
Prerequisite(s): (SYSB 2034 or MATH 1226) and (STAT 3005 or STAT 3615)
Instructional Contact Hours: (3 Lec, 3 Crd)

SYSB 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SYSB 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Technology Education (EDTE)

EDTE 1004 - Introduction to Integrative STEM Education (3 credits)
Introduction to creative hands-on problem-solving using technological and engineering design and application. Comprehensive views of how technology and engineering require integration of knowledge to solve technological challenges. Intersection of science, technology, engineering, and mathematics (STEM) with society. Use of virtual and hands-on modeling to identify, evaluate, and test the proper materials and processes for product design. Professional skills such as problem-solving, collaboration, and effective communication.
Pathway Concept Area(s): 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

EDTE 1014 - Teaching Technology, Engineering, and Design (3 credits)
Introduction to strategies for teaching technology, engineering, and design in middle and high schools. Exploration of state standards and national recommendations for teaching technology, engineering, and design. Curriculum design and pedagogical frameworks for teaching technological and engineering design-based learning activities, implementing differentiated instruction, and addressing industry trends.
Prerequisite(s): EDTE 1004 or ENGE 1215 or ENGE 1414
Instructional Contact Hours: (3 Lec, 3 Crd)

EDTE 2005 - Engineering Technologies (3 credits)
Fundamentals of technology and engineering design for middle and high school technology educators. 2005: Human needs and cultural context in engineering design process and design thinking. Contributions of systems engineering. Knowledge and skills for processing common materials. Introduction to computer-aided design for two and three-dimensional modeling. Laboratory safety. 2006: Technology and engineering practices. Measurement, analysis, and simulation tools and techniques. Advanced materials processing. Application of computer-aided design for two and three-dimensional modeling. Teaching technology in 6th through 12th grade classrooms.
Prerequisite(s): EDTE 1014
Instructional Contact Hours: (3 Lec, 3 Crd)

EDTE 2006 - Engineering Technologies (3 credits)
Fundamentals of technology and engineering design for middle and high school technology educators. 2005: Human needs and cultural context in engineering design process and design thinking. Contributions of systems engineering. Knowledge and skills for processing common materials. Introduction to computer-aided design for two and three-dimensional modeling. Laboratory safety. 2006: Technology and engineering practices. Measurement, analysis, and simulation tools and techniques. Advanced materials processing. Application of computer-aided design for two and three-dimensional modeling. Teaching technology in 6th through 12th grade classrooms.
Prerequisite(s): EDTE 2005
Instructional Contact Hours: (3 Lec, 3 Crd)

EDTE 2204 - Emerging Issues in Technology and Engineering (3 credits)
Examination of current and projected technology and engineering topics that are growing in regional, state, national, and global importance. Analyzing how the Grand Challenges for Engineering shape future technological advancements and their impact on societies, the environment, and global issues. Development, revision, and field-testing of appropriate learning activities for middle and high school students in selected topic areas.
Prerequisite(s): EDTE 2005
Instructional Contact Hours: (3 Lec, 3 Crd)

EDTE 2964 - Field Study/Practicum (1-19 credits)
Instructional Contact Hours: Variable credit course

EDTE 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

EDTE 3204 - Robotics Education (3 credits)
Introduction to designing robotic systems including sensors, electronic components, and mechanical devices. Foundational technical developments in the use of robots and other computer-controlled devices including technical reporting. History and evolution of robots and automation and their social, economic, industrial, and educational impacts. Robotics-based instruction for middle and high-school students.
Prerequisite(s): EDTE 2006 and CS 1014 and CS 1064
Instructional Contact Hours: (3 Lec, 3 Crd)

EDTE 3964 - Field Study/Practicum (1-19 credits)
Instructional Contact Hours: Variable credit course

EDTE 4204 - Capstone in Technology and Engineering Education (3 credits)
Workforce experience in technology and engineering education, including open-ended research, design, and industry collaboration. Open-ended and team-focused challenges in STEM contexts. Design-cycle (from problem identification to prototype and technical reporting) based on global, economic, environmental, and societal challenges. Comprehensive instructional unit planning to prepare pre-service educators to teach technological and engineering design-based learning to middle and high school students.
Prerequisite(s): EDTE 2204 and EDTE 3204
Instructional Contact Hours: (3 Lec, 3 Crd)

EDTE 4754 - Internship in Education (1-16 credits)
Planned program of clinical practice in education under the direction and supervision of a university supervisor and a selected practitioner. Recommendation of program area and successful completion of Professional Studies required.
Instructional Contact Hours: (1-16 Lec, 1-16 Crd)
Course Crosslist: ALS 4754

EDTE 4964 - Field Study/Practicum (1-19 credits)
Instructional Contact Hours: Variable credit course

EDTE 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

EDTE 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

Theatre and Cinema (TA)

TA 1004 - School of Performing Arts First Year Experience (1 credit)
Orientation to the School of Performing Arts philosophy and the resources of the School, the College, and the University. Cultivate a common intellectual, analytical, and creative conversation among first-year students. Enhance student participation in the creative and scholarly life of the Schools programs. Foster a sense of community and understanding across disciplines.
Instructional Contact Hours: (1 Lec, 1 Crd)
Course Crosslist: MUS 1004

TA 2014 - Introduction to Theatre (3 credits)
Appreciation and understanding of theatre as a living, collaborative art form through historical and intercultural perspectives, readings of key texts and analysis of scripts, and explorations of all elements of the theater making process, including playwriting, directing, acting, and design.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2024 - Introduction to Acting (3 credits)
Introductory performance class in acting skills and theories as a participant (actor) and observer (audience) for the non-major. Includes performances of dramatic literature/ improvisation for live audience, creating character biography and script analysis, historical and intercultural contexts, and techniques in constructive criticism that incorporate interpretive strategies.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2044 - Contemporary African American Theatre (3 credits)
Contributions of U.S. Black theatre artists; intersectional identities; performances spaces and society; critical race theory; dramatic storytelling; cultural behaviors; racial discrimination.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AFST 2044, ENGL 2044

TA 2104 - Fundamentals of Theatre and Production (3 credits)
Introduction to theatre vocabulary and understanding of the theatrical process, theatre aesthetics, theatrical modes of expression, basic script analysis, production analysis, theory and practice of collaboration, theatre organizations, history and operations of professional theatres. (T & C majors and minors only).
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2114 - Script Analysis (3 credits)
Understanding of drama as an element of theatre with focus on the process of script analysis for theatrical production.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2134 - Acting Lab (3 credits)
An introduction to the process of acting, through a variety of laboratory experiences, beginning with basic performance skills and culminating in the performance experience. Emphasis is on improvisation, terminology, physical action, script analysis, characterization, and rehearsal and performance techniques. Limited to Theatre & Cinema Majors.
Instructional Contact Hours: (6 Lab, 3 Crd)

TA 2144 - Foundations of Movement and Voice (3 credits)
An introduction to the process of acting, through a variety of laboratory experiences, beginning with basic performance skills and culminating in the performance experience. Emphasis is on various methods of performance style and analysis, theater movement and body conditioning, and vocal awareness and production. Limited to Theatre & Cinema Majors.
Prerequisite(s): TA 2134
Instructional Contact Hours: (6 Lab, 3 Crd)

TA 2164 - Scene Design Lab (3 credits)
An introduction to the processes, technologies, and aesthetics of scene design for theatrical productions and analysis of playscripts. Students develop workshop drawing, conceptual design and vision, and collaborative skills related to scene design, and exploration is focused in historical and contemporary theatre practice. A range of design problems will offer opportunity to learn various design approaches and provide practice with different media and means of design expression. Design Lab.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

TA 2174 - Costume Design Lab (3 credits)
Introduction to the processes, technologies, and aesthetics of costume design for theatrical productions and analysis of playscripts. Focus on developing workshop drawings, conceptual design and vision, and collaborative skills related to costume design, with special emphasis on historical and contemporary theatre practice. Various design approaches, different media, and a range of design problems are introduced. Design Lab/Studio.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

TA 2204 - Creative Dance (3 credits)
Study of the expressive elements of movement and dance. Basic choreographic procedures and small group work to design dances that emphasize particular movement concepts. Experience in music and movement of diverse dance cultures. Documentation of the pathways of dances in floorplans and written reflections on the creative processes.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2224 - Intermediate Performance Intensive (3 credits)
This course provides the Theatre & Cinema major, who desires a rigorous exploration of acting, a forum for application of the techniques and skills learned. These skills will be strengthened and applied through observation of and participation in scene and monologue work. Focus will be placed on basic skills and concepts necessary to creative, truthful, and believable performance of selected scenes, including use of voice and body, imagination, relaxation, sense and emotion memory, and script analysis. Limited to Theatre & Cinema Majors.
Prerequisite(s): TA 2134 and TA 2144
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2404 - Introduction to Applied Collaborative Techniques (3 credits)
Introduction to principles of collaboration in applied theatre for non-majors. Situational awareness, intrapersonal and interpersonal awareness, audience engagement, effective storytelling, team creativity and conflict resolution, and communicating across difference in public and professional settings.
Pathway Concept Area(s): 1A Discourse Advanced, 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2414 - Stage and Lighting Technology (3 credits)
A practical study of the technologies and specialized equipment employed in the construction, rigging and running of theatrical production; the planning and organization involved in mounting these productions; the tools, materials and techniques used to realize theatrical design and build scenery; and the fundamentals of stage lighting.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2604 - Introduction to Arts Marketing (3 credits)
An introduction to the theories and practice of marketing and building community engagement as applied to arts activities and professional not-for-profit arts organizations, through a survey of standard marketing approaches, examination of current practices in the field, and direct hands-on experience.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: MUS 2604

TA 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2984G - Special Study (1-19 credits)
Pathway Concept Area(s): 7 Identity & Equity in U.S.
Instructional Contact Hours: Variable credit course

TA 2984M - Special Study (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: Variable credit course

TA 3014 - Theatre Production Lab (1-3 credits)
Production experiences in the areas of performance, design and theatre technology, management, and writing. May be repeated for a maximum of nine credits.
Instructional Contact Hours: (1-3 Lab, 1-3 Crd)
Repeatability: up to 9 credit hours

TA 3024 - Intermediate Acting for Non-Theatre Major (3 credits)
Performance class in acting skills, theories, and genres. Designed for non-theatre arts majors. Builds on fundamentals and theory learned in Introduction to Acting. Includes body and voice awareness, performance of specific genres, and expanded acting theory and analysis.
Prerequisite(s): TA 2024
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3104 - Sound Technology Topics (3-6 credits)
Rotating topics in theatre sound technology and sound design. Designed for advanced theatre arts and cinema majors who have foundational training in areas of theatre technology and design. May be repeated 2 times with different content for a maximum of 9 credit hours. Design Lab.
Prerequisite(s): TA 2414
Instructional Contact Hours: (1 Lec, 3-8 Lab, 3-6 Crd)
Repeatability: up to 9 credit hours

TA 3105 - History of Drama and Theatre (3 credits)
History of drama and theatre from primitive ritual to the present day and its relationship to the social, economic, and political forces from age to age. 3105: primitive, Greek, Roman, Medieval, Renaissance, and Asian. 3106: Restoration, eighteenth, nineteenth, and twentieth centuries. Junior standing required.
Prerequisite(s): TA 2114
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3106 - History of Drama and Theatre (3 credits)
History of drama and theatre from primitive ritual to the present day and its relationship to the social, economic, and political forces from age to age. 3105: primitive, Greek, Roman, Medieval, Renaissance, and Asian. 3106: Restoration, eighteenth, nineteenth, and twentieth centuries.
Prerequisite(s): TA 2114
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3114 - Scenography Topics (9 credits)
Rotating topics in scenography and related specific design applications. Designed for theatre arts majors who have foundational training in areas of theatre design. May be repeated for credit.
Prerequisite(s): TA 2164
Instructional Contact Hours: (9 Lec, 9 Lab, 9 Crd)
Repeatability: up to 9 credit hours

TA 3124 - Costume Design and Technology Topics (1-9 credits)
Rotating topics of costume design and costume technology. Designed for advanced theatre arts majors who have foundational training in all areas if theatre design. May be repeated for credit.
Prerequisite(s): TA 2174
Instructional Contact Hours: (1-9 Lec, 1-9 Crd)
Repeatability: up to 9 credit hours

TA 3134 - Lighting Topics (1-9 credits)
Rotating topics in lighting design and technology. Designed for advanced theatre arts majors who have foundational training in all areas of theatre arts. May be repeated for credit. (Variable credit)
Prerequisite(s): TA 2414
Instructional Contact Hours: (1-9 Lec, 1-9 Crd)
Repeatability: up to 9 credit hours

TA 3144 - Theatre Technology Topics (9 credits)
Rotating topics in design and theatre technology. Designed for advanced theatre arts majors who have foundational training in all areas if theatre technology and design. May be repeated for unlimited number of credit hours.
Prerequisite(s): TA 2414
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3154 - Acting Topics (9 credits)
Rotating topics in performance skills and theories. Designed For advanced theatre arts majors who have foundational training in acting, voice and movement. May be repeated for credit.
Prerequisite(s): TA 2224 and TA 2144
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3164 - Voice and Speech Topics (9 credits)
Rotating topics in voice and speech skills, and theories and practice in performance. Designed for advanced theatre arts majors who have foundational training in acting, voice and movement. May be repeated for credit.
Prerequisite(s): TA 2224 and TA 2144
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3174 - Movement Topics (9 credits)
Rotating topics in theatre movement, dance for the theatre and theories of physical expression in the performing arts. Designed for advanced theatre arts majors who have foundational training in acting voice and movement. May be repeated for a maximum of 9 credit hours.
Prerequisite(s): TA 2144 and TA 2224
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3315 - Playwriting (3 credits)
A workshop course in the craft and art of playwriting which emphasizes the development of craft and the nurturing of vision and art. 3315: primary focus is on the writing of original scripts with additional attention paid to the work of influential playwrights and critics. 3316: primary focus is on the creative process of developing a play with the collaborative influences of a director, actors, designers, and other theatre professionals. Consent of instructor required.
Prerequisite(s): ENGL 1106 or ENGL 1204H or COMM 1016
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ENGL 3315

TA 3604 - Arts Management (3 credits)
The development of the not-for-profit arts organization, structures and characteristics of boards of directors, artistic missions and goals, funding, volunteer support, and fiscal control. Junior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3624 - Stage Management (3 credits)
The systems, procedures, forms, and duties of the stage manager in the professional, academic, and community theatre are explored in relationship to the production process and other theatre artists.
Prerequisite(s): TA 2104
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 3954F - Study Abroad (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design
Instructional Contact Hours: Variable credit course

TA 3954M - Study Abroad (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: Variable credit course

TA 3984M - Special Study (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: Variable credit course

TA 4014 - Contemporary Theatre Seminar (3 credits)
Issues and concerns in contemporary theatre; production philosophies and approaches, employment opportunities, career options, and preparation of portfolio and resume materials. Junior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 4304 - Theatre Outreach (1-3 credits)
Participation in theatre projects or activities that focus on community and social issues. May be repeated for a maximum of six credits. Junior standing.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 6 credit hours

TA 4315 - Directing (3 credits)
Script analysis, theories, techniques, and practical applications of theatrical direction. 4315: Theories and aesthetics of directing, functions of the director, script analysis, basic principles and techniques of staging. 4316: Rehearsal techniques, style determination realism, and non-realism. Senior standing required.
Prerequisite(s): TA 2134 and TA 2114
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 4316 - Directing (3 credits)
Script analysis, theories, techniques, and practical applications of theatrical direction. 4315: Theories and aesthetics of directing, functions of the director, script analysis, basic principles and techniques of staging. 4316: Rehearsal techniques, style determination realism, and non-realism.
Prerequisite(s): TA 4315
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 4704 - Professional Theatre Internship (9-15 credits)
Internship of one semester in acting, directing, management, design, or technical theatre or cinema with a professional equity company for selected advanced students; classroom, workshop, and production experiences. Minimum 9 credits, maximum 15 credits. Audition and consent.
Instructional Contact Hours: (9-15 Lec, 9-15 Crd)
Repeatability: up to 15 credit hours

TA 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Trans Biol Medicine & Health (TBMH)

TBMH 4964 - Field Work/Practicum (1-19 credits)
Instructional Contact Hours: Variable credit course

TBMH 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TBMH 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

University Course Series (UNIV)

UNIV 1004 - College Success Strategies (3 credits)
Study and application of strategies, skills, attitudes and behaviors leading to effective academic learning in a college setting. Credit not applicable to meeting degree requirements; may not be repeated.
Instructional Contact Hours: (3 Lec, 3 Crd)

UNIV 1824 - Pathways to Success: Exploring Your Future (3 credits)
Introductory experience course for University Studies and Explore Technology majors. Create fundamental knowledge and develop skills that facilitate successful transition to the university and develop decision-making skills, problem solving, inquiry, research majors and careers, critical thinking and integration of knowledge. Examine their personal decision towards their major utilizing psychosocial and identity in support of a successful transition. Evaluate sources of information to make an argument.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

UNIV 1984 - Special Study (1-19 credits)
May not count towards degree requirements; consult advisor.
Instructional Contact Hours: Variable credit course

UNIV 2114 - Unleash Your HokiePotential (1 credit)
First-Year Experience course for transfer students. Establish fundamental knowledge and develop skills that facilitate a successful transition into Virginia Tech. Develop/refine decision-making skills, problem-solving skills, critical thinking, and inquiry. Examine personal strengths, values, goals, and integration of knowledge; establish academic, personal, and career goals in support of a successful transition to Virginia Tech. Topics covered will include: principles of community, academic integrity, campus resources, digital and informational literacy, career planning, academic planning, and goal setting.
Instructional Contact Hours: (1 Lec, 1 Crd)

UNIV 2394 - Introduction to Residential Communities and Leadership (3 credits)
This course provides theories, basic principles, and skill development that serve as a knowledge base and framework for the peer helping, para-professional Resident Advisor position. This course is open only to students who are serving in their first semester as a Resident Advisor.
Instructional Contact Hours: (3 Lec, 3 Crd)

UNIV 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UNIV 3944 - VT Study Abroad Enrollment (0 credits)
Participation in an approved study abroad program without direct supervision of the VA Tech faculty but with required enrollment in an approved program of study in an international university. Course represents 12 billable hours and no academic credit.
Instructional Contact Hours: (0 Lec, 0 Crd)

UNIV 3944S - VT Study Abroad Enrollment 3 (0 credits)
Participation in an approved study abroad program without direct supervision of the VA Tech faculty but with required enrollment in an approved program of study in an international university. Course represents three billable hours and no academic credit.
Instructional Contact Hours: (0 Lec, 0 Crd)

UNIV 3944T - VT Study Abroad Enrollment 4 (0 credits)
Participation in an approved study abroad program without direct supervision of the VA Tech faculty but with required enrollment in an approved program of study in an international university. Course represents four billable hours and no academic credit.
Instructional Contact Hours: (0 Lec, 0 Crd)

UNIV 3944U - VT Study Abroad Enrollment 6 (0 credits)
Participation in an approved study abroad program without direct supervision of the VA Tech faculty but with required enrollment in an approved program of study in an international university. Course represents six billable hours and no academic credit.
Instructional Contact Hours: (0 Lec, 0 Crd)

UNIV 3944V - VT Study Abroad Enrollment 7 (0 credits)
Participation in an approved study abroad program without direct supervision of the VA Tech faculty but with required enrollment in an approved program of study in an international university. Course represents four billable hours and no academic credit.
Instructional Contact Hours: (0 Lec, 0 Crd)

UNIV 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

UNIV 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

University Honors Program (UH)

UH 1404 - Principles of Collaborative Discovery (3 credits)
Introduction to honors education at Virginia Tech. Disciplinarity, interdisciplinarity, multidisciplinarity, and transdisciplinarity. Qualitative and quantitative research methods. "Wicked problems," systems thinking, and collaborative discovery. Problem analysis and iterative thinking. Ethical dimensions of trans-sector activity.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 1504 - PGS PStudy Abroad Pre-Departure Seminar (2 credits)
Orientation for Presidential Global Scholars (PGS) participants. Introduction to theories of culture and cross-cultural competence. Survey of Swiss culture, history, and politics. Introduction to PGS faculty and research interests. Development of individual research questions; transdisciplinary research on critical issues in U.S. contexts. Critical travel and safety information.
Instructional Contact Hours: (2 Lec, 2 Crd)

UH 1604 - Introduction to Honors Quantitative and Qualitative Research Practices (3 credits)
Introduction to critical practices in undergraduate quantitative and qualitative research for Honors College students, including generating focused research questions, finding scholarly literature, organizing data, conducting ethical research, collaborative research practices, and identifying venues to present research findings.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UH 2124 - Honors Reading Seminar (1 credit)
Reading based sections in which small groups of students practice discussion, debate, and argumentation grounded in a topic or genre of reading of their groups choosing. Honors standing. Variable course content. Repeatable for up to six credits.
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 6 credit hours

UH 2504 - Topics in Discourse and Global Citizenship (3 credits)
Discovery, analysis, creation, and evaluation of written, spoken, and visual presentation of ideas in cross-cultural contexts. Special attention to the relationship of rhetoric to effective participation in academic, professional, and public/civic problem-solving. Course cannot be repeated for credit.
Corequisite(s): UH 2524, UH 2534, UH 2544, UH 2554, UH 4994
Pathway Concept Area(s): 1A Discourse Advanced, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 2514 - Topics in Quantitative/Computational Thinking and Global Citizenship (3 credits)
Application of quantitative/computational thinking in cross-cultural civic/public contexts. Use of quantitative/computational thinking to frame a question and devise a solution related to a civic/public issue. Drawing valid quantitative inferences about civic/public and cross-cultural issues characterized by inherent uncertainty. Evaluating conclusions or decisions about civic/public issues based on quantitative data. Ethical considerations of quantitative/computational thinking in cross-cultural civic/public issues. Course cannot be repeated for credit.
Corequisite(s): UH 4994
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 2524 - Topics in Natural Sciences and Global Citizenship (3 credits)
Study of a specific branch of the natural sciences, especially as it intersects with public/civic controversies and problem-solving. Cross-cultural perspectives on the nature, purposes, and processes of scientific inquiry and knowledge. Course cannot be repeated for credit.
Corequisite(s): UH 2504, UH 2534, UH 2544, UH 2554, UH 4994
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 2544 - Topics in Social Science and Global Citizenship (3 credits)
Study of the behavior and actions of individuals, groups, and institutions within larger social, economic, political, and geographic contexts, especially in cross-cultural settings. Special attention to social beliefs and actions as they influence public/civic controversies and problem-solving. Examination of the influence of value and beliefs on human behavior and social relationships. Course cannot be repeated for credit.
Corequisite(s): UH 2504, UH 2524, UH 2534, UH 2554, UH 4994
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 2554 - Topics in Humanities and Global Citizenship (3 credits)
Analysis and interpretation of texts and other artifacts to understand ideas, values, and identities in cross-cultural contexts. Special attention to the functions of narrative and rhetoric in public/civic controversies and problem- solving. Situating local/regional texts and artifacts in global frameworks. Course cannot be repeated for credit.
Corequisite(s): UH 2504, UH 2524, UH 2534, UH 2544, UH 4994
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 2604 - Intermediate Honors Quantitative and Qualitative Research Practices (3 credits)
Intermediate study of critical practices in quantitative and qualitative research for Honors College students, including identifying funding opportunities for research, collaborating across disciplines, designing introductory research protocols, managing research projects, and using posters to present research findings.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 2744 - Foundational Topics in Computing in Technology Innovation for Societal Impa (1 credit)
Foundational study of applications of computational thinking in technology innovation for societal impact. Key components of computing and their interrelation. Uses of computational thinking to frame questions and devise solutions. Implementation of simple computational processes and tools. Construction of computational models to analyze and draw inferences about complex and uncertain phenomena. Evaluation of knowledge based on quantitative data. Impacts of computing and information technology on society. Ethical dimensions of computing for technological and societal innovation. May be repeated 5 times with different content for a maximum of 6 credits.
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 6 credit hours

UH 2754 - Advanced Topics in Computing in Technology Innovation for Societal Impact (1 credit)
Advanced study of applications of computational thinking in technology innovation for societal impact. Uses of computational thinking to frame questions and devise solutions. Application of computational processes and tools. Application and evaluation of computational models to analyze and draw inferences about dynamic and uncertain phenomena. Impacts of computing and information technology on society. Ethical dimensions of computing for technological and societal innovation. May be repeated 2 times with different content for a maximum of 3 credits.
Prerequisite(s): MATH 1225 or MATH 1524 or MATH 1535
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

UH 2764 - Advanced Topics in Engineering in Technology Innovation for Societal Impact (1 credit)
Study of applications of computer and systems engineering in technology innovation for societal impact. Application of computer and systems engineering processes and tools to analyze complex or large-scale phenomena. Application and evaluation of computer and systems engineering approaches to analyze and draw inferences about the feasibility and effectiveness of technological innovations. Impacts of computer and systems engineering on society and the environment. Ethical dimensions of computer and systems engineering for technological and societal innovation. May be repeated 2 times with different content for a maximum of 3 credits.
Prerequisite(s): UH 2744
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

UH 2814 - Topics in Social Sciences for Technology Innovation for Societal Impact (1 credit)
Threshold concepts in social sciences related to collaborative, transdisciplinary technology innovation for societal impact. Study of key ideas about the behavior of individuals, groups, and institutions related to technology innovation within larger social, economic, political, and geographic contexts. Use of key concepts in the social sciences to examine the ethical dimensions of technological and societal innovation. May be repeated 5 times with different content for a maximum of 6 credits.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 6 credit hours

UH 2824 - Topics in the Arts for Technology Innovation for Societal Impact (1 credit)
Application of threshold concepts in the fine arts to collaborative, transdisciplinary technology innovation for societal impact. Study of key ideas for non-specialists about the formal elements, process, meaning, and value of the fine arts in technology innovation. Use of key concepts in the fine arts to examine the ethical dimensions of technological and societal innovation. May be repeated 2 times with different content for a maximum of 3 credits.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

UH 2834 - Topics in Humanities for Technology Innovation for Societal Impact (1 credit)
Threshold concepts in the humanities related to collaborative, transdisciplinary technology innovation for societal impact. Study of key ideas and values related to technology innovation in various spatial, cultural, and temporal contexts. Use of key concepts in the humanities such as historical/cultural context and the nature of the good to examine the ethics of technological and societal innovation. May be repeated 5 times with different content for a maximum of 6 credits.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 6 credit hours

UH 2855 - Calhoun Transdisciplinary Fusion Studio (3 credits)
Introduction to transdisciplinary, collaborative design processes to address real-world problems in technology innovation provided by clients from business, government, and nonprofit organizations. 2855: Collaborative problem-setting. Evaluative criteria for technology innovation: feasibility (can it be made?), viability (is it financially sensible?), desirability (do people want it?), and sustainability (can it work long-term?). Introduction to design thinking. Ethical dimensions of collaborative technology innovation for societal impact. 2856: Collaborative problem-solving. Introduction to quantitative and qualitative research methods. Optimization and integration. Design thinking and component prototyping. Ethical dimensions of collaborative technology innovation for societal impact. Design Lab/Studio.
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

UH 2856 - Calhoun Transdisciplinary Fusion Studio (3 credits)
Introduction to transdisciplinary, collaborative design processes to address real-world problems in technology innovation provided by clients from business, government, and nonprofit organizations. 2855: Collaborative problem-setting. Evaluative criteria for technology innovation: feasibility (can it be made?), viability (is it financially sensible?), desirability (do people want it?), and sustainability (can it work long-term?). Introduction to design thinking. Ethical dimensions of collaborative technology innovation for societal impact. 2856: Collaborative problem-solving. Introduction to quantitative and qualitative research methods. Optimization and integration. Design thinking and component prototyping. Ethical dimensions of collaborative technology innovation for societal impact. Design Lab/Studio.
Prerequisite(s): UH 2855
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

UH 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UH 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UH 3204 - Honors Service Learning (3 credits)
A two-part course. Part one: three hours a week working directly with community partners. Part two: a one-hour class to reflect on the service experience and discuss readings and other course materials that place the experiential learning into a theoretical context. Open to all Honors students. Variable course content. Repeatable for up to six credits.
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)
Repeatability: up to 6 credit hours

UH 3504 - Topics in Honors Transdisciplinary Seminars (3 credits)
Exploration of transdisciplinary issues and questions. Analysis of complex topics from multiple points of view. Collaborative discussion and critique. Ethical decision-making across disciplines. Application of knowledge and processes from other disciplines. Variable course content. May be repeated one (1) time with different content for a maximum of 6 credit hours.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

UH 3604 - Designing Protocols for Honors Quantitative and Qualitative Research (3 credits)
Advanced study of critical practices in quantitative and qualitative research for Honors College students, including transdisciplinary project management, refining research protocols based on feasibility of data collection, maintaining research ethics and integrity, planning for data collection, and planning for dissemination of research findings.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 3614 - Data Collection and Analysis for Honors Quantitative and Qualitative Research (3 credits)
Continuing advanced study of critical practices in quantitative and qualitative research for Honors College students, including working with multiple types of data, collecting, cleaning and managing data, reporting of primary and secondary data, evaluating the work of others, and communicating conclusions to general audiences.
Instructional Contact Hours: (3 Lec, 3 Crd)

UH 3855 - Calhoun Transdisciplinary Design Studio (3 credits)
Intermediate study of transdisciplinary, collaborative design processes to address real-world problems in technology innovation provided by clients from business, government, and nonprofit organizations. 3855: Systems thinking and systems definition; identification and analysis of stakeholders; skills discovery and transdisciplinary team building; rapid prototyping. 3856: Collaborative innovation; customer discovery; evidence-based decision-making; iterative design; troubleshooting. Design Lab/Studio.
Prerequisite(s): UH 2856
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

UH 3856 - Calhoun Transdisciplinary Design Studio (3 credits)
Intermediate study of transdisciplinary, collaborative design processes to address real-world problems in technology innovation provided by clients from business, government, and nonprofit organizations. 3855: Systems thinking and systems definition; identification and analysis of stakeholders; skills discovery and transdisciplinary team building; rapid prototyping. 3856: Collaborative innovation; customer discovery; evidence-based decision-making; iterative design; troubleshooting. Design Lab/Studio.
Prerequisite(s): UH 3855
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

UH 3954 - Study Abroad (1-19 credits)
Honors Section.
Instructional Contact Hours: Variable credit course

UH 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UH 4004 - Honors Tutorial (3 credits)
Small, seminar-style course of one or a few students. Students explore a specific topic that is new to them with a faculty member who provides individual attention and is an expert in that established field. Open to all Honors students. Junior Honors standing. Variable course content. Repeatable for up to six credits.
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)
Repeatability: up to 6 credit hours

UH 4104 - Honors Student Teach Practicum (2 credits)
For Honors students facilitating Honors courses that encourage and require student facilitation or mentorship responsibilities. Student Teaching Assistants and their sections are overseen by honors faculty or staff. Student Teaching Assistants meet weekly with a member of the honors staff in a class designed to prepare them for the facilitation experience and to monitor their progress. Open to all Honors students, subject to Program approval. Sophomore Honors standing required. Variable course content. Repeatable for up to eight credits. P/F only.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)
Repeatability: up to 8 credit hours

UH 4504 - Topics in Honors Discovery and Innovation Studios (3 credits)
Discovery and definition of critical, real-world problems. Transdisciplinary collaboration, design thinking, and experimentation. Reflective evaluation of individual and collective problem-solving efforts. Communication of solutions to diverse stakeholders. Variable course content. Repeatable for up to 12 credits.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 12 credit hours

UH 4514 - Honors SuperStudio (1 credit)
Transdisciplinary collaboration. Identifying and defining public/civic issues. Framing and strategizing transdisciplinary solutions to public/civic problems. Reflecting on transdisciplinary processes. Identifying and reflecting on issues of ethics and equity in public/civic problem solving. May be repeated one time with different content for a maximum of two credit hours.
Corequisite(s): 4504 or enrollment in an approved disciplinary capstone course.
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 2 credit hours

UH 4704 - Honors Studio+ (3 credits)
Transdisciplinary and trans-sector collaboration in technology innovation. Identifying, defining, and setting problems in technology innovation. Applying evaluative criteria for technology innovation — feasibility, viability, desirability, sustainability. Using design thinking to analyze and reflect on creative processes. Identifying, articulating, and reflecting on the ethical dimensions of collaborative technology innovation. Design Lab/Studio (2H, 2L, 3C)
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

UH 4855 - Calhoun Transdisciplinary Capstone Studio (3 credits)
Advanced study of transdisciplinary, collaborative design processes to address real-world problems in technology innovation provided by clients from business, government, and nonprofit organizations. 4855: Systems building; project leadership and management, including resource allocation and scheduling; team management; value propositions; project pitches. 4856: User experience; user testing; systems assessment, including feasibility, viability, desirability, sustainability, optimization, and integration; systems reflection and documentation. Design Lab/Studio.
Prerequisite(s): UH 3856
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

UH 4856 - Calhoun Transdisciplinary Capstone Studio (3 credits)
Advanced study of transdisciplinary, collaborative design processes to address real-world problems in technology innovation provided by clients from business, government, and nonprofit organizations. 4855: Systems building; project leadership and management, including resource allocation and scheduling; team management; value propositions; project pitches. 4856: User experience; user testing; systems assessment, including feasibility, viability, desirability, sustainability, optimization, and integration; systems reflection and documentation. Design Lab/Studio.
Prerequisite(s): UH 4855
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

UH 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UH 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UH 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

University Registrar (REG)

REG 1004 - Registrar Placeholder Course (3-6 credits)
Instructional Contact Hours: (3-6 Lec, 3-6 Crd)

REG 1234 - Testing Crosslisting Capabilities in Courseleaf CIM (3 credits)
Instructional Contact Hours: (3 Lec, 3 Crd)

Urban Affairs and Planning (UAP)

UAP 1004 - Introduction to Career & Professional Development in Public Service (1 credit)
This course introduces the academic requirements and potential career fields for the Environmental Policy and Planning (EPP) and Smart and Sustainable Cities (SSC) majors. It is designed to assist new and transfer students with academic planning, career exploration, and the job search process. In addition, students will develop an understanding of professional competencies and examine how these competencies relate to a potential occupational field. During the course, students will develop the materials and skills needed to successfully apply for an internship or job. These materials will include the preparation of a cover letter and resume that respond directly to a targeted position. The skills include interview and presentation techniques.
Instructional Contact Hours: (1 Lec, 1 Crd)

UAP 1024 - Leadership, Service, and Public Problem Solving (3 credits)
Current events and case studies on complex planning and policy issues challenging the United States. Historical, political, economic, social, and geographical context of the issues. Roles, relationships and responsibilities in governing, government, and the public policy process. Approaches to leadership and leadership styles. Professional ethics and the role of ethics in policy decisions. Dealing with competing values and public vs. interests in policy making.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 2004 - Principles of Real Estate (3 credits)
Introduction to real estate, including markets, land use planning and zoning, development, finance, construction, sales, marketing, management and property valuation. Examines the key actors and processes in each of these areas. Explores major public policies impacting real estate.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: REAL 2004

UAP 2114 - Sustainability by Design (3 credits)
Design decision-making in complex contexts. Ethical issues underlying design for sustainability. Evaluation of design in systems, products, places, and modes of living using the Framework for Strategic Sustainable Development (FSSD). Historical and cultural underpinnings of design and sustainability.
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ARCH 2114

UAP 2334 - Urbanization and Biodiversity Conservation (3 credits)
Overview of challenges and opportunities that urban environments create for biodiversity conservation and human wellbeing, with a focus on social sciences theories and approaches. How urbanization is changing people's relationship with their environment and what that means for biodiversity conservation and human wellbeing. Examination of how data collection, analysis, and interpretation occur using social sciences methods applied to biodiversity conservation. Diversity, Equity, and Inclusion in the context of urbanization and conservation.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FIW 2334

UAP 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 3014 - Urban Policy and Planning (3 credits)
An introduction to urban policy and urban planning. Includes analysis of the basic concepts and principles of urban policy, a review of urban policy in the United States, discussion of the development of urban planning and its role in shaping the urban environment, and an analysis of the relationship between public policy and planning and the organization and structure of the urban environment.
Prerequisite(s): UAP 1024
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 3024 - Urban and Regional Analysis (3 credits)
Overview and application of various methods used to study, represent, understand communities in their urban and regional context. Data collection and analysis; population, land use, transportation and economic forecasting; selecting and applying an appropriate method; designing and presenting a community study. Restricted to majors and minors only.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 3224 - Policy Implementation (3 credits)
Systematic analysis of the field and practice of public policy implementation. Includes analysis of the structure and dynamics of the policy process as well as specific analytic approaches to understanding policy implementation. Includes analysis of intra-organizational, interorganizational and intergovernmental implementation processes.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 3264 - Contemporary Urban Issues (3 credits)
Consideration of one particular issue of immediate importance to the contemporary urban environment. Topics emphasize major social or economic policy issues, and may change each year. Junior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 3344 - Global Environmental Issues: Interdisciplinary Perspectives (3 credits)
Critical examination of major global environmental problems from a humanities perspective, including international community responses to global environmental problems such as global warming, atmospheric ozone depletion, acid rain, tropical deforestation, toxic waste. Actions by key actors in the international community to develop solutions. Relationship of justice, fairness, equality, and diversity to political questions of power or authority. Pre: 3 credits of Critical Issues in a Global Context.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: IS 3344, PSCI 3344

UAP 3354 - Introduction to Environmental Policy and Planning (3 credits)
Introduction to the interdisciplinary principles of environmental policy, planning, economics, and ethics to address pollution abatement, resources conservation, habitat protection, and environmental restoration. The course will focus on practical means of identifying environmental problems and creatively solving them.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 3434 - Public Administration (3 credits)
The role and context of public administration in the contemporary United States, administrative organization and decision-making, public finance, human resources administration, and program implementation.
Prerequisite(s): PSCI 1014
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PSCI 3414

UAP 3444 - Administrative Law and Policy (3 credits)
The legal context of the exercise of discretion by public administrators in the United States. Adjudication and rule- making; access to administrative processes and information; legislative and judicial control of administration.
Prerequisite(s): PSCI 1014
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PSCI 3444

UAP 3464 - Appalachian Communities (3 credits)
The concept of community in Appalachia using an interdisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. Pre: Junior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AHRM 3464, APS 3464, GEOG 3464, HD 3464, HUM 3464, SOC 3464

UAP 3714 - The U. S. Policy Process (3 credits)
Description and analysis of the processes and institutions involved in the making and implementation of public policy in the United States, with a primary focus on domestic and economic policy. Empirical and normative models of the process of public policy making in the U.S.
Prerequisite(s): PSCI 1014
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PSCI 3714

UAP 3744 - Public Policy Analysis (3 credits)
Methods and approaches used in the analysis and evaluation of public policy; strengths and limitations of various analytic tools; normative issues in the practice of policy analysis.
Prerequisite(s): PSCI 1014 or PSCI 1014H
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PSCI 3744

UAP 3774 - Marxian Political Analysis (3 credits)
Contemporary uses of Marxian concepts and theories to study the world economy, business structure, current social issues, modern ethical values, and alienation.
Prerequisite(s): PSCI 2014 or PSCI 2054 or IS 2054 or GEOG 2054 or PSCI 2064 or IS 2064 or GEOG 2064
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PSCI 3774

UAP 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 4184 - Community Involvement (3 credits)
Issues, concepts, and techniques of citizen participation in community development. Institutional frameworks and their historical precedents. Exercises developing group communications skills, public meeting facilitation, and design of community involvement programs. Pre: Senior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4214 - Gender, Environment, and International Development (3 credits)
Key concepts and critiques related to the intersection of gender, environment, and international development. Development institutions and organizations with relationship to gender and environment. Theoretical and applied perspectives on eco-feminism; bio-diversity; climate change; feminist political ecology; agriculture and natural resources; participatory methods and empowerment. Case studies from Africa, Asia, and Latin America. Pre: Junior Standing.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: GEOG 4214, WGS 4214

UAP 4264 - Environmental Ethics and Policy (3 credits)
Issues in applied environmental ethics. Contributions of diverse religious and philosophical traditions to contemporary perspectives on the human-nature relationship. Examination of environmental policies from utilitarian economic, deep ecology, and ecofeminist perspectives. Junior, senior or graduate standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4344 - Law of Critical Environmental Areas (3 credits)
This course examines the legal principles and policy debates involved in the regulation and protection of critical environmental resources. Specific topics vary but will likely include wetlands law and policy, endangered species habitat, open space, forestland and farmland protection, coastal zone management, and floodplain regulation and policy.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4354 - Interdisciplinary Environmental Problem Solving Studio (3 credits)
Interdisciplinary, experiential problem-solving studio focusing on specific environmental problems. Working in groups, students interact with local officials, developers, environmental groups, and community organizations to explore the processes of environmental management, planning, and regulations. Students apply techniques and skills frequently used by environmental policymakers and planners. Pre: Senior standing.
Prerequisite(s): UAP 3354 and UAP 3224
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4364 - Seminar in Environmental Policy and Planning (2 credits)
Critical examination of the social, political, economic, legal, scientific, and technological contexts underlying processes of environmental change, problems, and solutions, as seen from various conceptual and disciplinary perspectives. Senior status required and 9 credit hours, 3000-level or above, in the Environmental Policy and Planning major or minor.
Prerequisite(s): UAP 3354 and UAP 3224
Instructional Contact Hours: (2 Lec, 2 Crd)

UAP 4374 - Land Use and Environment: Planning and Policy (3 credits)
Environmental factors involved in land use planning and development, including topography, soils, geologic hazards, flooding and stormwater management, ecological features, and visual quality. Techniques used in conducting environmental land inventories and land suitability analyses. Policies and programs to protect environmental quality in land use planning and development. Pre: Junior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4384 - Pollution Control Planning and Policy (3 credits)
Planning and policy aspects of managing residuals and environmental contaminants and their effects on human health and environmental quality. Technical and economic factors involved in management of water quality, air quality, solid and hazardous wastes, toxic substances, and noise. Implementation of pollution control legislation, policies, and programs at federal, state, and local levels.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4394 - Community Renewable Energy Systems (3 credits)
Practical design fundamentals for small scale renewable energy systems: solar building heating and cooling; solar domestic hot water; wind, photovoltaic, and hydroelectric systems; alcohol, methane and other biomass conversion systems. Developing plans, programs, and policies to stimulate development of renewable systems.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4624 - The Washington Semester: Seminar in American Politics and Public Policy (3 credits)
This seminar is the integrative forum for the principal elements of the Washington Semester experience. The course explores both the role of political institutions in policy formation and implementation and the primary managerial and leadership challenges that arise for implementing organization managers in American democratic public policy-making. Pre: Junior standing or instructor consent and acceptance into the Washington Semester program.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PSCI 4624

UAP 4644 - Washington Semester: Politics, Policy and Administration in A Democracy (3 credits)
This course is part of the Washington Semester. Explores the relationship between the imperatives of democratic mobilization, policy choices and organizational choices through intensive study of the operating context of a selected public or nonprofit organization. Examines implications of policy-maker choices for implementing institution dynamics and challenges. Pre: Junior standing and acceptance into the Washington Semester program required.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PSCI 4644

UAP 4714 - Economics and Financing of State and Local Governments (3 credits)
Examines the provision and financing of public goods and services in local governments. Analyzes associated policy issues. Reviews experience in Western Europe and developing countries, as well as in the United States.
Prerequisite(s): UAP 3024 and (ECON 2005 or ECON 2005H) and (ECON 2006 or ECON 2006H)
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4754 - Legal Foundations of Planning (3 credits)
Examination of the legal context in which urban planning and public policy operate. Legal structure, role of law, powers of sovereign governments, constitutional limitations on government activities, and public-private conflict and their influence on planning and public policy are examined. Pre: Junior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4764 - International Development Policy and Planning (3 credits)
Examination of major development theories and contemporary issues and characteristics of low-income societies (industrialization, urbanization, migration, rural poverty, hunger, foreign trade, and debt) that establish contexts for development planning and policy-making. Junior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: GEOG 4764, SOC 4764

UAP 4854 - Planning of the Urban Infrastructure (3 credits)
Course examines the interdependences among the elements of the built environment of the city and those between the elements of the built environment and the policy/planning structure of the city. Considered are those elements associated with the primary urban activities (residential, commercial, industrial) as well as the urban form-giving infrastructure facilities that support those land uses (water supply, sewerage, solid waste disposal, transportation, education, recreation, health, and safety).
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4914 - Seminar in Public and Urban Affairs (3 credits)
This capstone seminar explores the central questions of the role of the citizen and the citizenry in democratic capitalistic urban societies as well as the nature of accountability in such regimes. Topics such as the processes by which representation occurs, alternate theories of democratic community and the relationship of the public, private and civil sectors in urban society are treated. Senior status in PUA required. PUA majors and minors must complete this course with a C grade or higher to graduate; otherwise course must be repeated.
Prerequisite(s): UAP 4754 and SPIA 2554 and SPIA 3554
Instructional Contact Hours: (3 Lec, 3 Crd)

UAP 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 4964H - Honors Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

UAP 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Water (WATR)

WATR 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 2004 - Water, Environment, and Society (3 credits)
Introduction to the hydrologic cycle, water resources, and related environmental issues. Emphasis on ethics and relationships between human needs for and effects upon water including: water quality, water treatment, and wastewater treatment; water for health, energy, and food; water management, laws, economics, and conflict; hydrometeorological hazards and climate change; and potential solutions for these and other critical water issues.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: GEOG 2004

WATR 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 3104 - Principles of Watershed Hydrology (3 credits)
Study of hydrology in watersheds. Qualitative and quantitative principles of physical hydrological processes governing the movement, storage, and transformation of water on the Earths surface as influenced by watershed characteristics, including human modifications. Pre: Junior Standing
Prerequisite(s): MATH 1026 or MATH 1226 or STAT 3005 or STAT 3604 or STAT 3615
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 3104

WATR 3754 - Watersheds and Water Quality Monitoring (3 credits)
Delivery of water quality constituents from watersheds to water bodies (streams, lakes, and estuaries). Field monitoring methods to assess watershed drivers and how they affect water quality and aquatic ecosystem condition. Linkages among water quality, watershed characteristics, land use and management, and climate. Design of watershed monitoring programs to guide watershed management for protecting water quality and ecological condition of aquatic systems.
Prerequisite(s): (BIOL 1106 or BIOL 1006) and CHEM 1035 and FREC 2004 or (FOR 2004 or FREC 2114 or FOR 2114 or FREC 3314 or FOR 3314 or BIOL 2804 or ENSC 3604)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 3754

WATR 4244 - Hydroinformatics (3 credits)
Analysis and examination of hydrologic data using basic statistics and computer programming. Calculation and interpretation of flow frequency and duration, hydrologic analysis of geospatial digital terrain data, and implementation and analysis of simple hydrologic models. Advanced methods of temporal and spatial hydrologic data visualization using computer programming.
Prerequisite(s): FREC 3104 or WATR 3104 or FREC 1044
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 4244

WATR 4464 - Water Resources Policy and Economics (3 credits)
Economic theory and methods to explain water use decisions. Efficiency, equity, and ethical considerations in U.S. water policy. Analysis of water markets, climate change, and environmental flows from diverse stakeholder perspectives.
Prerequisite(s): AAEC 1005 or ECON 2005
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AAEC 4464, FREC 4464

WATR 4614 - Watershed Assessment, Management, and Policy (2 credits)
Multidisciplinary perspectives of assessment, management and policy issues for protecting and improving watershed ecosystems. Topics include: monitoring and modeling approaches for assessment, risk-based watershed assessment geographic information systems for watershed analysis, decision support systems and computerized decision tools for watershed management, policy alternatives for watershed protection, urban watersheds, and current issues in watershed management. Pre: Two 4000 level courses in environmental/natural resource science, management, engineering, and/or policy in BSE, CEE, FOR, FREC, GEOL, LAR, CSES, ENT, BIOL, GEOG, AAEC, UAP or equivalent.
Instructional Contact Hours: (2 Lec, 2 Crd)
Course Crosslist: ALS 4614

WATR 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WATR 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Women's and Gender Studies (WGS)

WGS 1114 - Intro to LGBTQ+ Lives (3 credits)
Introduction to LGBTQ+ Identities and Activism. Analysis of art, history, politics, and media in relation to LGBTQ+ identities. Emphasis on identifying and interpreting intercultural human experiences related to sexuality and gender by examining how contexts change across time, through social practices, and in intersections with other identity categories.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 1824 - Introduction to Womens and Gender Studies (3 credits)
Describes feminism and the field of Womens and Gender Studies. Explains basic theories of social inequality, privilege, oppression and intersectionality. Discusses feminist perspectives on science and culture. Outlines womens and mens relative positions in and contributions to such institutions as family, work and the state.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 2114 - Feminist Theory (3 credits)
Examination of diverse theoretical perspectives on women and gender, including their historical origins and political implications. Special emphasis on integrative perspectives that also address race, class, and other dimensions of inequality.
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 2204 - Race and Gender in Religion and Culture (3 credits)
Influence of race and gender on religion and culture. Overview of approaches to categories of diversity, particularly race and gender, in religious and cultural traditions. Utilization of humanistic and social scientific approaches to investigate geographically variable historical and/or contemporary case studies.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AFST 2204, RLCL 2204

WGS 2224 - Creativity, Power, & Politics (3 credits)
Creativity, Power, & Politics analyzes the dimensions of creativity and the arts in the context of gender, sexuality, race, and class. Emphasis on identifying and interpreting intercultural human experiences related to the use of art in feminist social movements by examining how contexts change across time and in intersections with other identity categories.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 2254 - Feminist Activism (3 credits)
Explores the history of individual and collective action geared toward gaining womens rights and improving womens positions in society. Course covers tensions and shifts in feminist movements, as well as the perspectives, agendas, and actions of specific subgroups of women whose perspectives sometimes conflict. Service-learning is a required component of the course.
Prerequisite(s): WGS 1824
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 2264 - Race, Class, Gender, and Sexualities (3 credits)
Focuses on how race, class, gender, and sexualities form interlocking systems of privilege and oppression at individual and institutional levels. Emphasizes race, class, gender, and sexualities as changing social constructions and interactive systems that shape social institutions and organizations, meanings, and identities.
Prerequisite(s): WGS 1824
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AFST 2264, SOC 2264

WGS 2284 - Lesbian, Gay, Bisexual, Transgender and Queer Issues (3 credits)
Introduces students to Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Studies. Focuses on sexuality and gender as historical and cultural constructs. Examines the experiences of individuals who do not conform to binary sex-gender systems and the development of diverse identities and LGBTQ communities. Introduces feminist and queer theories that address LGBTQ issues within social, political, legal, and cultural institutions. Examines the institutional oppression of sexual minorities and implications of the intersectionalities of such systems of inequality as gender, race, ethnicity, class, age, and (dis)ability.
Prerequisite(s): WGS 1824
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WGS 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WGS 3004 - Topics in Feminism (3 credits)
A variable topics course that addresses how the social construction of gender shapes social, cultural, political, economic, and institutional structures as well as individual experiences and perceptions. The course stresses interdisciplinary approaches to topics of emerging interest in feminist scholarship. Can be taken up to three times for credit with varying topic. In addition to WS 1824, must have taken a 2000-level Womens Studies course, or have instructors consent.
Prerequisite(s): WGS 1824
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

WGS 3014 - Women and Gender in Islam (3 credits)
An examination of women and gender in Islam from a variety of perspectives including Muslim women in Islamic history, normative constructions of the roles of women in Islam, and womens role in contemporary Muslim societies. Understanding of women in classical Islam; feminist and reformist approaches; and Western constructions of the rights of women in Islam.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: RLCL 3014

WGS 3134 - Gender and Linguistics (3 credits)
Exploration of differences--real and imagined--in the speech of men and women, and the relationship between these differences to culture. Exploration of how language can reflect and reinforce gender inequality. Linguistic phenomena covered: pitch, vocabulary, sound change, language ideologies, and discourse strategies and types.
Prerequisite(s): ENGL 1106 or ENGL 1204H or COMM 1016
Pathway Concept Area(s): 1A Discourse Advanced, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ENGL 3134

WGS 3214 - Global Feminisms (3 credits)
An introduction to the gendered analysis of global womens issues with a special focus on women of color. Examines the multiple and diverse sites of feminist struggle within the third world, and between first and third worlds both in the U.S. and internationally. Studies the impact on women of political movements such as nationalism, colonialism, revolution, authoritarianism and democracy. Compares theories originating with women of color in the U.S. with those from international third worlds.
Prerequisite(s): WGS 2264
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

WGS 4214 - Gender, Environment, and International Development (3 credits)
Key concepts and critiques related to the intersection of gender, environment, and international development. Development institutions and organizations with relationship to gender and environment. Theoretical and applied perspectives on eco-feminism; bio-diversity; climate change; feminist political ecology; agriculture and natural resources; participatory methods and empowerment. Case studies from Africa, Asia, and Latin America. Pre: Junior Standing.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: GEOG 4214, UAP 4214

WGS 4224 - Women's Studies Seminar (3 credits)
This multi-disciplinary, multi-cultural course examines a significant topic in Womens Studies, utilizing the perspectives of history, biology, psychology, political science, sociology, and the arts. Variable topics.
Prerequisite(s): WGS 1824 or WGS 1114
Instructional Contact Hours: (3 Lec, 3 Crd)

WGS 4334 - Sexual Medicine (3 credits)
Discusses sex and medicine in contemporary U.S. society. Explores how notions of sexual behavior and normality are defined and structured by medical discourse. Examines cultural institutions that play significant roles in formulating ideas about and definitions of deviance, perversity, and tolerated marginality. Critiques medical responses to sexual variations. Examines experiences of people who have sought out, or been the unwilling victims of, sexual medicine. Junior standing required.
Prerequisite(s): WGS 1824
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: STS 4334

WGS 4704 - Gender and Science (3 credits)
Investigates the gender dimensions of science in both historical and contemporary perspectives. Discusses feminist studies of science, exploring strengths and limitations. Assesses implications of cultural assumptions about gender for practicing scientists. A 3000 level course in science or engineering may satisfy prerequisite.
Prerequisite(s): WGS 2244 or STS 1504
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: STS 4704

WGS 4754 - Internship (1-6 credits)
Qualified students will be placed with a community agency or on-campus office which addresses contemporary issues of gender, class, and/or race, and will meet periodically with an appropriate faculty member to discuss assigned readings that will provide a context for the work experience. Students will also be expected to keep a journal and to write up a final evaluation of the experience. Variable credit: may be taken for up to 6 elective credits in the Womens Studies concentration. Junior standing, screening interviews with Tech faculty and with the service agency and consent required.
Prerequisite(s): WGS 1824
Instructional Contact Hours: (1-6 Lec, 1-6 Crd)
Repeatability: up to 6 credit hours

WGS 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

WGS 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

Instructional Contact Hours: Variable credit course

Financial Information

Auditing

Students are assessed the same rate for tuition and fees for auditing courses as for courses taken for credit.

Billing Statements (E-Bill)

Student Accounts are billed electronically. Current e-bills, e-bill history, and real-time current account activity are viewed in the e-billing system accessed through the student portal (Hokie SPA). E-bills are prepared at least monthly for new charges. Payment is required by due date on the statement to avoid penalties such as a late fee, registration hold, and cancellation of registration.

The initial e-bill for fall semester is posted mid-July and is due August 10. Updated e-bills are produced mid-August and again following the last day to add. Financial arrangements and payments must be in place to cover all charges no later than one week following the last day to add classes each semester to avoid cancellation of enrollment for the term. The initial e-bill for spring semester is posted in mid-December and is due January 10. After, a schedule similar to the fall e-bill schedule is followed. E-bills for the summer and winter terms will be posted at least one month prior to the start of each term.

Past due charges incur a late fee and will prevent access to drop/add and prevent pre-registration for the upcoming semester. In addition, past due charges from a prior semester incur finance charges.

Budget Tuition Plan

Virginia Tech's Budget Tuition Plan (BTP) offers a convenient method for planning and budgeting payment of tuition, fees, room, and board each semester. The BTP can cover all or part of the institutional charges. This plan provides the opportunity for the student or authorized family member to enroll in scheduled payments. The only cost for this service is a non-refundable application fee due with the application each semester. Students can join the BTP online through Hokie SPA. Please see **wallet.vt.edu** for additional information.

Bursar

The Office of the University Bursar is responsible for the billing of tuition, fees, housing, dining plans and many other student and related charges. Billing statements are electronically generated monthly (e-bill) and can be viewed on the student billing portal in Hokie SPA, where payment can be made by e-check, credit card, or payment plan if eligible. Payment can also be made by mail, in-person, or through Flywire (international payments).

Students may authorize parents or others as payers on their e-bill account. Unless revoked by the student, the payer receives the e-bill notification monthly and is able to view the account and make payments electronically to the student's account.

Release of Financial Information to a third party such as parent(s) and/or guardian(s) requires student authorization under the Family Educational Rights and Privacy Act (FERPA). The FERPA disclosure can be done via the Hokie SPA.

Detailed information is available on the Bursar's website www.bursar.vt.edu (http://www.bursar.vt.edu) and wallet.vt.edu.

Additional information on financial aid may be obtained by writing, calling, or visiting:

Virginia Tech Office of the University Bursar
Student Services Building, Suite 150
800 Washington St SW
Blacksburg, VA 24061
540-231-6277
Fax: 540-231-3238
bursar@vt.edu

Collection of Past Due Receivables for Students

Any amount owed to the university including, but not limited to, tuition, fees, room, board, loans, notes receivable, and amounts due for goods and services provided is considered a receivable to the university. A receivable becomes past due if payment is not received by the payment due date. At ninety days past due, the receivable becomes delinquent.

For currently enrolled students, the primary collection tool is the placement of a "**hold**" by the Office of the University Bursar on a student's record. This "**hold**" restricts certain student activities such as the ability to add or drop classes, receive diplomas, and registration for future academic terms. Once established, the "**hold**" remains in place until the debt is paid in full. When a student is no longer enrolled, the collection procedures utilized for other "non-student" receivables are implemented.

Individuals are responsible to pay all fees and charges owed to Virginia Tech. If the individual defaults on payment, has a returned check, e-check, or debit of said fees and charges, or has any delinquent amount owed, the individual must pay a penalty fee, interest at the highest rate allowed by law or as agreed to with Virginia Tech, and all reasonable administrative costs, collections fees, and attorney's fees incurred in the collection of amounts due the university. Students will be notified by an email sent to their Virginia Tech email address to alert them that a statement has been generated. Virginia Tech and their respective agents or contractors may contact individuals regarding any amounts owed, at the current or any future number provided for the cellular phone or other wireless device using automated telephone dialing equipment or artificial or pre-recorded voice or text messages.

Addresses must be kept current and can be changed by students as needed on Hokie SPA. Non-receipt of e-bill notification is not a valid defense for non-payment; it is the responsibility of the individual who has incurred the debt to see that the debt is discharged.

For non-students, a dunning message is included on each month's statement alerting the customer to the next collection steps that will be taken. If payment is not forthcoming within the stated period, the account and all pertinent information are forwarded to an outside collection agency for further collection efforts. In addition, the account is reported to national credit bureaus, thus affecting the debtor's credit rating.

In addition to the above measures, the university also lists the account with the Virginia Department of Taxation for set-off debt collection procedures. This means that any state income tax refund or payment processed through the State Treasurer's Office to the debtor will be reduced by the amount of the receivable owed by the debtor.

Eligibility for In-State Tuition

Eligibility for in-state tuition privileges and reduced rate tuition eligibility is governed by §§23.1-500 through 23.1-510 of the Code of Virginia. The provisions of §23.1-500 of the Code of Virginia are set forth, defined, and discussed in the State Council of Higher Education for Virginia's Domicile Guidelines **http://www.schev.edu/index/tuition-aid/in-state-residency/financial-aid-policy-and-procedures**. SCHEV developed these Guidelines to facilitate the consideration of uniform criteria in determining domiciliary status. §§23.1-500 through of the Code of Virginia places the responsibility on the student for establishing by clear and convincing evidence that s/he is eligible for the in-state tuition rate. Further, the burden is on the applicant to demonstrate by clear and convincing evidence that his/her domicile is Virginia and that s/he has abandoned any prior domicile. According to SCHEV's Guidelines, clear and convincing evidence is defined as "that degree of proof that will produce a firm conviction or a firm belief as to the facts sought to be established. The evidence must justify the claim both clearly and convincingly." Please visit SCHEV's website at **http://www.schev.edu/index/tuition-aid/in-state-residency** for additional information.

Residence or physical presence in Virginia primarily to attend the university does not entitle students to in-state tuition rates. Domicile for tuition purposes should be established before one enters the University. Please note that if a student enters the University classified as an out-of-state student, the student must present clear and convincing evidence to rebut the presumption that they are residing in the state primarily to attend school. Students seeking reclassification to in-state status must be prepared to pay the out-of-state tuition rate unless they are notified in writing that their status has been reclassified to in-state tuition.

Domicile classification is determined at the time of a student's admission to Virginia Tech. Undergraduate transfer and freshman applicants for admission apply for in-state status at the time they apply to Virginia Tech. For additional information please contact:

Office of Undergraduate Admissions
925 Prices Fork Road, Mail Code 0202
Blacksburg, VA 24061
https://vt.edu/admissions/undergraduate.html
(540) 231-6267
domicile@vt.edu

Continuing or returning undergraduate students classified as out of state who believe they qualify for in-state tuition may apply for changes in residency status through the Office of the University Registrar by completing the Application for Virginia in-state tuition rates. Applications must be received prior to the first day of class for the semester that in-state tuition privileges are sought. Please email **residency@vt.edu** for additional information. For additional information please contact:

Office of the University Registrar
Suite 250 Student Services Building
800 Washington Street, SW, Mail Code 0134
Blacksburg, VA 24061
www.registrar.vt.edu
(540) 231-6252
residency@vt.edu

The regulations governing domicile are determined by state law, and are therefore subject to change. The information stated herein is not intended to be a contract between a student and Virginia Tech but is provided for informational purposes only.

Eligibility for In-State Tuition Rates through the Veterans' Choice Act of 2014

A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill® – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill®), of Title 38, United States Code, who lives in the Commonwealth of Virginia while attending a school located in the Commonwealth of Virginia (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge from a period of active duty service of 90 days or more. *GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA).*

Anyone using transferred Post-9/11 GI Bill® benefits (38 U.S.C. § 3319) who lives in the Commonwealth of Virginia while attending a school located in the Commonwealth of Virginia (regardless of his/her formal State of residence) and enrolls in the school within three years of the transferor's discharge from a period of active duty service of 90 days or more.

Anyone using transferred Post-9/11 GI Bill® benefits who lives in the state where the IHL is located and the transferor is a member of the uniformed service who is serving on active duty.

A spouse or child using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in the Commonwealth of Virginia while attending a school located in the Commonwealth of Virginia (regardless of his/her formal State of residence).

An individual using educational assistance under chapter 31, Vocational Rehabilitation and Employment (VR&E) who lives in the Commonwealth of Virginia while attending a school located in the Commonwealth of Virginia (regardless of his/her formal State of residence) effective for courses, semesters, or terms beginning after March 1, 2019.

Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same institution. The person so described must have enrolled in the institution prior to the expiration of the three-year period following discharge or release as described above and must be using educational benefits under either chapter 30, chapter 33, or chapter 31 of title 38, United States Code.

Grievance Policy

"The Virginia State Approving Agency (SAA), is the approving authority of education and training programs for Virginia. Our office investigates complaints of GI Bill® beneficiaries. While most complaints should initially follow the school grievance policy, if the situation cannot be resolved at the school, the beneficiary should contact our office via email **saa@dvs.virginia.gov**."

Enrollment Status (Full Time)

Certification of full-time student status, for most purposes, U.S. Department of Veterans Affairs (V.A.) educational benefits, Social Security benefits, loans, scholarships, and grants, is based on the following enrollment information: official undergraduate and College of Veterinary Medicine enrollment for each regular semester must be 12 or more credit hours and official graduate enrollment for each regular semester must be 9 or more credit hours. All courses must be in the A/F option, P/F option, or equivalent credit. Please note that courses taken under the audit option do not count toward the enrollment status. Participation in the Virginia Tech Cooperative Education program, National Student Exchange program, and International Student Exchange program reflects full-time enrollment. Certification of enrollment for V.A. educational benefits will reflect only those hours considered to be progress toward the degree or educational objective. Although considered to be enrolled full-time, students who participate in the Cooperative Education program are not eligible for V.A. educational benefits or federal financial aid during the terms in which they participate in the Co-Op program.

Students Receiving Veterans Education Benefits

Once Virginia Tech receives a valid VA authorization, such as a VAF 28-1905 for Chapter 31 VR&E beneficiaries, Certificate of Eligibility (COE) or "Statement of Benefits" for Chapter 33 Post 9/11 GI Bill® recipients, and the student has submitted a request to use such entitlement, the covered student will be permitted to participate in the approved course(s) while awaiting payment from the VA for a period of 90 days from the date Virginia Tech submits a valid invoice for tuition/fees (T&F) to VA. For attendance costs a student's Veterans Affairs benefits will cover, Virginia Tech will not impose any penalty, including the assessment of late fees; the denial of access to classes, libraries or other institutional facilities; or require any covered individual to borrow additional funds due to delayed T&F payments from the VA.

Medical Resignations

A student resigning for medical reasons will be charged a daily tuition rate for each day enrolled.

Resignations for medical reasons must be accompanied by a recommendation from Schiffert Health Center or Cook Counseling Center at Virginia Tech or a medical professional indicating the student is unable to continue in school due to medical reasons. Recommendations should be forwarded to the student's academic dean. It is the purview of the Academic Dean to approve the recommendation.

Military Withdrawals

Students called into active military duty are encouraged to communicate with their advisors, instructors, and undergraduate or graduate deans to arrange "incompletes" or rescheduling of remaining work if their orders are received near the end of a term. However, if students request a withdrawal from the university, permission is granted without punitive action as well as granting a full refund of tuition and fees. This full refund is requested regardless of the date of the action of withdrawal. Procedurally, students (or their parents or guardians) are requested to provide copies of activation orders. If orders are unobtainable (in some emergency call-ups, this is possible), the University Registrar will telephone the company commander for verbal confirmation. Further, the University Registrar will serve as facilitator of this process for any advisor, instructor, or dean seeking verification of the students' military status. Students with Federal Financial Aid should be advised that full refund of tuition will result in an immediate requirement to commence repayment of aid. Students with federal financial aid are to be given the option of full or partial refund. Students are to work with their advisors and deans in requesting reinstatement to the university.

Reinstatement: All students leaving under the military withdrawal policy are entitled to reinstatement into the same program of study. Students are directed to seek advising from their advisors or academic deans.

If absent more than five years, certain majors may require re-taking of specific major courses.

Defer Initial Enrollment: Students called up for active duty may defer initial enrollment (in the same major) if:

- The student returns to Virginia Tech after a cumulative absence of not more than five years, and
- The student provides notice of intent to return to Virginia Tech not later than three years after completion of the period of service.

Payment Directions

The most efficient and direct methods of payment include electronic payments as accessible in the e-bill system and the Budget Tuition Plan.

If paying by mail, please make the check payable to Treasurer of Virginia Tech. Print the PDF version of the e-bill and enclose the remittance advice with your check to ensure proper payment application. Mail to:

Virginia Tech Office of the University Bursar
Student Services Building, Suite 150
800 Washington Street SW
Blacksburg, VA 24061

When mailing payment, please do not send cash. See wallet.vt.edu (http://wallet.vt.edu/) for additional payment options.

Refund Policy

Virginia Tech requires that payment of wages or salaries, travel or expense reimbursement, and student refunds be processed by direct deposit into an account in the name of the student at a financial institution in the United States designated by the student. The student can enroll in direct deposit online through Hokie SPA under the Hokie Wallet menu. Refund processing priority is given to students enrolled in direct deposit. If the student has not provided bank account information, a refund check will be mailed to the permanent address listed on Hokie SPA at the time the refund is processed. Requests for replacement refund checks must be in writing and will not be accepted until 14 calendar days after the date the original check was issued and mailed.

Refunds (Room and Board)

Students holding a residence hall contract who leave the university during the first week of class will forfeit $100 of their residence hall fee. Thereafter, the semester room charge, less $100, will be apportioned over the first six weeks of the semester. A student who withdraws after the Friday of the sixth week of the semester will be charged the full room and board rate. Any eligible refund accrual is based on the room check-out date.

Students who purchase a declining balance dining plan will be charged a forfeiture fee of $100 during the first week for a Major, Mega, or Premium dining plan and $35 during the first week for a Minor Flex or Commuter Cash dining plan. Beginning in week two and throughout the remainder of the semester, students will forfeit the base cost and will be refunded any unused dollars in the declining balance account. Commuter Cash dining plan holders will receive a refund of the remaining dollars on the plan less a $35 forfeiture fee. Refunds are calculated from the date the resignation is processed by the university or the last day of dining plan use, whichever is later. No refund will be granted for a resignation backdated for a previous semester.

Students with a balance in a Dining Dollars, Flex Additions, or Hokie Passport account will receive a credit on their student account of the balance less a $15 processing fee per account. Questions concerning adjustments to room charges should be directed to Housing Services at (540) 231-6205. Questions concerning adjustments to dining plan charges should be directed to Hokie Passport Services at (540) 231-5121.

Refunds (Tuition)

The refund schedules below list the student refund for withdrawals, resignations, and reduced course load for the fall and spring semesters. Schedules by calendar day as well as schedules for winter and summer are published on the bursar's website under Refund Policy. Students considering reducing their course load or resigning should always review examples of the calculation of any refund before actually dropping the course or resigning. Students receiving financial aid should contact the University Scholarships & Financial Aid Office prior to dropping the course to determine the impact on their financial aid.

Fees are defined as the comprehensive fees (full or part time) and any laboratory or resource fee associated with a particular course. When dropping a course, please note the non-refundable nature of fees after the first week of classes. Tuition and fee refunds for resignations are based on the effective date of resignation. If there is a question related to the effective date of resignation, the student should contact their college.

Tuition Refund Schedule for Reduced Course Loads

Semester Class Day	Student Refund
One - Five	100% of Tuition and Fees
Six - Eight	90% of Tuition and Fees
Nine - Nineteen	50% of Tuition and Fees
Twenty - Thirty-Seven	25% of Tuition and Fees
After day Thirty-Seven	0%

Tuition Refund Schedule for Withdrawals & Resignations

Semester Class Day	Student Refund
One	100% of Tuition and Fees
Two - Eight	90% of Tuition and Fees
Nine - Nineteen	50% of Tuition and Fees
Twenty - Thirty-Seven	25% of Tuition and Fees
After day Thirty-Seven	0%

- All refunds will be calculated from the official date of resignation, which may not necessarily be the last day of class attendance. No refund will be granted for retroactive/back-dated resignations.

Financial Aid & Programs

Virginia Tech awards financial aid to eligible students in the form of scholarships, grants, loans, and employment. The majority of financial aid is intended for fulltime students with financial need.

To apply, entering freshmen, transfer students and returning Virginia Tech students should submit the Free Application for Federal Student Aid (FAFSA) electronically at www.studentaid.gov (https://www.undergradcatalog.registrar.vt.edu/2122/www.studentaid.gov). The Office of University Scholarships and Financial Aid's priority deadline is March 1 for the upcoming academic year. The FAFSA opens on October 1 each year.

The priority deadline applies to all financial aid programs except the Federal Pell Grant, Federal Direct Subsidized and Unsubsidized, Federal Direct Grad PLUS and Federal Direct Parent PLUS Loan Programs.

Applicants for scholarships and financial aid must select Virginia Polytechnic Institute & State University or enter VT's institutional school code number, 003754, on the FAFSA for FAFSA results to be sent to Virginia Tech. Students must complete and submit a new FAFSA each year to be considered for financial aid at Virginia Tech.

All offers of financial aid are contingent upon receipt of anticipated federal and state funds by the university. Awards may be reduced or canceled if anticipated funds are not received. Offers of financial aid are subject to full-time enrollment (12 credit hours per term for undergraduates and 9 credit hours per term for graduate students) and the student meeting Satisfactory Academic Progress Policy requirements.

Eligibility Requirements

To be eligible to receive aid from institutional, state, and federal need-based programs, an applicant must meet the following eligibility requirements: enroll or be accepted for enrollment as a degree-seeking student; be a U.S. citizen or an eligible non-citizen; submit a complete FAFSA; and meet the financial aid Satisfactory Academic Progress Policy for Title IV recipients. Full-time enrollment is required for the majority of federal, state, and institutional programs. Students should consult with a financial aid advisor to determine how financial aid will be impacted for less than full time enrollment.

Federal Title IV Programs

The FAFSA is the application for all federal financial aid programs.

Federal Work-Study Program: This federal program provides employment opportunities to students with demonstrated financial need. Eligible undergraduate and graduate students are limited to 20 hours of work per week while classes are in session. All Federal Work-Study Program jobs pay at least minimum wage.

Federal Direct Loan Programs: This federal program encompasses Federal Subsidized, Unsubsidized, Graduate PLUS, and Parent PLUS Loans.

- Federal Subsidized and Unsubsidized Loans are long-term; low-interest loans guaranteed by the federal government for the educational expenses of eligible students enrolled at least half-time. Repayment begins six months after the student ceases at least half-time enrollment.
- Federal Parent PLUS Loans are available to parents of undergraduate dependent students enrolled at least half-time. Parents may borrow up to the cost of attendance minus any financial aid for which the student qualifies. You must apply at www.studentaid.gov (https://www.undergradcatalog.registrar.vt.edu/2122/www.studentaid.gov) and an approved credit check is required.
- Federal Graduate PLUS Loans provide additional loan funds to graduate students that have exhausted eligibility in the Federal Unsubsidized Student Loan Program. You must apply at www.studentaid.gov (https://www.undergradcatalog.registrar.vt.edu/2122/www.studentaid.gov) and an approved credit check is required.

Federal Pell Grant Program: Federal Pell Grants are awarded to undergraduate students with high financial need. This program provides grant support to lower income families. Students must be pursuing a first bachelor's degree to receive the Federal Pell Grant.

Federal Supplemental Educational Opportunity Grant: Virginia Tech awards this federal grant to undergraduate students with extraordinary financial need. These funds are restricted to Pell-eligible students.

Commonwealth of Virginia Programs

Virginia Guaranteed Assistance Program: Grants of up to the cost of tuition are awarded by Virginia Tech from funds administered by the State Council of Higher Education for Virginia. Awards are made to eligible undergraduate residents of Virginia with demonstrated financial need. The list of requirements for this grant are available on our website.

Commonwealth Award: Awards are made by Virginia Tech from funds administered by the State Council of Higher Education for Virginia to Virginia residents seeking a first bachelor's degree with demonstrated financial need. The list of requirements for this grant are available on our website.

Two-Year College Transfer Grant: The Two-Year College Transfer Grant is administered by the State Council of Higher Education for Virginia. These grants are for undergraduate state residents who transfer from a community college with a 3.0 Grade Point Average (GPA) after completing an Associate's Degree at a Virginia two-year public institution. Recipients must maintain a 3.0 GPA and meet other requirements listed on our website.

The Virginia Military Survivors and Dependent Education Program: The Virginia Military Survivors and Dependents Education Program provides tuition and fee educational assistance for a maximum of 8 semesters or four academic years to spouses and children of military service members killed, missing in action, taken prisoner, or who became at least 90 percent disabled as a result of military service in an armed conflict. This program was formerly named the Virginia War Orphans Education Program. To be eligible for assistance, application is made to the Virginia Department of Veterans Services.

Academic Scholarships and Grants: Scholarships are for select undergraduate students who establish an outstanding academic record, including incoming freshmen, through colleges and academic departments. Please refer to the scholarship section of our website for additional information. USFA offers the General Scholarship application through the electronic Scholarship Central portal at https://finaid.vt.edu (https://finaid.vt.edu/). This application is available August 1 and **the deadline is January 22**.

Athletic Scholarships: Admission and enrollment of students who are candidates for financial aid for which athletic ability is a consideration shall be conditional upon compliance with applicable regulations of the Atlantic Coast Conference and the National Collegiate Athletic Association.

Veterans Affairs Educational Benefits (GI Bill®): Applicants who wish to receive VA Educational Benefits should contact the Office of Veterans Services or visit www.veterans.vt.edu (https://www.undergradcatalog.registrar.vt.edu/2122/www.veterans.vt.edu). Application information for veterans' benefits may be obtained from the nearest regional office of the Veterans' Administration. Students must enroll for a minimum of 12 credits each term to receive benefits as full-time students.

General Information

Mission of the University

Inspired by our land-grant identity and guided by our motto, Ut Prosim (That I May Serve), Virginia Tech is an inclusive community of knowledge, discovery, and creativity dedicated to improving the quality of life and the human condition within the Commonwealth of Virginia and throughout the world.

Athletics, Intramurals, and Recreational Facilities

Virginia Tech has a diverse and highly active athletic program for men and women students in intercollegiate, intramural, and extramural sports. The athletic program is recognized as one of the most successful in the nation because it is geared to meet the needs of all students interested in physical and recreational sports activity.

The university has extensive and modern athletic and recreational facilities, including:

- Cassell Coliseum, an indoor arena seating 8,925
- Lane Stadium, seating 65,632
- a fully equipped recreation gymnasium, including War Memorial Pool
- Rector Field House
- Burrows-Burleson Tennis Center
- English Field at Atlantic Union Bank Park
- outdoor tennis courts
- the Pete Dye River Course of Virginia Tech and Virginia Tech Golf Course
- Johnson-Miller Track Complex
- Thompson Field for Soccer/Lacrosse
- Tech Softball Park
- a pond for ice skating in the winter
- South Recreation Field Area for outdoor sports

Virginia Tech's athletic varsity teams compete at the Division I level of the National Collegiate Athletic Association (NCAA). The university participates in the Atlantic Coast Conference for all varsity sports. Athletic scholarships are available in the following intercollegiate sports:

- Baseball (men)
- Basketball (men and women)
- Football (men)
- Golf (men and women)
- Lacrosse (women)
- Soccer (men and women)
- Softball (women)
- Swimming and Diving (men and women)
- Tennis (men and women)
- Indoor/Outdoor Track and Field/Cross Country (men and women)
- Volleyball (women)
- Wrestling (men)

The following extramural sports clubs also are available:

- baseball (men's)
- basketball
- bowling
- clay target
- competitive cheerleading
- crew
- cricket
- cycling
- equestrian
- fencing
- golf
- women's field hockey
- gymnastics
- ice hockey
- lacrosse
- roller hockey
- rugby
- soccer
- softball (women's)
- snow skiing
- tennis
- triathlon
- volleyball
- water polo
- wakeboard

Virginia Tech offers a wide range of intramural and recreational programs for men and women including the following sports:

- basketball
- billiards
- bowling
- chess
- dodgeball
- fantasy football
- flag football
- hearts tournament

- racquetball
- golf
- innertube water polo
- kickball
- soccer
- softball
- swimming
- table tennis
- tennis
- team darts
- ultimate frisbee
- volleyball
- wallyball
- wiffleball

Venture Out provides fun, safe, and educational outdoor services to the university community. Venture Out specializes in low-risk outdoor adventures, quality rental gear at unbeatable rates, and valuable resource materials. Venture Out is a healthy recreational alternative and allows the university community to enjoy all that Southwest Virginia has to offer, from hiking and camping, to kayaking, horseback riding, mountain biking, and skiing.

Venture Out
Phone: (540) 231-4982
E-mail: ventureout@vt.edu
Web: www.recsports.vt.edu/content/venture-out (http://www.recsports.vt.edu/content/venture-out/)

Cadet System

The Virginia Tech Corps of Cadets is one of only two programs in the United States offering a corps of cadets within a large public university. The Corps of Cadets (https://vtcc.vt.edu/), a militarily structured organization, offers many leadership development opportunities to both male and female students. The Rice Center for Leader Development offers a minor in leadership studies. Contact CAPT Jamie McGrath, USN(Ret), Director, (540) 231-9455 for additional information on the Rice Center.

The Corps is supervised by the Commandant of Cadets, who establishes overall policies and methods of operation for the Corps. The cadet commanders and staff officers are responsible for implementation of policies and procedures and the day-to-day operations of the Corps.

Membership in the Corps involves a 24-hour-a-day commitment. Members wear a distinctive Virginia Tech cadet uniform and live in designated cadet residence halls. Both cadets and non-cadets are part of one student body, attend the same classes, and are organized into one student government. Cadets participate in all university activities, including athletics, social events, and cultural programs. Membership in the Cadet Regimental Band, the "Highty-Tighties," is restricted to cadets. Although many benefits are available through participation in one of the three ROTC programs offered at Tech, a student does not have to enroll in an ROTC program to be a member of the Corps of Cadets.

Career and Professional Development

Career and Professional Development works with students of all academic levels and all majors/degree programs to assist with the following:

- **Making career decisions and plans.** Whether students are trying to decide on an academic major or a career field, Career Advisors on staff are ready to assist. Self-assessment tools are used to help students identify their unique strengths, interests, values, and personality type. Students can find a variety of career information through the Career and Professional Development web site (www.career.vt.edu (http://www.career.vt.edu)) and in the Career Resource Library in the Smith Career Center.
- **Gaining career-related experience while in school.** Increasingly, employers expect students to have experience in their chosen field before graduation. In addition to administering the Cooperative Education and Internship Program (detailed below) and Campus internEXP (an on-campus internship program), Career and Professional Development provides hundreds of internship job listings through Handshake, their on-line resume referral and job listing database.
- **Determining post-graduation career plans.** This typically involves seeking full-time employment or applying to graduate or professional school. Career and Professional Development offers a full range of services related to educating students about the job search process including resume and cover letter critiques, practice interviews, seminars on business etiquette, and more. Through Handshake, students have access to thousands of job listings and opportunities to connect with employers through the On-Campus Interviewing Program. Additionally, Health Professions Advising is located within Career and Professional Development and is dedicated to assisting students who are interested in continuing their education to pursue a health-related occupation. (www.career.vt.edu/hpa (http://www.career.vt.edu/hpa/))

Information about all of Career and Professional Development's resources, services and programs - including an events calendar - is located at www.career.vt.edu (http://www.career.vt.edu). To meet with a Career Advisor to discuss any of these topics, students can schedule an appointment through Handshake, by calling (540) 231-6241, or by visiting Career and Professional Development. Career and Professional Development is located in the Smith Career Center on the corner of Washington Street and West Campus Drive.

Cooperative Education & Internship Program

The Cooperative Education & Internship Program (CEIP) is an academic program that provides students the opportunity to combine real world work experience with classroom theory. It involves one or more semesters of paid or unpaid, full-time or part-time work and is a partnership among the student, Career and Professional Development, the academic department, and the employer. Gaining career-related experience gives the cooperative education or internship student the opportunity to test career goals, develop key experiences and skills, defray the costs of a college education, and gain an important edge for the post-graduation job market. The student transcript will indicate Cooperative Education and Internship Program enrollment during the term(s) worked.

The CEIP Orientation is required of all students who plan to enroll in the Cooperative Education & Internship Program. Seminars are scheduled throughout the year and are designed to walk prospective co-op and internship students through the process of enrollment in the CEIP. Please call (540) 231-6241 or visit career.vt.edu/experience/ceip.html (http://career.vt.edu/experience/ceip.html) to find out more.

Requirements for Participation in the CEIP

- Students must maintain a cumulative GPA of 2.0.
- Students can begin work the summer after their freshman year. Transfer students must have completed at least one semester and earned a GPA of at least 2.0 at Virginia Tech.
- The co-op or internship job can be a full-time or part-time opportunity.

Additional Notes

- The CEIP is open to any undergraduate student in any major.
- The Graduate School administers the graduate Co-op and Internship Program.
- To see where our current students are working, visit https://reports.career.vt.edu/EmployersListByMajor?orderBy=ASC&sortBy=StudentMajor (https://reports.career.vt.edu/EmployersListByMajor/?orderBy=ASC&sortBy=StudentMajor)

Counseling Center (Thomas E. Cook Counseling Center)

2475 Oak Lane, 107 East Eggleston Hall, 202 S. Main Street (Kent Square), 4505 North End Center, Riverside 1- 2nd floor, Roanoke; and National Capital Region (Falls Church campus)

The Thomas E. Cook Counseling Center is accredited by the International Association of Counseling Services and provides a full range of mental health services to all undergraduate and graduate students on the Blacksburg campus and the Roanoke (Riverside 1) campus. Services include crisis intervention, individual and group counseling, and psychiatric care. Cook Counseling Center also offers consultation services for students, parents, faculty, and staff; 24/7 after-hours emergency on-call services; mental health outreach including peer assistance programs; and online screenings.

The Cook Counseling Center consists of a multidisciplinary staff and all services are provided under the direction of licensed, credentialed and experienced mental health professionals and support staff. Confidentiality is an essential aspect of the counseling relationship between Cook Counseling Center staff and students. Confidentiality in the counseling relationship is protected by ethical principles and under legislative code in the Commonwealth of Virginia; information shared in counseling may only be released with the written permission of the student.

Through the provision of mental health services, the Cook Counseling Center provides opportunities for students to learn more about themselves as individuals, form deeper relationships with their peers, and grow to benefit our community and society-at-large. Cook staff members are aware of and respect cultural, individual, and role differences, including those based on age, gender, gender identity, race, ethnicity, culture, national origin, religion, sexual orientation, gender expression, disability, language, and socioeconomic status and consider these factors when working with students.

The Cook Counseling Center services are covered by payment of the student health fee. An appointment can be made by calling (540) 231-6557 or stopping by the office located in 2475 Oak Lane.

Cook Counseling Center | 540-231-6557 | ucc.vt.edu (http://ucc.vt.edu) | counseling@vt.edu

Cultural and Community Centers

As a department within Student Affairs, Cultural and Community Centers' programs, policies, and personnel create the conditions for underrepresented student success and to develop the cultural competence of every Virginia Tech student. We achieve this mission through advocacy, advising, and awareness.

Cultural and Community Centers hosts six centers, all located in the Squires Student Center. Students of every culture are encouraged to visit the centers and engage in conversation. The centers are:

- American Indian and Indigenous Community Center (AIICC)
- Asian Cultural Engagement Center
- Black Cultural Center
- El Centro Hispanic/Latino Center
- Intercultural Engagement Center
- LGBTQ+ Resource Center

Cultural and Community Centers' hosts a Community Kick-Off each fall to welcome students, faculty, and staff in identity-based communities, history and heritage months, and cultural achievement ceremonies each spring.

In addition, our team is available to provide informal advising to any student or student organization that feels they might fit within the scope of our mission.

Through programs and events, Cultural and Community Centers increases awareness of underrepresented students' experiences and develops opportunities to gain cultural competence for every Virginia Tech Student.

Cultural and Community Centers | 540-231-8584 | ccc.vt.edu (http://ccc.vt.edu) | vtccc@vt.edu

Dean of Students Office

The Dean of Students office serves as advocates for students and their support networks in times of personal, academic, and community crisis.

We know that life doesn't stop while students are in college. When life throws challenges in students' way, we're here to help them create plans, connect to resources, and gain the confidence to get back on track. We work with students, families, friends, and faculty. We're a friendly, caring team ready to listen and assist. We welcome referrals, appointments, and walk-ins.

A member of the Dean's Staff is on-call 24 hours a day, seven days a week. Between the hours of 8 a.m. and 5 p.m., call the Dean of Students office at 540-231-3787. After hours, the on-call staff member from Dean's Staff may be reached by calling the Virginia Tech Police at 540-231-6411, press 1.

Dean of Students | 540-231-3787 | dos.vt.edu (http://dos.vt.edu) | dean.students@vt.edu

First-Year Experiences

Virginia Tech's signature first-year experience (FYE@VT) initiative includes courses specific for first time first-year and transfer students. Uniquely housed in the academic unit, and each uniquely consistent with the strategic direction, mission, and culture of that unit; these courses support students in their academic transition to college by introducing

them to their chosen discipline/major, faculty in their major, and available resources on campus.

The courses are anchored by four foundational Cornerstones:

- **Academic transition** - introduce the discipline, the practice of learning from experience, and the resources for successful academic transition to Virginia Tech;
- **Holistic education** - integrate experiences inside and outside of the classroom for a meaningful, holistic student experience;
- **Integrity** - develop academic and personal integrity; and
- **Community** - foster a connection to the discipline and to Virginia Tech.

FYE@VT offers students integrated academic and social opportunities designed to promote the complex thinking and ethical abilities necessary for success in a global community. These opportunities enable students to investigate the world around them, resulting in a stronger sense of self, values, community and potential. FYE@VT leverages five essential practices for transitioning students to learn skills necessary to be successful in the discipline.

1. **Effective Teaching & Learning** FYE@VT courses are intentionally designed to use research-based learning experiences to foster student engagement and to support the development and success of first-year students.
2. **Virginia Tech Principles of Community** FYE@VT courses introduce students to and are conducted in the spirit of the Virginia Tech Principles of Community and Ut Prosim (That I May Serve).
3. **Mentorship & Engagement** FYE@VT courses demonstrate diverse ways of reinforcing an engaged campus through connecting students to curricular, social, co-curricular and cultural enrichment opportunities.
4. **Digital & Information Literacies** FYE@VT courses help students create connections with University Libraries to enhance their ability to discover, create, reflect, evaluate, and communicate knowledge to diverse audiences.
5. **Undergraduate Academic Integrity** FYE@VT courses support individual understanding and the ability to adhere to the principles of academic integrity when using and/or creating information in accordance with the Virginia Tech Honor Code and professional norms of their field.

A description of each program with contact information can be found at http://www.fye.vt.edu.

Global Travel Insurance & Emergency Assistance

Under University Policy 1070, http://www.policies.vt.edu/1070.pdf , all Virginia Tech students participating in university supported global travel are required to carry international medical and emergency assistance insurance. To meet this requirement, the university has contracted with an insurance provider CISI.

Some of the benefits of the Cultural Insurance Services International (CISI) policy include:

- Security & Natural Disaster Evacuation
- Repatriation
- Emergency Medical expenses, medical evacuation, & medical reunion

Those traveling internationally in a group for a formal education and study abroad program should refer to the Virginia Tech Global Education website at https://www.globaleducation.vt.edu for insurance requirements.

Those traveling internationally on Virginia Tech business, not in a study abroad program, should refer to Virginia Tech Risk Management website at http://risk.controller.vt.edu/vi/international.html.

Honor Code and Honor System

The Honor Code is the university policy which defines the expected standards of conduct in academic affairs. The Virginia Tech Honor Code embodies a spirit of mutual trust and intellectual honesty that is central to the very nature of the university and represents the highest possible expression of shared values among the members of the university community.

The fundamental beliefs underlying and reflected in the Honor Code are: that trust in a person is a positive force in making that person worthy of trust, that every student has the right to live in an academic environment that is free from the injustices caused by any form of intellectual dishonesty, and that the honesty and integrity of all members of the university community contribute to its quest for truth.

The functions of the Honor System are to communicate the meaning and importance of intellectual honesty to all students of the university; to articulate and support the interest of the community in maintaining the highest standards of conduct in academic affairs; and to identify, sanction, and educate those who fail to live up to the stated expectation of the university community with regard to these standards. (Please see the "Academics (p. 9)" section of this catalog for details relating to the Honor Code and System.)

Information Technology

The Division of Information Technology (it.vt.edu (http://it.vt.edu)) supports the university's computing and communications needs by providing integrated networks for data and voice communications, and services to meet Virginia Tech's instructional technology, enterprise-scale administrative processing, software procurement and support, research computing, and IT support needs. The 4help.vt.edu (http://4help.vt.edu) portal is the starting point for IT support, connecting users with direct support as well as to guides on specific tools and services.

The data network provides rapid access to cloud services, email, class materials, library databases, and the internet for every resident in university housing. Wireless access (WiFi) is available in all academic and administrative spaces across campus, as well as in many outdoor spaces. WiFi facilitates mobility across the campus and, in conjunction with the university computer requirement for hardware and software, is essential to improve the effectiveness of teaching and learning.

Virginia Tech is committed to using information technology to enhance teaching and learning and works to ensure that members of our teaching faculty have the ability to use information technology effectively. We provide continuing opportunities to learn about and incorporate both established and emerging technologies to enhance learning outcomes for students through the services provided at tlos.vt.edu (http://tlos.vt.edu). The division supports learning through our learning management system, online course evaluations, accessibility and professional development training, and support for videoconferencing and recorded media. The

required undergraduate student software bundle and other instruction-related software are offered at favorable pricing to students.

Direct IT support is provided to students through the 24x7 help resource, 4Help (4help.vt.edu (http://4help.vt.edu)). Classes and tutorials on software and many other skills are available on demand through LinkedIn Learning (linkedinlearning.vt.edu (http://linkedinlearning.vt.edu)). Computer labs offer additional options for collaboration and for access to highly specialized software. Each student is provided an email account and access to online tools from Google and Microsoft.

OneCampus (onecampus.vt.edu (http://onecampus.vt.edu)) provides secure access to personal information, including course materials, individual contact information, and billing and account information. On all platforms, security is overseen by the IT Security Office, and is protected through strong password, access, and identity management protocols, which are incorporated into the development of new applications.

Information Technology facilitates undergraduate, graduate, and faculty research through high performance computing, machine learning, acquisition of specialized research software, and collaborative research, as well as through ongoing professional development support.

For more on the Division of Information Technology, visit our website at it.vt.edu (http://it.vt.edu).

Living and Dining On-Campus

Housing and Residence Life

Virginia Tech's Housing and Residence Life operates 47 on-campus residence halls housing more than 9,300 residents. Our goal is to provide inclusive communities, foster a culture of learning, offer safe, clean, well-maintained living environments, and provide exceptional service.

A residence hall is more than just a place to sleep. The on-campus experience is enriched by the initiatives and engagement of our resident student staff and our professional and para-professional staff who live in the residence halls. We have three faculty principals living within residential colleges and many other faculty involved in the residential colleges and other living-learning communities.

To support such a dynamic environment, HRL has a complete facilities operation that includes maintenance, housekeeping, lock shop, renovations, fire and safety compliance, and warehousing. Occupancy management oversees assignments and contracting, resident communications, and general services.

All first-year students live on campus unless they fall into one of the following categories: those living with parents or other close relatives, those who are married and living with their spouses, veterans of at least six months of military service, or those who are at least 21 years old. Written requests for exceptions to this policy should be directed to Housing and Residence Life in 144 New Hall West, (0428).

Campus housing is also available, but not guaranteed, for other students. Transfer and graduate/professional students may request housing through an online wait list. A lottery-style housing application process is held each spring to allocate residential space to returning undergraduate students who wish to live on campus.

Housing and Residence Life | 540-231-6205 | housing.vt.edu (http://www.housing.vt.edu) | housing@vt.edu

Virginia Tech Off-Campus Housing

Virginia Tech Off-Campus Housing (VTOCH) provides students with resources, programs, and services to assist with their off-campus housing needs including a comprehensive searchable online database. a wonderful resource to begin. VTOCH maintains information on local apartments, realtors, transportation, and issues affecting renters today. VTOCH hosts two housing fairs each year so students can get up close and personal with rental options and roommate fairs so students can make connections with others to share living expenses.On the VTOCH website, users can find detailed information about people looking for or offering housing, ways to research housing options, roommates, furniture for sale, or ride requests. VTOCH also provides detailed information about apartment and realty companies in the Blacksburg area.

Twice each year, in the fall and in the spring, VTOCH hosts the Virginia Tech Off-Campus Housing Fair, where students, faculty, staff, and community members are able to interact with local property managers to view options for the following academic year. Additionally, other important housing-related companies will be in attendance, so guests can have conversations about their rights and responsibilities as tenants, renters insurance, utilities, and town relations. If you plan to move off-campus or just wants to see what your options are, plan to attend this once-a-semester free event.

Virginia Tech Off-Campus Housing | 540-231-3466 | www.campuslife.vt.edu/vtoch/ (http://www.campuslife.vt.edu/vtoch/) | vtoch@vt.edu

Dining Services

Virginia Tech has built a reputation for outstanding dining. Our dining program remains at the leading edge of national trends and maintains a tradition of award-winning events, programs, venues, and service. Students report high overall satisfaction and appreciate the variety of dining options available on campus. Recent customer comments such as "I brag about our food service to my friends and family" illustrate that Virginia Tech students share our pride in the dining program. Extensive online information on nutrition, special diets, and food allergies helps students plan their eating.

With more than 19,000 dining plan holders, Dining Services serves approximately 7.5 million meals per year, with total on-campus sales of $65 million annually.

Numerous dining options are available for both on-campus and off-campus students, as well as for faculty, staff, and campus visitors. All on-campus residents choose an individual Major, Mega, or Premium Flex Plan. Off-campus students may select one of six individual dining plans or participate in the Dining Dollars program. More than 11,000 off-campus students opt to have a dining plan each year.

Dining at Virginia Tech is anything but traditional. The award-winning dining program specializes in preparing diverse menus in innovative, exciting venues:

- **Au Bon Pain** operates dining venues in three campus locations.
  - Au Bon Pain in the Squires Food Court at Squires Student Center serves distinctive bakery items, upscale sandwiches, and signature soups.
  - Au Bon Pain at the Graduate Life Center serves many of the same bakery and sandwich options, as well as grab-n-go items, as the cafe in Squires Student Center. This location serves students living and studying in the Graduate Life Center.

    - Au Bon Pain at Goodwin Hall offers students on the academic side of campus a dining option that serves many of the same items as the location in Squires Student Center.
- **Burger '37** in the Squires Food Court at Squires Student Center offers gourmet beef, turkey, and vegetarian burgers, hand-cut fries, and classic shakes.
- **D2** at Dietrick Hall takes traditional dining to the next level by combining all-you-care-to-eat dining with the variety of an international marketplace and includes a shop dedicated to gluten-free, vegetarian, and vegan specialties.
- **Deet's Place** at Dietrick Hall is a gourmet coffee, ice cream, and pastry shop, complete with award-winning coffee beans roasted in-house.
- **DXpress** at Dietrick Hall is perfect for a quick snack on the run, such as biscuits, burgers, and pizza by the slice, and is open until 2:00a.m. for late-night options.
- **Hokie Grill & Co.** at Owens Hall features national brands Chick-fil-A, Pizza Hut, and Dunkin' Donuts, in addition to Blue Ridge Barbecue, grab-n-go sandwiches, snacks, salad, and fruit bar.
- **Owens Food Court** at Owens Hall consists of 12 specialty shops serving international and American favorites, including carved-to-order meats, a soup and salad bar, burgers, pastas, Philly cheese steaks, tacos, and a venue that serves exclusively local, organic, or sustainably produced foods.
- **Turner Place** at Lavery Hall offers a variety of convenient options to the academic side of campus. It houses franchises for Jamba Juice, Bruegger's Bagels, and Qdoba Mexican Grill alongside five upscale original venues serving sushi, crepes, gelato, teppanyaki, southern steakhouse fare, sourdough pizza, custom salads, and much more.
- **Vet Med Cafe** at the Virginia-Maryland Regional College of Veterinary Medicine on Duck Pond Drive and offers breakfast and lunch, Monday through Friday. Breakfast features breakfast bagel sandwiches and hot oatmeal, and lunch offers a daily chef special as well as grilled fish tacos and more.
- **West End Market** at Cochrane Hall features wood oven-baked pizzas, wraps, grilled steaks, seafood, homemade pastas, made-from-scratch soups, freshly baked pastries and breads, and more - all prepared right before your eyes.

Dining Services | 540-231-3933 | www.dining.vt.edu (http://www.dining.vt.edu) | dining@vt.edu

Location

The main campus is located in Blacksburg, Virginia, about 38 miles southwest of Roanoke, Virginia. To reach the campus from Interstate 81, take Exit 118-B (Christiansburg) onto U.S. Rt. 460 West. To reach the Visitor and Undergraduate Admissions Center, continue on U.S. 460 for 8.5 miles to the Prices Fork Road exit for "Downtown." Turn right at the first traffic light on Prices Fork Road and then take an immediate right and up the drive to the center.

Detailed Directions to Virginia Tech and Campus Map (https://vt.edu/maps.html)

Multicultural Academic Opportunities Program

The Multicultural Academic Opportunities Program (MAOP), founded in 1993 is an academic success community founded upon the principles of self-efficacy, mentoring, and peer support. Central to the goal of MAOP is the promotion of diversification within the student body of Virginia Tech. Through partnerships with various academic colleges and departments at Virginia Tech, other colleges and universities, governmental entities, and various organizations, MAOP participants are supported with academic guidance, social and emotional support, and financial support.

The MAOP community is open to all students who demonstrate a clear commitment to the pursuit of academic excellence and are interested in the promotion of diversity in an ever global community. MAOP provides opportunities for both undergraduate and graduate students through scholarships, tuition/assistantship support, academic workshops, and undergraduate research opportunities.

Web: http://www.maop.vt.edu
Phone: (540) 231-5023

Parking Regulations

All vehicles, including motorcycles and scooters, parked on the Virginia Tech campus must be registered with the Parking Services Office and must display a university parking permit. Yearly, semester, summer, and daily parking permits are available and an appropriate fee is charged for each permit. Visitors are required to display a visitor permit, which is available at the Virginia Tech Visitor Information Center. For more information about parking or to request a parking regulations handbook, visit www.parking.vt.edu (http://www.parking.vt.edu) or call (540) 231-3200.

Alternative Transportation

The Alternative Transportation Program offers several options for commuter students to get to class without the hassles of parking permits and searching for parking spaces through the Commuter Alternatives Program (CAP).

CAP has two programs to fit your commuting needs.

- Carpool Program: Carpooling saves you money on parking and gas, and it's the closest thing you can get to **reserved parking** on campus.
- BB&W is available to commuter students who use alternative transportation methods as their primary means of commuting to campus. Examples include riding the Blacksburg Transit or SmartWay buses, bicycling, and walking. By registering for BB&W, you will receive 15 half price daily parking passes per semester.

Bicycles can be registered for free through Parking Services at www.parking.vt.edu (http://www.parking.vt.edu).

For more information about commuter alternatives visit www.tcs.vt.edu/alternative (http://www.tcs.vt.edu/alternative/) or call (540) 231-0248.

ROTC Program

The Reserve Officer Training Corps Programs conducted at Virginia Tech are available to cadets and are offered by the Army, Navy/Marine Corps, and the Air Force. All students participating in ROTC are required to be members of the Corps of Cadets. Details about courses offered, as well as available scholarships and stipends, can be found in the department listings under the College of Liberal Arts and Human Sciences; ROTC (Army), ROTC (Navy/Marine Corps), and ROTC (Air Force). Upon successful graduation from Virginia Tech and completion of the ROTC program, the student is commissioned as an officer in either an active or reserve component of the Armed Forces. The total ROTC credits applied toward degree requirements varies by major and ranges from four

to 24. All credits count as free electives. Consult your course advisor for information on ROTC credits, which may be used within your major.

Students interested in additional details should contact the professor of military science for Army ROTC, the professor of naval science for Naval/Marine Corps ROTC, or the professor of aerospace studies for the Air Force ROTC program.

General Rules Governing the Cadet Lifestyle

All Virginia Tech students are eligible to join the Corps of Cadets and participate in the cadet lifestyle. Cadet student status is a prerequisite for participation in any of the ROTC programs. Students desiring to be a cadet, but not in ROTC are enrolled in the Citizen-Leader Track, also known as the VPI Battalion. VPI Battalion cadets live in the same cadet dorms, wear the same uniforms, and hold the same leadership positions, but go into private and public sector careers upon graduation.

Physical Standards: The Department of Defense has prescribed physical standards for formal enrollment in the ROTC programs. Cadets not physically qualified for an ROTC program may remain in cadet status as members of the Corps of Cadets but must maintain minimum physical standards for the Citizen-Leader Track.

Cadet Regulations: Cadets are expected to adhere to the Cadet Honor Code and abide by all cadet regulations, directives, policies, and procedures of the Corps, as well as the rules governing civilian students.

The following summary gives the prospective cadet an understanding of the nature of his or her obligation as a cadet:

- Cadet officers and non-commissioned officers are responsible to university authorities for the cadets under their supervision and are given the authority to discharge their responsibilities.
- Cadet residence halls are coeducational with controlled visiting privileges for non-residents and mandatory quiet study periods.
- Alcoholic beverages are prohibited in the cadet residence halls.
- Cadets are required to wear the cadet uniform to classes and cadet functions.
- Cadets are required to live in a designated cadet residence hall unless married and living with a spouse.
- Second-semester freshmen and upperclassmen in the corps may request a change to civilian status at any time. First-semester new cadets may not leave the corps and change to civilian status without penalty until the last day to drop a class (after six weeks of class). All students are encouraged to make status changes (from cadet to civilian lifestyle or vice versa) in conjunction with the beginning or end of an academic semester.

See Academics (p. 9) section for details on the ROTC course credits that apply toward degrees.

Services for Students with Disabilities

Services for Students with Disabilities (SSD) serves students who have or think they may have disabilities. The department receives and reviews all student requests for reasonable accommodations, or modifications and adjustments based on disability status, to University programs including academic programs, housing, study abroad, and campus life. SSD partners with Student Affairs and campus stakeholders to ensure students with disabilities are connected to resources necessary for equal participation and access in University programs. SSD also provides academic coaching, peer mentoring services, and a scholarship for students with disabilities. Students who think they may have a disability are encouraged to contact SSD to learn more about eligibility requirements and referrals for further inquiry. Whether it's a question about sign-language interpretation, reasonable accommodations, or obtaining an emotional support animal, SSD is available to help students transition to and actively participate in University life. Contact us by phone, email, or stop by and visit us in the office.

ADA and University Policy

In compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, and with the ADA Amendments Act of 2008, Virginia Tech is committed to ensuring that all qualified students with disabilities have the opportunity to pursue a postsecondary education without barriers to instruction and services. Under Policy Memorandum 178 and university Policy 4075, the university has given authority to Services for Students with Disabilities (SSD) to interpret disability documentation, determine the existence of a disability, and determine appropriate accommodations in this university setting. Academic accommodations, as determined by SSD, serve to "level the playing field" by removing barriers between students with disabilities and students who do not have a documented disability.

Student Affairs

Student Affairs at Virginia Tech is committed to the growth, development, and achievement of students at Virginia Tech. This organization works closely with academic colleagues to support students as they learn to be successful and effective leaders in the emerging global community. The mission of the Student Affairs is to promote student learning, life skills, and personal growth through a strong focus on holistic student development and collaborative partnerships that deliver superior service to, and care for, students in the spirit of Ut Prosim.

We want students to have an exceptional college experience at Virginia Tech, and our excellent academic programs are a great start. Recognizing that learning happens both in and out of the classroom, Student Affairs facilitates experiences and offers resources students need to graduate as successful, educated, and reflective individuals. Through Student Affairs programs, events, and services, students can hone their skills as responsible leaders, discover and pursue promising careers, develop habits for healthy and fulfilling lives, and make a tangible, positive impact on the communities to which they belong.

Student Affairs | http://www.students.vt.edu/ | 540-231-6272 | studentaffairs@vt.edu

Aspirations for Student Learning

Our philosophy is grounded in the Aspirations for Student Learning. The five Aspirations for Student Learning are our best hopes for and expectations of our students. Embracing these Aspirations helps Virginia Tech students find and define themselves through intentional reflection on all they are learning.

- Commit to unwavering **curiosity**
  Virginia Tech students will be inspired to lead lives of curiosity, embracing a lifelong commitment to intellectual development.
- Pursue **self-understanding** and **integrity**
  Virginia Tech students will form a set of affirmative values and develop the self-understanding to integrate these values into their decision-making.
- Practice **civility**
  Virginia Tech students will understand and commit to civility as a way of life in their interactions with others.
- Prepare for a life of **courageous leadership**
  Virginia Tech students will be courageous leaders who serve as change agents and make the world more humane and just.
- Embrace **Ut Prosim** as a way of life
  Virginia Tech students will enrich their lives through service to others.

ExperienceVT

Student Affairs helps students explore, practice, and live the Aspirations for Student Learning by offering opportunities they might pursue while at Virginia Tech—from internships, career fairs, and engagement in student organizations, to intramural sports, leadership development, and everything in between. Your engagement with activities outside the classroom will make you an accomplished, marketable, and self-aware community citizen, exhibiting transferable skills valued by employers. By attending events and programs, taking part in clubs and organizations, reflecting on your experiences, and tracking your progress, Virginia Tech students can capture the pivotal moments in their lives as Hokies.

Student Engagement and Campus Life

Through Student Engagement and Campus Life, you can get involved with student organizations, arts, events and recreation, and student employment. This department, within the Division of Student Affairs, uplifts the#student experience by cultivating affirming environments, promoting holistic well-being, and providing#exceptional#services.

Student Engagement and Campus Life operates the three student centers on campus, as well as the War Memorial Chapel, Owens Ballroom, Breakzone recreation center, and the Perspective Art Gallery. The department also facilitates a number of campus services like Virginia Tech Off-Campus Housing, venue reservations and production services, , a US Passport Office, and more.

The administrative offices are located on the second floor of Squires Student Center in room 225. The office is open from 8a.m. to 5p.m. Monday through Friday. Please contact us for any information regarding Student Engagement and Campus Life.

Student Engagement and Campus Life | 540-231-5431 | campuslife.vt.edu (http://www.campuslife.vt.edu) | campuslife@vt.edu

Campus Events: From large scale events and concerts to small group workshops and gatherings, Student Engagement and Campus Life is dedicated to helping students explore their interests and meet friends through its robust experience offerings. Visit gobblerconnect.vt.edu/events (http://gobblerconnect.vt.edu/events/) to see what's happening today at Virginia Tech.

Event Services facilitates and enhances programming for the Virginia Tech community by assisting and consulting in the campus reservation

processes featured on-campus. The Event Services Office fosters an educational environment that provides student organization members and departmental representatives with venue reservations, event scheduling, information on liability and risk management issues, standard procedure and protocol, and referrals to Production Services.

Event Services
221 Squires Student Center
Phone: (540) 231-5005
E-mail: eventservices@vt.edu
Web: campuslife.vt.edu/eventservices (http://www.campuslife.vt.edu/eventservices/)

The Squires Information Desk is staffed with knowledgeable student employees who are ready to answer questions about your student centers, student activities, the university, and the surrounding community. The information desk also operates the campus Lost and Found.

The Perspective Gallery presents art exhibitions by diverse artists working in a variety of media and styles. Visitors can view work of student, local and regional artists, nationally recognized artists, and artisans from around the world. Receptions and special events allow the public to meet and talk with the artists. Perspective Gallery is located on the second floor of Squires Student Center. Admission is always free. You can also enjoy works in the permanent collection, located throughout the public areas in Squires and Johnston Student Centers and the Graduate Life Center.

The Student Engagement and Campus Life Ticket Office is the major online ticket distribution center for events other than athletics at Virginia Tech and Moss Arts Center events. The office supports ticket sales for theatrical and musical performances, concerts, lectures, and movies.

Student Engagement and Campus Life Ticket Office
Phone: (540) 231-5615 or 800-843-0332
Web: campuslife.vt.edu/tickets (http://www.campuslife.vt.edu/tickets/)

Virginia Tech Off-Campus Housing (VTOCH), provides students with resources and support to assist with their off-campus housing needs including a comprehensive searchable online database. VTOCH maintains information on local apartments, realtors, transportation, and issues affecting renters today. The office hosts two housing fairs each year so students can meet and ask questions of local property managers.

The War Memorial Chapel stands prominently at the end of the Drillfield. It is the only Chapel on campus and provides a nondenominational place of solitude and meditation for all. It is host to religious services, weddings, baptisms, prayer vigils, memorial services, initiations, military commissioning, music recitals, student vocal and ministry groups, concerts, lectures, individual prayer and meditation, and bible study.

War Memorial Chapel
Phone: (540) 231-6240

Student Clubs and Organizations/GobblerConnect

Student Organizations: There are more than 800 registered student organizations at Virginia Tech. spanning a wide variety of academic and special interests. All Virginia Tech students are encouraged to find an organization that matches their interests and passions. By using GobblerConnect (gobblerconnect.vt.edu (http://www.undergradcatalog.registrar.vt.edu/1617/gobblerconnect.vt.edu)), you can search student organizations to find your community on campus.

Gobblerfest, Gobblerfair, and GobblerMarket: Students have several opportunities to meet campus student organizations in-person at our series of involvement fairs throughout the year. Gobblerfest kicks off the year on the Drillfield during Welcome Week; Gobblerfair is an indoor winter fair, and GobblerMarkets pop up throughout the year for a more in-depth, cozy environment.

The Source is the one-stop-shop for all student organizations! In The Source (located in the Breakzone) student organization members can work on a variety of DIY projects like painted banners, balloon arrangements, and buttons and stickers to promote your organization. Our space is available to student organization members on a first come, first-serve basis for committee meetings or to ask our informed staff about student organization best practices and resources.

Students who aren't quite sure where to start can lean on The Source's Engagement Ambassadors who would love to talk through the possibilities. Simply submit an involvement questionnaire (https://gobblerconnect.vt.edu/submitter/form/start/487016/) about your interests and goals and they'll connect you with opportunities and discuss the process for getting involved in a student organization or other experiences.

Student Centers

Squires (located off Alumni Mall) and **Johnston Student Centers** (located behind Burruss Hall) are hubs of activity for the university community. They serve as formal and informal meeting places for students, student organizations, and the larger university community. Facilities include meeting rooms, conference rooms, a ballroom, and theaters. Plenty of comfortable space welcomes students. Many departments call Squires Student Center home. We house the Intercultural Engagement Center, New Student and Family Programs, the music department, student media, student organization offices, VetZone, a non-denominational meditation space, and numerous cultural and community centers. Students, faculty, staff, and guests are free to use Squires or Johnston to meet with friends, study, attend activities and events, or just hang out.

Squires Student Center Information Desk | 1st Floor Squires Lobby | (540) 231-6906
Johnston Student Center Information Desk | 2nd Floor Johnston | (540) 231-5266

The Graduate Life Center at Donaldson Brown (located on Otey Street, across from Squires) is an innovative living-learning facility that supports Virginia Tech's goals for graduate education. The GLC features plenty of study space, a coffee shop, an auditorium, and a multipurpose conference room.

GLC Information Desk | 1st floor GLC lobby | 540- 231-0413

The War Memorial Chapel stands prominently at the end of the Drillfield. It is the only Chapel on campus and provides a nondenominational place of solitude and meditation for all. It is host to religious services, weddings, baptisms, prayer vigils, memorial services, initiations, military commissioning, music recitals, student vocal and ministry groups, concerts, lectures, individual prayer and meditation, and bible study.

Recreation

Breakzone is the place to go to relieve the stress of classes and tests. Breakzone sponsors competitive leagues, weekly bingo and trivia nights, and open play in a variety of activities. An expanded line-up includes pool tables, bowling lanes, table tennis, foosball, and video games. Students, faculty, staff, and guests can enjoy testing their skills while relaxing with friends in an upbeat environment.

Student Health Services and Insurance

University Student Health Services

University Student Health Services provides general ambulatory health care to students throughout the year. Students who have paid their health fee (included as part of the university's comprehensive fee) and submitted a health history form are eligible for services. A team of physicians, nurse practitioners, physician assistants, certified college health nurses, and licensed practical nurses manages most common illnesses and injuries. X-ray, laboratory, and pharmacy services are available on site.

Student Health History

Each student entering Virginia Tech must furnish a health history form, completed by a home physician, for the University Student Health Services. The form will be available online to applicants who accept the offer of admission. Failure to meet Health Services standards may result in dismissal from the university. Information is available at www.healthcenter.vt.edu (http://www.healthcenter.vt.edu).

Student Medical Insurance Coverage

The university has contracted with a health insurance carrier to offer group health coverage for full-time students at Virginia Tech. For details on coverage and specific benefits, please contact the Student Medical Insurance office at 540/ 231-6226 or visit http://risk.controller.vt.edu/studentmedicalinsurance.html.

Health insurance is mandatory for international students with F-1 or J-1 visas and all Virginia Tech Carilion School of Medicine and College of Veterinary Medicine students. All students with a mandatory insurance requirement must purchase the university-sponsored plan or another health insurance plan meeting or exceeding the University outlined minimum coverage levels. Students should review their insurance policies and complete the online waiver form found at http://risk.controller.vt.edu/studentmedicalinsurance.html. Once the student submits the waiver form, the university will review the documentation to determine if the insurance coverage meets the outlined minimum requirements.

Global Travel Insurance & Emergency Assistance

Under University Policy 1070, http://www.policies.vt.edu/1070.pdf, all Virginia Tech students participating in university supported global travel are required to carry international medical and emergency assistance insurance. To meet this requirement, the university has contracted with an insurance provider CISI.

Some of the benefits of the Cultural Insurance Services International (CISI) policy include:

- Security & Natural Disaster Evacuation
- Repatriation
- Emergency Medical expenses, medical evacuation, & medical reunion

Those traveling internationally in a group for a formal education and study abroad program should refer to the Virginia Tech Global Education website at https://www.globaleducation.vt.edu for insurance requirements.

Those traveling internationally on Virginia Tech business, not in a study abroad program, should refer to Virginia Tech Risk Management website at http://risk.controller.vt.edu/vi/international.html.

University at a Glance

Dedicated to its motto, Ut Prosim (That I May Serve), Virginia Tech pushes the boundaries of knowledge by taking a hands-on, transdisciplinary approach to preparing scholars to be leaders and problem-solvers.

A comprehensive land-grant institution that enhances the quality of life in Virginia and throughout the world, Virginia Tech is an inclusive community dedicated to knowledge, discovery, and creativity. Virginia Tech offers the widest range of degree choices in Virginia to more than 37,000 undergraduate, graduate, and professional students on all its campuses.

Virginia Tech has a significant presence across Virginia, including numerous Extension offices and research centers. In Northern Virginia, the university is developing a 1 million-square-foot Innovation Campus that will become a global center of talent production and technology excellence. In Roanoke, the Fralin Biomedical Research Institute at VTC and the Virginia Tech Carilion School of Medicine are a part of the emerging Health Sciences and Technology Campus. The main campus is in Blacksburg, Virginia, while the university's international presence is anchored by the Steger Center for International Scholarship in Riva San Vitale, Switzerland. Other sites are in Newport News, Richmond, and Abingdon.

Offering more than 280 undergraduate and graduate degree programs, Virginia Tech has eight undergraduate colleges, a school of medicine, a veterinary medicine college, Graduate School, and Honors College. Inside and outside of the classroom, in living-learning communities, and in its Corps of Cadets, and in collaboration across academic disciplines, Virginia Tech students engage in experiential learning.

In Virginia Tech's transdisciplinary communities called Destination Areas, scholars seek to address complex global challenges that cross traditional academic boundaries. Taking students to the next level by helping them solve real-world problems, Tech professors have a reputation for imagining the next great thing from self-driving cars to energy-conscious homes and then making it happen.

A leading global research institution, Virginia Tech conducts more than $550 million in research each year (the FY20 total was $556 million). The university boasts world-class research institutes and facilities such as the Smart Road transportation research testbed, and the Cube, a four-story theater and laboratory in the Moss Arts Center. The Link + License + Launch team, a one-stop shop for industry partners from discovery to market, is dedicated to streamlining all aspects of corporate partnerships, from research collaborations to corporate giving to technology commercialization and startups.

Guided by its Principles of Community, the university is dedicated to increasing access, inclusion, and diversity in order to create a community that nurtures learning and growth for all of its members.

The desire to serve is deeply ingrained in Virginia Tech's learning, discovery, and engagement. More than a motto, Ut Prosim is a value system that guides students' decisions and helps mold them into responsible citizens of the world.

University Exemplary Departments

University Exemplary Department Awards recognize the work of departments that maintain, through collaborative efforts of dedicated colleagues, exemplary teaching and learning environments for students and faculty.

University Facilities

Virginia Tech has more than 235 campus buildings, research laboratories, an airport, a 2,600-acre main campus in Blacksburg, a 1,800-acre research farm in Montgomery County, and facilities across the commonwealth.

Among the university's major facilities in Blacksburg are: Carol M. Newman Library, with more than 2.3 million volumes; the Moss Arts Center, home of the Center for the Arts at Virginia Tech professional presenting program; The Inn at Virginia Tech and Skelton Conference Center, which offers conference space and 147 hotel rooms and suites; Cassell Coliseum (seating 10,000); and Lane Stadium (seating more than 66,000). Adjacent to campus is the Virginia Tech Corporate Research Center, which employs more than 3,000 and offers businesses the opportunity to establish close working relationships with the university.

Major facilities outside of Blacksburg include the Innovation Campus in Northern Virginia, now under development; the Steger Center for International Scholarship and Architecture in Switzerland; the Virginia Tech Northern Virginia Center in Falls Church; the Hotel Roanoke & Conference Center; public radio station WVTF, which covers a large part of Virginia; the Marion duPont Scott Equine Medical Center in Leesburg; Virginia Tech Research Center - Arlington; the Washington-Alexandria Center of the College of Architecture and Urban Studies; the Virginia Tech Carilion School of Medicine and Fralin Biomedical Research Institute in Roanoke; Tech Center Research Park in Newport News, Virginia; 11 agricultural experiment stations; and six 4-H centers.

University Libraries

A member of the prestigious Association of Research Libraries, the University Libraries consist of the Carol M. Newman Library and three branches: Art and Architecture, Veterinary Medicine, and the Northern Virginia Resource Center located in Falls Church, Virginia. Their online services are available 24/7.

The libraries offer services and resources to support students in their work every step of the way. From visiting the information services desk on the second floor for help with a research project, to using our 3D printing studio (http://designstudio.lib.vt.edu/) for course projects, to simply using our spaces for quiet our collaborative work, students can find numerous resources at the libraries.

Newman Library is home to many hands-on spaces that allow experiential learning, such as Fusion Studio (http://fusionstudio.lib.vt.edu/) for longer term collaborative projects. Students can also seek help with writing papers and other projects at the English department's Writing Center, or assistance preparing for presentations at the communication department's CommLab, both on the second floor. Other library studios include Media Design (https://www.mediastudio.lib.vt.edu), Data Visualization (https://www.datavizstudio.lib.vt.edu), Data Transformation (https://

www.dtstudio.lib.vt.edu), and Virtual Environments (https://www.virtualstudio.lib.vt.edu). The Libraries' Digital Humanities and Social Sciences program – Athenaeum (https://www.lib.vt.edu/spaces/athenaeum.html) provides support to courses and research projects in these disciplinary areas.

Help can be found on our homepage (https://lib.vt.edu/), and many resources, including our Ask A Librarian chat (http://www.lib.vt.edu/help/ask.html), online collections, and subject research guides (http://guides.lib.vt.edu/), can be used from anywhere on or off campus, without stepping foot in our buildings.

In each of the libraries, there is a Circulation/Reference desk staffed by people who can help you locate and use resources. Each college and academic department also has a librarian who is a subject expert (http://www.lib.vt.edu/instruct/clprg.html) and can help you find relevant research, suggest journals, or point you in the direction of resources for your area of study.

Special Collections, located on the first floor of Newman Library, houses major research collections including the Archives of American Aerospace Exploration, the International Archive of Women in Architecture, Railroad Archives, the Culinary History Collection, and many items from the Civil War.

For users with disabilities, there is a Special Services Room in Newman Library equipped with adaptive software and hardware.

For additional information, check out www.lib.vt.edu (http://www.lib.vt.edu), come walk through our spaces, or stop by one of the help desks.

Veterans Services

The Office of Veterans Services is the primary resource for Virginia Tech veterans and their dependents. Staff work closely with the Department of Veterans Affairs to receive and process all documentation related to veteran and military student educational benefits. The Office of Veterans Services works closely with The Student Success Center to ensure veterans, military students and dependents are connected to the resources necessary for a successful transition to and through their course of study at Virginia Tech. In collaboration with The Student Success Center, students served by the Office of Veterans Services have access to tutoring, mentoring, assistance navigating the VA system, and the Veterans@VT student organization.

Graduation Requirements

Prerequisites and Course Duplication

Some courses might have prerequisites not shown. Students are required to double-check course pre-requests, the duplicated course list, and equivalents. Please see your advisor or consult the undergraduate course catalog for more information.

Satisfactory progress:

- A minor GPA of 2.0 or higher must be attained in the courses counting towards the minor.
- A grade of B minus or better must be earned in the classes listed in sections II, III, IV, and V to be eligible for the Society of Actuaries Validation by Educational Experience.

Adaptive Brain and Behavior (ABB) Minor

Code	Title	Credits
Gateway Courses		
Select two of the following:		6
BMES 2004	Concussion Perspectives: Medical, Scientific and Societal Perspectives	
HD 2014	Integrative Practices for Health, Wellbeing, and Resilience	
NEUR 2464	Neuroscience and Society	
Subtotal		6
Foundational Courses		
Select one of the following:		3
EDCO 2004	Healthy Relationships: Understanding Self and Others	
EDEP 2444	Motivating Yourself and Others

HD 4714	Senior Capstone Seminar	3
or NEUR 3554	Neuroscience Research and Practical Experience	
or NEUR 4044	Neuroscience Senior Seminar	
or NEUR 4594	Clinical Neuroscience in Practice	
Or one of the following may substitute with ABB Advisor approval:		
XXXX 3954/4954	Study Abroad	
XXXX 4974	Independent Study	
XXXX 4984	Special Study	
XXXX 4994	Undergraduate Research	
Subtotal		3
Total Credits		**18**

Graduation Requirements

Note: For the courses attempted for this minor, students must maintain an overall minor GPA of 2.0 or better. A minimum of 18 hours is required to graduate with an Adaptive Brain and Behavior minor.

Advertising (ADV) Minor

The Advertising Minor introduces students from outside mass communication disciplines to basic principles of paid persuasive communication. The minor requires students to earn 15 credits from units within the School of Communication and 3 credits from the Marketing Department in the Pamplin College of Business. The requirements and electives are listed below. Some courses on this checksheet have prerequisites that are not part of the minor requirements. Please consult the University Course Catalog or check with your academic adviser for information about those prerequisites.

Code	Title	Credits
Required Minor Courses		
COMM 2024	Media Writing	3
MKTG 3504	Advertising	3
ADV 3004	Advertising Copywriting and Brand Storytelling	3
Subtotal		9
Elective Courses		
Select three of the following:		9
ADV 3014	Account Planning and Media Buying	

ADV 3024	Ethics and Social Responsibility in Advertising	
CMST 3064	Persuasion	
JMC 4064	Social Media Analytics	
JMC 4264	Social Media Theory and Practice	
PR 2044	Principles of Public Relations	
PR 3084	Advanced Public Relations Research Methods	
PR 4164	Public Relations Administration	
Subtotal		9
Total Credits		**18**

Graduation Requirements

The minor requires students to earn 15 credits from units within the School of Communication and 3 credits from the Marketing Department in the Pamplin College of Business. Some courses on this checksheet have prerequisites that are not part of the minor requirements.

Total Required Credits: 18

GPA Requirement: A GPA of 2.0 or higher is required in the minor.

Africana Studies (AFST) Minor

Code	Title	Credits
Required Minor Courses		
AFST 1714	Introduction to African American Studies	3
or AFST 1814	Introduction to African Studies	
AFST 4354	Topics in Africana Studies (may be taken twice under different topics)	3
Subtotal		6
Elective Courses		
Select twelve credits of the following: [1]		12
AFST/ENGL/ TA 2044	Contemporary African American Theatre	
AFST/RLCL 2144	African Religions	
AFST/RLCL/ WGS 2204	Race and Gender in Religion and Culture	
AFST/HIST 2275	African-American History (1619-1877)	
AFST/HIST 2276	African-American History (1877-present)	
AFST 2354	The Civil Rights Movement	
AFST/SOC 2454	Race and Racism	
AFST/ENGL 2644	Introduction to African-American Literature

AAEC Elective (must be at the 3000 or 4000 level)		3
Subtotal		6
Total Credits		**24**

[1] This minor is not available to students majoring in Agribusiness, Applied Economic Management, Environmental Economics: Management & Policy, International Trade and Development or Food and Health Systems Economics.

[2] **Pre-requisites**: Some courses required for this major have pre-/co-requisites and/or enrollment requirements. Please refer to the Undergraduate Course Catalog or consult your advisor for information about pre-/co-requisites and enrollment requirements.

Graduation Requirements

A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.

Agricultural and Applied Economics (AEMN) Minor

Code	Title	Credits
I. Required Introductory Courses [1]		
AAEC 1005	Economics of the Food and Fiber System	3
or ECON 2005	Principles of Economics	
AAEC 1006	Economics of the Food and Fiber System	3
or ECON 2006	Principles of Economics	
Subtotal		6
II. Required Core Course		
AAEC 2434	Foundations of Agribusiness	3
or AAEC 2104	Personal Financial Planning	
Subtotal		3
III. Elective Credits		
AAEC Elective (must be at the 3000 or 4000 level)		3
AAEC Elective (must be at the 3000 or 4000 level)		3
AAEC Elective (must be at the 3000 or 4000 level)		3
AAEC Elective (must be at the 3000 or 4000 level)		3
AAEC Elective (must be at the 3000 or 4000 level)		3
Subtotal		15
Total Credits		**24**

[1] This minor is not available to students majoring in Agribusiness, Applied Economic Management, Environmental Economics: Management & Policy, International Trade and Development or Food and Health Systems Economics.

Graduation Requirements

A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.

American Indian Studies (AINS) Minor

The Minor in American Indian Studies requires 18 semester hours:

- the four required AINS courses (3 hours each)
- two electives (3 hours each).

At least 9 hours of credit (including those in the list of required courses) must be taken at the 3000 level or above. Normally only one Independent Study (AINS 2974 Independent Study or AINS 4974 Independent Study, or another departmental Independent Study course approved by the American Indian Studies director) will be accepted for credit. The Special Study course (AINS 4984 Special Study, or another department equivalent approved by the American Indian Studies director) may be taken more than once if the topic of each course is different. Check undergraduate catalog for prerequisites.

A minimum GPA of 2.0 in all courses taken to fulfill the minor is required.

Code	Title	Credits
Required Minor Courses		
AINS 1104	Introduction to American Indian Studies	3
AINS/ENGL 2804	Contemporary Native American Literatures	3
AINS/PSCI 3684	Indigenous Peoples and World Politics	3
AINS 4004	Topics in American Indian Studies	3
Subtotal		12
Elective Courses		
Select six hours from the list of American Indian Studies courses and/or from the list of pre-approved electives in other departments or programs:		6
American Indian Studies		
AINS/HUM 2104	Oral Traditions and Culture	
AINS 2974	Independent Study	
AINS/ENGL 3304	The Languages of Native America	
AINS 4754	Internship	
AINS 4974	Independent Study	
AINS 4994	Undergraduate Research	
Pre-approved Electives in Other Departments or Programs [1]		
AFST/SOC 2454	Race and Racism	
ART 3004	Topics in Art History (when on appropriate topic)	
ENGL 3644	The Postcolonial Novel	
ENGL 3654	Ethnic American Literature	
RLCL 4324	Topics in Religion and Culture (when on appropriate topic) (See AINS Director for approval)	
SOC 1014	Introduction to Social Anthropology	
SOC 2024	Sociology of Race and Ethnicity	
SOC/GEOG/ UAP 4764	International Development Policy and Planning	
Subtotal		6
Total Credits		**18**

Graduation Requirements

Minimum 18 credits to complete the minor. Twelve of the credit hours are from required courses. Students may select the additional six hours from the list of American Indian studies courses and/or from the list of pre-approved electives in other departments or programs. A minimum GPA of 2.0 in all courses taken to fulfill the minor is required.

1 Non-AINS courses may not be substituted for 1000- or 2000-level AINS courses.

American Studies (AMS) Minor

Code	Title	Credits
Required Minor Courses		
HUM 2504	Introduction to American Studies	3
HUM 4104	Explorations in Advanced Humanities Topics	3
Subtotal		6
Elective Courses		
Select at least twelve credit hours from at least two of the following four areas: [1]		12
Area I: Literature		
ENGL 2804	Contemporary Native American Literatures [2]	
ENGL 3624	Appalachian Literature	

ENGL 3654	Ethnic American Literature	
ENGL 4634	Studies in an American Author before 1900 (junior standing required) [2]	
or ENGL 4644	Studies in an American Author after 1900	
Area II: History and Politics		
HIST 1116	History of the United States	
HIST 2275	African-American History	
HIST 2276	African-American History	
HIST 3004	Colonial America	
HIST 3064		
HIST 3084	Recent America, 1917-Present	
HIST 3104		
HIST 3105	Women in U S History	
HIST 3114		
HIST 3106	Women in U S History	
HIST 3144	American Environmental History

PSCI 3255	The Politics of Race, Ethnicity and Gender	
or PSCI 3256	The Politics of Race, Ethnicity and Gender	
PSCI 3754	American Political Theory [2]	
Area III: The Arts and Communication		
HUM/RLCL 1504	Introduction to Popular Culture	
ARCH 4214	[2, 3, 4]	
APS 2404	Folk Cultures in Appalachia	
APS 2434	The Cultural Politics of Music in Appalachia	
ART 3784	European and American Art Since 1900 [2]	
ART 3884	American Art to 1914 [2]	
CINE 3514	American Cinema Genres [2]	
HUM/AINS 2104	Oral Traditions and Culture	
HUM/RLCL 3034	Theories of Popular Culture	
SOC 4114	The Sociology of Popular Music	
Area IV: Cultural Studies		
AFST 1714	Introduction to African American Studies	
AINS 1104	Introduction to American Indian Studies	
AINS 4004	Topics in American Indian Studies [3]	
APS/HUM 1704	Introduction to Appalachian Studies	
APS/HUM/AHRM/GEOG/HD/UAP 3464	Appalachian Communities [2]	
HUM 4414	Issues in Appalachian Studies [2, 3]	
LAR 4034	Evolution of the American Landscape	
RLCL 2124	Religion in American Life	
RLCL 4324	Topics in Religion and Culture [2, 3, 4]	
UAP 1024	Leadership, Service, and Public Problem Solving	
WGS 2264	Race, Class, Gender, and Sexualities	
WGS 3004	Topics in Feminism [2, 3, 4]	
Subtotal		12
Total Credits		**18**

1 No more than ONE course (3 credit hours) may be at the 1000-2000 level.
2 Please note pre-requisite(s) for this course.
3 This course may be repeated for credit when the topic varies.
4 These variable topics courses may be included in the minor when the topic is relevant to American Studies, as approved by the minor coordinator.

Graduation Requirements

Special offerings, including Independent Study, Undergraduate Research, and Study Abroad, and relevant courses in this or other departments may be used to fulfill requirements of up to six (6) credits for the minor where appropriate. Permission to count such courses must be granted by the minor coordinator. Courses taken to fulfill the requirements of the minor cannot be taken as pass/fail unless that is the only way the course is taught. Students should check the course catalogue for the latest information on course pre-requisites.

To graduate with a minor in American Studies, a student must have an over-all GPA of 2.0 and an in-minor GPA of 2.0 from all of the courses taken from the minor check-sheet.

For more information, consult the minor coordinator, Dr. Danille Christensen, 105 Major Williams Hall, dec09@vt.edu

1 No more than **one** course (3 credit hours) may be at the 1000-2000 level.
2 Please note pre-requisite(s) for this course.
3 This course may be repeated for credit when the topic varies.
4 These variable topics courses may be included in the minor when the topic is relevant to American Studies, as approved by the minor coordinator.

ARBC 3304	Modern Arabic Literature in Translation	
ARBC 3474	Topics in Arab Cinema	
ARBC 3274	War and Arab Culture	
Total Credits		**18**

Graduation Requirements

Notes:

- A student must complete all courses with a least a minimum 2.0 Minor GPA for all hours attempted. In addition, a minimum grade of "C" (2.0) must be earned in each course completed for the Arabic minor.
- Some courses in the minor requirements listed above have prerequisites, so students should consult the University Catalog or check with their advisor to ensure the proper fulfillment of course requirements.
- Courses used to fulfill minor requirements may not be taken as Pass/Fail.
- Before the student departs on a study abroad program, a form titled "Authorization to Take Courses Elsewhere" must be filled out and signed by the student, the student's Arabic advisor, and the Director of the Office of Global Education.

Art History (AHST) Minor

Code	Title	Credits
Required Minor Courses		
ART 2385	Survey of the History of Western Art	3
ART 2386	Survey of the History of Western Art	3
Select two of the following:		6
ART 4184	Museum Studies: Theory and Practice	
ART 4284	Museum Ethics and Cultural Preservation	
ART 4384	Topics in Art History (May be taken twice to earn 6 credit hours.)	
ART 4684	Topics in Museums and Collections	
Subtotal		12
Elective Courses		
Select two of the following:		6
ART 3004	Topics in Art History	
ART 3034	Survey of Latin American Art and Architecture	
ART 3044	Art and Architecture of India	
ART 3054	Islamic Art and Architecture	
ART 3064	Arts of China and Japan	
ART 3074	Egyptian Art and Architecture	
ART 3084	Greek Art and Architecture	
ART 3094		
ART 3174	Introduction to Archaeology	
ART 3184	Roman Art and Architecture	
ART 3284	Medieval Art and Architecture	
ART 3384	Renaissance Art and Architecture	
ART 3484	Baroque and Rococo Art and Architecture	
ART 3584	Nineteenth Century European Art: Neoclassicism to Post-Impressionism	
ART 3674	History of Photography	
ART 3684	African-American Art	
ART 3774	History of Modern Graphic Design	
ART 3784	European and American Art Since 1900	
ART 3884	American Art to 1914	
Subtotal		6
Total Credits		**18**

Graduation Requirements

Students must complete all courses comprising the minor with a GPA of 2.0 or better and maintain an overall GPA of 2.0.

Any courses taken for the Art History minor will count toward the in-minor GPA.

Asian Studies (ASIA) Minor

Code	Title	Credits
I. Foundational Courses		
3 credits, choose one of the following:		3
HIST 1354	Conflict and Security in Modern East Asia	
RLCL 1904	Religion and Culture In Asia	
HIST/RLCL 2394	Tofu to Tikka: Food in Asian History	

Subtotal		3
II. Elective Credit		
Select four courses, from at least two of the following groups:		12
a. History		
HIST 2355	History of China	
HIST 2356	History of Modern China	
HIST 2364	History of Japan	
HIST/RLCL 2374	Gods and Kings in Premodern India	
HIST/RLCL 2384	Gandhi in the Making of Modern India	
HIST 3254	The Vietnam War	
HIST 3664	Revolutionary China	
HIST 3674	Topics in Chinese History	
b. Culture and Society		
ART 3044	Art and Architecture of India	
ART 3054	Islamic Art and Architecture	
ART 3064	Arts of China and Japan	
CHN 2734	Chinese Culture and Civilization	
CHN 3304	Chinese Literature in Translation	
JPN 3304	Japanese Literature in Translation	
CHN 3474	Topics in Chinese Cinema	
JPN 2744	From Atom to Akira: Japan's Pop Culture	
RLCL/SOC 2514	Asian American Experience	
RLCL 2324	Islam	
RLCL 3214	Religion and Culture in India	
RLCL 3224	Religion and Culture in China and Japan	
c. Language [1]		
CHN 1105 & CHN 1106	Elementary Chinese and Elementary Chinese	
or CHN 1106	Elementary Chinese	
CHN 2105 & CHN 2106	Intermediate Chinese and Intermediate Chinese	
or CHN 2106	Intermediate Chinese	
CHN 3105 & CHN 3106	Advanced Chinese and Advanced Chinese	
or CHN 3106	Advanced Chinese	
CHN 3514	Modern China through the Media	
KOR 1105 & KOR 1106	Elementary Korean and Elementary Korean	
or KOR 1106	Elementary Korean	
JPN 1105 & JPN 1106	Elementary Japanese and Elementary Japanese	
or JPN 1106	Elementary Japanese	
JPN 2105 & JPN 2106	Intermediate Japanese and Intermediate Japanese	
or JPN 2106	Intermediate Japanese	
JPN 3105 & JPN 3106	Advanced Japanese and Advanced Japanese	
or JPN 3106	Advanced Japanese	
JPN 3125 & JPN 3126	Japanese for Oral Proficiency and Japanese for Oral Proficiency	
or JPN 3126	Japanese for Oral Proficiency	
JPN 4104	Japanese Advanced Grammar	
CHN 3604	Chinese Language and Society	
d. Social Sciences and Geography [1]		
ECON 4144	Economics of China	
PSCI 3574	Government and Politics of Japan	
PSCI 3584	Governments and Politics of Asia	
GEOG 2784	Geography of Tea	
GEOG 3254	Geography of East Asia	
Subtotal		12
III. Capstone Experience		
Select one of the following:		3
3xxx	Study abroad in Asia (options in AHRM, BUS, CHN, JPN, HIST, RLCL or other study abroad credits in Asia).	
HIST 4974	Independent Study	
RLCL 4974	Independent Study	
SOC 4974	Independent Study	
PSCI 4974	Independent Study	
IS 4974	Independent Study	
On subject related to Asian Studies, with prior approval of coordinator		
HIST/RLCL/ SOC/PSCI/IS 4994	Undergraduate Research	
On subject related to Asian Studies, with prior approval of coordinator		
3XXX or 4XXX	Topics class on subject related to Asian Studies, with prior approval of coordinator.	
Subtotal		3
Total Credits		**18**

Graduation Requirements

The Minor in Asian Studies (ASIA) requires the satisfactory completion of a minimum of 18 semester hours with a minimum 2.0 GPA in all courses. Courses must be taken for a grade (not P/F). Courses must be distributed as indicated, including at least 6 credits in 3000-4000 level courses. Substitutions are allowed for up to 6 credits of independent studies (4974), special studies courses (1984, 2984, 3984, 4984), undergraduate research, Honors Colloquia, or other classes if the topic is appropriate, with prior approval of the Coordinator. No more than 50% of the coursework for the Minor may double-count for a History Major or Minor, Chinese Studies Minor, Religion and Culture Minor, or Japanese Studies Minor.

Astronomy (ASTR) Minor

Code	Title	Credits
Required Minor Courses		
PHYS 1055	Introduction to Astronomy	3
PHYS 1056	Introduction to Astronomy	3
PHYS 1155	Astronomy Laboratory	1
PHYS 1156	Astronomy Laboratory	1
PHYS 3154	Observational Astrophysics	2
PHYS 3655	Introduction to Astrophysics	3
PHYS 3656	Introduction to Astrophysics	3
Subtotal		16
Elective Courses		

Select one of the following:		3
PHYS 3355	Intermediate Mechanics	
PHYS 3405	Intermediate Electricity and Magnetism	
PHYS 4574	Nanotechnology	
PHYS 4614	Optics	
PHYS 4654	Modern Cosmology	
PHYS 4664	Astroparticle Physics	
PHYS 4674	Introduction to General Relativity	
PHYS 4714	Introduction to Biophysics	
PHYS 4755	Introduction to Computational Physics	
PHYS 4774	Intro to Physics of Galaxies	
BIOL 2134	Cell Function and Differentiation	
BIOL 2704	Evolutionary Biology	
GEOS 4154	Earthquake Seismology	
GEOS 4714	Volcanoes and Volcanic Processes	
AOE 3154	Astromechanics	
ECE 4114	Antennas	
ECE 4124	Radio Wave Propagation	
ECE 4144	Optical Systems	
ESM 3024	Introduction to Fluid Mechanics	
Subtotal		3
Total Credits		**19**

Graduation Requirements

Acceptable Substitutions:

- PHYS 3355 Intermediate Mechanics: AOE 3154 Astromechanics, **or** ESM 3124 Dynamics II- Analytical and 3-D Motion.
- PHYS 3405 Intermediate Electricity and Magnetism: ECE 3105 Electromagnetic Fields.

Minimum Hours and GPA Required for Graduation

A minimum overall and in-minor GPA of 2.0 is required for graduation. All minor courses attempted are used in the calculation of the in-minor GPA.

Prerequisites and Corequisites

Courses in this minor have prerequisites or corequisites. Please check with your advisor or consult the Undergraduate Course Catalog.

Behavioral Decision Science (BDS) Minor

Code	Title	Credits
Required Minor Courses		
BDS 2005	Fundamentals of Behavioral Decision Science	3
BDS 2006	Fundamentals of Behavioral Decision Science	3
ECON/BDS 3134	Choice and Behavior	3
Subtotal		9
Elective Courses		
Select two of the following:		*6*
ECON 3034	Economics of Poverty and Discrimination	
ECON 3154	Managerial Economics	
ECON 4014	Environmental Economics	
ECON 4214	Economics of Health Care	
NEUR 2464	Neuroscience and Society	
NEUR 3084	Cognitive Neuroscience	
PSYC 2014	Psychology of Social Interventions	
PSYC 2084	Social Psychology	
PSYC 3054	Health Psychology	
PSYC 4184	The Science of Giving	
Subtotal		6
Capstone		
Select one of the following:		*3*
BDS 4864	Developing Behavioral Science Policies and Interventions	
BDS 4194	Predicting Social Behavior	
BDS 4974		
BDS 4974H		
BDS 4994		
BDS 4994H		
Subtotal		3
Total Credits		**18**

Graduation Requirements

1. A minimum of 18 credit hours is needed to complete the minor.

2. Prerequisites and corequisites for all courses must be satisfied. Please consult the University Catalog for the latest statement of these requirements.

3. BDS 2005, BDS 2006, BDS 3134 and one of the required electives must be completed prior to beginning the Capstone requirement, which is assumed to be the final course for fulfillment of the minor.

4. All course to fulfill the BDS minor requirements must be taken A/F and be completed with a minimum GPA of 2.0. Students must also maintain an overall GPA of 2.0.

Biodiversity Conservation (BIOD) Minor

Code	Title	Credits
Required Foundational Courses		
FREC 1004/ GEOG 1084	Digital Planet (Pathways Concept 5 - Quantitative and Computational Thinking)	3
FIW 2114	Principles of Fish and Wildlife Conservation (Pathways Concept 4 - Reasoning in the Natural Sciences)	3
Subtotal		6
Mid-Level Courses		
Select 3 courses from the two restricted Elective groups:		9-10
One course from the Human Dimensions Area		
One course from the Natural Resources Area		
One course from either the Human Dimensions or Natural Resources area		
Subtotal		9-10
Required Capstone Course		
FIW 4114	Biodiversity Conservation (Pathways Concept 3 - Reasoning in the Social Sciences Pathways Concept 4 - Reasoning in the Natural Sciences) [1]	3

Subtotal		3
Total Credits		**18-19**

Code	Title	Credits
Restricted Electives		
Human Dimensions		
AAEC 3324	Environment and Sustainable Development Economics (Pathways Concept 3 - Reasoning in the Social Sciences Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States) [1]	3
FIW 2334	Urbanization and Biodiversity Conservation	3
FIW 2514	Fish and Wildlife Conservation Policy (Pathways Concept 3 - Reasoning in the Social Sciences)	3
FIW 4454	Human-Wildlife Conflicts	3
FIW 4464	Human Dimensions of Fisheries and Wildlife	3
GEOG 3104	Environmental Justice, Resources and Development (Pathways Concept 3 - Reasoning in the Social Sciences)	3
HIST 3144	American Environmental History (Pathways Concept 2 - Critical Thinking in the Humanities Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
STS 2454	Science, Techology, and Environment (Pathways Concept 2 - Critical Thinking in the Humanities)	3
Natural Resource		
FIW 2234	Fish, Fishing, and Conservation (Pathways Concept 3 - Reasoning in the Social Sciences Pathways Concept 4 - Reasoning in the Natural Sciences) [1]	3
FIW 2324	Wildlife Field Biology	3
FIW 4244	Applied Epidemiology of Fish and Wildlife Diseases	3
FIW/FREC 4324	Genetics of Natural and Mangaged Populations	3
FIW 4424	Ichthyology	4
FIW 4454	Human-Wildlife Conflicts	3
FIW 4534	Ecology and Management of Wetland Systems	3
FIW 4614	Fish Ecology	3
FREC 3364	Environmental Silviculture	3

[1] Where more than one outcome is listed, only one outcome may be counted unless it is outcome 7, which may be double counted with another outcome.

Graduation Requirements

Notes for Biodiversity Conservation Pathways Minor:

1. Students in the Fish and Wildlife Conservation Degree (Wildlife Conservation, Freshwater Fish Conservation, Marine Fish Conservation , Fish Conservation/Human Dimension Option, Wildlife Conservation/Human Dimensions Option) are not eligible to declare the Biodiversity Conservation Pathways Minor.
2. At least two courses taken must be at the 3000-4000 level.
3. Any course substitution requests of the courses above must be proposed in writing to the College of Natural Resources and Environment Advising Center in 138 Cheatham Hall.
4. Some courses listed on this checksheet may have prerequisites, please consult the University Course Catalog, or check with your advisor.
5. A minimum cumulative GPA for all classes taken for the minor is 2.0

Steps for Completing the Biodiversity Conservation Minor

1. Make an advising appointment with the Biodiversity Conservation Minor Coordinator for orientation to the minor.
2. Declare the Biodiversity Conservation minor at the CNRE Advising Center in 138 Cheatham Hall.
3. Include minor information when updating the application for degree in Hokie Spa.
4. Students cannot graduate until they have either (1) satisfied the requirements for the minor or (2) withdrawn from the minor by notifying CNRE Advising Center office in 138 Cheatham and revising their DARS.

Biological Physics (BIPH) Minor

Code	Title	Credits
Required Minor Courses		
PHYS 2305	Foundations of Physics	4
PHYS 2306	Foundations of Physics	4
PHYS 4714	Introduction to Biophysics	3
BIOL 2124	Cell and Molecular Biology for Engineers [1]	2
Subtotal		13
Elective Courses		
Select 9 credits of the following:		9
PHYS 3704	Thermal Physics	
PHYS 4564	Polymer Physics	
PHYS 4574	Nanotechnology	
PHYS 4614	Optics	
PHYS 4755	Introduction to Computational Physics	
BIOL 3774	Molecular Biology	
BIOL 4884	Cell Biology	
SYSB 2024	Fundamentals of Systems Biology	
Subtotal		9
Total Credits		**22**

Graduation Requirements

Acceptable Substitutions:

BIOL 2134 Cell Function and Differentiation is an acceptable substitution for BIOL 2124 Cell and Molecular Biology for Engineers.

Minimum Hours and GPA Required for Graduation:

A minimum overall and in-minor GPA of 2.0 is required for graduation. All physics courses attempted are used in the calculation of the in-minor GPA.

Prerequisites and Corequisites:

Courses in this minor have prerequisites or corequisites. Please check with your advisor or consult the Undergraduate Course Catalog.

Biological Sciences (BIOL) Minor

Code	Title	Credits
Required Minor Courses		
BIOL 1105	Principles of Biology [1]	3
BIOL 1115	Principles of Biology Laboratory [1]	1
BIOL 1106	Principles of Biology [1]	3
BIOL 1116	Principles of Biology Laboratory [1]	1
BIOL 2004	Genetics [#]	3
BIOL 2134	Cell Function and Differentiation [#]	3
BIOL 2704 or BIOL 2704H	Evolutionary Biology [#]	3
BIOL 2804 or BIOL 2804H	Ecology [#]	3
CHEM 1035	General Chemistry [1]	3
CHEM 1036	General Chemistry [1]	3
Subtotal		26
Elective Courses		
Select two of the following:		6-8
BIOL 3134	Human Genetics [#]	
BIOL 3204	Plant Taxonomy [#]	
BIOL 3404	Introductory Animal Physiology [#]	
BIOL 3454	Introductory Parasitology [#]	
BIOL 3514	Introduction to Histology [#]	
BIOL 3774	Molecular Biology [#]	
BIOL 3954	Study Abroad (var credit) [2,#]	
BIOL 4004	Freshwater Ecology [#]	
BIOL 4104	Developmental Biology [#]	
BIOL 4114	Global Change Ecology [#]	
BIOL 4134	Evolutionary Genetics [#]	
BIOL 4334	Chemical Ecology [#]	
BIOL 4454	Invertebrate Zoology [#]	
BIOL/ALS 4554	Neurochemical Regulation [#]	
BIOL 4594	Ecology, Evolution, and Behavior Senior Seminar [#]	
BIOL 4664	Virology [#]	
BIOL 4734	Inflammation Biology [#]	
BIOL 4474	Ethology [#]	
BIOL 4844	Proteomics and Biological Mass Spectrometry [#]	
BIOL 4854	Cytogenetics [#]	
BIOL 4864	Clinical Biology [#]	
BIOL 4874	Cancer Biology [#]	
BIOL 4884	Cell Biology [#]	
Subtotal		6-8
Total Credits		**32-34**

Notes

[1] Students must earn a "C" or better in BIOL 1105, 1106, 1115, 1116, CHEM 1035, and CHEM 1036, or the equivalent. Only two attempts are allowed for each course.

[2] If BIOL 3954 is taken to fulfill minor requirements, the course must be taken for at least 3 credits.

[#] Some courses listed on this checksheet may have prerequisites; please consult the University Course Catalog or check with your advisor.

Cross-listed Courses on this Checksheet

ALS/BIOL 4554: Neurochemical Regulation

Acceptable Substitutions

CHEM 1035:	CHEM 1055 General Chemistry for Majors
CHEM 1036:	CHEM 1056 General Chemistry for Majors

Graduation Requirements

Students must have an in-minor and overall GPA of 2.0 to graduate. All courses taken to fulfill minor requirements will count toward the in-minor GPA.

Students must earn a "C" or better in BIOL 1105, 1106, 1115, 1116, CHEM 1035, and CHEM 1036, or the equivalent. Only two attempts are allowed for each course.

Biomedical Engineering (BME) Minor

Code	Title	Credits
Required Minor Courses		
BMES 2104	Introduction to Biomedical Engineering	3
BMES 4064	Introduction to Medical Physiology	3
Subtotal		6
Approved BME Research		
Students may pursue one or a combination of the following options in order to fulfill this requirement:		6
Senior Design Courses		
BSE 4125	Comprehensive Design Project	
BSE 4126	Comprehensive Design Project	
ECE 4805	Senior Design Project	
ECE 4806	Senior Design Project	
ENGE 4735	Interdisciplinary Design Capstone	
ENGE 4736	Interdisciplinary Design Capstone	
ISE 4005	Project Management and Systems Design	
ISE 4006	Project Management and Systems Design	
ME 4015	Engineering Design and Project	
ME 4016	Engineering Design and Project	
MSE 4075	Senior Design Laboratory	
MSE 4076	Senior Design Laboratory	
MINE 4635	Mining Engineering Capstone	
MINE 4636	Mining Engineering Capstone	
Departmental Undergraduate Research Course		
AOE 4994	Undergraduate Research

ECE 5606	Stochastic Signals and Systems	
ESM 5405	Clinical Internship in Biomedical Engineering	

ESM 5406	Clinical Internship in Biomedical Engineering
ISE 5154	Applied Human Factors Engineering
ISE 5614/ BMES 5214	Human Physical Capabilities
ISE 5644	Human Audition and Auditory Display Design
ME/BMES 5764	Modeling MEMS and NEMS
ME 5864G	Advanced Micro/Nano-Robotics

[1] Note, the courses offered as electives may have hidden prerequisites. It is the responsibility of the student to assure that all prerequisites are met prior to registration for these courses.

[2] 5000-level courses are typically restricted based on amount of total credit hours completed, GPA, and available seats after graduate student registration. Please contact the department's undergraduate academic advisor regarding registering for 5000-level courses.

Graduation Requirements

To obtain a minor in Biomedical Engineering (BME) students must first be accepted into the BME minor program. Once accepted, a student must take 6 hours of required coursework, 6 hours of approved elective courses, and 6 hours of approved BME research for a total of 18 credits. No pass/fail courses will be accepted.

Blue Planet (BLPL) Minor

FIW 2114	Principles of Fish and Wildlife Conservation (Pathways Concept 4 - Reasoning in the Natural Sciences)	
FREC 3044	Environmental Data Science (Pathways Concept 5 - Quantitative and Computational Thinking)	
FREC/IS/PSCI 4174	Climate Change and the International Policy Framework (Pathways Concept 1 - Discourse or Pathways Concept 3 - Reasoning in the Social Sciences)	
FREC 4354	Forest Soil and Watershed Management (Pathways Concept 5 - Quantitative and Computational Thinking)	
GEOG 2114	Introduction to Coastal Regions	
GEOG/GEOS 3104	Environmental Justice, Resources and Development (Pathways Concept 3 - Reasoning in the Social Sciences)	

GEOG/GEOS 4134	Interdisciplinary Issues and Ethics in Water Resources (Pathways Concept 3 - Reasoning in the Social Sciences)	
GEOG/NR 1115	Seeking Sustainability (Pathways Concept 3 - Reasoning in the Social Sciences)	
GEOS 3034	Oceanography	
UAP 4374	Land Use and Environment: Planning and Policy	
Total Credits		**20**

1 Courses may have prerequisites, corequisites, or other restrictions. Please consult the University Course Catalog, or check with your advisor.

Graduation Requirements

20 Credit Hours Required for Minor

Notes:

1. All courses for the Blue Planet minor must be taken A/F and be completed with a minimum in-minor GPA of 2.0. Any course taken to fulfill the Blue Planet minor will count towards the minor GPA.
2. No more than 50% of the graded course credits required for the Blue Planet minor may be double-counted by a student in the Water: Resources, Policy, and Management major.
3. A minimum of 6 hours of 3000/4000 level courses are required for the minor.

Key to Pathways Learning Core Outcomes:

1f = Foundational Discourse

1a = Advanced/Applied Discourse

2 = Critical Thinking in the Humanities

3 = Reasoning in the Social Sciences

4 = Reasoning in the Natural Sciences

5f = Foundational Quantitative and Computational Thinking

5a = Advances/Applied Quantitative and Computational Thinking

6 = Critique and Practice in Design and the Arts

7 = Critical Analysis of Equity and Identity in the United States

Business (BUSR) Minor

Code	Title	Credits
ACIS 1504	Introduction to Business Analytics and Business Intelligence (Pathways Concept 5 - Quantitative and Computational Thinking 5F)	3
ACIS 2115 & ACIS 2116	Principles of Accounting and Principles of Accounting	6
BIT 2405 & BIT 2406	Introduction to Business Statistics, Analytics, and Modeling and Introduction to Business Statistics, Analytics, and Modeling (Pathways Concept 5 - Quantitative and Computational Thinking 5F 5A) [1]	6
BIT 3414	Operations and Supply Chain Management	3
ECON 2005 & ECON 2006	Principles of Economics and Principles of Economics (Pathways Concept 3 - Reasoning in the Social Sciences)	6
FIN 3104	Introduction to Finance	3
HTM/MGT 2314	Introduction to International Business	3
MATH 1524	Business Calculus (Pathways Concept 5 - Quantitative and Computational Thinking 5F) [2]	4
MGT 1104	Foundations of Business	3
MGT 3404	Principles of Management	3
MKTG 3104	Marketing Management	3
Select one of the following:		3
FIN 3054	Legal and Ethical Environment of Business (Pathways Concept 3 - Reasoning in the Social Sciences)	
FIN 3074	Legal, Ethical, and Financing Issues for Entrepreneurs	
Total Credits		**46**

[1] The following courses may be substituted for BIT 2405:
- CMDA 2005 Integrated Quantitative Sciences + CMDA 2006 Integrated Quantitative Sciences
- STAT 3005 Statistical Methods + STAT 3006 Statistical Methods
- STAT 3604 Statistics for Social Science
- STAT 3615 Biological Statistics + STAT 3616 Biological Statistics
- STAT 4604 Statistical Methods for Engineers

[2] The following courses may be substituted for MATH 1524:
- MATH 1225 Calculus of a Single Variable + MATH 1226 Calculus of a Single Variable

Graduation Requirements

Business minors must complete a minimum of **46 credit hours** with at least a 2.00 GPA. Students must earn a grade of C- or better in each course. If these criteria are met, the minor will be noted on the transcript.

Application Eligibility

In order to apply for a minor in Business, students must meet the following criteria:

- be enrolled in a degree-granting major outside the Pamplin College of Business (Real Estate for Commercial Properties and Real Estate for Residential Properties majors are eligible to pursue the Business minor)
- have at least a 2.00 overall GPA at Virginia Tech
- have completed MATH 1524 (or equivalents)

Students can apply for the business minor at http://pampl.in/addminor (http://pampl.in/addminor/)

Pre-requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Additional Information

Industrial Systems & Engineering (ISE) majors ONLY may substitute courses as listed below:

- ISE 2034 for ACIS 1504
- ISE 3004 for ACIS 2116
- STAT 4706 for BIT 2405
- ISE 2404 + ISE 3414 for BIT 2406
- ISE 4004 for MGT 3404
- ISE 4204 for BIT 3414

Chemistry (CHEM) Minor

Code	Title	Credits
Required Minor Courses		
CHEM 1035	General Chemistry [1, 2]	3
CHEM 1036	General Chemistry [1, 2]	3
CHEM 1045	General Chemistry Laboratory [1, 2]	1
CHEM 1046	General Chemistry Laboratory [1, 2]	1
CHEM 2535	Organic Chemistry [2]	3
CHEM 2536	Organic Chemistry [2]	3
CHEM 2545	Organic Chemistry Laboratory [2]	1
CHEM 2546	Organic Chemistry Laboratory [2]	1
CHEM 4615	Physical Chemistry for the Life Sciences [1, 2]	3
or CHEM 4616	Physical Chemistry for the Life Sciences	
Subtotal		19
Elective Courses		
Select one of the following:		3
BCHM 3114	Biochemistry for Biotechnology and the Life Sciences [2]	
BCHM 4115	General Biochemistry [2]	
CHEM/SBIO 4424	Polysaccharide Chemistry [2]	
CHEM 4514	Green Chemistry [2]	
CHEM 4534	Organic Chemistry of Polymers [2]	
CHEM 4554	Drug Chemistry [2]	
CHEM 4616	Physical Chemistry for the Life Sciences [2]	
CHEM 4634	Polymer and Surface Chemistry [2]	
CHEM/ENSC 4734	Environmental Soil Chemistry [2]	
CHEM 4994	Undergraduate Research (3 credits must be completed. Requires permission of faculty research advisor and undergraduate research eligibility requirements)	
SBIO 3444	Sustainable Biomaterials and Bioenergy [2]	
FST 4504	Food Chemistry [2]	
GEOS 4634	Environmental Geochemistry [2]	
CHEM 4584	Bioorganic Chemistry [2]	
Subtotal		3
Total Credits		**22**

[1] Acceptable course substitutions are as follows:
CHEM 1055 may be substituted for CHEM 1035
CHEM 1056 may be substituted for CHEM 1036
CHEM 1065 may be substituted for CHEM 1045
CHEM 1066 may be substituted for CHEM 1046
CHEM 3615 or CHE 2164may be substituted for CHEM 4615.

[2] Course has prerequisites. Please check the course catalog for details.

Graduation Requirements

A minimum of 22 credit hours must be completed. No more than 16 credits earned toward the CHEM minor may be double-counted among a student's major(s) or minor(s). The overall GPA for the courses within the CHEM minor must be 2.0 or higher. All courses used to fulfill the minor will count toward the Minor GPA.

Chinese Studies (CHNS) Minor

Code	Title	Credits
Required Minor Courses		
CHN 2105	Intermediate Chinese	3
CHN 2106	Intermediate Chinese	3
CHN 3105	Advanced Chinese	3
CHN 3106	Advanced Chinese	3
Select two of the following:		6
CHN 3954	Study Abroad	
CHN 2734	Chinese Culture and Civilization	
CHN 3124	Chinese for Oral Proficiency	
CHN 3474	Topics in Chinese Cinema	
CHN 3514	Modern China through the Media	
CHN 4614	Teaching Chinese	
RLCL 1904	Religion and Culture In Asia	
RLCL 3224	Religion and Culture in China and Japan	
HIST 2355	History of China	
HIST 2356	History of Modern China	
HIST 3664	Revolutionary China	
HIST 3674	Topics in Chinese History	
ART 3064	Arts of China and Japan	
PSCI 3584	Governments and Politics of Asia	
Subtotal		18
Total Credits		**18**

Graduation Requirements

Notes:

- A minimum grade of "C" must be earned in each course completed for the Chinese Studies minor and an average GPA of 2.0 in all courses taken for the Chinese Studies minor is required for completion.
- Courses used to fulfill minor requirements may not be taken Pass/Fail.
- A form titled "Authorization to Take Courses Elsewhere" must be filled out and signed by the student, the Chair of the Department, and the Director of the Office of Global Education before the student departs on a study abroad program.
- Some courses in the minor requirements listed above have prerequisites, so be sure to consult the University Catalog or check with your advisor.

Cinema (CINE) Minor

Code	Title	Credits
Required Minor Courses		
CINE 2054	Introduction to Cinema	3
Subtotal		3

Elective Courses		
Select five of the following:		15
CINE 2064	Introduction to Cinema Production	
CINE 3214	Fiction Cinema Production	
CINE 3224	Documentary Cinema Production	
CINE 3184	Cinema Production Topics [1]	
CINE 3514	American Cinema Genres	
CINE 3524	The Cinema Director	
CINE 3534	Avant-Garde Cinema	
CINE/ENGL 3544	Literature and Cinema	
AFST/CINE 3444	African American Images in Film	
CINE 4084	Cinema History	
CINE 4534	Underground Cinema and Culture	
CINE 4144	Topics in Cinema Studies [1]	
Subtotal		15
Total Credits		**18**

[1] May be repeated 2 times with different content for a maximum of 9 credits.

Graduation Requirements

A minimum of 6 credit hours must be completed at the 3000 or 4000 academic level.

A minimum GPA of 2.0 is all courses taken to fulfill the minor is required.

Film or cinema focused courses from other departments across the university may be used to fulfill requirements for the minor upon approval by the minor coordinator.

Up to six hours of special offerings, such as Independent Study (4974) or Undergraduate Research (4994) in any department may be used to fulfill requirements for the minor where appropriate. Permission to include such courses must be granted by the minor coordinator.

Civic Agriculture and Food Systems (CAFS) Minor

The minor in Civic Agriculture and Food Systems embodies a commitment to developing and strengthening an economically, environmentally, and socially sustainable system of agriculture and food systems that relies on local resources and serves local markets and citizens. The minor serves the needs of all students and is designed to promote academic enhancement, personal growth, and civic engagement while strengthening student's capacity to learn about civic agriculture and food systems through reflection and experiential practice to solve real-world problem. The minor in Civic Agriculture and Food Systems requires the completion of 18 credits; 12 credits required courses and 6 credits free electives from the list provided. All courses must be taken and passed on an A–F basis unless only offered on P/F basis.

Code	Title	Credits
Required Minor Courses		
ALS 2204	Sustainable Food Systems (Pathways Concept 1 - Discourse (advanced); Pathway 11 - Intercultural and Global Awareness)	3
ALS 3404	Ecological Agriculture: Theory and Practice (Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways 10 - Ethical Reasoning)	3
ALS 4204	Concepts in Community Food Systems (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways 11- Intercultural and Global Awareness)	3
ALS 4214	Capstone: Civic Agriculture and Food Systems (Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Pathways 10 - Ethical Reasoning)	3
Subtotal		12
Free Electives		
Select two of the following:		6
AAEC 1005/1006	Economics of the Food and Fiber System	
AAEC 3204	International Agricultural Development and Trade	
AAEC 3324	Environment and Sustainable Development Economics	
AAEC 4204	Food and Agricultural Policy	
AAEC 4344	Sustainable Development Economics	
AAEC 4814	Food and Health Economics	
ALCE 3004	Educational Programs in Agricultural and Life Sciences	
ALCE 3014	Leadership Effectiveness for Professionals in Agricultural Organizations	
ALCE 3624	Communicating Ag and Life Sciences in Writing	
ALCE 3634	Communicating Ag and Life Sciences in Speaking	
ALS 1004	Agriculture, the Arts and Society	
ALS 2504	Animals in Society	
ALS 3954	Study Abroad (max 1-3 credit hours)	
ALS 4964	Field Study/Practicum (max 1-3 credit hours)	
ALS 4994	Undergraduate Research (max 1-3 credit hours)	
APSC 1454	Introduction to Animal and Poultry Science	
DASC/APSC 3134	Animal Agriculture and the Environment	
ENSC 1015/1016	Foundations of Environmental Science	
CSES 4544	Forage Crop Ecology	
CSES/ENSC 4444	Managed Ecosystems, Ecosystem Services, and Sustainability	
HIST 3144	American Environmental History	
HTM 2454	Global Travel & Tourism Management	
HORT 2134	Plants and Greenspaces in Urban Communities	
HORT 2184	Plants, Places, and Cultures in a Global Context	
HORT 2234	Environmental Factors in Horticulture	
HORT 2834	Sustainable Agriculture Practicum	
HORT 4835 & HORT 4845	Organic Vegetable Production and Organic Vegetable Production Laboratory	
HNFE 4624	Community Nutrition	
Subtotal		6
Total Credits		**18**

Minimum GPA of 2.0 in all courses taken to fulfill the minor is required. Faculty advisor in the Office of Academic Programs with civic agriculture food systems experience will serve as a counterpart to the student's

major advisor. Students choosing Civic Agriculture & Food Systems will register with the Office of Academic Programs in the College of Agriculture & Life Sciences, 1060 Litton-Reaves Hall. This will enable the college to provide any pertinent assistance, materials & information to the student. The student will consult with the professor of any course that requires prerequisites. The checksheet contains no hidden prerequisites.

Classical Languages (CLL) Minor

Code	Title	Credits
Required Minor Courses		
Select eighteen semester hours of coursework in Latin and/or Classical and New Testament Greek from the following: [1]		18
LAT 1105	Elementary Latin	
LAT 1106	Elementary Latin	
LAT 2104	Cicero and Livy	
LAT 2114	Latin Epic: Vergil and Ovid	
LAT 2124	Latin Lyric: Catullus and Horace	
LAT 2134	Late Medieval Latin	
LAT 2984	Special Study	
LAT 3004	Readings in Latin Literature	
LAT 4004	Directed Studies in Latin Prose Composition	
LAT 4974	Independent Study (variable credit) [2]	
LAT 4984	Special Study	
LAT 4994	Undergraduate Research (variable credit) [2]	
LAT 5974	Independent Study (variable credit) [2]	
LAT 5984	Special Study (Graduate)	
LAT 5994	Research and Thesis (variable credit) [2]	
GR 1105	Classical and New Testament Greek	
GR 1106	Classical and New Testament Greek	
GR 2104	Greek New Testament	
GR 2114	Readings in Classical Greek Literature	
GR 2974	Independent Study (variable credit) [2]	
GR 2984	Special Study [2]	
GR 4974	Independent Study (variable credit) [2]	
GR 4984	Special Study [2]	
GR 4994	Undergraduate Research (variable credit) [2]	
Total Credits		**18**

[1] Including at least 6 credit hours at the 3000 or 4000 level. With the exception of LAT 1105 Elementary Latin, LAT 1106 Elementary Latin, GR 1105 Classical and New Testament Greek, GR 1106 Classical and New Testament Greek, and LAT 4004 Directed Studies in Latin Prose Composition, all courses are variable-content courses and may be repeated for credit up to three times with different content. For substitutions, see your advisor for Classical Languages.

[2] Course can be included in the Minor *only* with permission of your advisor.

Graduation Requirements

- All courses taken from among those listed above will be included in the calculation of the minor GPA.
- A student must complete all courses with a minimum 2.0 GPA for all hours attempted. In addition a minimum grade of C is required of all Foreign Language Minors in each of the required courses for the minor.
- Required courses may be transferred only with the approval of your advisor for the Latin Minor.
- Authorization to take coursework elsewhere should be obtained beforehand from the Dean's Office and the Chair of the Department of Modern and Classical Languages and Literatures.

N.B.

1. CLA 2444 Ancient Greek and Roman Mythology (= ENGL 2444 Ancient Greek and Roman Mythology and RLCL 2444 Greek and Roman Myth) and CLA 2454 Topics in Ancient Greek and Latin Literature do not count toward a Latin Minor.
2. No course required for the Classical Language Minor may be taken Pass/Fail.
3. Some courses listed on this checksheet may have pre-/corequisites; please consult the University Course Catalogue.

Classical Studies (CLA) Minor

The Minor in Classical Studies in the Department of Modern and Classical Languages and Literatures requires the completion of 18 credit hours from the following list. At least 6 credit hours must be at the 3000 or 4000 level. 6 credit hours maximum may be counted at the 1000 level.

Code	Title	Credits
Required Minor Courses		
Select 6 courses of the following:		18
ART 3074	Egyptian Art and Architecture	
ART 3084	Greek Art and Architecture	
ART 3174	Introduction to Archaeology	
ART 3184	Roman Art and Architecture	
CLA/RLCL 1134	The Ancient Mediterranean World	
CLA 2434	Fairytale, Folklore, and Magic: Popular Literature in Ancient Greece and Rome	
CLA/ENGL/ RLCL 2444	Ancient Greek and Roman Mythology	
CLA 2454	Topics in Ancient Greek and Latin Literature	
CLA 2464	Mythology, Philosophy and Video Games	
CLA 3954	Study Abroad	
GR 1105	Classical and New Testament Greek	
GR 1106	Classical and New Testament Greek	
HIST 1024	Ancient History	
HIST/CLA 2224	Ancient Greek and Roman Women	
HIST/CLA 2234	Classics in the Modern World	
HIST 3274	The Greek City	
HIST 3284	The Roman Revolution

LAT 1105	Elementary Latin	
LAT 1106	Elementary Latin	
PHIL 2115	Ancient Through Medieval Philosophy	

RLCL 2424	New Testament	
RLCL 3414	Jesus in Earliest Christianity	
RLCL 3424	Orthodoxy and Heresy in Early Christianity	
Subtotal		18
Total Credits		**18**

When o#ered, the following courses may also be included in the Classical Studies minor by substitution, when the topics pertain to Classical Studies. Consult the Classical Studies advisor.

Code	Title	Credits
ART 3004	Topics in Art History	3
RLCL 4324	Topics in Religion and Culture	3
PHIL 4014	Special Topics in Philosophy	3

Students must maintain a 2.0 GPA in the Classical Studies minor. The in-minor GPA is calculated as the GPA in all courses the student has taken in the Classical Studies minor. A minimum grade of C (2.0) must be earned by Classical Studies minors in all courses taken to satisfy the Classical Studies minor.

Independent Study (CLA 2974 Independent Study or CLA 4974 Independent Study), Special Study (CLA 2984 Special Study and CLA 4984 Special Study), or Undergraduate Research (CLA 4994 Undergraduate Research) in any department may also be substituted *if the topic is fitting*; consult the Classical Studies advisor. Substitutions must be approved by the Classical Studies advisor. No course taken Pass/Fail can be included in a Classical Studies Minor.

All classes are three credits.

Graduation Requirements

The Minor in Classical Studies in the Department of Modern and Classical Languages and Literatures requires the **completion of 18 credit hours** from the following list. At least 6 credit hours must be at the 3000 or 4000 level. 6 credit hours maximum may be counted at the 1000 level.

Climate and Society (CLSO) Minor

Code	Title	Credits
A minimum of 18 credit hours:		
Required Foundational Courses		
FREC 2124	Forests, Society & Climate (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways Outcome 11 - Intercultural and Global Awareness)	3
GEOG 1524	Introduction to Earths Climate (Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways Outcome 11 - Intercultural and Global Awareness)	3
Subtotal		6
Restricted Electives		
Select one course from four different content areas for a total of three courses: Please note that one of the courses must be at a 3000/4000 level.		9
Physical/Natural Sciences		
CSES 2244	Agriculture, Global Food Security and Health (Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways Outcome 10 - Ethical Reasoning ; Pathways Outcome 11 - Intercultural and Global Awareness)	
FREC 4354	Forest Soil and Watershed Management (Pathways Concept 5 - Quantitative and Computational Thinking (5A) ; Pathways Outcome 11 - Intercultural and Global Awareness) [1]	
GEOS 1064	Climate History: Past, Present, and Future (Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways Outcome 10 - Ethical Reasoning)	
GEOS 3034	Oceanography (Not a Pathways course)	
STS 2454	Science, Techology, and Environment (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Outcome 10 - Ethical Reasoning ; Pathways Outcome 11 - Intercultural and Global Awareness)	
Environment and Ecosystems		
FREC 2004	Forest Ecosystems (Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways Outcome 11 - Intercultural and Global Awareness)	
GEOG/WATR 2004	Water, Environment, and Society (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Outcome 10 - Ethical Reasoning)	
GEOG 3104	Environmental Justice, Resources and Development (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Outcome 11 - Intercultural and Global Awareness)	
GEOG 3274	Polar Environments (Pathways Concept 1 - Discourse (1A); Pathways Outcome 11 - Intercultural and Global Awareness) [1]	
GEOS 1024	Earth Resources, Society, and Environment (Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways Outcome 11 - Intercultural and Global Awareness)	
Humans Dimensions and Policy		
FREC/NR/LAR 2554	Leadership for Global Sustainability (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Outcome 10 - Ethical Reasoning ; Pathways Outcome 11 - Intercultural and Global Awareness)	
STS 2444	Global Science and Technology Policy (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Outcome 11 - Intercultural and Global Awareness)	
STS 3334	Energy and Society (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Outcome 11 - Intercultural and Global Awareness)	
Methods		
FREC 1004/ GEOG 1084	Digital Planet (Pathways Concept 5 - Quantitative and Computational Thinking (5F) ; Pathways Outcome 10 - Ethical Reasoning)	

FREC 3044	Environmental Data Science (Pathways Concept 5 - Quantitative and Computational Thinking (5A) ; Pathways Outcome 10 - Ethical Reasoning) [1]	
Subtotal		9
Required Capstone		
FREC/IS/PSCI 4174	Climate Change and the International Policy Framework (Pathways Concept 1 - Discourse (1A); Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Outcome 10 - Ethical Reasoning) [1]	3
Total Credits		**18**

[1] Some courses listed on this checksheet may have prerequisites, corequisites or other registration restrictions. Please consult the University Course Catalog or check with your advisor for more information.

Graduation Requirements

NOTES:

Complete a minimum of 18 credit hours.

1. Students must complete 3 credits in each of the two following integrative outcomes: (10) Ethical Reasoning and (11) Intercultural Global Awareness.
2. A minimum cumulative GPA of 2.0 in all courses taken is required to complete this minor.
3. All minor courses must be taken on A - F basis.
4. No more than 50% of the graded course credits required for the Minor may be double-counted in a student's Major.
5. When the need arises, such as due to limited course availability or scheduling conflicts, students enrolled in the minor may contact the College of Natural Resources and Environment Advising Center to request to substitute a minor requirement.

Pathways Core Concepts:
If= Foundational Discourse
Ia = Advanced/Applied Discourse
2 = Critical Thinking in the Humanities
3 = Reasoning in the Social Sciences
4 = Reasoning in the Natural Sciences
5f= Foundational Quantitative and Computational Thinking
5a =Advanced/Applied Quantitative and Computational Thinking 6 = Critique and Practice in Design and the Arts
7 = Critical Analysis of Identity and Equity in the United States
Pathways Integrative Concepts:
IO = Ethical Reasoning
11 = Intercultural and Global Awareness

Community Systems and Engagement (CSE) Minor

The Community Systems and Engagement (CSE) Pathways Minor encourages participation by undergraduate students from all majors. The minor prepares students to address persistent community issues through active citizenship and systems thinking competency. By combining community engagement, service learning, and applied problem solving, the minor creates substantial opportunities for experiential learning.

The Pathways Minor in Community Systems and Engagement requires completion of 18 credit hours as follows:

Code	Title	Credits
Select one of the following:		3
SOC 2034	Diversity and Community Engagement (Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Pathways Concept 3 - Reasoning in the Social Sciences ; Intercultural and Global Awareness)	
SPIA 1024	Community Service Learning (Pathways Concept 3 - Reasoning in the Social Sciences ; Ethical Reasoning ; Intercultural and Global Awareness)	
Subtotal		3
Required Minor Courses		
SPIA 2024	Community Systems Thinking (Pathways Concept 3 - Reasoning in the Social Sciences ; Intercultural and Global Awareness)	3
HD 3024	Community Analytics (Pathways Concept 5 - Quantitative and Computational Thinking (advanced); Ethical Reasoning)	3
SPIA 4784	Community Systems Capstone (Pathways Concept 5 - Quantitative and Computational Thinking (advanced); Ethical Reasoning; Intercultural and Global Awareness)	3
Subtotal		9
Elective Courses		
Select two of the following: [1]		6
FREC 2554	Leadership for Global Sustainability (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences ; Intercultural and Global Awareness)	
SPIA 4964	Field Work/Practicum (variable credit)	
TA 2404	Introduction to Applied Collaborative Techniques (Pathways Concept 6 - Critique and Practice in Design and the Arts ; Pathways Concept 1 - Discourse (applied); Intercultural and Global Awareness)	
UAP 4954	Study Abroad (variable credit)	
UAP/PSCI 4624	The Washington Semester: Seminar in American Politics and Public Policy	
UAP/PSCI 4644	Washington Semester: Politics, Policy and Administration in A Democracy	
Other courses [2]		
Subtotal		6
Total Credits		**18**

1 Electives should be selected to gain additional exposure to a specific engagement strategy, community, or topic area. Global education, internships, research, or field studies with a community engagement focus are encouraged. Students may also choose courses which satisfy other Pathways to General Education requirements if they have a community engagement component.
2 With pre-approval on the minor director.

Notes:

- No more than 50% of the graded course credits required for the Minor in Community Systems and Engagement may be double-counted by a student toward the requirements of a major.
- A GPA of 2.0 or higher is required in minor.
- Some courses listed on this checksheet have prerequisites. Please consult the University Course Catalog or check with your advisor.

Computer Science (CS) Minor

Code	Title	Credits
CS 1114	Introduction to Software Design (C)	3
or CS 2064	Intermediate Programming in Python	
CS 2114	Software Design and Data Structures (C)	3
MATH 2534	Introduction to Discrete Mathematics	3
CS 2505	Introduction to Computer Organization (C)	3
CS 3114	Data Structures and Algorithms	3
CS 3/4/5XXX	CS Elective	3
CS 3/4/5XXX	CS Elective	3
Total Credits		**21**

Graduation Requirements

Additional Requirements and Comments

1. CS minors must earn at least a "C" (2.0) in CS 1114, CS 2114, and CS 2505
2. Students must have a CS minor GPA of at least 2.0 to successfully complete the minor. The CS minor GPA includes all courses with the CS designator.
3. The following courses are not allowed for CS minor credit: BIT 4164, CS 4944, CS 5044, CS 5045, CS 5046, CS 5904, CS 5944, CS 5974, and CS 5994.
4. The following cross-listed courses are allowed for CS 3/4/5XXX elective credit: BIT 4614, CMDA 3634, CMDA 3654, CMDA 4654, ECE 4424, MATH 3414, MATH 4414, PSCI 4164, STAT 3654, and STAT 4654.
5. To declare the CS minor, a student must be in a degree-granting major and must have completed CS 2114 (C) or CS 2505 (C) or one of their equivalent substitutions listed below.
6. The following substitutions are accepted for the CS minor:
   - CS 1054 (C) will substitute for CS 1114 (C).
   - ECE 2514 (C) will substitute for CS 1114 (C).
   - ECE 3514 (C) will substitute for CS 2114 (C).
   - ECE 2564 (C) will substitute for CS 2505 (C).
   - MATH 3034 will substitute for MATH 2534.
   - CS 5040 will substitute for CS 3114.

Undergraduates Taking Graduate Courses

Students within 2 semesters of graduating and with a 3.0 or better GPA may enroll in 5000-level courses satisfying undergraduate degree requirements within their department if they have been accepted into the Accelerated Undergraduate/Graduate Program, or by permission of the course instructor and the Department. For students not accepted into the Accelerated Undergraduate/Graduate Program, these courses may not be used on the Plan of Study for a graduate degree.

Consumer Studies (CONS) Minor

Code	Title	Credits
Required Minor Courses		
CONS 2304	Consumer and Family Finances	3
AHRM 2404	Consumer Rights	3
CONS 3504	Resource Management for Individuals and Families	3
Select two of the following:		6
CONS 3404	Consumer Education Strategies	
CONS 4314	Debtor-Creditor Relationships	
CONS 4324	Financial Counseling	
CONS 4404	Consumer Protection	
Subtotal		15
Elective Courses		
Select one of the following:		3
FMD 1204	Clothing and People	
FMD 3024	History of Costume	
RED 2644	Housing and the Consumer	
RED 4604	Environmental and Sustainability Issues in Housing	
Subtotal		3
Total Credits		**18**

Graduation Requirements

Note: A minimum GPA of 2.0 in all courses taken to fulfill the minor is required.
The curriculum includes no hidden pre-requisites.

Crop & Soil Environmental Sciences (CSES) Minor

Code	Title	Credits
Required Minor Courses		
CSES 2444	Agronomic Crops	3
or SPES 2244	World Crops: Food and Culture	
Select one of the following:		3-4
CSES 3114/ GEOS 3614	Soils	
And		
CSES 3124/ GEOS 3624	Soils Laboratory	
Or		
ENSC 3134	Soils in the Landscape	
Subtotal		6-7
Restricted Electives		
Select a minimum of 9 credits of the following:		9
CSES 2244	Agriculture, Global Food Security and Health	
CSES 2224	Foundations of Precision Agriculture	
CSES 2444	Agronomic Crops [1]	
CSES 2564	Turfgrass Management	
CSES 3564	Golf and Sports Turf Management	
CSES 4064	Soil Microbiology	

CSES 4134	Soil Genesis and Classification	
CSES 4144	Plant Breeding and Genetics	
CSES 4214	Soil Fertility and Management	
CSES 4224	Applied Concepts in Precision Agriculture	
CSES 4344	Crop Physiology and Ecology	
CSES 4544	Forage Crop Ecology	
ENSC 3604	Fundamentals of Environmental Science	
ENSC 3644	Plant Materials for Environmental Restoration	
ENSC/CHEM 4734	Environmental Soil Chemistry	
ENSC 4244	Ecological Restoration	
HORT 4344	Production of Food Crops in Controlled Environment Agriculture	
SPES 2004	Cannabis - Science, Industry, and Culture	
SPES 2244	World Crops: Food and Culture [1]	
SPES 4114	Topics: StudyAway: Production, Culture and Social Aspects US Agriculture	
Subtotal		9
Optional Restricted Electives		
Select a maximum 4 credits of the following:		3-4
ENT 4254	Insect Pest Management	
ENT/PPWS 4264	Pesticide Usage	
PPWS 4104	Plant Pathology	
Subtotal		3-4
Total Credits		**18-20**

[1] This course can only count once towards the Minor requirements, either as a Required Course or as a Restrictive Elective.

Graduation Requirements

Notes:

- Minimum credits to complete minor =18
- Minimum GPA requirement of 2.0 for courses taken towards the minor
- Some courses listed for this minor may have pre-/co-requisites, please consult the University Course Catalog, or check with your advisor

Cybersecurity (CYBR) Minor

Code	Title	Credits
Required Minor Courses		
Select two of the following:		6
ECE 4560	Computer and Network Security Fundamentals *	
CS 4264	Principles of Computer Security *	
ECE/CS 5560	Fundamentals of Info Security + *	
Subtotal		6
Networks Group		
Select one of the following:		3
ECE 3564	Introduction to Computer Networking	
ECE 4564	Network Application Design	
CS 3754	Cloud Software Development	
CS 4254	Computer Network Architecture and Programming +	
or CS 5565	Network Architecture and Protocols	
Subtotal		3
Systems Group		
Select one of the following:		3
CS 3214	Computer Systems	
CS 4274	Secure Computing Capstone	
CS/ECE 4504	Computer Organization	
or ECE 4530	Hardware-Software Codesign	
or CS 3274	Software Reverse Engineering	
ECE 3574	Applied Software Design	
Subtotal		3
Interdisciplinary Group		
Select one of the following:		3
ACIS 4684	Information Systems Security and Assurance	
BIT 4614	Cybersecurity Management II	
CS 3274	Software Reverse Engineering	
CS/BIT/PSCI 4164	Future of Security: Integrative Solutions for Complex Security Systems	
CS 4274	Secure Computing Capstone	
FIN 4014	Cyberlaw and Policy	
MATH 4175	Cryptography	
MATH 4176	Cryptography	
Subtotal		3
Additional Required Elective Course (3c)		
Select one additional course from the Networks, Systems, or Interdisciplinary List		3
Subtotal		3
Seminar 1c		
ECE 4944	Cybersecurity Seminar (offered Spring semester only)	1
Subtotal		1
Total Credits		**19**

+ Students in their senior year with a 3.0 or better GPA may enroll in 5000-level courses satisfying undergraduate degree requirements within their department with the permission of the course instructor and the department head.

* CS 5560/ECE 5560 can be substituted for either ECE 4560 or CS 4264, not both courses.

Graduation Requirements

Additional Requirements

1. The Cybersecurity Minor is restricted to students in the BSEE, BSPCE, and BSCS degree programs only.
2. Students majoring in Secure Computing in Computer Science are not eligible to enroll in the Cybersecurity Minor due to course duplication.
3. To declare the Cybersecurity Minor, a student must be in a degree-granting major and have completed one of the following courses: CS 3214 **or** ECE 3574.
4. It is your responsibility to ensure that you have completed the prerequisites for each course. For prerequisite grade requirements

and the most accurate and up-to-date prerequisite information, please refer to the timetable of classes.

Dairy Science (DASC) Minor

Code	Title	Credits
Required Minor Courses		
Many courses in this list have prerequisites. Click on each course for its description and any co- or prerequisites.		
ALS 2304	Comparative Animal Physiology and Anatomy	4
DASC 2474	Dairy Science and Industry	3
DASC 4374	Physiology of Lactation	3
Subtotal		10
Elective Courses		
Many courses in this list have prerequisites. Click on each course for its description and any co- or prerequisites.		
Complete at least 3 credits at the 3000-4000 level.		
Select a minimum of 9 credits of the following courses:		9
DASC 1574	Dairy Science First Year Experience	
DASC 1464	Dairy Cattle Handling	
DASC 2204	Entrepreneurship in Animal Agriculture	
DASC 2484	Dairy Cattle Evaluation	
DASC/APSC 3134	Animal Agriculture and the Environment	
DASC 3274	Applied Dairy Cattle Nutrition	
DASC 3474	Dairy Information Systems	
DASC 4174	Applied Dairy Cattle Genetics	
DASC 4274	Dairy Ration Formulation	
DASC/APSC 4304	Principles and Practices of Bovine Reproduction	
DASC 4384	Mammary Immunology	
DASC 4474	Advanced Dairy Management Evaluation	
DASC 4475	Dairy Enterprise Management	
DASC 4476	Dairy Enterprise Management	
Subtotal		9
Total Credits		**19**

Graduation Requirements

1. Total 19 credit hours. A minimum of 6 credits at the 3000-4000 level must be completed.
2. Students who minor in Dairy Science must register with the School of Animal Sciences and be assigned a faculty advisor.
3. A minimum 2.0 grade point average across all courses taken in the minor is required for completion of the minor.

Data and Decisions (DTDC) Minor

Code	Title	Credits
I. Introductory Restricted Elective		
Select one of the following:		3
ACIS 1504	Introduction to Business Analytics and Business Intelligence	
CS 1014	Introduction to Computational Thinking (Pathways Concept 5f – Foundational Quantitative and Computational Thinking)	
FREC 1004/ GEOG 1084	Digital Planet (Pathways Concept 5f – Foundational Quantitative and Computational Thinking)	
HIST/SOC/ STS 2604	Introduction to Data in Social Context (Pathways Concept 5f – Foundational Quantitative and Computational Thinking)	
SPIA 2004	Introduction to Urban Analytics	
STAT 1014	Data in Our Lives (Pathways Concept 5f – Foundational Quantitative and Computational Thinking)	
Subtotal		3
II. Core Requirements		
BDS 2005	Fundamentals of Behavioral Decision Science (Pathways Concept 3 - Reasoning in the Social Sciences)	3
CMDA 2014	Data Matter (Pathways Concept 5a – Advanced Quantitative and Computational Thinking)	3
Subtotal		6
III. Restricted Electives - Applying Data and Decisions		
Select two of the following:		6
BDS 2006	Fundamentals of Behavioral Decision Science (Pathways Concept 3 - Reasoning in the Social Sciences)	
BIT 3434	Advanced Modeling for Business Analytics	
BIT 4604	Data Governance, Privacy and Ethics (Pathways Concept 2 - Critical Thinking in the Humanities)	
FREC 3044	Environmental Data Science (Pathways Concept 5a – Advanced Quantitative and Computational Thinking)	
GEOS/GEOG 4354	Introduction to Remote Sensing	
HD 3024	Community Analytics	
HIST 2624	Topics in the History of Data in Social Context (Pathways Concept 1a – Advance Discourse Pathways Concept 2 - Critical Thinking in the Humanities)	
HIST 3774	Digital History	
PHS/HNFE 3634	Epidemiologic Concepts of Health and Disease	
PHS 4064	Modeling Infectious Diseases	
PSCI 2024	Research Methods in Political Science	
SOC/HD 2104	Quantitative Approaches to Community Research (Pathways Concept 5f – Foundational Quantitative and Computational Thinking)	
SOC 3204	Social Research Methods	
STAT 3604	Statistics for Social Science (Pathways Concept 5a – Advanced Quantitative and Computational Thinking)	
UAP 3024	Urban and Regional Analysis	
Subtotal		6
IV. Data and Decisions Capstone Requirement		
BIT/MGT 4854	Analytics in Action (Pathways Concept 1a – Advanced Discourse)	3
Subtotal		3
Total Credits		**18**

Graduation Requirements

Credit Hours Requirement

18 total credit hours are required to complete the minor.

Minimum GPA

For the courses attempted for this minor, the student must have a GPA of 2.0 or better.

Prerequisites

Some courses listed on this checksheet may have prerequisites. Students are required to double check course prerequisites and equivalents. Please see your advisor or consult the Undergraduate Course Catalog (https://catalog.vt.edu) for more information.

Acceptable Substitutions

CS 1014: CS 1114, or CS 1064, or CS 1054, or CS 1044.

STAT 3604: STAT 3005 or STAT 3615 or CMDA 2005*

**Note: If CMDA 2005 is taken for an Applying Data & Decisions Restricted Elective, 9 credits of Applying Data & Decisions Restricted Electives will be required for the minor, making the total minor requirements 21.*

Design + Technology + Creative Expression (DTCE) Minor

Code	Title	Credits
Required Minor Courses		
IDS 1114	Play to Make	3
MUS 3064	Digital Sound Manipulation	3
AAD 4234	Capstone Collaborations: Cross-Disciplinary Teams	3
Subtotal		9
Elective Courses		
Understand (Empathize/Define)		
Select one of the following:		3
CINE 2054	Introduction to Cinema	
COMM 2084	Media and Society	
CS 3724	Introduction to Human-Computer Interaction	
HIST/SOC/ STS 2604	Introduction to Data in Social Context	
IDS 2114	History of Industrial Design	
IDS 2124	History of Modern Industrial Designers	
ITDS 1114	Design Appreciation	
MUS 3314	Instrumental Ensemble Music	
STS 1504	Introduction to Science, Technology, and Society	
STS 3284	Technology and Disability	
Explore (Ideate/Prototype)		
Select one of the following:		3
AHRM 2014	Design for Consumers Studio

MKTG 4974	Independent Study	3
MKTG 4984	Special Study	3
MKTG 4994	Undergraduate Research	1-19
or MKTG 4994H	Honors Undergraduate Research	
SBIO 3124	Paper and Paperboard Packaging	3
SBIO 3445 & SBIO 3446	Entrepreneurial Wood Design and Innovation and Entrepreneurial Wood Design and Innovation	6
SBIO 4024	Packaging Design for Global Distribution	3

Graduation Requirements

Students must complete the minor with at least a 2.00 GPA in the **21 credit hours** required for the minor. If these criteria are met, the minor will be noted on the transcript.

Application Eligibility

Application to the minor in Digital Marketing Strategy is open to all university students, with the exception of Marketing majors, with at least a 2.5 overall GPA at Virginia Tech.

Students can apply for the Digital Marketing Strategy minor at http://pampl.in/addminor

Prerequisites

Students are responsible for ensuring they have met necessary prerequisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Major and Minor Courses

No more than 50% of the graded course credits required for the Minor in Digital Marketing Strategy may be double-counted by a student also enrolled in a non-marketing business degree.

Diversity and Community Engagement (DCE) Minor

Code	Title	Credits
Required Minor Courses		
SOC 2034	Diversity and Community Engagement	3
SOC 4294	Capstone: Diversity Engagement [1]	3
Subtotal		6
Elective Courses for Diversity and Community Engagement Minor		

Select four courses in four of the five area on the approved minor list from the following: [2,3]		12
Area 1: Expressive Cultures		
AFST 2774	Black Aesthetics	
AFST 4774	Blacks in the Performing Arts	
AINS/HUM 2104	Oral Traditions and Culture	
AINS/ENGL 2804	Contemporary Native American Literatures	
AINS/ENGL 3304	The Languages of Native America	
ENGL 3624	Appalachian Literature	
ENGL 3654	Ethnic American Literature	
HUM/RLCL 3204	Multicultural Communication	
RLCL 2324	Islam	
SPAN 3474	Topics in Modern Hispanic Caribbean Cultures	
WGS 2224	Creativity, Power, & Politics	
WGS/RLCL 3014	Women and Gender in Islam	
Area 2: Historical Legacies		
AFST/HIST 2275	African-American History	
AFST/HIST 2276	African-American History	
AFST 2354	The Civil Rights Movement	
AFST 4704	History of African-American Theatre	
AINS/HUM 2104	Oral Traditions and Culture	
HIST 3105 & HIST 3106	Women in U S History and Women in U S History	
HIST 3164	Sexuality in American History	
HIST 3205 & HIST 3206	and	
HIST 3214	History of Appalachia	
PSCI 3784	Origins of the State	
SPAN 2754	Topics in Spanish American Culture	
SPAN 3444	Topics in Early Spanish American Cultures	
Area 3: Global Perspectives		
AINS/PSCI 3684	Indigenous Peoples and World Politics	
ENGL 3644	The Postcolonial Novel	
FR 3314	Introduction to Francophone Studies	
GEOG/IS/PSCI 2034	Geography of Global Conflict	
HIST 3554	Age of Globalization	
IS/GEOG/PSCI 2054	Introduction to World Politics	
IS/GEOG/PSCI 2064	The Global Economy and World Politics	
ISE 4304	Global Issues in Industrial Management	
PHIL 2304	Global Ethics	
STS/HIST 2054	Engineering Cultures	
SOC/GEOG/UAP 4764	International Development Policy and Planning	
WGS 3214	Global Feminisms	
WGS/GEOG/UAP 4214	Gender, Environment, and International Development	
Area 4: Community and Society		
ALCE 4304	Community Education and Development	
AFST/SOC 2454	Race and Racism	
AFST 3454	African American Leadership for Social Change	
APS/AHRM/GEOG/HD/HUM/SOC/UAP 3464	Appalachian Communities	
APS/HUM 4414	Issues in Appalachian Studies	
ECON 3024	Economic Justice	
ECON 4124	Growth and Development	
HD 2314	Human Sexuality	
HD 4364	Gender And Family Diversity	
HTM 3484	Socio-Cultural Impacts of Tourism	
PSCI 3255 & PSCI 3256	The Politics of Race, Ethnicity and Gender and The Politics of Race, Ethnicity and Gender	
PSCI 3724	Poverty and Welfare Policy	
PSYC 2084	Social Psychology	
SOC 2024	Sociology of Race and Ethnicity	
SOC/RLCL 2514	Asian American Experience	
SOC 3004	Social Inequality	
SOC 3014	Gender Relations	
SOC 3504	Population Trends and Issues	
SOC 3614	Gender and Work in the U.S.	
SOC 3714	Sociology of Aging	
TA 4304	Theatre Outreach	
WGS 2254	Feminist Activism	
WGS/AFST/SOC 2264	Race, Class, Gender, and Sexualities	
WGS 2284	Lesbian, Gay, Bisexual, Transgender and Queer Issues	
WGS/STS 4704	Gender and Science	
Area 5: Experiential Learning [4]		
Subtotal		12
Total Credits		**18**

1. Should be taken as the final course for fulfillment of the minor unless granted permission by the instructor.
2. At least 9 hours must be taken at the 3000-4000 level. Alternatively, students may complete three credit hours in three of the five areas, and an additional three credit hours in an approved experiential learning project. This experiential learning project must be approved by the minor director.
3. Additional courses may be substituted for the fulfillment of any of the aforementioned areas at the discretion of the minor advisor. A Course Substitution Form must be submitted. A current syllabus and course description are required for these additional courses to be considered

toward the fulfillment of requirements for the Diversity and Community Engagement Minor.

[4] Experiential learning projects are educational opportunities that occur outside of the confines of a traditional classroom. These projects must include work related to the issues of diversity and community engagement. A student will receive three credit hours for an experiential learning provided they fulfill all of the requirements. Examples of experiential of learning project are, but may not necessarily include the following examples:

- Service learning
- Volunteer projects
- Internships related to diversity or community work
- Undergraduate research projects
- Conflict resolution programs

Experiential Learning Projects will receive credit hours under SOC 4964 Field Study. The minor director must approve all experiential learning projects. Please refer to the Experiential Learning Project Handbook for guidelines and procedures.

Additional Requirements

- Departmental pre-requisites for these courses must be satisfied
- A minimum of 18 credit hours is required
- A maximum of 6 credit hours may be taken within the same program to fulfill the electives requirement. [1]
- A maximum of 6 credit hours may be taken at the 1000-2000 level, including the foundations course.
- All courses must be taken for a letter grade of A/F
- A minimum GPA of 2.0 in all courses taken to fulfill the minor required.

1 Due to the Department of Sociology offering both the foundation and capstone courses, students will be allowed to take one additional course in this department. For the purposes of this minor, Africana Studies, American Indian Studies, and Women and Gender Studies are considered separate programs. Similarly, in the Religion and Culture Department, Religion, Humanities, and Appalachian Studies will be counted as separate programs.

SOC 3004	Social Inequality	
SOC/ENGL/ RLCL 3144	Language and Ethnicity in the United States	
Subtotal		9
Total Credits		**19**

1 For Human Development Majors, the 1 credit of field study for the ECDE minor must be in addition to the 6 credit hours of field study required for the HD major. Elementary Education Majors pursuing the Virginia State Early childhood for three-year-olds and four-year-olds add-on endorsement should seek information and academic advising from the School of Education (soe@vt.edu) regarding the specific requirements for Field Study.

2 Students who are not majoring in a degree program offered by the School of Education may not enroll in EDCI 3964 or EDCI 4964. Elementary Education Majors pursuing the Virginia State Early childhood for three-year-olds and four-year-olds add-on endorsement should seek information and academic advising from the School of Education (soe@vt.edu) regarding the specific requirements for Field Study.

3 Elementary Education Majors pursuing the Virginia State Early childhood for three-year-olds and four-year-olds add-on endorsement must complete EDCI 3234 and EDCI 3244.

Graduation Requirements

Students cannot major in ECDE and minor in ECDE.
University min. GPA is 2.0. In-minor min. GPA is 2.0. All minor courses count toward the in-minor GPA.
Some courses listed on this checksheet may have prerequisites; see Undergraduate Catalog.
Students participating in the elementary education degree program that grants Virginia State Teaching Licensure have the option of fulfilling the ECDE minor by taking specific minor courses options that will make them eligible for the Virginia State Early childhood for three-year-olds and four-year-olds add-on endorsement. Students seeking this option should seek information and academic advising from the School of Education (soe@vt.edu).

Ecological Cities (ECOC) Minor

Code	Title	Credits
Required Foundational Courses (6 credit hours)		
LAR 1254	Environment and Natural Systems (Pathways Concept 4 - Reasoning in the Natural Sciences ; Pathways Concept 5 - Quantitative and Computational Thinking)	3
HORT/FREC 2134	Plants and Greenspaces in Urban Communities (Pathways Concept 4 - Reasoning in the Natural Sciences)	3
Subtotal		6
Depth Courses (Select one course from each group - 9 credit hours minimum)		**9**
Ecology and Related Sciences		
BIOL 2804	Ecology *	
BSE 3324	Small Watershed Hydrology *	
ENSC 3134	Soils in the Landscape *	
ENSC 3604	Fundamentals of Environmental Science *	
ENSC 4244	Ecological Restoration *	
FREC 2004	Forest Ecosystems (Pathways Concept 4 - Reasoning in the Natural Sciences)	
FREC 2114	Ecology of Appalachian Forests (Pathways Concept 4 - Reasoning in the Natural Sciences)	
FREC/WATR 3104	Principles of Watershed Hydrology *	
FREC/HORT 3354	Trees in the Built Environment *	
FREC 3954	Study Abroad (with approval; variable)	
HORT 3454	*	
Humanities and Social Sciences		
ARCH/SPIA 1044	Life in the Built Environment (Pathways Concept 3 - Reasoning in the Social Sciences Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
ENGL 3534	Literature and the Environment (Pathways Concept 1 - Discourse; or Pathways Concept 2 - Critical Thinking in the Humanities) *	
GEOG/SPIA 2244	Sustainable Urbanization (Pathways Concept 3 - Reasoning in the Social Sciences) *	
GEOG 3244	The U.S. City	
HIST 3144	American Environmental History (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences)	
LAR 3264	People Community and Place (Pathways Concept 3 - Reasoning in the Social Sciences) *	
PSCI/UAP 3344	Global Environmental Issues: Interdisciplinary Perspectives (Pathways Concept 2 - Critical Thinking in the Humanities) *	
SPIA/HNFE 2314	Active Transportation for a Healthy, Sustainable Planet (Pathways Concept 3 - Reasoning in the Social Sciences)	
STS 2454	Science, Techology, and Environment (Pathways Concept 2 - Critical Thinking in the Humanities)	
UAP 3014	Urban Policy and Planning *	
UAP 3354	Introduction to Environmental Policy and Planning	
Design and Practice		
BC 4334	Sustainable Building Performance Management	
BSE 3334	Nonpoint Source Pollution Assessment and Control *	
BSE 4126	Comprehensive Design Project *	
CEE 3274	Introduction to Land Development Design *	
CEE 4264	Sustainable Land Development *	
FREC 4454	Urban and Community Forestry (Pathways Concept 1 - Discourse)	
HORT 4744	Plant Establishment and Environmental Design *	
LAR 4034	Evolution of the American Landscape (Pathways Concept 1 - Discourse ; Pathways Concept 2 - Critical Thinking in the Humanities)	
LAR 4084	Landscape Design and Planning Studio *	
PM 3684	Sustainable Property Management (Pathways Concept 3 - Reasoning in the Social Sciences)	
RED 4604	Environmental and Sustainability Issues in Housing (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
SBIO 3324	Green Building Systems	
UAP 4354	Interdisciplinary Environmental Problem Solving Studio *	
UAP 4394	Community Renewable Energy Systems	
Subtotal		9
Required Capstone Course		
FREC/BSE/HORT/LAR/SPIA 4554	Creating the Ecological City (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 6 - Critique and Practice in Design and the Arts) *	3
Total Credits		**18**

* Some courses in the Minor Requirements listed above may have prerequisites, corequisites, or other registration requirements. Please see the University Course Catalog or Timetable for more information.

Graduation Requirements

Notes for Ecological Cities Pathways Minor:

A minimum of 18 credit hours is required to graduate with an Ecological Cities minor.

1. Any course substitutions requests of the courses above must be proposed in writing to the College of Natural Resources and Environment Advising Center in 138 Cheatham Hall.
2. A minimum GPA of 2.0 in courses comprising the minor is required to complete the minor.

Steps for completing the Ecological Cities Minor

1. Make an advising appointment with the ECOC Minor Coordinator for orientation to the minor.
2. Declare the Ecological Cities minor at the CNRE Advising Center in 138 Cheatham Hall.

3. Include minor information when updating the application for degree in Hokie Spa.
4. Students cannot graduate until they have either (i) satisfied the requirements for the minor or (ii) withdrawn from the minor by notifying CNRE Advising Center office in 138 Cheatham Hall and revising their DARS.

Economics (ECAS) Minor

Code	Title	Credits
Required Minor Courses		
Principles of Economics Sequence		
ECON 2005 & ECON 2006	Principles of Economics and Principles of Economics	6
Intermediate Theory Courses		
ECON 3104 & ECON 3204	Microeconomic Theory and Macroeconomic Theory	6
Subtotal		12
Elective Courses		
3000 or 4000 level Economics elective		3
3000 or 4000 level Economics elective		3
Subtotal		6
Total Credits		**18**

Graduation Requirements

- The required GPA for the minor is 2.0. All economics courses count in computation of GPA, not just the best 18 hours.
- ECON 4754 Internships, ECON 4964 Field Study, ECON 4974 and ECON 4974H Independent Study do not count as ECON Electives.

Economics of Diversity, Equity, and Inclusion Minor

Code	Title	Credits
A student majoring in Economics or any option in Economics cannot complete this minor.		
1. Introduction/Foundational Experience Required Courses		
Select two of the following		6
ECON 1104	Economics of Gender	
ECON 1204	Economics of Race	
ECON 1214	Economic History of Diversity and Inclusion	
Subtotal		6
2. Mid-Level Experience		
I. Introduction to Identity, Diversity, and Society		
Select one of the following:		3
AINS 1104	Introduction to American Indian Studies (Pathways Concept 3 - Reasoning in the Social Sciences)	
APS/HUM 1704	Introduction to Appalachian Studies (Pathways Concept 2 - Critical Thinking in the Humanities)	
ARBC 2774	Arab Culture and Civilization (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences)	
CHN 2734	Chinese Culture and Civilization (Pathways Concept 2 - Critical Thinking in the Humanities)	
HD 1134	Introduction to Disabilities Studies (Pathways Concept 2 - Critical Thinking in the Humanities)	
HIST 2275	African-American History	
HIST/CRIM 2504	Crime and Punishment in American History	
HIST/AINS 3174	Native American History	
MGT 3444	Multicultural Diversity in Organizations	
PHIL 2314	Philosophy of Sex, Gender, and Race	
PSCI 3255	The Politics of Race, Ethnicity and Gender	
RLCL 1024/1024H	Judaism, Christianity, and Islam (Pathways Concept 2 - Critical Thinking in the Humanities)	
RLCL 1904/1904H	Religion and Culture In Asia (Pathways Concept 2 - Critical Thinking in the Humanities)	
RLCL 2124	Religion in American Life	
RLCL/JUD 2134	Judaism: A Survey of History, Culture, and Heritage (Pathways Concept 2 - Critical Thinking in the Humanities)	
RLCL/SOC 2514	Asian American Experience (Pathways Concept 3 - Reasoning in the Social Sciences)	
RLCL/HUM 3204	Multicultural Communication	
RLCL 3214	Religion and Culture in India (Pathways Concept 2 - Critical Thinking in the Humanities)	
RLCL 3224	Religion and Culture in China and Japan (Pathways Concept 2 - Critical Thinking in the Humanities)	
SOC 2004	Social Problems (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
SOC 2024	Sociology of Race and Ethnicity	
SOC 2034	Diversity and Community Engagement	
SPAN 2764	Introduction to Latino American Studies (Pathways Concept 2 - Critical Thinking in the Humanities)	
STS 2034	Introduction to Technology and Race (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
STS/APS 3124	Societal Health in North America	
STS 3284	Technology and Disability (Pathways Concept 2 - Critical Thinking in the Humanities)	
WGS 1824	Introduction to Womens and Gender Studies (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences)	
WGS 2284	Lesbian, Gay, Bisexual, Transgender and Queer Issues	
II. Analysis		
Select one of the following:		3
BIT 2406	Introduction to Business Statistics, Analytics, and Modeling	
HIST/STS/ SOC 2604	Introduction to Data in Social Context	
STAT 3005	Statistical Methods	
STAT 3615	Biological Statistics	

STAT 3604	Statistics for Social Science	
III. Writing Course		
Select one of the following:		3
AINS 2414	Identity and Inclusion in Agricultural and Life Sciences	
ENGL 2634	Writing and Social Justice	
ENGL 2844	Introduction to Professional and Technical Writing	
ENGL 3754	Advanced Writing and Research	
ENGL 3764	Technical Writing	
ENGL 3774	Business Writing	
ENGL 3834	Intercultural Issues in Professional Writing	
HUM 2504	Introduction to American Studies	
Subtotal		9
3. Capstone		
Select one of the following:		3
ECON 4964	Field Study [1]	
ECON 4974/4974H	Independent Study [1]	
ECON 4984	Special Study [1]	
ECON 4994/4994H	Undergraduate Research	
Subtotal		3
Total Credits		**18**

[1] ECON 3004, ECON 4964, ECON 4974, and ECON 4984 may be used for requirements with approval from the department prior to the start of the semester in which the course is completed.

Graduation Requirements

1. All courses to fulfill minor must be taken A/F.
2. The minor requires a minimum GPA of 2.0. Six credit-hours must be completed at the 3000-4000 level.

Ecosystem for Human Well-Being (EHWB) Minor

Code	Title	Credits
Required Minor Courses		
ENSC 1015	Foundations of Environmental Science	3
HIST 3144	American Environmental History	3
PHS 4054	Concepts in One Health (Junior Standing for Capstone Experience Required Course)	3
Subtotal		9
Elective Courses		
Select one course from each of the three following areas:		9
Environment		
AAEC 3324	Environment and Sustainable Development Economics	
ENGL 3534	Literature and the Environment	
or ENGL 110	First-Year Writing	
or ENGL 120		
or COMM 10	Communication Skills	
FREC 2004	Forest Ecosystems	
FREC 2124	Forests, Society & Climate	
GEOG/WATR 2004	Water, Environment, and Society	
GEOG 3104	Environmental Justice, Resources and Development	
STS 3334	Energy and Society	
Health		
CSES 2244	Agriculture, Global Food Security and Health	
ENGL 3154	Literature, Medicine, and Culture	
GEOG 4074	Medical Geography of Infectious Diseases	
HIST 3724	History of Disease, Medicine, and Health	
HNFE 2664	Behavioral Theory in Health Promotion	
PHS 3014	Introduction to Environmental Health	
PSYC 3024	Human Behaviors and Natural Environments	
Culture		
AINS 1104	Introduction to American Indian Studies	
APS/HUM 1704	Introduction to Appalachian Studies	
ENGL 2634	Writing and Social Justice	
HORT/FREC 2134	Plants and Greenspaces in Urban Communities	
HORT 2184	Plants, Places, and Cultures in a Global Context	
HTM 3484	Socio-Cultural Impacts of Tourism	
STS 1504	Introduction to Science, Technology, and Society	
Subtotal		9
Total Credits		**18**

Graduation Requirements

Minimum Credits for the Minor: 18 credit hours to include 9 required courses and 9 restricted elective credits.

Minimum GPA requirements: Must have a 2.0 or higher for all courses used to complete this minor.

Prerequisites: Some courses in the minor requirements have prerequisites. Please refer to Undergraduate Course Catalog or consult your advisor for information about prerequisites.

Steps for Completing the Minor:

1. To add the minor complete the online form found on the CALS Student Forms Page (https://www.cals.vt.edu/academic-programs/current/CALS_Studentforms.html)
2. Students cannot graduate until they have either satisfied the requirements for the minor or withdrawn from the minor.

From more information contact Dr. Matthew Eick (540) 231-8943, eick@vt.edu or Renee Eaton (540) 231-5987, rselberg@vt.edu

Engineering Science & Mechanics (ESM) Minor

Code	Title	Credits
1. Required Minor Courses		
ESM 2104	Statics	3
ESM 2204	Mechanics of Deformable Bodies	3
ESM 2304	Dynamics	3

Subtotal		9
2. Fluid Mechanics Requirement		
Select one of the following: [1]		3-4
ESM 3234	Fluid Mechanics I-Control Volume Analysis	
ESM 3024	Introduction to Fluid Mechanics	
ME 3414	Fluid Dynamics [1]	
CEE 3304	Fluid Mechanics for Civil and Environmental Engineering [1]	
AOE 3014	Fluid Dynamics for Aerospace and Ocean Engineers [1]	
Subtotal		3-4
3. Approved Electives		
Select six credits from the Approved Electives List		6
Subtotal		6
4. Approved ESM Research or Graduate Level Education		
Select 3 credits from Senior Design Courses or Departmental Undergraduate Research courses. The following will automatically fulfill this requirement. [2,3]		3
AOE 4065	Air Vehicle Design	
AOE 4066	Air Vehicle Design	
AOE 4165	Space Vehicle Design	
AOE 4166	Space Vehicle Design	
AOE 4994	Undergraduate Research	
BMES 4015	BME Senior Design and Project	
BMES 4016	BME Senior Design and Project	
BMES 4994	Undergraduate Research	
CEE 4104	Water and Wastewater Treatment Design	
CEE 4274	Land Development Design	
CEE 4334	Hydraulic Structures	
CEE 4544	Design of Earth Structures	
CEE 4654	Geometric Design of Highways	
CEE 4664	Pavement Design	
CEE 4994	Undergraduate Research	
ESM 4994	Undergraduate Research	
ME 4015	Engineering Design and Project	
ME 4016	Engineering Design and Project	
ME 4994	Undergraduate Research	
MSE 4075	Senior Design Laboratory	
MSE 4076	Senior Design Laboratory	
MSE 4994	Undergraduate Research	
Subtotal		3
Total Credits		**21-22**

1. Students taking a non-ESM course to satisfy Item 2 must take an additional 3 credit hours of ESM coursework from Item 3.
2. Any 3 credit 5000 or 6000 level ESM class may be substituted for any elective in Item 3 and/or the Research Requirement of Item 4. ESM 5004 Scientific Communication in Engineering Mechanics and/or ESM 5944 Seminar may not be counted.
3. The research requirement may be fulfilled through Senior Design Courses or through a departmental undergraduate research course. Research must demonstrate application of fundamental Engineering Science & Mechanics principles. Similar courses with different department prefixes may count with permission.

Approved Electives List for Item 3

Complete six credits. At least 3 credits must be at 4XXX or above.[1]

Code	Title	Credits
Solid Mechanics		
ESM/MSE 3054	Mechanical Behavior of Materials	3
ESM/MSE 3064	Mechanical Behavior of Materials Laboratory	1
ESM 4024	Advanced Mechanical Behavior of Materials	3
ESM 4044/ CEE 4610	Mechanics of Composite Materials	3
ESM 4444/ AOE 4054	Stability of Structures	3
Fluid Mechanics		
ESM 3334	Fluid Mechanics II-Differential Analysis	3
Dynamics		
ESM 3124	Dynamics II- Analytical and 3-D Motion	3
ESM 4114/ AOE 4514	Nonlinear Dynamics and Chaos	3
Biomechanics		
ESM 4105	Engineering Analysis of Physiologic Systems	3
ESM 4106	Engineering Analysis of Physiologic Systems	3
ESM 4204	Musculoskeletal Biomechanics	3
ESM 4224	Biodynamics and Control	3
ESM 4234	Mechanics of Biological Systems	3
ESM 4245	Mechanics of Animal Locomotion	3
ESM 4246	Mechanics of Animal Locomotion	3
ESM 4304	Hemodynamics	3
Modeling and Optimization		
ESM/AOE 4084	Engineering Design Optimization	3
ESM/ME 4194	Sustainable Energy Solutions for a Global Society	3
ESM/BMES 4614	Probability-Based Modeling, Analysis, and Assessment	3
ESM 4734/ AOE 4024	An Introduction to the Finite Element Method	3

1. Any 3 credit 5000 or 6000 level ESM class may be substituted for any elective in Item 3 and/or the Research Requirement of Item 4. ESM 5004 Scientific Communication in Engineering Mechanics and/or ESM 5944 Seminar may not be counted.

Graduation Requirements

To obtain a minor in ESM students must:

- complete 21 credit hours of ESM courses on an A-F basis
- earn an in-minor GPA of a 2.0
- earn a minimum of a C- in each course
- obey all prerequisite rules; some courses have prerequisites not required for the minor.

English - Creative Writing (CENG) Minor

Code	Title	Credits
Foundational		
ENGL 2744	Introduction to Creative Writing	3
Subtotal		3
Advanced Creative Writing Courses		
Select four of the following:		12
ENGL/TA 3315	Playwriting	
ENGL 3704	Creative Writing: Fiction [1]	
ENGL 3714	Creative Writing: Poetry [1]	
ENGL 3724	Creative Writing: Creative Non-fiction [1]	
ENGL 3734	Community Writing	
ENGL 3734H	Community Writing	
ENGL 4724	Creative Writing: Fiction for Young People	
Subtotal		12
Literature		
Select one of the following:		3
RLCL/ENGL 3024	Religion and Literature	
ENGL 3534	Literature and the Environment	
ENGL 3544	Literature and Cinema	
ENGL 3644	The Postcolonial Novel	
ENGL 4444	The British Novel	
ENGL 4504	Modern Poetry	
ENGL 4514	Contemporary Poetry	
ENGL 4664	Contemporary Fiction	
Subtotal		3
Total Credits		**18**

[1] These courses may be repeated twice for credit (for a total of nine hours).

Graduation Requirements

In order to graduate with a Minor in English: Creative Writing, students must achieve a cumulative GPA of 2.0 in the Minor.

ENGL 1105, ENGL 1106, and ENGL 1204H do not count toward satisfaction of the Minor.

Entomology (ENT) Minor

Code	Title	Credits
Required Minor Courses		
ENT 3014	Insect Biology	2
ENT 3024	Insect Biology Laboratory	2
Select at least three of the following, two of which must have a laboratory class:		10-12
ENT 2004	Insects and Human Society [1]	
ENT 2254	Bees and Beekeeping	
ENT 2264	Bees and Beekeeping Laboratory	
ENT 2804	Bees: Biology, Diversity, and Sustainability [1]	
ENT 3254	Medical and Veterinary Entomology	
ENT 3264	Medical and Veterinary Entomology Laboratory	
ENT 4254	Insect Pest Management	
ENT 4264	Pesticide Usage	
ENT 4354	Aquatic Entomology	
ENT 4484	Freshwater Biomonitoring	
ENT 4624	Animal and Plant Biosafety and Biosecurity	
ENT 4994	Undergraduate Research (up to 3 credits)	
Subtotal		14-16
Elective Courses		
Select one of the following:		3-5
AAEC 3314	Environmental Law	
AAEC 3604	Agricultural Law	
BCHM 4204	Biochemical Toxicology	
BIOL 2804	Ecology	
BIOL 3454	Introductory Parasitology	
BIOL 4004	Freshwater Ecology	
BIOL 4454	Invertebrate Zoology	
BIOL 4474	Ethology	
BIOL 4664	Virology	
BIOL 4674	Pathogenic Bacteriology	
ENGL 3764	Technical Writing	
ENSC 3604	Fundamentals of Environmental Science	
FIW 4454	Human-Wildlife Conflicts	
FIW 4614	Fish Ecology	
FREC 3354	Trees in the Built Environment	
FREC 4514	Forest and Tree Pest Management	
PPWS 4104	Plant Pathology	
PPWS 4504	Fundamentals of Plant Physiology	
STAT 3005 & STAT 3006	Statistical Methods and Statistical Methods	
STAT 3615 & STAT 3616	Biological Statistics and Biological Statistics	
Subtotal		3-5
Prerequisites may be required for above courses. See course catalog or consult your advisor.		
Total Credits		**17-21**

[1] Pathways Course

Graduation Requirements

Total credits required for Entomology Minor = 19

A 2.0 GPA across all courses taken in the minor is required for graduation.

Entrepreneurship - New Venture Growth (ENVG) Minor

Code	Title	Credits
1. Required Minor Courses		
MGT 2064	Foundations of Entrepreneurship	3
MGT 3064	Cornerstones of Entrepreneurship and Innovation	3
MGT 4064	Developing Entrepreneurial Ventures	3

Subtotal		9
2. Select One of the Following Courses - (each is three credits)		
Select one of the following:		3
MGT 3074	Social Entrepreneurship	
MGT 3084	Digital Entrepreneurship, Innovation, and Product Development	
MGT 3094	Global Entrepreneurship	
Subtotal		3
3. Restricted Electives		
Select two of the following: [1]		6
AAEC 3454	Small Business Management and Entrepreneurship	
AAEC 4404	Agricultural Management and Problem-solving	
ACIS 4214	Cost Planning and Control [2]	
BIT 3414	Operations and Supply Chain Management [2]	
CHE/MKTG 4144	Business and Marketing Strategies for the Process Industries [2]	
CMDA/CS/ STAT 3654	Introductory Data Analytics and Visualization	
CS 4244	Internet Software Development [2]	
CS 4624	Multimedia, Hypertext and Information Access	
CS 4644	Creative Computing Studio [2]	
CS 4704	Software Engineering Capstone [2]	
ENGE/IDS/ MGT 4094	Startup: Commercialization of Innovation	
ENGL 4814	Developing Online Content	
FIN 3054	Legal and Ethical Environment of Business [2]	
FIN 3074	Legal, Ethical, and Financing Issues for Entrepreneurs [2]	
FIN 3104	Introduction to Finance [2]	
FIN 4234	Venture Capital and Investment Banking	
HTM 3244	Franchising and Ownership in the Services Industries	
HTM 3424	Event Management	
IDS 4044	Professional Practice and Entrepreneurship	
ISE 4015	Management Systems Theory, Applications, and Design [2]	
ISE 4304	Global Issues in Industrial Management [2]	
MGT 1064	Entrepreneurs Residence Experience	
MGT 2114	Principles of Project Management	
MGT 2504	Sustainable Business Management	
MGT 3074	Social Entrepreneurship (if not taken to satisfy requirement in section 2)	
MGT 3084	Digital Entrepreneurship, Innovation, and Product Development (if not taken to satisfy requirement in section 2)	
MGT 3094	Global Entrepreneurship (if not taken to satisfy requirement in section 2)	
MGT 3164		
MGT 3304	Management Theory and Leadership Practice	
MGT 3754	Management Internships and Career Development [3]	
MGT 3954	Study Abroad [3]	
MGT 4084	Management Consulting	
MGT 4954	Study Abroad [3]	
MGT 4964	Field Study [3]	
MKTG 3104	Marketing Management [2]	
MKTG 4254	Product and Price Management [2]	
MKTG 4304	Marketing Communications [2]	
MKTG 4354	Marketing Channels and Logistics [2]	
MKTG 4454	Sales Force Management [2]	
SBIO 2104	Principles of Packaging	
SBIO 2614	Introduction to Forest Products Marketing	
SBIO 3004	Sustainable Nature-Based Enterprises	
SBIO 3445	Entrepreneurial Wood Design and Innovation	
SBIO 3446	Entrepreneurial Wood Design and Innovation	
SBIO 3454	Society, Sustainability Biomaterials and Energy	
SBIO 3464	Sustainable Operations Management	
SBIO 3554	Sustainable Biomaterials Enterprises	
Subtotal		6
Total Credits		**18**

[1] Cross listed or jointly offered courses can only be taken once to count as credit towards the minor.
[2] May require department approval.
[3] Will only be accepted for the minor when the topic is "Entrepreneurship".

Graduation Requirements

To complete the Entrepreneurship – New Venture Growth Minor, students accepted in the minor must **complete the 18 hours of required and elective courses** listed in sections 1, 2, and 3 **with a minimum average GPA of 2.0**. If these criteria are met the minor will be noted on the student's transcript.

Application Eligibility

Application to the Minor in Entrepreneurship – New Venture Growth (ENVG) is open to all university students in good academic standing pursuing a non-Pamplin Major (Students pursuing any Real Estate major are eligible for the ENVG minor). Admission will be competitive and will be based on the following criteria:

- Minimum 2.00 overall GPA;
- Completion of two Pathway courses or admission to the Innovate living-learning community;
- Written statement of interest in the entrepreneurial purpose associated with new venture growth (not to exceed 1 page);

Students can apply for the ENVG minor here: http://pampl.in/addminor (http://pampl.in/addminor/)

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Environmental Economics (EECO) Minor

Code	Title	Credits
I - Required Introductory Courses [1]		
AAEC 1005	Economics of the Food and Fiber System	3
or ECON 2005	Principles of Economics	
MATH 1025	Elementary Calculus	3
or MATH 1225	Calculus of a Single Variable	
Subtotal		6
II - Required Core Courses		
AAEC 3004	Agricultural Production and Consumption Economics [2]	3
AAEC 3324	Environment and Sustainable Development Economics [2]	3
AAEC 3314	Environmental Law	3
AAEC 4314	Environmental Economic Analysis and Management [2]	3
Subtotal		12
III - Electives Credits		
AAEC Elective (must be at the 3000 or 4000 level)		3
AAEC Elective (must be at the 3000 or 4000 level)		3
Subtotal		6
Total Credits		**24**

[1] This minor is not available to students majoring in Agribusiness, Applied Economic Management, Environmental Economics: Management & Policy, International Trade and Development or Food and Health Systems Economics.

[2] **Pre-requisites**: Some courses required for this major have pre-/co-requisites and/or enrollment requirements. Please refer to the Undergraduate Course Catalog or consult your advisor for information about pre-/co-requisites and enrollment requirements.

Graduation Requirements

A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.

Environmental Policy and Planning (EPP) Minor

EPP Minor Requirements

Code	Title	Credits
UAP 1024	Leadership, Service, and Public Problem Solving	3
SPIA 2554	Collaborative Policy-Making and Planning	3
SPIA 3554	Transdisciplinary Problem Solving for Social Issues	3
UAP 3354	Introduction to Environmental Policy and Planning	3
UAP 3014	Urban Policy and Planning	3
UAP 4344	Law of Critical Environmental Areas	3
UAP 4374	Land Use and Environment: Planning and Policy	3
Total Credits		**21**

Graduation Requirements

In-minor GPA: Students must have a 2.0 or above in-minor GPA to complete the SSC minor. All courses listed below are used in the computation of the in-minor GPA.

Intra-SPIA Program majoring and minoring: No more than 50% of the graded course credits required for the Minor in Environmental Policy and Planning may be double-counted by a student also enrolling in a major under the Bachelor of Arts in Public and Urban Affairs.

Prerequisite Statement: Some courses listed on this checksheet have prerequisites. Be sure to consult the University Catalog and/or check with your advisor.

Environmental Science (ENSC) Minor

Code	Title	Credits
Required Minor Courses		**6-7**

IS 4964	Field Study (var)	
IS 4994	Undergraduate Research (var)	
Subtotal		12
Total Credits		**18**

Graduation Requirements

Hours Requirement: A minimum of eighteen (18) credit hours is required to graduate with a minor in European Engagement.

In major GPA: GPA of 2.0 is required for the minor. All courses listed are included in the minor GPA calculation.

Maximum number of credit hours: For the following courses the maximum number of credits that can be awarded are as follows: 3944/3944S/3944T (12); 3954 Study Abroad (12); 4034 Diplomacy Lab (9); 4754 Internship (9); 4964 Field Study/Practicum (6) 4994 Undergraduate Research (9).

Use of Courses: No more than 50% of the graded course credits required for the Minor in European Engagement (EURE) may be double-counted in a student's Major.

Course content: To count for the Minor in European Engagement the location or the content/topic of all courses should be European in character. Courses will be evaluated and approved by the International Studies Program advisor.

Event Management Track

Code	Title	Credits
ALCE 3004	Educational Programs in Agricultural and Life Sciences	3
ALCE/EDCT 4034	Methods of Planning Education Programs for Agriculture	3
ALCE/EDCT 4884	Youth Program Management	3
HTM 2454	Global Travel & Tourism Management (Pathways Concept 3 - Reasoning in the Social Sciences)	3
HTM 2474	Introduction to Meetings and Convention Management	3
HTM 2514	Catering Management	3
HTM 3044	Private Club Management	3
HTM 4444	Winery Tourism	3
ITDS 1114	Design Appreciation (Pathways Concept 6 - Critique and Practice in Design and the Arts , 6A or 6D)	3
LDRS 1414	Citizen Leadership (Pathways Concept 3 - Reasoning in the Social Sciences)	3
LDRS 3104	The Dynamics of Leadership	3
LDRS 3304	Elements of Team Leadership (Pathways Concept 3 - Reasoning in the Social Sciences)	3
PSYC 2044	Psychology of Learning (Pathways Concept 3 - Reasoning in the Social Sciences)	3

Graduation Requirements

In addition to fulfilling the requirements of their individual majors, students must complete the minor with at least a 2.0 GPA in the 18 credit hours required by the minor. If these criteria are met, the minor will be noted on the student's transcript.

Application Eligibility

The minor in Event and Experience Management (EEMG) is open to all Virginia Tech students with a GPA of at least 2.50 and who have at least 12 earned credit hours here at Virginia Tech.

Students can apply for the EEMG minor at http://pampl.in/addminor (http://pampl.in/addminor/)

Students **cannot** pursue the EEMG Major and Minor simultaneously.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Finance (FIN) Minor

Code	Title	Credits
Required Minor Courses		
ACIS 2115	Principles of Accounting [3]	3
ACIS 2116	Principles of Accounting [1,3]	3
BIT 2405	Introduction to Business Statistics, Analytics, and Modeling [2,3]	3
ECON 2005	Principles of Economics [3]	3
FIN 3134	Financial Analytics [4]	3
FIN 3144	Investments: Debt, Equity and Derivatives [4]	3
FIN 3154	Corporate Financial Analytics and Strategy [4]	3
Subtotal		21
Elective Courses		
Select two of the following:		6
FIN 3114	Python/SQL for Data Analytics and Finance	
FIN 4144	International Financial Management	
FIN 4154	Real Estate Finance	
FIN 4224	Fixed Income Securities: Analysis and Management	
FIN 4234	Venture Capital and Investment Banking	
FIN 4244	Asset Valuation and Corporate Governance	
FIN 4264	Managing Risk with Derivatives	
FIN 4274	Equity Securities: Analysis and Management	
Subtotal		6
Total Credits		**27**

1. ISE 3004 Industrial Cost Control may be substituted for ACIS 2116 Principles of Accounting.
2. STAT 3005 Statistical Methods + STAT 3006 Statistical Methods, STAT 3604 Statistics for Social Science, STAT 4705 Probability and Statistics for Engineers + STAT 4706 Probability and Statistics for Engineers, or ISE 2024 Probability Foundations for Industrial and Systems Engineers + STAT 4706 Probability and Statistics for Engineers may be substituted for BIT 2405 Introduction to Business Statistics, Analytics, and Modeling.
3. Students must achieve a grade of C- or higher in ACIS 2115 Principles of Accounting, ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics.
4. Students must achieve a grade of C or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy.

Graduation Requirements

Admission Requirements

In order to apply for a minor in Finance, students must:

- Be enrolled in a degree granting program outside the Pamplin College of Business. (Real Estate for Commercial Properties & Real Estate for Residential Properties majors not double majoring in a business degree are eligible to pursue the minor in Finance).
- Have a GPA of 2.50 or above.

- Have completed MATH 1225 Calculus of a Single Variable - MATH 1226 Calculus of a Single Variable or MATH 1524 Business Calculus with grade(s) of C- or better.

Students can apply for the Finance minor at http://pampl.in/addminor (http://pampl.in/addminor/)

Graduation Requirements

The minor in Finance requires 27 credit hours of course work as described above. The footnotes indicate some substitutions that might reasonably be expected. In order to graduate, students must have a 2.00 GPA in all courses used to fulfill the minor.

To remain in the minor in Finance program, students must maintain a GPA of at least 2.00 in the courses listed below. A grade of C or better in FIN 3134, FIN 3144, and FIN 3154 is required to receive a minor in Finance. Students who receive a grade of C- in FIN 3134 may enroll concurrently in FIN 3144 and FIN 3154 while re-taking FIN 3134. Students who receive a grade of C- in FIN 3144 and FIN 3154 may enroll concurrently in FIN 42XX courses while retaking FIN 3144 and FIN 3154. A grade of C or better in FIN 3134 is required before enrolling in FIN 42XX courses.

Prerequisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Food Science and Technology (FST) Minor

Code	Title	Credits
Required Minor Courses		
FST/BIOL 3604	Food Microbiology	4
FST 4304	Food Processing	3
or BSE 4604	Food Process Engineering	
FST 4314	Food Processing Laboratory	1
FST 4504	Food Chemistry	3
FST 4524	Food Safety and Quality Assurance	3

FREC/CSES 4334	Principles and Practice of Agroforestry	
FREC 4354	Forest Soil and Watershed Management *	
FREC 4374	Forested Wetlands *	
FREC 4414	Advanced Wildland Fire Management *	
FREC 4454	Urban and Community Forestry	
FREC 4514	Forest and Tree Pest Management *	
Subtotal		12
Total Credits		**21**

* Course has prerequisites or restrictions. Check course catalog or timetable for further information.

Graduation Requirements

NOTES FOR THE MINOR IN FORESTRY

1. A minimum G.P.A. of 2.0 in these courses is required to complete the minor.
2. All courses must be taken for A–F grade unless only offered P/F.

STEPS FOR COMPLETING THE MINOR IN FORESTRY

1. Complete the form to declare a minor in the College of Natural Resources and Environment Advising Center.
2. If you have questions about the checksheet, ask the Advising Center to put you in contact with the departmental advisor or a faculty member in forestry.
3. When you request or update your DARS, be sure to include the minor so that it will check your progress on both your major and minor.
4. Once you have enrolled in the minor, you cannot graduate until you either (i) satisfy the credit requirements for the minor, or (ii) withdraw from the minor by notifying the Advising Center of the College of Natural Resources and Environment (138 Cheatham Hall) and revising your DARS.

French (FR) Minor

Code	Title	Credits
Required Minor Courses		
FR 2105	Intermediate French [1,2]	3
FR 2106	Intermediate French [1,2,3]	3
FR 3105	Composition, Conversation and Grammar [4]	3
FR 3106	Composition, Conversation and Grammar [4]	3
FR 3304	Introduction to French Literature	3
Select one of the following:		3
FR 3314	Introduction to Francophone Studies [4]	
FR 3424	French Culture from Middle Ages to Renaissance	
FR 3434	French Culture from Baroque to Revolution [4]	
FR 3444	French Culture from Romanticism to Belle Epoque [4]	
FR 3454	French Culture from World Wars to Global Present [4]	
Total Credits		**18**

1. Any 3000- level or 4000- level French course may be substituted for FR 2105 or FR 2106.
2. FR 2114 Accelerated Intermediate French (6 s.h.) may be taken in place of FR 2105 and FR 2106.
3. FR 2164 Intermediate Business French (3 s.h.) may be taken in place of FR 2106.
4. May also count toward Pathways.

Graduation Requirements

Requirements: 18 semester hours of coursework at the 2000 or 3000 level

Please note:

- Students must earn 18 credit hours for the French minor regardless of initial course placement[1].
- If you have AP or IB French credit, see your French Advisor of instructor. AP exam credit and IB diploma credit are usually awarded automatically by the Office of the University Registrar. Depending on your score, those credits may possibly be used to satisfy certain requirements for the minor. Make sure you inquire about these substitutions early on.
- Students must have a 2.0 in-minor GPA in French.
- All courses required to complete the French minor are included in the minor GPA calculation. Students must earn a C or better in each course for it to count towards the minor
- French courses may also be used to meet certain Pathways requirements. Please see the current Pathways for General Education Guide.

French for Business (FRBS) Minor

Requirements: 18 semester hours of coursework, distributed as follows:

Code	Title	Credits
Required Minor Courses		
FR 3105	Composition, Conversation and Grammar	3
FR 3106	Composition, Conversation and Grammar	3
Select two of the following:		6
FR 2164	Intermediate Business French [1]	
FR 3164	Advanced Business French	
FR 4164	Special Topics in Business French	
Select two of the following:		6
FR 2714	Introduction to French Culture and Civilization	
FR 3304	Introduction to French Literature	
FR 3314	Introduction to Francophone Studies	
FR 3424	French Culture from Middle Ages to Renaissance	
FR 3434	French Culture from Baroque to Revolution	
FR 3444	French Culture from Romanticism to Belle Epoque	
FR 3454	French Culture from World Wars to Global Present	
FR 4154	Advanced Composition and Stylistics	
Total Credits		**18**

1. Cannot be taken after FR 3105 or FR 3106.

Graduation Requirements

Requirements: 18 semester hours of coursework

Please note:

- Students must earn 18 credit hours for the French major regardless of initial course placement[1].
- If you have AP or IB French credit, see your French Advisor of instructor. AP exam credit and IB diploma credit are usually awarded automatically by the Office of the University Registrar. Depending on your score, those credits may possibly be used to satisfy certain requirements for the minor. Make sure you inquire about these substitutions early on.
- Students must have a 2.0 in-minor GPA in French.
- All courses required to complete the French minor are included in the minor GPA calculation. Students must earn a C or better in each course for it to count towards the minor

- French courses may also be used to meet certain Pathways requirements. Please see the current Pathways for General Education Guide.

1. Any 3000- level or 4000- level French course may be substituted for FR 2105 or FR 2106.
2. FR 2164 Intermediate Business French (3 s.h.) may be taken in place of FR 2106.
3. May also count toward Pathways.

Gender, Science and Technology (GST) Minor

Code	Title	Credits
Required Minor Courses (to be taken in sequence) (15 credits)		
WGS 1824	Introduction to Womens and Gender Studies	3
STS 1504	Introduction to Science, Technology, and Society	3
HIST/STS/SOC 2604	Introduction to Data in Social Context	3
or STS 3314	Medical Dilemmas and Human Experience	
WGS/STS 4334	Sexual Medicine (Pre: WGS 1824 or WGS 1114)	3
WGS/STS 4704	Gender and Science (Pre: STS 1504)	3
Subtotal		15
Elective Courses		
Select one of the following:		3
WGS 2254	Feminist Activism	
WGS 3004	Topics in Feminism	
STS/APS 3124	Societal Health in North America	
UAP/WGS/ GEOG 4214	Gender, Environment, and International Development	
WGS 4224	Women's Studies Seminar	
WGS 4754	Internship	
WGS 4974	Independent Study	
STS 4304	Contemporary Issues in Science, Technology, and Society	
Subtotal		3
Total Credits		**18**

Please Note: Students cannot take more than 3 credit hours of either Internship or Independent Study. Up to six credits of special offerings, such as Independent Study (4974), or Undergraduate Research (4994) in any department may be used to fulfill requirements for the minor where appropriate.

Permission to include such courses must be granted by the minor coordinator. For additional information contact: Dr. Christine Labuski at chrislab@vt.edu

Graduation Requirements

The Minor in Gender, Science, and Technology (GST) requires the completion of 18 credit hours as outlined. Five specific courses are required. Three additional credits of electives at the 3000 or 4000 level are also required. A minimum GPA of 2.0 in all courses taken to fulfill the minor is required.

Geographic Information Science (GIS) Minor

Code	Title	Credits
Required Minor Courses		
CS 1064	Introduction to Programming in Python	3
GEOG 2084	Principles of Geographic Information Systems	3
GEOG 4084	Modeling with Geographic Information Systems	3
GEOG 4354	Introduction to Remote Sensing	3
or FREC 4214	Forest Photogrammetry and Spatial Data Processing	
Subtotal		12
Geographic Information Science Options		
Select two of the following:		6
FREC 4114	Information Technologies for Natural Resource Management	
GEOG 3314	Cartography	
GEOG 4254	R Programming for Geospatial Applications	
GEOG 4314	Spatial Analysis in Geographic Information Systems	
GEOG 4324	Algorithms in Geographic Information Systems	
GEOG 4334	Geospatial Information Technology for Land Change Modeling	
GEOG 4374	Remote Sensing and Phenology	
GEOG 4394	Introduction to Web Mapping	
GEOG 4404	Geovisualization	
Subtotal		6
Total Credits		**18**

Graduation Requirements

A minimum overall GPA of 2.0 in these courses is required to complete the minor.

All minors must Include 6 or more credits at 3000 level or above.

All courses must be taken for an A-F grade unless they are only offered P/F.

Steps for completing the minor In Geographic Information Science for Non-Majors:

- Declare minor using a 'Major/Option/Minor Form' found In the CNRE Advising Center, 138 Cheatham Hall.
- Include minor Information when updating the application for degree In Hokie Spa.
- Students cannot graduate until they have either:
  a. satisfied the requirements for the minor or
  b. withdrawn from the minor by notifying CNRE Academic Programs office In 138 Cheatham and revised their DARS.

Geographic Information Science (GIS-G) Minor Meteorology/ Geography Majors

- A minimum overall GPA of 2.0 In these courses is required to complete the minor.
- All minors must Include 6 or more credits at 3000 level or above.
- All courses must be taken for an A-F grade unless they are only offered P/F.

Steps for completing the minor in Geographic Information Science-G

- Declare minor using a 'Major/Option/Minor Form' found in the CNRE Advising Center, 138 Cheatham Hall.
- Include minor information when updating the application for degree in Hokle Spa.
- Some courses In the minor requirements listed above have prerequisites, so be sure to consult the University Catalog or check with the Minor advisor.
- Students cannot graduate until they have either:
  a. satisfied the requirements for the minor or
  b. withdrawn from the minor by notifying CNRE Academic Programs office In 138 Cheatham and revised their DARS.

Geography (GEOG) Minor

Code	Title	Credits
Required Minor Courses		
GEOG 1004	Introduction to Human Geography	3
GEOG 1014	World Regions	3
GEOG 1104	Introduction to Environmental Geography	3
GEOG 2314	Maps and Mapping	3
or GEOG 3314	Cartography	
Subtotal		12
Geography Electives		
Select nine credits		9
Subtotal		9
Total Credits		**21**

Graduation Requirements

- Upon declaring the Geography minor, students majoring in Meteorology must complete at least 6 credits of elective GEOG courses not counted toward their MTRG major requirements.
- A minimum overall GPA of 2.0 in these courses is required to complete the minor. All minors must include 6 or more credits at 3000 level or above.
- All courses must be taken for an A-F grade unless they are only offered P/F.

Steps for completing the Geography Minor

- Declare minor using a 'Minor Declaration Form' found on the CNRE Advising Center website: www.cnre.vt.edu/advising
- Include minor information when updating the application for degree in Hokie Spa.
- Students cannot graduate until they have either:
  a. satisfied the requirements for the minor OR
  b. withdrawn from the minor by notifying CNRE Academic Programs office in 138 Cheatham and revised their OARS.

Geosciences (GEOS) Minor

Code	Title	Credits
Section 1. GEOS Foundation		
Select one of the following options:		6-7
Option 1:		
GEOS 1004 & GEOS 1104	Earth Science: Our Past, Present, and Future and Introduction to Earth Sciences Laboratory	
or GEOS 210	Elements of Geology	
GEOS 1014	Evolution of the Earth-Life System	
Option 2:		
GEOS 2024	Earth's Dynamic Systems	
Subtotal		6-7
Section 2. GEOS Electives		
GEOS 3000 or 4000 Electives		12
Total Credits		**18-19**

Graduation Requirements

In order to minor in Geosciences, a student must have a minimum in-minor GPA of 2.0.

A minimum of 18 hours is required to graduate with a Geosciences minor.

German (GER) Minor

Code	Title	Credits
Required Minor Courses		
GER 3105	Grammar, Composition and Conversation	3
GER 3106	Grammar, Composition and Conversation	3
Select two of the following:		6
GER 3204	Culture of the German-Speaking Countries	
GER 3305	Topics in German Culture and Literature	
GER 3306	Topics in German Culture and Literature	
GER elective approved by a German advisor [1]		
Subtotal		12
Elective Courses		
Select two GER electives		6
Subtotal		6
Total Credits		**18**

[1] Minor credit for the following advanced-level courses taught in English may be awarded with the approval of the instructor and the German advisor: GER 3474 and GER 4334. A maximum of one such course may be counted for minor credit.

Graduation Requirements

18 hours of coursework at the 2000-level – 2015 and 2016 OR 2114, as necessary – and above

- A minimum grade of "C" must be earned in each course completed for the German minor and an average GPA of 2.0 in all courses taken for the German Minor is required for completion.
- Courses used to fulfill major, minor, or Pathways General Education requirements may not be taken Pass/Fail.
- German courses may also be used to meet Pathways Concepts 2 and Pathways Concepts 6 requirements. See the current Pathways Course Catalog.
- AP placement exam credit or IB diploma credit may be used to satisfy certain requirements for the minor. Students should consult their assigned minor advisor.
- Students may transfer all German credit earned abroad, but at least 25% of the German minor (a minimum of 2 courses) must be taken at Virginia Tech.
- When choosing among 3204, 3305, 3306, students must take two courses with different course numbers.

Courses that do not count toward the minor:

GER 2724 Introduction to German Culture and Civilization

GER 2964 Field Study

GER 4964 Field Study

Global Business Practices to Improve the Human Condition (GBP) Minor

Code	Title	Credits
I. Required Core Courses		
a. Foundational Courses		
HTM/MGT 2314	Introduction to International Business	3
ECON 2005	Principles of Economics (Pathways Concept 3 - Reasoning in the Social Sciences)	3
b. Analytical Thinking Course		
HIST/SOC/STS 2604	Introduction to Data in Social Context (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 5 - Quantitative and Computational Thinking 5F)	3
c. Prosperity and Social Change Course		
Select one of the following:		3
SOC 2004	Social Problems (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
SOC 2024	Sociology of Race and Ethnicity (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
Subtotal		12
II. Track Courses		
Select 6 credits of the following (follow either the Social Change Track or the Prosperity Track):		6
Social Change Track		
Select two of the following:		
HUM/RLCL 3204	Multicultural Communication (Pathways Concept 3 - Reasoning in the Social Sciences)	
IS 4014	International Development	
MGT 2204	Global Business of Pop Culture (Pathways Concept 2 - Critical Thinking in the Humanities and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
MGT 3444	Multicultural Diversity in Organizations (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
MGT 4314	International Management (Junior Standing; fall only)	
MGT 4334	Ethical Leadership and Corporate Social Responsibility (Pathways Concept 1 - Discourse 1A and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
MKTG 4644	Marketing, Society and the Public Interest	
SOC 2034	Diversity and Community Engagement (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
SOC 3854	Globalization: Sociological Perspectives	
SPIA 1024	Community Service Learning (Pathways Concept 3 - Reasoning in the Social Sciences)	
SPIA 3554	Transdisciplinary Problem Solving for Social Issues	
SPIA 4464	Data and the Art of Policy-Making and Planning (Pathways Concept 5 - Quantitative and Computational Thinking 5A)	
Prosperity Track		
Select two of the following:		

AAEC 3204	International Agricultural Development and Trade (Pathways Concept 3 - Reasoning in the Social Sciences)	
AAEC 3324	Environment and Sustainable Development Economics (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	
ECON 3004	Contemporary Economic Issues	
ECON/PPE 3024	Economic Justice	
ECON 4124	Growth and Development	
FIN 4144	International Financial Management	
GEOG/SPIA 2244	Sustainable Urbanization (Pathways Concept 3 - Reasoning in the Social Sciences , $30 fee)	
HTM 3484	Socio-Cultural Impacts of Tourism (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
MGT 3074	Social Entrepreneurship	
PSCI/GEOG/IS 2064	The Global Economy and World Politics (Pathways Concept 3 - Reasoning in the Social Sciences)	
PSCI/IS 4054	Seminar in Global Political Economy (Senior Standing)	
Subtotal		6
III. Capstone Experience		
Select one of the following:		3
XXXX 3954 Study Abroad - must have approval from Pamplin International Programs *		
XXXX 4974 Independent Study - must have approval from Pamplin International Programs *		
XXXX 4994 Undergraduate Research - must have approval from Pamplin International Programs *		
Subtotal		3
Total Credits		**21**

* Must contain an experiential social change or prosperity component. Guidelines for content coverage will be provided and must be followed for course to count toward minor.

Graduation Requirements

Application Eligibility

The Global Business Practices to Improve the Human Condition (GBP) minor is open to all university students with a GPA of at least 2.0.

Students can apply for the GBP minor at http://pampl.in/addminor (http://pampl.in/addminor/)

Graduation Requirements

To complete the Global Business Practices to Improve the Human Condition minor, students must pass the 21 credits of required and elective classes with an average GPA of a 2.5 in these courses. Students must complete at least 6 out of the 21 credits at the 3000-4000 level. No course grade may be lower than C- to earn the minor. Additionally, students must complete an experience with a social or economic change component approved by Pamplin International Programs. If these criteria are met, the minor will be noted on the student's transcript.

Pre-Requisite Statement

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or consult with your academic advisor.

Requirements

No more than two courses may be double counted toward graduation major requirements. A course cannot be used more than once to meet section requirements for this minor.

Global Engagement (GLBE) Minor

Program Curriculum

Code	Title	Credits
Required Minor Courses		
Select one of the following:		3
IS 1024	Comp Gov & Politics	
IS/PSCI/GEOG 2054	Introduction to World Politics	
IS/PSCI/GEOG 2064	The Global Economy and World Politics	
Subtotal		3
Elective Courses		
Select 15 hours from the following:		15
IS 3954	Study Abroad	
IS/PSCI 4034	Topics in Diplomacy Lab	
IS/PSCI 4735	Topics in Multilateral Diplomacy Workshop	
IS/PSCI 4736	Topics in Multilateral Diplomacy Workshop	
IS/PSCI 4744	Intelligence Analysis Workshop	
IS 4754	Internship	
IS 4964	Field Study	
IS 4994	Undergraduate Research	
Subtotal		15
Total Credits		**18**

Graduation Requirements

Hours Requirement: A minimum of 18 hours is required to graduate with an Global Engagement minor.

GPA requirement: GPA of 2.0 is required for the Global Engagement minor. All courses listed on this checksheet are included in the Global Engagement minor GPA calculation.

Prerequisites: Some courses listed on this checksheet have prerequisites. Be sure to consult the University Catalog and/or check with your advisor.

Dual Use of Courses: No course can double count within or between International Studies-related majors or minors with the exception of the Core Degree Requirements and IS 1004 Nations and Nationalities, IS 2054 Introduction to World Politics and IS 2064 The Global Economy and World Politics.

Intra-IS Program majoring and minoring: Students may pursue more than one major or minor associated with the International Studies Program. In this case, the policy pertaining to the "Dual Use of Courses" will apply.

Intra-departmental majoring and minoring: Students pursuing one or more majors associated with the International Studies Program cannot major or minor in Political Science.

Global Food Security and Health (GFSH) Minor

Code	Title	Credits
Required Minor Courses		
Introductory Pathways Courses		
AAEC 1005	Economics of the Food and Fiber System	3
or ECON 2005	Principles of Economics	
CSES 2244	Agriculture, Global Food Security and Health	3
Middle Pathways Course		
HD 2014	Integrative Practices for Health, Wellbeing, and Resilience	3
Other Non-Pathways Required Courses		
ALS 2964 FIELD S		1
or ALS 3954	Study Abroad	
or ALS4994		
SPES 4114	Topics: StudyAway: Production, Culture and Social Aspects US Agriculture	3
Subtotal		13
Restricted Electives		
Select two of the following (minimum 6 credits):		6
AAEC 3024	Monetary and Global Issues in Applied Economics	
AAEC 3204	International Agricultural Development and Trade	
AAEC 3324	Environment and Sustainable Development Economics	
ALCE 3014	Leadership Effectiveness for Professionals in Agricultural Organizations	
ALS 2964	Field Study	
or ALS 3954	Study Abroad	
or ALS 4994	Undergraduate Research	
FREC 2124	Forests, Society & Climate	
FREC 2784	Global Forest Sustainability	
FREC 4014	Natural Resources Economics	
FST/IS/PSCI 2044	Food, War and Conflict	
GEOG 3104	Environmental Justice, Resources and Development (Pathways Concept 3 - Reasoning in the Social Sciences)	
GEOG 4214	Gender, Environment, and International Development	
HORT 2184	Plants, Places, and Cultures in a Global Context	
PHS 2004	Introduction to Public Health	
PPWS 2104	Plants, Genes, and People	
SPES 2244	World Crops: Food and Culture	
Subtotal		6
Total Credits		**19**

Graduation Requirements

Notes

- The Global Food Security and Health minor is an interdisciplinary program that explores the biophysical, technological, and institutional drivers that contribute to global food security and population health.
- Minimum credits to complete minor =19
- Minimum GPA of 2.0 in all courses taken to fulfill the minor is required
- A minimum of 6 credits at the 3XXX-4XXX level must be completed
- Some courses listed for this minor may have pre-/co-requisites, please consult the University Course Catalog, or check with your advisor.
- Students choosing Global Food Security and Health minor will register with the Office of Academic Programs in the College of Agriculture and Life Sciences, 1060 Litton Reaves Hall. This will enable the college to provide any pertinent assistance, materials, and information to the student.
- Faculty advisor in the Office of Academic Programs will serve as a counterpart to the student's major advisor.
- If you have any questions, please contact Dr. Ozzie Abaye at cotton@vt.edu or Karen Drake-Whitney at kdrake@vt.edu

Green Engineering (GREN) Minor

Code	Title	Credits
Required Minor Courses		
ENGR 3124	Introduction to Green Engineering	3
Select one of the following:		3
ENGR 4134	Environmental Life Cycle Assessment [1]	
CEE 4134	Environmental Sustainability - A Systems Approach [1,2]	
ME/ESM 4194	Sustainable Energy Solutions for a Global Society [1]

SPIA 4554	Creating the Ecological City
STS 2454	Science, Techology, and Environment (Pathways Concept 2 - Critical Thinking in the Humanities)
STS 3334	Energy and Society (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences) [4,6]
UAP 3354	Introduction to Environmental Policy and Planning
UAP 4374	Land Use and Environment: Planning and Policy
UAP 4394	Community Renewable Energy Systems
UAP 4854	Planning of the Urban Infrastructure
Subtotal	12
Total Credits	**18**

[1] These courses count either as a required course or an engineering elective, but not both

[2] Prerequisites and non-major enrollment restrictions apply.

Graduation Requirements

To complete a minor in Green Engineering, students must:

1. Complete a total of 18 credits
   a. 6 credits of required courses
   b. 6 credits of engineering electives from list
   c. 6 credits of interdisciplinary electives from list
2. Complete all courses as an A-F grade mode
3. Earn a minimum 2.0 GPA for the 18 credits that fulfill the minor

Additional Comments

1. Review the course prerequisites when deciding on the electives.
2. Not all courses are offered each term.
3. 1000 level courses will not be considered for substitutions.
4. Senior Capstone Design projects and Undergraduate Research in engineering departments are eligible as engineering electives if the project focuses on environmental impacts. See program advisor for **advance** approval of projects.
5. Other courses, including Study Abroad, may be substituted on a case-by-case basis with approval from the Green Engineering Director and College of Engineering Associate Dean of Academic Affairs (e.g., NR/GEOG 3954 Study Abroad may be substituted if the Stud Abroad trip is concerned directly with environment and sustainability.)
6. Dr. Sean McGinnis, Director of Green Engineering (287 Holden Hall), will act as an advisor for all student pursuing a Green Engineering minor. Email: smcginn@vt.edu, Website: www.eng.vt.edu/green (https://catalog.vt.edu/undergraduate/minors/green-engineering-minor/www.eng.vt.edu/green/)

Health Communication (HCOM) Minor

Code	Title	Credits

HD 3024	Community Analytics (Pathways Concept 5 - Quantitative and Computational Thinking (5A) ; Integrative Outcome: Pathways Outcome 10 - Ethical Reasoning)	
PHS 4014	Public Health Program Planning and Evaluation	
PR 2044	Principles of Public Relations (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Pathways Outcome 10 - Ethical Reasoning) [1]	
SOC 2034	Diversity and Community Engagement (Pathways Concept 3 - Reasoning in the Social Sciences , and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Pathways Outcome 11 - Intercultural and Global Awareness) [1]	
Health Communication Capstone [3]		
ADV 4324	Issues in Health Communication	3
Total Credits		**21**

1. Prerequisites: Some courses listed for this minor may have pre/co-requisites; please consult the University Course Catalog or check with your advisor.
2. No more than 50% of the graded course credits required for Minor in Health Communication (HCOM) may be double-counted in a student's major.
3. GPA Requirement: A GPA of 2.0 or higher is required in the minor. The GPA is based on all courses a student has completed for the Minor in Health Communication (HCOM).

Graduation Requirements

- Minimum credits to complete the minor: 21
- GPA Requirement: A GPA of2.0 or higher is required in the minor. The GPA is based on all courses a student has completed in the health communication minor.
- Minimum of 6 credits must be completed at the 3XXX and/or 4XXX level
- If completing this minor to satisfy Pathways General Education requirements, please reference the core and/or integrated outcome(s) satisfied by the course during the selection of courses for the completion of this minor.

HIST 3644	Twentieth-Century Russia	3
HIST 3654	Arab-Israeli Conflict	3
HIST 3664	Revolutionary China	3

Graduation Requirements

To earn a minor in history, a student must satisfactorily complete a minimum of 18 semester hours of history courses with a minimum 2.0 GPA in all courses taken to satisfy the minor. **The 18 hours for the minor must include at least 3 hours of credit from each of three of the four groups of HIST courses (Groups I-IV).**

1. Empires, Colonialism, and Globalization;
2. Ideas, Traditions, and Cultures;
3. Science, Technology, Environment, Medicine;
4. Conflict, War, and Peace.

HIST 1014, HIST 2984, HIST 3984, HIST 2104, HIST 2114, HIST 2124, HIST 3914, and HIST 4914 can be substituted to appropriate groups. Please see course schedule or advisor for more information.

Horticulture (HORT) Minor

Code	Title	Credits
Required Minor Courses		
Complete the following 8 Credits		8
HORT 2224	Horticulture Science and Industry	
HORT 2234	Environmental Factors in Horticulture	
HORT 2244	Plant Propagation	
Subtotal		8
Restricted Electives		
Choose a minimum of 10 credits from the following list: [1]		10
CSES 2224	Foundations of Precision Agriculture	
CSES 4064	Soil Microbiology	
FREC 2254	Arboriculture Field Skills	
HORT 2134	Plants and Greenspaces in Urban Communities	
HORT 2144	Indoor Plants	
HORT 2164	Floral Design	
HORT 2184	Plants, Places, and Cultures in a Global Context	
HORT/BIOL 2304	Plant Biology	
HORT 2834	Sustainable Agriculture Practicum	
HORT/FST 3114	Wines and Vines	
HORT 3324	Herbaceous Landscape Plants	
HORT 3325	Woody Landscape Plants	
HORT 3326	Woody Landscape Plants	
HORT/FREC 3354	Trees in the Built Environment	
HORT 3664	Hardscape Materials and Installation	
HORT 4205	Public Gardens Maintenance and Management	
HORT 4206	Public Gardens Maintenance and Management	
HORT 4334	Greenhouse and Controlled Environment Agriculture Management	
HORT 4344	Production of Food Crops in Controlled Environment Agriculture	
HORT 4545	Small Scale and Residential Landscape Design	
HORT 4546	Small Scale and Residential Landscape Design	
HORT 4614	Ornamental Plant Production and Marketing	
HORT 4654	Viticulture	
HORT 4764	Vegetable Crops	
HORT 4784	Vegetable Seed Production	
HORT 4794	Medicinal Plants and Herbs	
SPES 2004	Cannabis - Science, Industry, and Culture	
SPES 2244	World Crops: Food and Culture	
Subtotal		10
Total Credits		**18**

[1] For the Restrictive Electives, at minimum, 6 credits must be at the 3000 or 4000 academic level.

Graduation Requirements

- Minimum credits to complete minor = 18
- For Restricted Electives, at minimum 6 of 10 credit hours must be at 3XXX or 4XXX academic level
- Minimum GPA requirement of 2.0 for courses taken towards the minor
- Some courses listed for this minor may have pre-/co-requisites, please consult the University Course Catalog, or check with your advisor.

Housing and Society (HOSO) Minor

Code	Title	Credits
I. Introduction/Foundational Experience Required Minor Courses		
RED 2644	Housing and the Consumer	3
PM 3634	Managing Affordable and Specialized Housing	3
RED 4664	Universal Design (Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Integrative Outcome: Intercultural and Global Awareness) [1]	3
Subtotal		9
II. Mid-Level Experience Elective Courses		
Select six credits from one of the following tracks:		6
Data Analysis Track		
REAL 2034	Real Estate Data Analysis (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Outcome: Ethical Reasoning) [1]	
PM 4644	Advanced Property and Asset Management	
STAT 1014	Data in Our Lives (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Outcome: Ethical Reasoning) [1]	
CONS 2304	Consumer and Family Finances (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Outcome: Ethical Reasoning) [1]	
HIST/SOC/ STS 2604	Introduction to Data in Social Context (Pathways Concept 2 - Critical Thinking in the Humanities & Pathways Concept 5 - Quantitative and Computational Thinking (foundational) ; Integrative Outcomes: Ethical Reasoning and Intercultural and Global Awareness) [1]	
HD/SOC 2104	Quantitative Approaches to Community Research (Pathways Concept 5 - Quantitative and Computational Thinking (advanced); Integrative Outcome: Ethical Reasoning) [1]	
Economics Track		
ECON 1104	Economics of Gender (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning) [1]	

ECON 1204	Economics of Race (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning) [1]
ECON 1214	Economic History of Diversity and Inclusion (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning) [1]
PPE 2894	PPE Gateway Course
ECON 3034	Economics of Poverty and Discrimination (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning) [1]
AAEC 3324	Environment and Sustainable Development Economics (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness) [1]
Family and Community Track	
Must choose at least one Pathways course	
CONS 2304	Consumer and Family Finances (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Outcome: Ethical Reasoning) [1]
HD 2004	Adulthood and Aging (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Intercultural and Global Awareness) [1]
HD 1134	Introduction to Disabilities Studies (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning) [1]
HD 2304	Family Relationships
HD 3024	Community Analytics
HD 2104	Quantitative Approaches to Community Research (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Outcome: Ethical Reasoning) [1]
HD 3234	Child/Youth Community Services
PM 4964	Field Work/Practicum
SOC 2034	Diversity and Community Engagement (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness) [1]
Social Justice Track	
SOC 2004	Social Problems (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness) [1]
SOC 3314	Social Movements (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness) [1]
SOC 3004	Social Inequality [1]
HUM/RLCL 3204	Multicultural Communication (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Intercultural and Global Awareness) [1]
PHIL 1304	Morality and Justice (Pathways Concept 2 - Critical Thinking in the Humanities ; Integrative Outcome: Ethical Reasoning) [1]
RLCL/AFST/ WGS 2204	Race and Gender in Religion and Culture (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness)
MGT 3444	Multicultural Diversity in Organizations (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness) [1]
UAP 1024	Leadership, Service, and Public Problem Solving (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Ethical Reasoning)
Sustainability Track	
RED 4604	Environmental and Sustainability Issues in Housing (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness) [1]
GEOG/SPIA 2244	Sustainable Urbanization (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Intercultural and Global Awareness) [1]
SBIO 3324	Green Building Systems [1]
AAEC 3324	Environment and Sustainable Development Economics (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Intercultural and Global Awareness) [1]
HORT 2134	Plants and Greenspaces in Urban Communities (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Intercultural and Global Awareness)
FREC/NR/LAR 2554	Leadership for Global Sustainability (Pathways Concept 2 - Critical Thinking in the Humanities & Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcomes: Ethical Reasoning and Intercultural and Global Awareness)
STS 3334	Energy and Society (Pathways Concept 2 - Critical Thinking in the Humanities & Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Intercultural and Global Awareness)

STS 2254	Innovation in Context (Pathways Concept 2 - Critical Thinking in the Humanities ; Integrative Outcomes: Ethical Reasoning and Intercultural and Global Awareness)	
Subtotal		6
III. Capstone Experience Required Course		
PM 4744	Housing Challenges and Policies in the United States (Pathways Concept 3 - Reasoning in the Social Sciences & Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning) [1]	3
Subtotal		3
Total Credits		**18**

[1] Pathways General Education courses: If completing this minor to satisfy Pathways General Education requirements, please reference the core and/or integrated outcome(s) satisfied by the course during the selection of courses for the completion of this minor.

Graduation Requirements

No more than 50% of the graded course credit hours required for the Minor in Housing and Society may be double-counted by a student also enrolled in his/her major.

Some courses listed on the checksheet may have prerequisites, please consult the University Course Catalog, or check with your advisor.

GPA Requirement: A GPA of 2.0 or higher is required in the minor. The GPA is based on all courses a student has completed in the Housing and Society minor.

Human-Computer Interaction (HCI) Minor

Code	Title	Credits
Required Minor Courses		
HIST/SOC/STS 2604	Introduction to Data in Social Context	3
COMM 2084	Media and Society	3
CS 3724	Introduction to Human-Computer Interaction	3
Subtotal		9
Elective Courses		
Select 6 credits of the following (3 from outside CS)		6
Design Focus		
ART 1234	Topics in Visual Communication Design for Non-Majors	
IDS 2214	IDS Studio for Minors	
IDS 2034	Design Visualization	
JMC 4374	New Communications Technology	
Theory and Research Focus		
CMDA/STAT/CS 3654	Introductory Data Analytics and Visualization	
COMM 4024	Communication Law	
ISE 3614	Human Factors Engineering and Ergonomics	
PSYC 1004	Introductory Psychology	
PSYC 2084	Social Psychology	
SOC 3204	Social Research Methods	
Content Focus		
ART 3574	Topics In Graphic Design (Scheduled topics: "Intro Web Design" or "Interaction Design")	
ART 3604	Topics in New Media Art (Scheduled topic: "Multimedia")	
ART 3704	Topics in Computer Animation (Scheduled topic: "Creative Code w/ Processing")	
ART 4504	Topics in Multimedia Studio	
ART 4544	Computer Animation Studio (Scheduled topic: "Adv Creative Code" or "Multimedia/Installation")	
CS 4634	Design Of Information	
MUS 3314	Instrumental Ensemble Music (Linux Laptop Orch)	
Implementation Focus		
CS 3714	Mobile Software Development	
CS 3744	Introduction to GUI Programming and Graphics	
CS 3754	Cloud Software Development	
CS 4624	Multimedia, Hypertext and Information Access	
MUS 3064	Digital Sound Manipulation	
MUS 3065	Computer Music and Multimedia Design	
MUS 3066	Computer Music and Multimedia Design	
MUS 4014	Topics in Advanced Electroacoustic Research	
Subtotal		6
Integrative Capstone		
Select one of the following:		3
CS 4774	Human-Computer Interaction Design Experience (non-CS-majors)	
CS 4784	Human-Computer Interaction Capstone (CS-majors)	
Subtotal		3
Total Credits		**18**

Graduation Requirements

1. HCI minors must earn at least a “C” (2.0) in CS 3724, HIST 2604, and COMM 2084.
2. Students must have an HCI Minor GPA of at least 2.0 to successfully complete the minor.
3. Student must be in a degree-granting major before declaring the minor.
4. Some courses listed on this checksheet have prerequisites. It is the student’s responsibility to be aware of prerequisites and to ensure that all prerequisites are completed prior to enrolling in the chosen course. Some courses may be restricted to specific majors in some semesters. Check the Undergraduate Course Catalog and consult with an academic advisor to confirm your eligibility for specific electives. Actual course offerings are subject to availability of sufficient resources, including faculty availability and student demand.

Humanities, Science and Environment (HSE) Minor

Code	Title	Credits
Required Minor Courses		
Course in Science and Technology in Society		
STS 1504	Introduction to Science, Technology, and Society	3
STS 3104	Science and Technology in Modern Society	3
Subtotal		6
Humanities (Outside STS)		
Select two of the following:		6
ENGL 3534	Literature and the Environment (Pathways Concept 2 - Critical Thinking in the Humanities ; WI) [1]	
FREC 2554	Leadership for Global Sustainability	
HIST 3144	American Environmental History	
HIST 3234	The North American West	
HIST 3734	History of Modern Biology	
RLCL 2464	Religion and Science	
PHIL 2304	Global Ethics (Pathways Concept 2 - Critical Thinking in the Humanities)	
PHIL 3314	Ethical Theory [1]	
PHIL 4304	Political Philosophy [1]	
PHIL 4604	Philosophy of Biology (WI) [1]	
UAP 4264	Environmental Ethics and Policy [1]	
Subtotal		6
Social Sciences		
Select two of the following:		6
PSCI/UAP 3344	Global Environmental Issues: Interdisciplinary Perspectives (Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States) [1]	
RED 4604	Environmental and Sustainability Issues in Housing	
FIW 4464	Human Dimensions of Fisheries and Wildlife [1]	
FREC 3364	Environmental Silviculture	
FREC 4434	Natural Resource Policy	
GEOG 3104	Environmental Justice, Resources and Development	
GEOG 4204	Geography of Resources	
GEOG 4084	Modeling with Geographic Information Systems	
HTM 3484	Socio-Cultural Impacts of Tourism	
MGT 4334	Ethical Leadership and Corporate Social Responsibility [1]	
PSCI/UAP 3714	The U. S. Policy Process (WI) [1]	
SOC 3504	Population Trends and Issues	
UAP 3354	Introduction to Environmental Policy and Planning	
UAP 4184	Community Involvement	
UAP 4214	Gender, Environment, and International Development [1]	
Subtotal		6
Natural Sciences		
Select two of the following: [2]		6
BIOL 1064	Plants and Civilization [1]	
BIOL 2804	Ecology [1]	
BIOL 4004	Freshwater Ecology [1]	
BIOL 4014	Environmental Toxicology [1]	
BIOL 4314	Plant Ecology [1]	
ENSC 3604	Fundamentals of Environmental Science [1]	
FIW 4614	Fish Ecology [1]	
FIW 4454	Human-Wildlife Conflicts	
FIW 4464	Human Dimensions of Fisheries and Wildlife	
FREC 3524	Environmental Interpretation [1]	
GEOG 4044	Biogeography	
GEOS 3014	Environmental Geosciences	
Subtotal		6
Written, Oral, and Visual Communications		
Select one of the following:		3
COMM 2004	Public Speaking	
ENGL 3764	Technical Writing	
ENGL 3774	Business Writing	
ENGL 4824	Science Writing [1]	
STS 2984	Special Study	
Subtotal		3
Total Credits		**27**

Graduation Requirements

Minimum of 6 credit hours at 3000 level or above is required for the completion of the minor.

Students should discuss requirements for their minor with their advisor prior to registering for classes each semester.

Minimum Grade Point Average

A minimum GPA of 2.0 in all courses taken to fulfill the minor is required.

1 Prerequisites may apply - See your advisor.
2 All Biology 3000 and 4000 level courses have restricted capacity for non-majors.

Industrial Design (IDS) Minor

Code	Title	Credits
Required Minor Courses		
IDS 2214	IDS Studio for Minors	6
IDS 3124	Materials and Processes	3
IDS 2044	Human Factors [1]	3
IDS 2114	History of Industrial Design	3
or IDS 2124	History of Modern Industrial Designers	
Subtotal		15
Elective Courses		
Select 3 credits of the following:		3
ARCH 3504	Topics in Architectural Media and Methods	
IDS 4974	Independent Study	
IDS 3204	Topics in Professional Development	
IDS 3224	Topics in Design Competencies	
IDS 3234	Topics in Design Theory	

Subtotal	3
Total Credits	**18**

[1] ARCH 1015/1016 prerequisite for Human Factors is waived for minor students. See department for force add procedure.

Graduation Requirements

The minor requires 18 hours, with no less than 6 hours at the 3000 or 4000 level.

A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.

Innovation (INNO) Minor

Code	Title	Credits
Required Minor Courses		
STS 2254	Innovation in Context (Pathways Concept 2 - Critical Thinking in the Humanities ; Integrated Concept 10: Ethical Reasoning and 11: Intercultural and Global Awareness)	3
ENGE 2094	Create!: Ideation & Innovation (Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Integrated Concept 11: Intercultural and Global Awareness)	3
MGT/ENGE/IDS 4094	Startup: Commercialization of Innovation (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrated Concept 10: Ethical Reasoning)	3
Subtotal		9
Elective Courses		
Select a minimum of nine credit hours from the following:		9
ACIS 1004	Accounting Foundations (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Concept: 10)	
AHRM 1014	Design and Art for Consumers (Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Integrative Concept: 1)	
AHRM 2014	Design for Consumers Studio (Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Integrative Concept: 1)	
COMM 2004	Public Speaking (Pathways Concept 1 - Discourse (advanced/applied); Integrative Concept 10)	
CS 1014	Introduction to Computational Thinking (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Concept 10)	
ENGE 1644	Global STEM Practice: Leadership and Culture (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept: 11)	
ENGE 2524	Exploring Service Learning Through STEAM/STEM Educational Outreach	
ENGE 4104	Applied Explorations in Innovation	
ENGE 4735	Interdisciplinary Design Capstone	
ENGL 1654	Introduction to Science Fiction and Fantasy (Pathways Concept 2 - Critical Thinking in the Humanities ; Integrative Concept 11)	
ENGL 3764	Technical Writing (Pathways Concept 1 - Discourse (advanced/applied); Integrative Concept: 10)	
ENGL 3774	Business Writing	
ENGL 3814	Creating User Documentation	
ENGL 3824	Visual Rhetoric and Document Design	
ENGL 3834	Intercultural Issues in Professional Writing	
ENGL 3844	Writing and Digital Media	
ENGL 4804	Grant Proposals and Reports	
ENGL 4814	Developing Online Content	
ENGL 4824	Science Writing	
HIST/STS 2715	History of Technology (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept: 11)	
HIST/STS 2716	History of Technology (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept: 11)	
ISE 4004	Theory of Organization	
ISE 4015	Management Systems Theory, Applications, and Design	
ISE 4304	Global Issues in Industrial Management	
STS/HIST 2054	Engineering Cultures	
STS 2154	The Life Sciences and Society (Pathways Concept 2 - Critical Thinking in the Humanities ; Integrative Concept 10)	
STS 2354		
STS 3284	Technology and Disability (Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Integrative Concept 10)	
STS 3334	Energy and Society (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept 11)	
Subtotal		9
Total Credits		**18**

Graduation Requirements

Minimum GPA: A minimum minor GPA of a 2.0 in each course taken to fulfill the minor is required.

Graduation Requirement: Students must achieve a grade of C or higher in all courses taken for the minor (ENGE 2094 , STS 2254, ENGE 4094, and any three courses taken from (ACIS 1004, AHRM 1014, AHRM 2014, COMM 2004, CS 1014, ENGE 1644, ENGE 2524, ENGE 4104, ENGE 4735, ENGL 1654, ENGL 3764, ENGL 3774, ENGL 3814, ENGL 3824, ENGL 3834, ENGL 3844, ENGL 4804, ENGL 4814, ENGL 4824, HIST 2715 or STS 2715, HIST 2716 or STS 2716, ISE 4004, ISE 4015, ISE 4304, STS 2054 or HIST 2054, HIST 2354, HIST 3284, HIST 3334)

Electives: A minimum of 3 credits of electives must be at the 3000-4000 level.

Integrated Security (ISDA) Minor

Please Note: There are 3 options to choose from in the Integrated Security Pathways Minor. All students in all 3 options will take the introductory and Capstone courses together. This minor is open to all

students regardless of major. **Tracks are denoted below by A - General Security Track, B - Securing Cyber Track, C - Human Security Track.**

Also note: no more that 50% of the graded course credit hours required for the Minor in Integrated Security may be double-counted by a student also enrolled in his/her major.

The Integrated Security Minor requires a minimum of 18-21 hours depending on minor track listed below:

Code	Title	Credits
I. Introductory Course		
BIT/CS/PSCI 2164	Foundations of Contemporary Security Environments (Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F) ; Pathways Concept 3 - Reasoning in the Social Sciences ; Intercultural Global Awareness) [1]	3
Subtotal		3
II. Middle Courses		
Select one of the following:		12-15
A. General Security Track		
B. Securing Cyber Track		
C. Human Security Track		
Subtotal		12-15
III. Capstone Course		
BIT/CS/PSCI 4164	Future of Security: Integrative Solutions for Complex Security Systems (Pathways Concept 1 - Discourse ; Ethics) [1,2]	3
Subtotal		3
Total Credits		**18-21**

[1] Pathways courses

[2] Courses with prerequisites. Please consult the University Course Catalog, or check with your advisor.

Tracks

A. General Security Track

Code	Title	Credits
Select one course from each block		
Block 1		
CS 1014	Introduction to Computational Thinking (Pathways Concept 5 - Quantitative and Computational Thinking)	3
CS 1054	Introduction to Programming in Java	3
CS 1064	Introduction to Programming in Python	3
CS 1114	Introduction to Software Design	3
SOC 2104	Quantitative Approaches to Community Research (Pathways Concept 5 - Quantitative and Computational Thinking) [1]	3
STS/HIST/SOC 2604	Introduction to Data in Social Context (Pathways Concept 2 - Critical Thinking in the Humanities) [1]	3
HD 3024	Community Analytics (Advanced/Applied Pathways Concept 5 - Quantitative and Computational Thinking) [1]	3
BIT 4604	Data Governance, Privacy and Ethics (Pathways Concept 2 - Critical Thinking in the Humanities) [1,2]	3
Block 2 (Human Security)		
HIST 1354	Conflict and Security in Modern East Asia (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
PSVP 2044	Peace and Violence (Pathways Concept 3 - Reasoning in the Social Sciences)	3
PSCI 3104	Security Studies: Theories and Concepts [1]	3
PSCI 3114	Global Security [2]	3
PSCI 3134	Global Conflict and War	3
PSCI 3184	Human Security [2]	3
HIST 3714	War and Medicine	3
BIT 4604	Data Governance, Privacy and Ethics [2]	3
Block 3 (Cybersecurity)		
HIST 2716	History of Technology (Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
PSCI 3044	The Politics of Internet Governance [2]	3
PSCI 3054	The Dark Web and Threat Analytics	3
PSCI 4074	The Politics of Cybersecurity [2]	3
FIN 4014	Cyberlaw and Policy (Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
BIT 4614	Cybersecurity Management II [2]	3
ECE 4560	Computer and Network Security Fundamentals [2]	3
CRIM 4474	Cyber Criminology (Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
CS 4264	Principles of Computer Security [2]	3
Block 4 (Environmental Security)		
AAEC 1264	(Pathways Concept 3 - Reasoning in the Social Sciences)	3
AAEC 3324	Environment and Sustainable Development Economics (Pathways Concept 3 - Reasoning in the Social Sciences ; Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States) [1]	3
GEOS 1034	Earths Natural Hazards (Pathways Concept 4 - Reasoning in the Natural Sciences) [1,2]	3
GEOG 2004	Water, Environment, and Society (Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
GEOG 2034	Geography of Global Conflict	3
GEOG 3104	Environmental Justice, Resources and Development (Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
PSCI 3344	Global Environmental Issues: Interdisciplinary Perspectives	3
STS 2454	Science, Techology, and Environment (Pathways Concept 2 - Critical Thinking in the Humanities) [1]	3

[1] Pathways courses.

[2] Courses with prerequisites. Please consult the University Course Catalog, or check with your advisor.

B. Securing Cyber Track

Code	Title	Credits
Select one course from each block		
Block 1 (Cybersecurity Infrastructure)		
CS 1014	Introduction to Computational Thinking (Pathways Concept 5 - Quantitative and Computational Thinking (Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F))) [1]	3
CS 1064	Introduction to Programming in Python	3
CS 1054	Introduction to Programming in Java	3
CS 1114	Introduction to Software Design	3
Block 2 (Cybersecurity and Society)		
CRIM 4474	Cyber Criminology (Pathways Concept 3 - Reasoning in the Social Sciences ; Ethical Reasoning) [1]	3
GEOG 2034	Geography of Global Conflict	3
HIST 2716	History of Technology (Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
PSCI/IS 3054	The Dark Web and Threat Analytics	3
PSCI 4074	The Politics of Cybersecurity [2]	3
Block 3 (Cybersecurity Risk and Governance)		
FIN 4014	Cyberlaw and Policy (Pathways Concept 3 - Reasoning in the Social Sciences or Pathways Concept 2 - Critical Thinking in the Humanities ; Ethical Reasoning) [1]	3
BIT 4604	Data Governance, Privacy and Ethics (Pathways Concept 2 - Critical Thinking in the Humanities ; Ethical Reasoning) [1,2]	3
BIT 4614	Cybersecurity Management II [2]	3
ECE 4560	Computer and Network Security Fundamentals [2]	3
BIT 4624	Cybersecurity Analytics for Business [2]	3
CS 4264	Principles of Computer Security [2]	3
Block 4		
Select one additional course from any of the above blocks in the Securing Cyber Track		3

1 Pathways courses.
2 Courses with prerequisites. Please consult the University Course Catalog, or check with your advisor.

C. Human Security Track

Code	Title	Credits
Select 9 credit hours from Block 1, 6 credit hours from Block 2		
Block 1 (Foundations of Human Security)		
GEOG/IS/PSCI 2054	Introduction to World Politics (Pathways Concept 3 - Reasoning in the Social Sciences) [1]	3
PHIL 2304	Global Ethics (Pathways Concept 2 - Critical Thinking in the Humanities ; Ethics) [1]	3
IS/PSCI 3184	Human Security [2]	3
Block 2 (Exploring Human Security)		
AAEC 1264	(Pathways Concept 3 - Reasoning in the Social Sciences)	3
PSVP 2044	Peace and Violence	3
GEOG 2034	Geography of Global Conflict	3
SOC 3004	Social Inequality [2]	3
IS/PSCI 3104	Security Studies: Theories and Concepts	3
IS/PSCI 3114	Global Security	3
IS/PSCI 3134	Global Conflict and War	3
IS/PSCI 3154	Topics in Global Public Policies	3
IS/PSCI 3175	Global Development	3
PSCI/UAP 3344	Global Environmental Issues: Interdisciplinary Perspectives	3
IS/PSCI 3634	Human Rights: Global Issues	3
HIST 3714	War and Medicine	3
IS 4014	International Development	3
IS/PSCI 4024	Seminar in Diplomacy and Security	3
SOC 4444	Schools, Violence, and Justice	3

1 Pathways courses.
2 Courses with prerequisites. Please consult the University Course Catalog, or check with your advisor.

Graduation Requirements

General Security Track Notes

- One course in addition to the two required courses must be a designated a Pathways course that meets a *third* Pathways objective. Example: If Foundations of Security is taken as a Pathways Computational Thinking course, and Security Solutions is taken as a Discourse Pathways course, then the student must choose his or her *third* Pathways course from the selected courses that meets a *third* Pathways objective, such as Reasoning in the Social Sciences, Critical Thinking in the Humanities, etc.
- In addition to the *Future of Security* course, 3 credit hours must be taken at the 3000/4000 level.
- No more than 50% of courses in the minor can be duplicated in the major.

Securing Cyber Track Notes

- One course in addition to the two required courses must be a designated Pathways course that meets a third Pathways objective. Example: If Foundations of Security is taken as a Pathways Computational Thinking course, and Security Solutions is taken as a Discourse Pathways course, then the student must choose his or her third Pathways course from the selected courses that meets a third Pathways objective such as Reasoning in the Social Sciences, Critical Thinking in the Humanities, etc.
- No more than 50% of courses can count towards the student's major.

Human Security Track Notes

- One elective must be taken at the 3000/4000 level.
- No more than 50% of the courses may be duplicated in the major.

Declaring a Minor and Advising

- Declare the Integrated Security Pathways Minor by emailing abrantly@vt.edu
- Please see an advisor in Political Science during pre-registration in 531 Major Williams for questions and assistance.
- Once a minor is declared, a student cannot graduate until she or he has either satisfied the requirements for the minor or withdrawn from

the minor by notifying the IS-DA academic advisors in 531 Major Williams Hall.

Integrative Health and Wellness (IHW) Minor

Code	Title	Credits
Required Minor Courses		
PHS 1514	Personal Health	3
HNFE 2334	Introduction to Integrative Health	3
HD 2014	Integrative Practices for Health, Wellbeing, and Resilience	3
Subtotal		9
Restricted Electives		
Select 9 credits minimum of the following; 6 of these credits must be 3000 or 4000 level:		9
ADV 4324	Issues in Health Communication	
CMST 3124	Interpersonal Communication	
FST/HNFE 2544	Functional Foods for Health	
HD 2314	Human Sexuality	
HIST 3624	Health and Illness in African History	
HIST 3724	History of Disease, Medicine, and Health	
HNFE 4114	Food and Nutritional Toxicology	
HNFE 4224	Alternative and Complementary Nutrition Therapies	
HNFE 4354	Dietary Supplements and Health	
HORT/FREC 2134	Plants and Greenspaces in Urban Communities	
HORT 4794	Medicinal Plants and Herbs	
PHIL 3324	Biomedical Ethics	
PSYC 2054	Psychology of Personality	
PSYC 3024	Human Behaviors and Natural Environments	
PSYC 3054	Health Psychology	
RLCL 1024	Judaism, Christianity, and Islam	
RLCL 1904	Religion and Culture In Asia	
RLCL 2144	African Religions	
RLCL 3214	Religion and Culture in India	
SOC 4704	Medical Sociology	
SOC 4714	Sociology of Mental Illness	
STS/RLCL 2464	Religion and Science	
STS 3314	Medical Dilemmas and Human Experience	
XXXX 4964, 4974, or 4994	Field Study, Independent study or Undergraduate study [1]	
Subtotal		9
Total Credits		**18**

[1] May be included in the minor up to 3 credit hours (1 credit hour = 45 hours of work) when the topic is relevant to the Integrative Health and Wellness, as approved in advance by the minor coordinator and the course instructor, and/or the designated department undergraduate coordinator.

Seats in elective courses are not guaranteed.

Graduation Requirements

A minimum GPA of 2.0 in all courses taken to fulfill the minor is required. A faculty advisor in the College of Agriculture and Life Sciences (CALS) Academic Programs Office will serve as a counterpart to the student's major advisor. Students choosing the minor in Integrative Health and Wellness will register with the CALS Academic Programs Office, 1060 Litton Reaves Hall. This will enable the college to provide any pertinent assistance, materials, and information to the student. Some courses listed on this checksheet have prerequisites, please consult the University Course Catalog, or check with your advisor.

Interdisciplinary Engineering and Science (IES) Minor

Code	Title	Credits
Required Common Courses		
ENGR/COS 2164	Introduction to Scieneering	1
Select one of the following:		2
ENGR 2464	Engineering Fundamentals for Scientists (For Life Science majors) [1]	
BIOL 2124	Cell and Molecular Biology for Engineers (For Physical Science or Engineering majors) [2]	
ENGR/COS 4064	Scieneering Capstone	3
Subtotal		6
Elective Courses		
In-Discipline Courses		
Select 9 credit hours from the list based on a student's major		9
Out-Of-Discipline Courses		
Select 3 credit hours from the list based on a student's major		3
Subtotal		12
Total Credits		**18**

Elective Courses

In-Discipline

Code	Title	Credits
Life Sciences Majors [1]		
ALS 3104	Animal Breeding and Genetics	3
ALS 3304	Physiology of Reproduction	3
ALS/BIOL 4554	Neurochemical Regulation	3
ALS/WATR 4614	Watershed Assessment, Management, and Policy	2
BCHM 3114	Biochemistry for Biotechnology and the Life Sciences	3

[1] Life Science majors include all CALS and CNRE majors not listed in Physical Sciences, as well as the COS majors of Biochemistry, Biological Sciences, Psychology, and Systems Biology.

[2] Will not count towards the IES minor for students majoring in Chemistry, Geological Sciences, Mathematics, Physics or Statistics.

[3] Physical Sciences include Chemistry, Economics, Environmental Sciences, Geosciences, Mathematics, Nanoscience, Neuroscience, Physics and Statistics and Sustainable Biomaterials.

[4] Will not count towards the IES minor for students majoring in Chemistry, Geological Sciences, Mathematics, Physics, or Statistics.

Graduation Requirements

1. To obtain a minor in Interdisciplinary Engineering and Science (Scieneering), a student must complete at least 18 credit hours on an A/F basis, as indicated below. A student must receive a grade of C or better for each course on this checksheet. A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.
2. Students completing the minor must obey all pre-requisite rules. Some courses above may have additional pre-requisites not required for minor.
3. Students may “double count” up to 9 credit hours in the minor with those required for graduation in their major, provided the major has no restrictions to the contrary. Out-of-discipline elective courses chosen for the minor cannot be required courses in the student’s major course of study.

International Business (IB) Minor

Code	Title	Credits
I. Required Culture Course (3 credits)		
Complete one of the following courses. Contact Pamplin International Programs if you think you may have taken a substitutable course.		
Select one of the following:		3
AFST 1814	Introduction to African Studies (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
ARBC 2774	Arab Culture and Civilization (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
ARBC 3274	War and Arab Culture (Pathways Concept 2 - Critical Thinking in the Humanities)	
ARBC 3474	Topics in Arab Cinema (Pathways Concept 2 - Critical Thinking in the Humanities)	
CHN 2734	Chinese Culture and Civilization (Pathways Concept 2 - Critical Thinking in the Humanities)	
CHN 3474	Topics in Chinese Cinema (Pathways Concept 2 - Critical Thinking in the Humanities)	
FR 2714	Introduction to French Culture and Civilization (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
GER 2724	Introduction to German Culture and Civilization (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
GER 3474	Topics in German Cinema (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 6 - Critique and Practice in Design and the Arts 6A)	
ITAL 3474	Topics in Italian Cinema (Pathways Concept 1 - Discourse 1A or Pathways Concept 2 - Critical Thinking in the Humanities)	
JPN 2744	From Atom to Akira: Japan's Pop Culture (Pathways Concept 2 - Critical Thinking in the Humanities)	
RUS 2734	Introduction to Russian Culture and Civilization (Pathways Concept 2 - Critical Thinking in the Humanities)	
RUS 4204	Topics in Russian Culture and Civilization	
RLCL 1904	Religion and Culture In Asia (Pathways Concept 2 - Critical Thinking in the Humanities)	
SPAN 2744	Topics in Spanish Culture (Pathways Concept 2 - Critical Thinking in the Humanities)	
SPAN 2754	Topics in Spanish American Culture (Pathways Concept 2 - Critical Thinking in the Humanities)	
SPAN 2764	Introduction to Latino American Studies (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
SPAN 2774	Minority Languages in the Spanish-Speaking Context (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
Subtotal		3
II. Required Elective Courses (9 credits)		
Select three of the following:		9
BIT 4474	Global Operations and Information Technology	
HTM 4484	International Tourism	
FIN 4144	International Financial Management	
MGT 4314	International Management (Junor Standing; fall only)	
MKTG 4704	International Marketing (Junior Standing)	
Subtotal		9
III. Restricted Elective Courses (6 credits)		
Students may take any two courses from the following but may not double count courses from Part II.		6
Any three-credit course from the list of International Business Minor Elective Courses below.		
Any three-credit course from the Department of Modern and Classical Languages and Literatures (FR, GER, SPAN, etc.) - cannot be used for Part I.		
Any one three-credit Pamplin Business Study Abroad course (ACIS, BIT, FIN, HTM, MGT, MKTG, or REAL 2954 or 3954). Other courses with an embedded study abroad experience may also fulfill the requirement - contact Pamplin International Programs for substitutions.		
Subtotal		6
IV. Foreign Language Requirement		
One of the following foreign language requirements must be met.		
a. Passed at least four years of a single foreign language in high school.		
b. Passed three years of a single foreign language in high school, plus two years of a different foreign language in high school. [1]		
c. Passed three years of a single foreign language in high school, plus two semesters of a university-level foreign language sequence (may be used in Part III above), e.g. SPAN 1105-SPAN 1106 or SPAN 1114 [1]		
d. Completion of a 2106 foreign language course - may take up to four semesters of a single university-level foreign language (e.g. FR 1105, FR 1106, FR 2105, FR 2106) (may be used in Part III above)		
e. Foreign language will be waived for international students or students that speak a second language in their home.		
V. International Experience Requirement		
If not a study abroad experience, the experience must be verified by Pamplin International Programs. All non-Pamplin students are required to complete a Pamplin study abroad experience in order to earn the minor.		
a. Study Abroad		
b. International Employment		
c. International Internship		
d. International Residency		
e. International Service Learning		
Total Credits		**18**

[1] If you choose a different language than high school, you may take any language at the 1000-level. Otherwise, you must take 2000-level courses.

International Business Minor Elective Courses

Code	Title	Credits
ARBC 3644	Religion in the Middle East (Pathways Concept 2 - Critical Thinking in the Humanities)	3
BIT 4474	Global Operations and Information Technology	3
ECON 4124	Growth and Development	3

UAP/GEOG/SOC 4764	International Development Policy and Planning (Junior Standing)	3

Graduation Requirements

To complete the International Business minor, students must pass the 18 credits of required and elective classes listed with an average GPA of a 2.0 in these courses. Additionally, students must satisfy the foreign language and international experience requirements. No course grade may be lower than a C- to earn the minor. If these criteria are met, the minor will be noted on the student's transcript.

Application Eligibility

The International Business {IB) minor is open to all university students with a GPA of at least 2.0. However, all non-Pamplin students must complete a Pamplin international experience in order to earn the 1B minor. Additionally, all Real Estate and non-Pamplin students must complete HTM 2314 or MGT 2314 to be eligible to apply for the minor.

Students can apply for the IB minor at http://pampl.in/addminor (http://pampl.in/addminor/)

Prerequisite Statement

Some courses listed on this check sheet have prerequisites; please consult the University Course Catalog or check with your academic advisor.

Requirements

No more than two courses from each discipline permitted, with the exception of XXXX 3954 Study Abroad. A course cannot be double-counted to meet more than one IB minor requirement unless indicated.

WGS/GEOG/UAP 4214	Gender, Environment, and International Development	3

Graduation Requirements

Hours Requirement: A minimum of 18 hours is required to graduate with an International Studies (IS) minor.

GPA requirement: GPA of 2.0 is required for the IS minor. All courses listed on this checksheet are included in the IS minor GPA calculation.

Prerequisites: Some courses listed on this checksheet have prerequisites. Be sure to consult the University Catalog and/or check with your advisor.

Dual Use of Courses: No course can double count within or between International Studies-related majors or minors with the exception of the Core Degree Requirements and IS 1004 Nations and Nationalities, IS 2054 Introduction to World Politics and IS 2064 The Global Economy and World Politics.

Intra-IS Program majoring and minoring: Students may pursue more than one major or minor associated with the International Studies Program. In this case, the policy pertaining to the "Dual Use of Courses" will apply.

Intra-departmental majoring and minoring: Students pursuing one or more majors associated with the International Studies Program cannot major or minor in Political Science.

Italian (ITAL) Minor

Code	Title	Credits
Required Minor Courses		
Select six of the following:		18
ITAL 2105	Intermediate Italian [1]	
ITAL 2106	Intermediate Italian [1]	
ITAL 3105	Culture Composition and Conversation	
ITAL 3106	Culture Composition and Conversation	
ITAL 3305	Introduction to Italian Literature in Context	
ITAL 3306	Introduction to Italian Literature in Context	
ITAL 3474	Topics in Italian Cinema	
Total Credits		**18**

[1] Students who place out of ITAL 2105 and/or ITAL 2106 should take any Italian course at the 3000 or 4000 level to satisfy those credit requirements.

Graduation Requirements

18 credit hours in Italian at the 2000-level and above.

- A student must complete all courses with a least a minimum 2.0 Minor GPA for all hours attempted. In addition, a minimum grade of “C” (2.0) must be earned in each course completed for the Italian minor.
- Courses used to fulfill minor requirements may not be taken as Pass/Fail.
- All courses in the minor requirements listed above have prerequisites, so students should consult the University Catalog or check with their advisor to ensure the proper fulfillment of course requirements.
- Before the student departs on a study abroad program, a form titled “Authorization to Take Courses Elsewhere” must be filled out and signed by the student, the student's Italian advisor, and the Director of the Office of Global Education. The completed form must be

submitted to the dean of the College of Liberal Arts and Human Sciences.

- Independent Study in Italian (ITAL 4974) or Special Study in Italian (ITAL 3984) may be substituted if the topic is fitting. See your advisor for Italian.
- Topics in Italian Cinema (ITAL 3474) may be counted for the Italian minor a maximum of two times if taken with different content.
- Substitutions may be approved by the Italian Program Director upon request.

Japanese Studies (JPNS) Minor

Code	Title	Credits
Required Minor Courses		
JPN 2105	Intermediate Japanese	3
JPN 2106	Intermediate Japanese	3
JPN 3105	Advanced Japanese	3
JPN 3106	Advanced Japanese	3
Subtotal		12

Select 6 semester hours of the following:		6
JPN 2744	From Atom to Akira: Japan's Pop Culture	
JPN 3125	Japanese for Oral Proficiency	
JPN 3126	Japanese for Oral Proficiency	
JPN 3304	Japanese Literature in Translation	
JPN 3724	Modern Japanese Culture and Society	
JPN 3954	Study Abroad	
JPN 4104	Japanese Advanced Grammar	
RLCL 1904	Religion and Culture In Asia	
RLCL 3224	Religion and Culture in China and Japan	
HIST 2364	History of Japan	
ART 3064	Arts of China and Japan	
PSCI 3574	Government and Politics of Japan	
PSCI 3584	Governments and Politics of Asia	
Subtotal		6
Total Credits		**18**

Graduation Requirements

Students must earn 18 JPN credits regardless of initial course placement.

Language courses must be taken in sequential order. For students with AP/IB credit or prior Japanese language experience, contact your Japanese advisor for placement.

Students with a proficiency level in Japanese that is too advanced for a given course will not be allowed to enroll in that course.

- A minimum grade of "C" must be earned in each course completed for the Japanese Studies minor. A minimum in-minor GPA of 2.0 is required, and all courses used to fulfill the requirements of the minor will be used to determine the minor GPA.
- Courses used to fulfill minor requirements may not be taken Pass/Fail.
- A form titled "Authorization to Take Courses Elsewhere" must be filled out and signed by the student, the Chair of the Department, and the Director of the Office of Global Education before the student departs on a study abroad program.

HIST 3654	Arab-Israeli Conflict	
JUD 4424	Advanced Topics in Jewish Culture, History and Thought	
JUD 4974	Independent Study (max 3 credit hours)	
Subtotal		12
Total Credits		**18**

[1] Including at least 6 credits at the 3000 level or above

Graduation Requirements

Special offerings, topics courses, Independent Study (4974), Special Study (4984), or Undergraduate Research (4994) in any department, so long as the topic is appropriate, may also be counted towards this minor. Permission to include courses not specifically listed here, however, must be granted by the minor coordinator. Please note that all upper division courses may require prerequisites. Students must take responsibility to familiarize themselves with any other prerequisites that may be required when selecting courses. Students must have an over-all GPA of 2.0 and a GPA of 2.0 in courses completed for the minor in order to graduate. For more information, contact the Judaic Studies Minor coordinator, Prof. Brian Britt, bbritt@vt.edu.

Landscape Architecture (LAR) Minor

Code	Title	Credits
Required Minor Courses		
Complete the following:		
LAR 1254	Environment and Natural Systems (Pathways Concept 4 - Reasoning in the Natural Sciences or Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F))	3

LAR 1264	Seeing, Understanding and Representing Landscape and the Built Environment (Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A) or Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D))	3
LAR 2254	Social and Cultural Landscapes	3
Subtotal		9
Select a minimum of nine (9) credits of the following:		9
LAR/FREC/NR 2554	Leadership for Global Sustainability (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	
LAR 3044	Land Analysis and Site Planning (Pathway 5a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05A))	
LAR 3264	People Community and Place (Pathways Concept 3 - Reasoning in the Social Sciences)	
LAR 4034	Evolution of the American Landscape (Pathway 1a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G01A) or Pathways Concept 2 - Critical Thinking in the Humanities)	
LAR 4084	Landscape Design and Planning Studio (Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D))	
LAR 4154	Design Studies of the Built Environment (Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A) Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D))	
LAR 4254	Theories of Landscape Architecture	
LAR 4304	Topics in Landscape Architecture [1]	
LAR/BSE/FREC/HORT/SPIA 4554	Creating the Ecological City	
Subtotal		9
Total Credits		**18**

All courses taken for the LAR minor must be taken for an A-F grade and be completed with a minimum in-minor GPA of 2.0. Any courses taken for the LAR minor will count toward the in-minor GPA.

[1] May take different sections for credit

- Of the courses listed in Section 2, at least six (6) credits must be taken at the 3000 or 4000 level.
- All courses taken for the LAR minor must be taken for an A-F letter grade and be completed with a minimum in-minor GPA of 2.0. Any courses taken for the LAR minor will count towards the in-minor GPA.

Language and Culture for the Practice of Science (LCPS) Minor

Code	Title	Credits
Introduction/Foundational Experience		
Select one of the following:		6
FR 3105 & FR 3106	Composition, Conversation and Grammar and Composition, Conversation and Grammar [1]	
SPAN 3105 & SPAN 3106	Grammar, Composition and Conversation and Grammar, Composition and Conversation [1]	
Subtotal		6
Mid-level Experience		
BIOL 1105	Principles of Biology	3
BIOL 1106	Principles of Biology	3
Select one of the following:		2-4
ALS 2404	Biotechnology in A Global Society	
ALS 3404	Ecological Agriculture: Theory and Practice	
ALS 4204	Concepts in Community Food Systems	
APSC 3334	Animal Welfare and Bioethics	
BIOL 1064	Plants and Civilization	
ENT 2004	Insects and Human Society	
FIW 4464	Human Dimensions of Fisheries and Wildlife	
FIW 4714	Fisheries Management	
FREC 2124	Forests, Society & Climate	
FREC 2134	Plants and Greenspaces in Urban Communities	
FREC 2554	Leadership for Global Sustainability	
FREC 4334	Principles and Practice of Agroforestry	
HNFE 3634	Epidemiologic Concepts of Health and Disease	
HORT 2184	Plants, Places, and Cultures in a Global Context	
HORT 2224	Horticulture Science and Industry	
PPWS 2104	Plants, Genes, and People	
PPWS 4114	Microbial Forensics and Biosecurity	
Select one of the following:		3
FR 2714	Introduction to French Culture and Civilization	
SPAN 2744	Topics in Spanish Culture	
SPAN 2754	Topics in Spanish American Culture	
SPAN 2764	Introduction to Latino American Studies	
SPAN 2774	Minority Languages in the Spanish-Speaking Context	
Subtotal		11-13
Capstone Experience		
Select one of the following:		3
FR 3154	French for the Natural Sciences	
SPAN 3154	Spanish for the Natural Sciences	
Subtotal		3
Total Credits		**20-22**

[1] The prerequisite for FR 3105/SPAN 3105 and FR 3106/SPAN 3106 can be satisfied through completing FR 2106/FR 2164 or SPAN 2106. It can also be met through high school study of French or Spanish and through AP or IB credit. Students with high school study of French or Spanish should consult with an advisor in the appropriate language to determine placement.

Graduation Requirements

Minor requirement: Minimum of 20 credit hours to complete minor.

Minimum GPA: A minimum GPA of 2.0 in these courses is required to complete the minor.

Prerequisite Statement: Some courses listed on this checksheet may have pre-/co-requisites; please consult the University Course Catalog, or check with your advisor.

Double Counting: No more than 50% of the graded course credits required for Minor in Language and Culture for the Practice of Science (LCPS) may be double-counted in a student's Major.

Language Sciences (LNGS) Minor

Code	Title	Credits
I. Required Minor Courses		
ENGL 1504	Introduction to Contemporary Linguistics (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept: Intercultural Awareness)	3
Select one of the following:		3
ENGL/WGS 3134	Gender and Linguistics (Pathways Concept 1 - Discourse (advanced/applied); Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept: Intercultural Awareness)	
ENGL/RLCL/SOC 3144	Language and Ethnicity in the United States (Pathways Concept 1 - Discourse (advanced/applied); Integrative Concept: Intercultural Awareness)	
SPAN 2774	Minority Languages in the Spanish-Speaking Context (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept: Intercultural Awareness)	
ENGL 4074	Syntax (Pathways Concept 5 - Quantitative and Computational Thinking (advanced); Integrative Concept: Intercultural Awareness)	3
or ENGL 4144	Phonology	
Subtotal		9
II. Elective Courses		
Select two of the following: [1]		6
ENGL 1514	Language and Society (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concept: Ethical Reasoning ; Integrative Concept: Intercultural Awareness)	
ENGL 1524	Language and the Mind	
ENGL 2034	Analyzing the Sounds of Language (Pathways Concept 5 - Quantitative and Computational Thinking (foundational); Integrative Concepts: Ethical Reasoning)	
ENGL/AINS 3304	The Languages of Native America	
RLCL 3204	Multicultural Communication (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Concepts: Intercultural Awareness)	
ENGL 4004	Linguistic Discourse Analysis	
ENGL 4054	History of the English Language	
GER 4334	Special Topics in German Life, Literature, and Language [2]	
ENGL/PSYC 4134	Language Development	
SPAN 3494	Introduction to Hispanic Linguistics	
SPAN 3544	Sounds of Spanish	
SPAN 4114	Topics in Spanish Linguistics	
ENGL 4974	Independent Study [3]	
or CHN 4974	Independent Study	
or CLA 4974	Independent Study	
or FL 4974	Independent Study	
or GER 4974	Independent Study	
or GR 4974	Independent Study	
or HEB 4974		
or ITAL 4974	Independent Study	
or JPN 4974	Independent Study	
or LAT 4974	Independent Study	
or PORT 4974	Independent Study	
or SPAN 4974	Independent Study	
Subtotal		6
Language Sciences Capstone		
ENGL 4084	Conducting Research in the Language Sciences	3
Subtotal		3
Total Credits		**18**

[1] Courses in Section I not taken as required may be used as electives.
[2] GER 4334 counts as an elective only when History of the German Language is the topic.
[3] An independent study on an appropriate linguistic topic as approved by a linguistics faculty member.

Graduation Requirements

The Pathways Minor in Language Sciences requires 18 hours.

Some courses on this checksheet have prerequisites. Please consult the University Catalog or your advisor.

In order to graduate with a Minor in Language Sciences, students must complete all courses comprising the minor with a GPA of 2.0 or better.

Latin (LAT) Minor

Code	Title	Credits
Required Minor Courses		
Select 18 semester hours of the following:		18
LAT 1105	Elementary Latin	
LAT 1106	Elementary Latin (cont.)	
LAT 2104	Cicero and Livy	
LAT 2114	Latin Epic: Vergil and Ovid	
LAT 2124	Latin Lyric: Catullus and Horace	
LAT 2134	Late Medieval Latin	
LAT 2984	Special Study	
LAT 3004	Readings in Latin Literature	
LAT 4004	Directed Studies in Latin Prose Composition	
LAT 4974	Independent Study [1]	
LAT 4984	Special Study (Advanced)	
LAT 4994	Undergraduate Research [1]	
LAT 5974	Independent Study [1]	
LAT 5984	Special Study (Graduate)	

LAT 5994	Research and Thesis [1]	
Subtotal		18
Total Credits		**18**

[1] Courses can be included in the Minor *only* with permission of your advisor.

Graduation Requirements

Requirements: 18 semester hours of coursework in Latin from the following list, including at least 6 credit hours at the 3000 or 4000 level. With the exception of LAT 1105 Elementary Latin , LAT 1106 Elementary Latin , and LAT 4004 Directed Studies in Latin Prose Composition all courses are variable-content courses and may be repeated for credit up to three times with different content. For substitutions, see your advisor for Latin.

- All courses taken from among those listed above will be included in the calculation of the minor GPA.
- A student must complete all courses with a minimum 2.0 GPA for all hours attempted. In addition a minimum grade of C is required of all Foreign Language Minors in each of the required courses for the minor.
- Required courses may be transferred only with the approval of your advisor for the Latin Minor.
- Authorization to take coursework elsewhere should be obtained beforehand from the Dean's Office and the Chair of Modern and Classical Languages and Literatures.

N.B.

1. CLA 2444 Ancient Greek and Roman Mythology (= ENGL 2444 Ancient Greek and Roman Mythology and RLCL 2444 Greek and Roman Myth) and CLA 2454 Topics in Ancient Greek and Latin Literature do not count toward a Latin Minor.
2. No course required for the Latin Minor may be taken Pass/Fail.

Leadership and Service (LAS) Minor

Code	Title	Credits
Required Minor Courses		
Select 12 credit hours of the following:		12
AS 3215	Air Force Management and Leadership (AFROTC label: Leading People and Effective Communication) [1]

Subtotal		9
Total Credits		**21**

[1] Some courses listed on this checksheet may have prerequisites and/or corequisites; please consult the University Course Catalog or check with your advisor.

Elective Courses for Leadership and Service Minor

History (HIST)

Code	Title	Credits
HIST 3254	The Vietnam War	3
HIST 3484	Nazi Germany: History and Memory	3
HIST 3644	Twentieth-Century Russia	3
HIST 3524		3
HIST 3534	Modern Military History	3
HIST 3544	World War II	3

Philosophy (PHIL)

Code	Title	Credits
PHIL 1304	Morality and Justice	3
PHIL 2304	Global Ethics	3
PHIL 3314	Ethical Theory [1]	3
PHIL/MGT 4324	Business and Professional Ethics	3
PHIL 4334	Jurisprudence [1]	3

[1] Some courses listed on this checksheet may have prerequisites and/or corequisites; please consult the University Course Catalog or check with your advisor.

Leadership Studies (LDRS)

Code	Title	Credits
LDRS 1414	Citizen Leadership	3
LDRS 2014	Principles of Peer Leadership	3
LDRS 3104	The Dynamics of Leadership [1]	3
LDRS 3304	Elements of Team Leadership [1]	3

[1] Some courses listed on this checksheet may have prerequisites and/or corequisites; please consult the University Course Catalog or check with your advisor.

Aerospace Studies (AS)

Code	Title	Credits
AS 1115	Introduction to the Air Force (AFROTC label: Heritage and Values) [1]	1

AS 1116	Introduction to the Air Force (AFROTC label: Heritage and Values)	1
AS 2115	Team and Leadership Fundamentals (AFROTC label: Team Leadership and Fundamentals) [1]	1
AS 2116	Team and Leadership Fundamentals (AFROTC label: Team Leadership and Fundamentals)	1
AS 2944	AFROTC Leadership Laboratory (1, can be counted up to 8 times) [1]	1

[1] Some courses listed on this checksheet may have prerequisites and/or corequisites; please consult the University Course Catalog or check with your advisor.

Military Science (MS)

Code	Title	Credits
MS 1005	Military Science I, Army Reserve Officer Training Corps	2
MS 2006	Military Science II, Army Reserve Officer Training Corps [1]	3
MS 3005	Military Science III, Army Reserve Officer Training Corps [1]	4
MS 4005	Military Science IV, Army Reserve Officer Training Corps [1]	4

[1] Some courses listed on this checksheet may have prerequisites and/or corequisites; please consult the University Course Catalog or check with your advisor.

Graduation Requirements

Hours requirement: A minimum of 21 hours is required to graduate with a Leadership and Service minor.

GPA requirement: A GPA of 2.5 is required for the minor. All courses listed on this checksheet are included in the minor GPA calculation.

Prerequisites: Some courses listed on this checksheet have prerequisites and/or corequisites. Be sure to consult the University Catalog and/or check with your advisor.

Double-counting: Any student pursuing multiple minor degree programs *may* use courses completed for other minor programs towards completion quotas for this minor (provided, of course, that the course in question is one listed on this checksheet as a requirement or elective).

Leadership and Social Change (ILRM) Minor

The Leadership and Social Change minor introduces students to the academic study of leadership and provides them with interdisciplinary skills to solve complex societal issues at the local, national, and international levels. While engaging in the study of leadership, students will also learn about the Social Change Model of Leadership Development created specifically for college students. This model helps students understand themselves (individual values), how to work with others (group values), and how to better serve their communities (society values). In this process, students will not only learn *about* leadership but will also answer the question: leadership *for what*?"

Admission Requirements for the Minor

The Leadership and Social Change minor is open to all Virginia Tech undergraduate students with a cumulative GPA of at least 2.50. To add the minor, visit this link: https://www.cals.vt.edu/academic-programs/current/CALS_Studentforms.html (https://nam04.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cals.vt.edu%2Facademic-programs%2Fcurrent%2FCALS_Studentforms.html&data=05%7C02%7Cdagreen%40vt.edu%7C9cf843b7146f4b0156a908dcd7f04302%7C6095688410ad40fa863d4f32c1e3a3%7C0%7C0%7C638622674118081326%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLC%7C0%7C%7C%7C&sdata=yWV8cqPnEcpGZ%2F5T1T77fBme8MqXboxQ3v2DvWE6%2Fwc%3D&reserved=0), scroll down and select “Add or Drop Minor in CALS”.

Total Credits	**19**

Graduation Requirements

- A minimum of 19 hours is required to graduate with the Leadership and Social Change minor.
- Students must complete at least 6 credit hours of coursework at the 3000-level or above.
- At least 9 credits of Pathways courses must satisfy three different concepts.
- No more than 50% of the graded course credits required for the Minor in Leadership and Social Change (ILRM) may be double counted in a student's major.
- Students must self-select their social change electives based on an interest area or focus. Use the definitions provided on page 1 and the worksheet on page 3 for ideas. If you are interested in taking social change elective courses outside what is listed, please consult with

Dr. Austin Council, Coordinator of the Leadership and Social Change Minor (adc@vt.edu), before enrolling to receive approval.

Adding the Leadership and Social Change Minor

To add the minor, visit this link: https://www.cals.vt.edu/academic-programs/current/CALS_Studentforms.html, scroll down and select "Add or Drop Minor in CALS".

Leadership, Corps of Cadets (LMCC) Minor

Application to the Minor in Leadership - Corps of Cadets is restricted to active members of the Virginia Tech Corps of Cadets. Awarding of the Minor in Leadership - Corps of Cadets is restricted to graduates of the Virginia Tech Corps of Cadets.

Qualifying Leadership Positions for the LMCC

MN 1104	Naval Ships Systems I: Engineering	
MN 2004	Naval Ships Systems II: Weapons	
MN 2104	Seapower and Maritime Affairs	
MN 3005	Navigation and Naval Operations	
MN 3006	Navigation and Naval Operations	
MN 3204	Evolution of Warfare	
MN 4005	Leadership and Management/Ethics	
MN 4006	Leadership and Management/Ethics	
MN 4204	Amphibious Warfare	
Air Force ROTC		
AS 1115	Introduction to the Air Force	
AS 1116	Introduction to the Air Force	
AS 2115	Team and Leadership Fundamentals	
AS 2116	Team and Leadership Fundamentals	
AS 3215	Air Force Management and Leadership	
AS 3216	Air Force Management and Leadership	
AS 4215	National Security Forces in Contemporary American Society	
AS 4216	National Security Forces in Contemporary American Society	
Subtotal		8-11
III. Required Minor Courses		
PHIL 2304	Global Ethics	3
Select one of the following:		3
MGT 3304	Management Theory and Leadership Practice	
MGT 3404	Principles of Management	
Substitute approved by the Director of the Rice Center for Leader Development (include signed LMCC Course Substitute Request)		
Subtotal		6
Total Credits		**19-27**

[1] Students must complete a minimum of 22 credit hours to earn the minor.

Graduation Requirements

Application to the Minor in Leadership - Corps of Cadets (LMCC) is restricted to active members of the Virginia Tech Corps of Cadets. Awarding of the Minor in Leadership - Corps of Cadets is restricted to students who have completed a minimum of six (6) semesters in the Virginia Tech Corps of Cadets. For more information about declaring the minor, visit https://vtcc.vt.edu/academic-programs/check-sheets.html.

Requirements for Minor

I. A minimum of 22 credit hours consisting of:

- Sixteen credit hours that include:
  - Satisfactory completion of a minimum of six semesters of Corps Leadership Courses. If a cadet transferred into the VTCC after their first year of college, then they will be required to satisfactorily complete the appropriate Corps Leadership Courses for a minimum of five semesters.
  - The remaining credits must be earned by satisfactory completion of ROTC or Pro Lab courses.
- Six credit hours must include:
  - Satisfactory completion of MGT 3304 Management Theory and Leadership Practice OR MGT 3404 Principles of Management OR suitable substitute approved by the Director of the Rice Center for Leader Development.
  - Satisfactory completion of PHIL 2304 Global Ethics
- A minimum of six credit hours at the 3000-level or above must be satisfactorily completed.
- Satisfactory completion of coursework for this minor is defined as earning no lower than a C- as the final grade for each course.

II. Satisfactory completion of leadership progression within the Virginia Tech Corps of Cadets:

- Requires satisfactory completion of three leadership positions that have direct supervisory responsibility over other cadets or significant organizational responsibility. (3 VTCC – or – 2 VTCC and 1 ROTC/VPI – or – 1 VTCC and 2 ROTC/VPI). The Director of the Rice Center for Leader Development maintains the current list of approved leadership positions: https://vtcc.vt.edu/academic-programs/check-sheets.html.
- Fire Team Leader (in any organization) can only be counted once.
- Must complete at least six semesters in the Corps of Cadets. Students dismissed from the Corps of Cadets for disciplinary reasons

or unsatisfactory performance are not eligible for this minor. This requirement is met upon graduation from the Corps of Cadets for transfers students enrolled in the Corps of Cadets for less than six semesters.

Pre-Requisite Statement

Some courses listed have pre-requisites, please consult the University Course Catalog, or check with your advisor.

Literature (LIT) Minor

Code	Title	Credits
Required Minor Courses		
I. A Course in Literature Written Before 1800		
Select one of the following:		3
ENGL 3204	Medieval Literature	
ENGL 3214	Renaissance Literature	
ENGL 4114	Chaucer	
ENGL 4124	Introduction to Old English	
ENGL 4164	Studies in Shakespeare	
ENGL 4214	Milton	
Or an appropriate section of:		
ENGL 4684	Special Topics in Literature	
ENGL 4784	Senior Seminar	
II. A Course in Diverse Literary Traditions		
Select one of the following:		3
ENGL/AFST 2644	Introduction to African-American Literature	
ENGL/AINS 2804	Contemporary Native American Literatures	
ENGL 3364	Topics in Literature by Women	
ENGL 3514	Ethnic Literature for Children	
ENGL 3644	The Postcolonial Novel	
ENGL 3654	Ethnic American Literature	
III. Four Courses in Literature		
Select four of the following: [1]		12
ENGL 2034	Analyzing the Sounds of Language	
ENGL 2534	American Literary History	
ENGL 2544	British Literary History	
ENGL 2604	Introduction to Critical Reading	
ENGL/AFST 2644	Introduction to African-American Literature	
ENGL 2804	Contemporary Native American Literatures	
ENGL 3134	Gender and Linguistics	
ENGL 3144	Language and Ethnicity in the United States	
ENGL 3154	Literature, Medicine, and Culture	
ENGL 3204	Medieval Literature	
ENGL 3214	Renaissance Literature	
ENGL 3234	Romantic Literature	
ENGL 3244		
ENGL 3264	Modernist British Literature	
ENGL 3274		
ENGL 3324	Acts of Interpretation	
ENGL 3364	Topics in Literature by Women	
ENGL 3514	Ethnic Literature for Children	
ENGL 3524	Literature for Children	
ENGL 3534	Literature and the Environment	
ENGL 3544	Literature and Cinema	
ENGL 3624	Appalachian Literature	
ENGL 3644	The Postcolonial Novel	
ENGL 3654	Ethnic American Literature	
ENGL 3684	Literature and the Law	
ENGL 3684H	Literature and the Law	
ENGL 3694	Topics in World Novels	
ENGL 3844	Writing and Digital Media	
ENGL 4114	Chaucer	
ENGL 4124	Introduction to Old English	
ENGL 4164	Studies in Shakespeare	
ENGL 4214	Milton	
ENGL 4434	The American Novel	
ENGL 4444	The British Novel	
ENGL 4504	Modern Poetry	
ENGL 4514	Contemporary Poetry	
ENGL 4624	Studies in a British Author after 1800	
ENGL 4634	Studies in an American Author before 1900	
ENGL 4644	Studies in an American Author after 1900	
ENGL 4664	Contemporary Fiction	
ENGL 4674		
ENGL 4684	Special Topics in Literature	
Total Credits		**18**

Graduation Requirements

The Minor in English: Literature requires 18 hours distributed as follows:

I. A Course in Literature Written Before 1800 (3 hours)

II. A Course in Diverse Literary Traditions (3 hours)

III. Four Courses in Literature (12 hours)

In order to graduate with a Minor in Literature, students must complete all courses comprising the minor with a GPA of 2.0 or better

Materials in Society (MTSC) Minor

Instructions: Complete all classes in Section I (Core Requirements), three classes from Section II (Restricted Electives), and Section III (Materials and Society Capstone Requirement). 18 total credit hours are required to complete the minor. no more than 50% of the graded course credits required for the minor may be double-counted in a student's major.

Code	Title	Credits
I. Required Minor Courses		
MSE 1014	The Science of Materials in Everyday Life (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Ethical Reasoning)	3
CHEM 3054	Postconsumer Materials (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Intercultural and Global Awareness)	3
Subtotal		6

II. Restricted Electives		
Select three credits from each of the following sections for a total of nine credits:		9
IIa: Social Equity		
PHIL 1304	Morality and Justice (Pathways Concept 2 - Critical Thinking in the Humanities ; Integrative Outcome: Ethical Reasoning)	
STS 2454	Science, Techology, and Environment (Pathways Concept 2 - Critical Thinking in the Humanities ; Integrative Outcomes: Intercultural and Global Awareness; Ethical Reasoning)	
STS 3334	Energy and Society (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Intercultural and Global Awareness)	
STS 3284	Technology and Disability (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Integrative Outcome: Ethical Reasoning)	
ENGL 2634	Writing and Social Justice (Pathways Concept 1 - Discourse (advanced/applied) and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning)	
IIb: Policy		
STS 2444	Global Science and Technology Policy (Pathways Concept 2 - Critical Thinking in the Humanities ; Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Intercultural and Global Awareness)	
SPIA 2554	Collaborative Policy-Making and Planning (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning)	
SPIA 4464	Data and the Art of Policy-Making and Planning (Pathways Concept 5 - Quantitative and Computational Thinking (advanced/applied); Integrative Outcome: Ethical Reasoning)	
FREC/IS/PSCI 4174	Climate Change and the International Policy Framework (Pathways Concept 1 - Discourse (advanced/applied) or Pathways Concept 3 - Reasoning in the Social Sciences ; Integrative Outcome: Ethical Reasoning)	
FREC/AAEC/WATR 4464	Water Resources Policy and Economics (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrative Outcome: Ethical Reasoning)	
IIc: Materials Science		
MINE 2114	Energy and Raw Materials: Geopolitics and Sustainable Development (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Intercultural and Global Awareness)	
CHEM 1015	Chemistry in Context (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Ethical Reasoning) [1]	
CHEM 1016	Chemistry in Context (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Ethical Reasoning) [1]	
GEOS 1024	Earth Resources, Society, and Environment (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Intercultural and Global Awareness)	
ENSC 1015	Foundations of Environmental Science (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Intercultural and Global Awareness)	
ENSC 1016	Foundations of Environmental Science (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Intercultural and Global Awareness)	
GEOS 1004	Earth Science: Our Past, Present, and Future (Pathways Concept 4 - Reasoning in the Natural Sciences ; Integrative Outcome: Ethical Reasoning)	
Subtotal		9
III. Materials and Society Capstone Requirement		
CHEM 4054		3
Subtotal		3
Total Credits		**18**

1 Prior credit in CHEM 1035 General Chemistry or CHEM 1036 General Chemistry can substitute for CHEM 1015 Chemistry in Context or CHEM 1016 Chemistry in Context.

Prerequisites

Some courses listed on this checksheet may have prerequisites. Students are required to double check course prerequisites and equivalents. Please see your advisor or consult the Undergraduate Course Catalog for more information.

Minimum GPA

For the courses attempted for this minor, the student must have a GPA of 2.0 or better.

For planning purposes, students may wish to be aware that the following courses are typically taught during:

- Fall Semester: STS 2454 Science, Techology, and Environment, STS 3334 Energy and Society, SPIA 2554 Collaborative Policy-Making and Planning, MINE 2114 Energy and Raw Materials: Geopolitics and Sustainable Development, CHEM 1015 Chemistry in Context, FREC 4174 Climate Change and the International Policy Framework, FREC 4464 Water Resources Policy and Economics, ENSC 1015 Foundations of Environmental Science, GEOS 1014 Evolution of the Earth-Life System, and STS 3284 Technology and Disability.
- Spring Semester: CHEM 1016 Chemistry in Context, PHIL 1304 Morality and Justice, STS 2444 Global Science and Technology Policy, SPIA 4464 Data and the Art of Policy-Making and Planning, GEOS 1024 Earth Resources, Society, and Environment, CHEM 3054 Postconsumer Materials, MSE 1014 The Science of Materials in Everyday Life, CHEM 4054 , ENSC 1016 Foundations of Environmental Science, and GEOS 1004 Earth Science: Our Past, Present, and Future.

Mathematics (MATH) Minor

Code	Title	Credits
Required Minor Courses		
MATH 1225	Calculus of a Single Variable (Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F))	4
MATH 1226	Calculus of a Single Variable (Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F))	4
MATH 2114	Introduction to Linear Algebra	3
MATH 2204	Introduction to Multivariable Calculus	3
or CMDA 2005	Integrated Quantitative Sciences	
MATH 2214	Introduction to Differential Equations (Pathway 5a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05A))	3
or CMDA 2006	Integrated Quantitative Sciences	
Elective Courses [1]		
Select nine credits of MATH courses numbered 3000 or higher. Subject to restrictions and exceptions in the footnote below.		9
Total Credits		**26**

Footnote

[1] **The following courses can also be used as Elective Courses:**

- MATH 2534 Introduction to Discrete Mathematics
- CMDA 3605 Mathematical Modeling: Methods and Tools
- CMDA 3606 Mathematical Modeling: Methods and Tools
- CMDA 4604 Intermediate Topics in Mathematical Modeling

The following courses are cross-listed with MATH courses and therefore can also be used as Elective Courses:

- AOE 4404 Applied Numerical Methods
- AOE 5404 Numerical Methods for Aerospace and Ocean Engineering
- CS 3414 Numerical Methods
- CS 4414 Issues in Scientific Computing

The following course can be used only with approval by the Math Undergraduate Policy & Curriculum Committee. Contact math advising.

- MATH 4984 Course MATH 4984 Not Found

The following courses CANNOT be used as Elective Courses:

- MATH 4044 History of Mathematics
- MATH 4625 Mathematics for Secondary Teachers
- MATH 4626 Mathematics for Secondary Teachers
- MATH 4644 Secondary School Mathematics With Technology
- MATH 4664 Senior Math Education Seminar
- MATH 4754 Internship
- MATH 4974 Independent Study
- MATH 4994 Undergraduate Research

Graduation Requirements

Minimum Credits Required for Graduation

At least 26 credits required.

To graduate with a Virginia Tech undergraduate degree, a minimum of 25% of total credits for majors and minors must be taken at Virginia Tech. This means at least 7 credits for the math minor must be taken at Virginia Tech.

Minimum GPA Required for Graduation

Students are required to have 2.0 in-minor GPA.

Grade Mode

All courses used for the math minor must be taken in A-F grade mode.

Medicine and Society (MSOC) Minor

Code	Title	Credits
Required Minor Courses		
Select one of the following:		3
STS 2154	The Life Sciences and Society	
HIST 3734	History of Modern Biology	
HIST/STS 3705	History of Science	
HIST/STS 3706	History of Science	
ENGL 3154	Literature, Medicine, and Culture	
Select one of the following:		3
STS 3284	Technology and Disability	
STS/WGS 4334	Sexual Medicine	
SOC 4704	Medical Sociology	
SOC 4414	Drugs and Society	
Select one of the following:		3
STS 3314	Medical Dilemmas and Human Experience	
STS 3124	Societal Health in North America	
PHIL 3324	Biomedical Ethics	
GEOG 4074	Medical Geography of Infectious Diseases	
Subtotal		9
Elective Courses		
Select 9 credit hours of the following:		9
ENGL 3534	Literature and the Environment [1]	
ENGL 3154	Literature, Medicine, and Culture	
HD 1004	Childhood and Adolescence	
HD 2004	Adulthood and Aging	
HD 2314	Human Sexuality	
HD 3114	Issues in Aging	
HD 4324	Advanced Family Relationships	
HIST/STS 3705	History of Science (if not taken as requirement)	
HIST/STS 3706	History of Science	
HIST 3714	War and Medicine	
HIST 3724	History of Disease, Medicine, and Health (if not taken as requirement)	
HIST 3734	History of Modern Biology (if not taken as requirement)	
HUM 3204	Multicultural Communication [1]	
PHIL 1304	Morality and Justice	

PHIL 3314	Ethical Theory [1]	
PHIL 4604	Philosophy of Biology [1]	
PHS 2004	Introduction to Public Health	
PSYC 3054	Health Psychology [1]	
RLCL 1044	Religious Ethics	
SOC 3714	Sociology of Aging (if not taken as requirement) [1]	
SOC 4414	Drugs and Society (if not taken as requirement) [1]	
SOC 4704	Medical Sociology (if not taken as requirement) [1]	
SOC 4714	Sociology of Mental Illness (if not taken as requirement) [1]

STS 2154	The Life Sciences and Society	
STS 2724	Introduction to Displacement Studies	
STS 3104	Science and Technology in Modern Society	
STS/APS 3124	Societal Health in North America	
STS 3284	Technology and Disability (if not taken as requirement)	
STS 4304	Contemporary Issues in Science, Technology, and Society	
STS 4334	Sexual Medicine	
STS 4754	Internship (max. 3hrs for the minor credit)	
STS 4994	Undergraduate Research (max. 3hrs for the minor credit)	
WGS/STS 4704	Gender and Science [1]	
Subtotal		9
Total Credits		**18**

Graduation Requirements

The minor in Medicine and Society consists of 18 credit hours distributed as below. A minimum of 12 hours must be at the 3000 or 4000 level.

- A GPA of 2.0 in all courses taken from the minor checksheet is required.
- Courses must be taken for a grade.
- Students will be enrolled as participants when they formally enroll in the minor.

Medieval & Early Modern Studies (MEES) Minor

Code	Title	Credits
Required Minor Courses		
I. The following course:		
RLCL 1214	The Medieval World	3
Subtotal		3
II. Select one course from each of the following groups:		*6*
Art and History		
ART 3284	Medieval Art and Architecture	
ART 3384	Renaissance Art and Architecture	
ART 3484	Baroque and Rococo Art and Architecture	
HIST 3314	The Later Roman Empire	
HIST 3324	The Medieval World	
HIST 3334	The Renaissance World, 1350-1500	
HIST 3344	Early Modern and Reformation History, 1500-1650	
Literature, Languages, and Thought		
ENGL 3204	Medieval Literature	
ENGL 3214	Renaissance Literature	
ENGL 4124	Introduction to Old English	
GER 3305	Topics in German Culture and Literature	
LAT 2134	Late Medieval Latin	
PHIL 2116	Ancient Through Medieval Philosophy	
PHIL/PSCI 3015	Political Theory	
SPAN 3404	Early Peninsular Culture and Literature	
SPAN 3444	Topics in Early Spanish American Cultures	
SPAN 4304	Topics in Early Modern Literature and Culture	
Subtotal		6
III. Additional Courses		
Select three additional courses (9 credits) from those listed below or from topics courses relevant to Medieval & Early Modern Studies. [1]		9
ART 2385	Survey of the History of Western Art	
ART 3284	Medieval Art and Architecture [2]	
ART 3384	Renaissance Art and Architecture [2]	
ART 3484	Baroque and Rococo Art and Architecture [2]	
ENGL 1634	Introduction to Shakespeare	
ENGL 3204	Medieval Literature [2]	
ENGL 3214	Renaissance Literature [2]	
ENGL 4054	History of the English Language	
ENGL 4114	Chaucer	
ENGL 4124	Introduction to Old English [2]	
ENGL 4164	Studies in Shakespeare	
ENGL 4214	Milton	
FR 3424	French Culture from Middle Ages to Renaissance	
GER 3305	Topics in German Culture and Literature [2]	
HIST 2345	History of the Middle East	
HIST 3314	The Later Roman Empire [2]	
HIST 3324	The Medieval World [2]	
HIST 3334	The Renaissance World, 1350-1500 [2]	
HIST 3344	Early Modern and Reformation History, 1500-1650 [2]	
HIST 3354	Reform and Revolution in Early Modern England	
HIST 3524		
LAT 2134	Late Medieval Latin [2]	
PHIL 2116	Ancient Through Medieval Philosophy [2]	
PHIL/PSCI 3015	Political Theory [2]	
RLCL 1214	The Medieval World [3]	
RLCL 2324	Islam	
RLCL 3424	Orthodoxy and Heresy in Early Christianity	
RLCL/HIST 3504	The Age of The Crusades	
SPAN 3404	Early Peninsular Culture and Literature [2]	
SPAN 3444	Topics in Early Spanish American Cultures [2]	
SPAN 4304	Topics in Early Modern Literature and Culture [2]	
STS 2715	History of Technology	

STS/HIST 3705	History of Science	
TA 3105	History of Drama and Theatre	
Subtotal		9
Total Credits		**18**

1 Permission to include courses not specifically listed here, however, must be granted by the minor coordinator.
2 Cross-listed in section II, above. Note, however, that these courses will not be counted twice.
3 Cross-listed in section I, above. Note, however, that these courses will not be counted twice.

Graduation Requirements

Special offerings, topics courses, Independent Study (4974), Special Study (4984), or Undergraduate Research (4994) in any department, so long as the topic is appropriate, may also be counted towards this minor.

Permission to include courses not specifically listed here, however, must be granted by the minor coordinator. Please note that all upper division courses may require prerequisites. Students must take responsibility to familiarize themselves with any other prerequisites that may be required when selecting courses. Students must have an over-all GPA of 2.0 and an in-minor GPA of 2.0 in order to graduate. Students interested in the Medieval & Early Modern Studies Minor are encouraged to talk with Prof. Charlene M. Eska, ceska@vt.edu

Meteorology (MTRG) Minor

Code	Title	Credits
Required Minor Courses		
GEOG 1514	Introduction to Meteorology	3
GEOG 1524	Introduction to Earths Climate	3
GEOG 2505	Weather Analysis I	3
GEOG 2506	Weather Analysis II	3
Subtotal		12
Geography/ Meteorology Restricted Electives		
Select 3 of the following:		9
GEOG/WATR 2004	Water, Environment, and Society	
GEOG 2114	Introduction to Coastal Regions	
GEOG 3274	Polar Environments	
GEOG/CSES/GEOS 3304	Geomorphology	
GEOG 3404	Mountain Geography	
GEOG 3504	Severe Weather	
GEOG 4044	Biogeography	
GEOG/GEOS 4134	Interdisciplinary Issues and Ethics in Water Resources	
GEOG 4224	Tracking Environmental Change	
GEOG 4514	Tropical Meteorology	
Subtotal		9
Total Credits		**21**

Graduation Requirements

- Upon declaring the MTRG minor, students who are majoring in Geography may no longer use any of the "Required Courses" above (GEOG 1514, GEOG 1524, GEOG 2505, and GEOG 2506) towards their GEOG major requirements. These courses may apply ONLY toward the MTRG minor.
- A minimum overall GPA of 2.0 in these courses is required to complete the minor.
- All minors must include 6 or more credits at 3000 level or above.
- All courses must be taken for an A-F grade unless they are only offered P/F.

Steps for completing the Meteorology Minor

- Declare minor using a 'Minor Declaration Form' found on the CNRE Advising Center website: www.cnre.vt.edu/advising
- Include minor information when updating the application for degree in Hokie Spa.
- Students cannot graduate until they have either
  a. satisfied the requirements for the minor OR
  b. withdrawn from the minor by notifying CNRE Academic Programs office in 138 Cheatham and revised their DARS.

Middle East Studies (MEST) Minor

Code	Title	Credits
I. Required Minor Courses		
RLCL 2324	Islam	3
HIST 2345	History of the Middle East	3
or HIST 2346	History of the Middle East	
Select one of the following:		3
ARBC 1105	Elementary Arabic	
ARBC 1106	Elementary Arabic	
ARBC 1114	Accelerated Elementary Arabic	
ARBC 2105	Intermediate Arabic	
ARBC 2106	Intermediate Arabic	
ARBC 3105	Advanced Arabic	
ARBC 3106	Advanced Arabic	
ARBC 3474	Topics in Arab Cinema	
ARBC 3514	Media Arabic	
Subtotal		9
II. Elective Courses		
Select three Elective Courses (two of which must be at the 3000 level or above). Only one elective can be a language class. [1]		9
Religion and Culture		
RLCL 1024	Judaism, Christianity, and Islam	
RLCL 1024H		
RLCL/WGS 3014	Women and Gender in Islam	
RLCL/HIST 3504	The Age of The Crusades	
RLCL/IS/ARBC 3644	Religion in the Middle East	
History		
HIST 2345	History of the Middle East [2]	
HIST 2346	History of the Middle East [2]	

HIST 3654	Arab-Israeli Conflict	
Foreign Languages and Literatures		
ARBC 1105	Elementary Arabic [2]	
ARBC 1106	Elementary Arabic [2]	
ARBC 1114	Accelerated Elementary Arabic	
ARBC 2105	Intermediate Arabic [2]	
ARBC 2106	Intermediate Arabic [2]	
ARBC 2774	Arab Culture and Civilization [2]	
ARBC 3105	Advanced Arabic [2]	
ARBC 3106	Advanced Arabic [2]	
ARBC 3304	Modern Arabic Literature in Translation [2]	
ARBC 3474	Topics in Arab Cinema [2]	
ARBC 3514	Media Arabic	
School of Visual Arts		
ART 3054	Islamic Art and Architecture	
Political Science		
JUD/PSCI 3544	The State of Israel: A Political History	
PSCI 3594	Topics in Middle East Politics and International Relations	
Government and International Affairs		
GIA 5314	Middle East Geopolitics	
GIA/PSCI 5614/ HIST 5544	Understanding The Israeli Palestinian Conflict	
Economics		
ECON 3314	Middle East Economics	
Subtotal		9
Total Credits		**18**

[1] ARBC 1105, ARBC 1106, ARBC 1114, ARBC 2105, ARBC 2106, ARBC 3105, and ARBC 3106 count as language classes.

[2] Course offerings listed in both Section I and Section II may not be counted twice.

Graduation Requirements

Special offerings, topics courses, Independent Study (4974), Special Study (2984 or 4984), or Undergraduate Research (4994) in any department, so long as the topic is appropriate, may also be counted towards this minor. Permission to include courses not specifically listed here, however, must be granted by the minor coordinator.

Please note that all upper division courses may require prerequisites. Students must take responsibility to familiarize themselves with any prerequisites that may be required when selecting courses.

Students must have an over-all GPA of 2.0 and an in-minor GPA of 2.0 in order to graduate. According to Policy 11(c) all courses used to fulfill the requirements of the minor will be used to determine the minor GPA.

Students interested in the Middle East Studies Minor are encouraged to talk with Dr. Rachel Scott, rmscott@vt.edu, 540-231-4848.

Music (Jazz Studies) (MMJS) Minor

Code	Title	Credits
I. Music Theory		
Take all three of the following:		6
MUS 2815	Jazz Improvisation	
MUS 2816	Jazz Improvisation	
MUS 3815	Advanced Jazz Improvisation

Subtotal		10
Total Credits		**22**

[1] All semesters of MUS 3314 must be jazz-focused, with at least two semesters of MUS 3314 Instrumental Ensemble Music: Jazz Ensemble (Combos), and at least two semesters of MUS 3314 Instrumental Ensemble Music: Jazz Ensemble (Big Band) or Jazz Ensemble II (Big Band).

Graduation Requirements

A minimum of 6 credit hours must be completed at the 3000 or 4000 academic level.

A minimum minor GPA of 2.0 from all courses taken to fulfill the minor is required.

Music (MUS) Minor

Code	Title	Credits
Music Theory		
Select one of the following:		6
MUS 1005 & MUS 1006	Theory Fundamentals and Theory Fundamentals	
OR		
MUS 2025 & MUS 2026	European-American Music Theory and European-American Music Theory	
Subtotal		6
Music History/Literature		
MUS 2115	Survey of Western Music	3
MUS 2116	Survey of Western Music	3
Subtotal		6
Upper Level (6 credits required)		**6**

Choose one of the following tracks:		
Track A		
MUS 3814	Jazz History	
MUS 3164	History of Electronic Music	
Track B		
MUS 3814	Jazz History	
or MUS 3164	History of Electronic Music	
And		
MUS 3314	Instrumental Ensemble Music (Repeat course three times for a total of three credit hours)	
Or		
MUS 3414	Choral Ensemble Music (Repeat course three times for a total of three credit hours)	
Or		
MUS 2514	Individual Applied Voice [1]	
MUS 2524	Individual Applied Keyboard [1]	
MUS 2534	Individual Applied Violin [1]	
MUS 2544	Individual Applied Viola [1]	
MUS 2554	Individual Applied Cello [1]	
MUS 2564	Individual Applied Bass [1]	
MUS 2574	Individual Applied Flute [1]	
MUS 2584	Individual Applied Oboe [1]	
MUS 2594	Individual Applied Clarinet [1]	
MUS 2614	Individual Applied Saxophone [1]	
MUS 2624	Individual Applied Bassoon [1]	
MUS 2634	Individual Applied Horn [1]	
MUS 2644	Individual Applied Trumpet [1]	
MUS 2654	Individual Applied Trombone [1]	
MUS 2664	Individual Applied Baritone [1]	
MUS 2674	Individual Applied Tuba [1]	
MUS 2684	Individual Applied Percussion [1]	
Subtotal		6
Total Credits		**18**

[1] An audition is required for Individual Applied Lessons, and availability is dependent upon faculty availability in the appropriate studio.

Graduation Requirements

A GPA of 2.0 or higher is required in the Music minor. All courses listed on this check sheet are included in the Minor GPA calculations.

18 credit hours are required for the Music minor.

Music (Technology Emphasis) (MMTX) Minor

Code	Title	Credits
I. Music Theory		
Select two of the following:		6
MUS 1005	Theory Fundamentals	
MUS 1006	Theory Fundamentals	
MUS 2025	European-American Music Theory	
MUS 2026	European-American Music Theory	
Subtotal		6
II. Music History/Literature		
MUS 3814	Jazz History	3
or MUS 3164	History of Electronic Music	
Subtotal		3
III. Technology Core		
MUS 2055	Audio Technology For Music	3
MUS 2056	Audio Technology For Music	3
Subtotal		6
IV. Technology Advanced		
Select one of the following series:		6
Series a.		
MUS 3055	Music and Media Production	
MUS 3056	Music and Media Production	
Series b.		
MUS 3065	Computer Music and Multimedia Design	
MUS 3066	Computer Music and Multimedia Design	
Subtotal		6
Total Credits		**21**

"Some courses listed on this check sheet have prerequisites. Please consult the University Course Catalog or check with your advisor.

A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.

Total Hours Required= 21 credit hours

Nanoscience (NANO) Minor

Code	Title	Credits
Required Minor Courses		
NANO 1015	Introduction to Nanoscience: From Atoms to Applications	3
NANO 1016	Introduction to Nanoscience	3
NANO 2024	Quantum Physics of Nanostructures	4
or PHYS 3324	Modern Physics	
NANO 2114	Nanoscience Research Seminar	1
NANO 3015	Nanoscale Synthesis, Fabrication, and Characterization	4
NANO 3016	Nanoscale Synthesis, Fabrication, and Characterization	4
Total Credits		**19**

Graduation Requirements

Prerequisites

Some courses have a prerequisites. Students are required to double check prerequisites and equivalents. Please see your advisor or consult the Undergraduate Course Catalog for more information.

Minimum GPA

For the courses attempted for this minor the student must have a GPA of 2.0 or better.

National Security and Foreign Affairs (NSFA) Minor

Code	Title	Credits
Required Minor Courses		
PSCI 1014	Introduction to United States Government and Politics	3
IS/PSCI/GEOG 2054	Introduction to World Politics	3
Select one of the following:		3
IS 3734	National Security	
IS 3104	Security Studies: Theories and Concepts	
IS 3624	Foreign Policy and Diplomacy	
IS 3625	US-Russia Foreign Policies	
IS 3626	US-Russia Foreign Policies	
IS 3704	National Security Strategy	
IS 3735		
IS 3736

Graduation Requirements

Hours Requirement: A minimum of 18 hours is required to graduate with an National Security and Foreign Affairs (NSFA) minor. A minimum of 6 credit hours must be completed at the 3000 or 4000 academic level (This is a university requirement and is met by the minor requirements).

GPA requirement: GPA of 2.0 is required for the IS minor. All courses listed on this checksheet are included in the National Security and Foreign Affairs minor GPA calculation.

Prerequisites: Some courses listed on this checksheet have prerequisites. Be sure to consult the University Catalog and/or check with your advisor.

Dual Use of Courses: Only required courses common across departmental majors and minors can double count.

Intra-departmental majoring and minoring: Due to overlapping of courses, students cannot pursue another major within the Department of Political Science. However, they can pursue any of the minors offered by the department except the Minor in Political Science.

Natural Resources Recreation (NRR) Minor

Code	Title	Credits
Complete a minimum of 18 credit hours, distributed as follows:		
Required Minor Courses		
Complete all courses below (9 credits)		
FREC/NR/LAR 2554	Leadership for Global Sustainability	3
FREC 3524	Environmental Interpretation [1]	3
FREC 3544	Outdoor Recreation Planning and Management [1]	3
Subtotal		9
ENVIRONMENTAL POLICY RESTRICTED ELECTIVE		
Complete 1 course below (3 credits)		3
AAEC 3314	Environmental Law [1]	
or FREC 4434	Natural Resource Policy	
Subtotal		3
RECREATION RESTRICTED ELECTIVES		
Select two of the following:		6
FREC/GEOG/SBIO/FIW 3954	Study Abroad (max 3 credit hours) [2]	
HNFE 2274	Wilderness First Responder	
HTM 2464	Designing the Service Experience	
HTM 3484	Socio-Cultural Impacts of Tourism	
Subtotal		6
Total Credits		**18**

1. Course has additional prerequisites or restrictions. Check course catalog or timetable for further information
2. Study abroad must be pre-approved for use in the minor. A study abroad can only satisfy a maximum of 3 credit hours towards Minor in Natural Resources and Recreation Restricted Electives.

Graduation Requirements

This Minor requires completion of a minimum of 18 credits.

Notes for the Minor in Natural Resource Recreation

1. A minimum average GPA of 2.0 in these courses is required to complete the minor.
2. All courses must be taken for A-F grade unless only offered P/F.
3. Students in the Environmental Conservation & Society Major are not eligible to declare the Natural Resources Recreation Minor.

Steps for Completing the Minor in Natural Resource Recreation

1. Sign up for the minor in the Advising Center of the College of Natural Resources and Environment (138 Cheatham Hall).
2. If you have the questions about the checksheet, ask the Advising Center to put you in contact with the departmental advisor or faculty member in natural resource recreation.
3. When you request or update your DARS, be sure to include the minor so that it will check your progress on both your major and minor.
4. Once you have enrolled in the minor, you cannot graduate until you either (i) satisfy the credit requirements for the minor, or (ii) withdraw from the minor by notifying the Advising Center of the College of Natural Resources and Environment (138 Cheatham Hall) and revising your DARS.

Naval Engineering (NAVE) Minor

Naval Engineering is defined as a field of study and expertise that includes all engineering and sciences as applied in the research, development, design, construction, operation, maintenance and logistic support of surface and subsurface ships, craft, aircraft, and vehicles (manned and autonomous) used by the Navy for the Nation's defense. It inherently includes multiple engineering disciplines, and hence it is open to all students in the College of Engineering who meet the following requirements.

Code	Title	Credits
Required Minor Courses		
AOE 2204	Introduction to Ocean Engineering	3
AOE 4264	Principles of Naval Engineering	3

AOE 4244	Naval and Marine Engineering Systems Design	3
Select a minimum of 9 additional credits of the following: [1]		9
AOE 4265	Ocean Vehicle Design (with approved NE focus)	
AOE 4266	Ocean Vehicle Design (with approved NE focus)	
XXX 4994	Undergraduate Research w/NE focus	
AOE 3134	Air Vehicle Dynamics	
AOE 3124	Aerospace Structures	
AOE 3154	Astromechanics	
AOE 3164	Aerothermodynamics and Propulsion Systems	
AOE 3224	Ocean Structures	
AOE 3234	Ocean Vehicle Dynamics	
AOE 3264	Thermodynamics and Marine Propulsion	
AOE 4234	Aerospace Propulsion Systems	
CEE 3104	Introduction to Environmental Engineering	
CHE 2164	Chemical Engineering Thermodynamics	
CS 3724	Introduction to Human-Computer Interaction	
CS 3114	Data Structures and Algorithms	
CS 3214	Computer Systems	
CS 3304	Comparative Languages	
ECE 3054	Electrical Theory	
ECE 3304	Introduction to Power Systems	
ECE 4224	Power Electronics	
ECE 3574	Applied Software Design	
ECE 3504	Principles of Computer Architecture	
ESM 2204	Mechanics of Deformable Bodies	
ESM 3054	Mechanical Behavior of Materials	
ESM 4044	Mechanics of Composite Materials	
ESM 4734/ AOE 4024	An Introduction to the Finite Element Method	
ISE 3614	Human Factors Engineering and Ergonomics	
ISE 2014	Engineering Economy	
ISE 2404	Deterministic Operations Research I	
ISE 3414	Probabilistic Operations Research	
ISE 3624	Industrial Ergonomics	
ME 2134	Thermodynamics	
ME 3304	Heat and Mass Transfer	
ME 3414	Fluid Dynamics	
ME 3514	System Dynamics	
ME 4124	Computer Aided Design of Fluid-Thermal Systems	
MSE 4034	Thermodynamics of Materials Systems	
MSE 3054/3064	Mechanical Behavior of Materials	
Total Credits		**18**

[1] Prerequisites may apply -- see your advisor

Graduation Requirements

Naval Engineering is defined as a field of study and expertise that includes all engineering and sciences as applied in the research, development, design, construction, operation, maintenance and logistic support of surface and subsurface ships, craft, aircraft, and vehicles (manned and autonomous) used by the Navy for the Nation's defense. It inherently includes multiple engineering disciplines, and hence it is open to all students in the College of Engineering who meet the following requirements.

To complete the Naval Engineering minor students must:

- complete 18 credit hours as prescribed in the program requirements
- maintain a 2.0 in-minor GPA

Naval Leadership (MN) Minor

Code	Title	Credits
Required Minor Courses		
MN 1004	Introduction to Naval Science	3
PHIL 2304	Global Ethics	3
MN 4005	Leadership and Management/Ethics	3
MN 4006	Leadership and Management/Ethics	3
Subtotal		
Elective Courses		
Select nine credits of the following: [1]		9
HIST 3254	The Vietnam War	
HIST 3484	Nazi Germany: History and Memory	
HIST 3644	Twentieth-Century Russia	
HIST 3524		
HIST 3534	Modern Military History	
HIST 3544	World War II	
PHIL 1304	Morality and Justice	
PHIL 3314	Ethical Theory	
PHIL/MGT 4324	Business and Professional Ethics

MN 4974	Independent Study	
Subtotal		
Total Credits		**21**

[1] At least 3 hours of elective courses must be at the 3000 or 4000 level.

Graduation Requirements

Hours Requirement: A minimum of 21 hours is required to graduate with a Naval Leadership (MN) minor.
GPA Requirement: A GPA of 2.5 is required for the MN minor. All courses listed on this checksheet are included in the MN minor GPA calculation.

Prerequisites: Some courses listed on this checksheet have prerequisites. Consult the University Catalog and/or check with Academic Advisor.
Double-counting: Any student pursuing multiple minor programs may use courses completed for other minor programs towards completion quotas for this minor (provided that the course is listed on this checksheet as a requirement or elective).

Nuclear Engineering (NE) Minor

Code	Title	Credits
Required Minor Courses		
MATH 2214	Introduction to Differential Equations	3
NSEG 3145	Fundamentals of Nuclear Engr (C-) [1]	3
NSEG 3146	Fundamental of Nuclear Engr (C-) [1]	3
NSEG 3604	Radiation Detection, Protection and Shielding (C-) [2,3]	3
or NSEG 5604	Radiation Detect & Shielding	
Subtotal		12
Elective Courses		
Select two of the following:		6
NSEG 4204	Nuclear Fuel Cycle (C-) [2,3]	
or NSEG 5204	Nuclear Fuel Cycle	
NSEG 4214	Nuclear Power Plant Operations (C-) [2,3]	
or NSEG 521	Nuclear Plant Systems & Ops	
NSEG 4424	Reactor Thermal Hydraulics (C-) [2,3]	
or NSEG 5424	Reactor Thermal Hydraulics	
MSE 4384	Nuclear Materials (C-) [2,3]	
or MSE 5384	Advanced Nuclear Materials	
NSEG 4974	Independent Study (C-, 3 hours max)	
NSEG 4994	Undergraduate Research (C-, 3 hours max)	
Subtotal		6
Total Credits		**18**

1. Undergraduates accepted in the accelerated BS/MS program can substitute ME5114, Nuclear Engineering Fundamentals, 3 credits, for the NSEG 3145/3146 sequence but then a third elective course will be required for a total of 18 credit hours.
2. Undergraduate students not already accepted into the accelerated BS/MS program must take the undergraduate version of this course and will not be permitted to enroll in the graduate-level course.
3. Students within 2 semesters of graduating who have a minimum overall GPA of 3.0 or higher who have not been accepted into an accelerated BS/MS program may request permission to enroll in a 5000-level NSEG course provided that: (1) an undergraduate version of the course is not available, (2) the student cannot otherwise complete the minor with current undergraduate course offerings, and (3) the student has earned a B or higher in all previous NSEG courses. Permission from both the ME department head and the course instructor are required for the student to enroll in a 5000-level NSEG course. These courses may not be used on the Plan of Study for a graduate degree at Virginia Tech.

Graduation Requirements

Minor Requirements

1. Complete a minimum of 18 credits of nuclear engineering-related coursework - 12 credits of required courses and 6 credits of elective courses from the attached list.
2. Maintain a 2.0 in-minor GPA and earn a minimum grade of C- or better in all courses which count toward the minor, with the exception of MATH2214, which must receive a passing grade.
3. No pass/fail grades will be permitted.

Organizational Leadership (BOLD) Minor

Code	Title	Credits
Required Minor Courses		
MGT 2354	Teams, Leadership, and Business: Cultivating Excellence (Pathways Concept 3 - Reasoning in the Social Sciences)	3
MGT 4334	Ethical Leadership and Corporate Social Responsibility (Pathways Concept 1 - Discourse 1A and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	3
Subtotal		6
Elective Courses		
Select two courses from the Electives list. At least one elective must be a Pathways course.		6
Subtotal		6
Required Experiential Activity		
Select one of the following:		3
MGT 3064	Cornerstones of Entrepreneurship and Innovation	
MGT 4084	Management Consulting	
MGT 4964	Field Study	
Subtotal		3
Required Capstone Course		
MGT 4354	Leadership: Advances in Skills and Concepts	3
Subtotal		3
Total Credits		**18**

Elective Courses - choose two, 6 credit hours.

Electives can be chosen as complements to your major to develop skills in Creativity & Innovation, Critical & Strategic Thinking, Holistic Thinking & Ethical Reasoning, and/or Intercultural Communication. At least one elective (3 credits) **must** be a Pathways course.

Code	Title	Credits
Creativity and Innovation Courses		
FA 2004	Creativity and the Artistic Experience (Pathways Concept 6 - Critique and Practice in Design and the Arts , 6A)	3
HIST/SOC/STS 2604	Introduction to Data in Social Context (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 5 - Quantitative and Computational Thinking , 5F)	3
HORT 2164	Floral Design (Pathways Concept 6 - Critique and Practice in Design and the Arts , 6A or 6D)	3

ITDS 1114	Design Appreciation (Pathways Concept 6 - Critique and Practice in Design and the Arts , 6A or 6D)	3
MGT 2204	Global Business of Pop Culture (Pathways Concept 2 - Critical Thinking in the Humanities and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	3
Critical and Strategic Thinking Courses		
ACIS 1004	Accounting Foundations (Pathways Concept 5 - Quantitative and Computational Thinking , 5F)	3
ART 2385	Survey of the History of Western Art (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 6 - Critique and Practice in Design and the Arts , 6A)	3
COMM 2084	Media and Society (Pathways Concept 3 - Reasoning in the Social Sciences)	3
LDRS 3304	Elements of Team Leadership (Pathways Concept 3 - Reasoning in the Social Sciences)	3
PHIL 1504	Critical Thinking (Pathways Concept 5 - Quantitative and Computational Thinking , 5F)	3
PHIL 3505	Modern Logic and Its Development	3
TA/MUS 2604	Introduction to Arts Marketing	3
TA 3604	Arts Management	3
Holistic Thinking & Ethical Reasoning		
CMST 3064	Persuasion	3
GEOG/NR 1115	Seeking Sustainability (Pathways Concept 3 - Reasoning in the Social Sciences)	3
HIST 3114	(Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	3
HIST 3554	Age of Globalization (Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences)	3
LDRS 3104	The Dynamics of Leadership	3
MGT 4314	International Management	3
MGT/PHIL 4324	Business and Professional Ethics (Pathways Concept 2 - Critical Thinking in the Humanities)	3
MN 4005	Leadership and Management/Ethics (Pathways Concept 3 - Reasoning in the Social Sciences)	3
PHIL 2304	Global Ethics (Pathways Concept 2 - Critical Thinking in the Humanities)	3
Intercultural Communication Courses		
COMM 2004	Public Speaking (Pathways Concept 1 - Discourse , 1A)	3
HUM/RLCL 3204	Multicultural Communication (Pathways Concept 3 - Reasoning in the Social Sciences)	3
MGT 3444	Multicultural Diversity in Organizations (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States)	3
PR 4074	Organizational Communication	3
TA 2404	Introduction to Applied Collaborative Techniques (Pathways Concept 1 - Discourse , 1A or Pathways Concept 6 - Critique and Practice in Design and the Arts , 6A or 6D)	3

Graduation Requirements

The minor in Organizational Leadership (BOLD) is open to all Virginia Tech students with a GPA of at least 2.50.

Students can apply for the BOLD minor at http://pampl.in/addminor (http://pampl.in/addminor/)

Notes

- Students must complete the minor with at least a 2.0 GPA in the 18 credit hours required by the minor.
- Course substitution requests for the minor can be submitted at https://pamplin.vt.edu/leadership-center/minor/course-substitution.html
- Business majors should not take ACIS 1004 Accounting Foundations as they cannot earn credit for both ACIS 1004 Accounting Foundations and ACIS 2115 Principles of Accounting.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Packaging Systems & Design (PSD) Minor

The minor in Packaging Systems and Design requires the completion of 18 credit hours with at least 6 at the 3000 or 4000 level as follows:

Code	Title	Credits
Required Minor Courses		
SBIO 2004	Computer-Aided Design in Packaging	3
SBIO 2104	Principles of Packaging	3
SBIO 3124	Paper and Paperboard Packaging	3
SBIO 3224	Packaging Distribution Systems	3
Subtotal		12
Elective Courses		
Select two of the following:		6
SBIO 2124	Structure and Properties of Sustainable Biomaterials	
SBIO 3284	Packaging Polymers and Production	
SBIO 4024	Packaging Design for Global Distribution	
SBIO 4214	Food and Health Care Packaging	
SBIO 4224	Industrial Packaging Systems	
Subtotal		6
Total Credits		**18**

All courses must be taken on the letter grade (A/F) option. A minimum GPA of 2.00 is required for all courses taken in the minor.

Some courses listed on this checksheet may have prerequisites, please consult the University Course Catalog or check with your advisor.

Pathways to Sustainability (PSUS) Minor

A minimum of 18 credit hours to include:

Code	Title	Credits
Required Minor Courses		
GEOG/NR 1115	Seeking Sustainability	3
GEOG/NR 1116	Seeking Sustainability	3
Subtotal		6
Core Pathways Courses		
Humanities: Pathways Concept 2 - Critical Thinking in the Humanities		
Select one of the following: [1]		3
AAEC 3324	Environment and Sustainable Development Economics	
APS/HUM 1704	Introduction to Appalachian Studies	
ENGL 3534	Literature and the Environment	
FREC 2554	Leadership for Global Sustainability	
HIST 3144	American Environmental History	
MGT 3444	Multicultural Diversity in Organizations	
STS 3334	Energy and Society	
Environment: Pathways Concept 4 - Reasoning in the Natural Sciences		
Select one of the following:		3
ENSC 1015	Foundations of Environmental Science	
FIW 2114	Principles of Fish and Wildlife Conservation	
FREC 2114	Ecology of Appalachian Forests	
FREC/HORT 2134	Plants and Greenspaces in Urban Communities	
GEOS 1024	Earth Resources, Society, and Environment	
Art & Design: Pathways Concept 6 - Critique and Practice in Design and the Arts		
Select one of the following: [2]		3
ART 2385	Survey of the History of Western Art	
GEOG 3314	Cartography	
ITDS 1114	Design Appreciation	
SBIO 2104	Principles of Packaging	
TA 2024	Introduction to Acting	
TA 2404	Introduction to Applied Collaborative Techniques	
Subtotal		9
Required Capstone: Pathways Concept 3 - Reasoning in the Social Sciences		
GEOG/NR 4444	Practicing Sustainability	3
Subtotal		3
Total Credits		**18**

1 Except MGT 3444 Multicultural Diversity in Organizations & AAEC 3324 Environment and Sustainable Development Economics

2 Except SBIO 2104 Principles of Packaging

All minimum overall GPA of 2.0 in these courses is required to complete the minor.

All minors must include 6 or more credits at 3000 level or above.

All courses must be taken for an A-F grade unless they are only offered P/F.

Steps for successful completion of the Pathways to Sustainability Minor:

- Declare minor using a 'Major/Option/Minor Form' found in the CNRE Advising Center, 138 Cheatham Hall.
- Include minor information when updating the application for degree in Hokie Spa.
- Some courses in the minor requirements listed above have prerequisites, so be sure to consult the University Catalog or check with the Minor advisor.
- Students cannot graduate until they have either:
  a. satisfied the requirements for the minor or
  b. withdrawn from the minor by notifying CNRE Academic Programs office in 138 Cheatham and revised their DARS.

Peace Studies and Social Justice (PSSJ) Minor

Code	Title	Credits
Required Introduction		
Pathways Course		
PSVP 2044	Peace and Violence (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness)	3
Subtotal		3
Elective Courses (Must take at least 3 credits at the 3000-/4000-level)		
Select three credits from each of the areas:		12
A. Root Causes of Violence		
Pathways Courses		
GEOS 1034	Earths Natural Hazards (3 hours Pathways Concept 4 - Reasoning in the Natural Sciences and 3 hours Ethical Reasoning)	
HIST 1354	Conflict and Security in Modern East Asia (3 hours of Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness) [1]	
HIST/AFST/IS 3864	(3 hours Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness) [1]	
HIST 3114	(3 hours Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Ethical Reasoning) [1]	
HIST 3564	The Cold War (3 hours Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness) [1]	
PHIL 3314	Ethical Theory (3 hours Pathways Concept 2 - Critical Thinking in the Humanities and 3 hours Ethical Reasoning) [1]	
STS 3334	Energy and Society (3 hours Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness) [1]	

WGS 1824	Introduction to Womens and Gender Studies (3 hours Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness) [1]
B. Acts of Violence	
Pathways Courses	
CRIM 4474	Cyber Criminology (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Ethical Reasoning)
GEOG 1014	World Regions (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness)
HIST 3544	World War II (3 hours Pathways Concept 2 - Critical Thinking in the Humanities or Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Ethical Reasoning and Intercultural and Global Awareness)
PSCI/GEOG 2054	Introduction to World Politics (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness)
HIST 3054	The American Civil War (3 hours Pathways Concept 1 - Discourse (Advanced/Applied) or Pathways Concept 2 - Critical Thinking in the Humanities and 3 hours Intercultural and Global Awareness)
HIST 3654	Arab-Israeli Conflict (3 hours Pathways Concept 2 - Critical Thinking in the Humanities and 3 hours Intercultural and Global Awareness)
SOC 2004	Social Problems (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States and 3 hours Intercultural and Global Awareness)
Non-Pathways Courses	
CRIM 3414	Criminology
CRIM 4424	Juvenile Delinquency
GEOG/IS/PSCI 2034	Geography of Global Conflict
JUD/HIST/RLCL 3494	The Holocaust
PSCI 3564	Violent Political Change
PSVP 4444	Schools, Violence, and Justice
PSVP 4484	Hate Crimes
C. Strategies for Reducing Violence and Promoting Peace	
AAEC 1264	(3 hours Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness)
AAEC 3324	Environment and Sustainable Development Economics (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States and 3 hours Intercultural and Global Awareness)
BIT/MGT 2404	(3 hours Pathways Concept 5 - Quantitative and Computational Thinking (Foundational) and 3 hours Intercultural and Global Awareness)
HUM/RLCL 3204	Multicultural Communication (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and 3 hours Intercultural and Global Awareness)
HD 2014	Integrative Practices for Health, Wellbeing, and Resilience (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States and 3 hours Ethical Reasoning)
PHIL 4334	Jurisprudence (3 hours Pathways Concept 2 - Critical Thinking in the Humanities and 3 hours Ethical Reasoning)
SOC 2034	Diversity and Community Engagement (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States and 3 hours Intercultural and Global Awareness)
SOC 3314	Social Movements (3 hours Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States and 3 hours Intercultural and Global Awareness)
Non-Pathways Courses	
PSVP 2444	Conflict Resolution, Mediation and Peacebuilding
CRIM 3434	Systems of Justice
SOC 4404	Sociology of Law
D. Data and Information	
Pathways Courses	
ENGL 2634	Writing and Social Justice (3 hours Pathways Concept 1 - Discourse (Advanced/Applied) and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States and 3 hours Ethical Reasoning)
HD 3024	Community Analytics (3 hours Pathways Concept 5 - Quantitative and Computational Thinking (Advanced/Applied) and 3 hours Ethical Reasoning)
HIST/SOC/STS 2604	Introduction to Data in Social Context (3 hours Pathways Concept 5 - Quantitative and Computational Thinking (Foundational) and Pathways Concept 2 - Critical Thinking in the Humanities and 3 hours Ethical Reasoning and Intercultural and Global Awareness)
SOC/HD 2104	Quantitative Approaches to Community Research (3 hours Pathways Concept 5 - Quantitative and Computational Thinking (Foundational) or 3 hours Ethical Reasoning)
Subtotal	12
Required Capstone	
Non-Pathways Course	
PSVP 4104	Global Society, Violence and the Prospects for Peace 3
Subtotal	3
Total Credits	**18**

Graduation Requirements

Minimum GPA of 2.0 or higher is required for the minor.

Some courses on this checksheet may have prerequisites, please consult the Undergraduate Course Catalog.

1 Course must be taken for Critical Thinking in the Humanities credit.

Philosophy (PHIL) Minor

Code	Title	Credits
Required Minor Courses		
PHIL 1504	Critical Thinking	3
or PHIL 3505	Modern Logic and Its Development	
Select 6 hours of Philosophy courses at the 3000 or 4000 level		6
Select one of the following:		3
An additional Philosophy course at the 3000 or 4000 level		
PHIL 2115	Ancient Through Medieval Philosophy	
PHIL 2116	Ancient Through Medieval Philosophy	
PHIL 2125	History of Modern Philosophy	
PHIL 2126	History of Modern Philosophy	
Subtotal		12
Philosophy Elective Courses		
Select 6 hours of electives in Philosophy at any level		6
Subtotal		6
Total Credits		**18**

Code	Title	Credits
Minor and Electives		
PHIL 1204	Knowledge and Reality	3
PHIL 1304	Morality and Justice	3
PHIL 1504	Critical Thinking	3
PHIL 1604	How Science Works	3
PHIL 2115	Ancient Through Medieval Philosophy	3
PHIL 2125	History of Modern Philosophy	3
PHIL 2126	History of Modern Philosophy	3
PHIL 2304	Global Ethics	3
PHIL 2314	Philosophy of Sex, Gender, and Race	3
PHIL 3015	Political Theory	3
PHIL 3016	Political Theory	3

PHIL 4334	Jurisprudence	3
PHIL 4514	Special Topics in Logic	3
PHIL 4604	Philosophy of Biology	3
PHIL 4614	Philosophy of Science	3

Graduation Requirements

A minimum minor GPA of 2.0; According to Policy 11(c) all courses used to fulfill the requirements of the minor will be used to determine the minor GPA.

Philosophy, Politics, and Economics (PPE) Minor

Program Curriculum

Code	Title	Credits
I. Core Areas Elective Courses		
Select one course from each core area from the approved minor list.		
Philosophy [1]		3
Political Science		3
Economics		3
Subtotal		9
II. PPE Gateway Course		
PPE 2894	PPE Gateway Course [1]	3
Subtotal		3
III. Applied Areas Elective Course		
Select one course from the approved minor list		3
Subtotal		3
IV. PPE Capstone Course		
PPE 4884	PPE Capstone Course [1]	3
Subtotal		3
Total Credits		**18**

[1] These courses satisfy the following Pathways General Education core and integrated outcomes:

1. Core Areas Elective Courses, Philosophy - Critical Thinking in Humanities and Ethical Reasoning,
2. PPE 2894 PPE Gateway Course - Reasoning in the Social Sciences and Ethical Reasoning, and
3. PPE 4884 PPE Capstone Course - Advanced Discourse and Intercultural Global Awareness.

Please be aware that depending on major, course(s) completed to satisfy program degree core requirements may limit the use of specific course(s) listed on this minor from being completed to satisfy Pathways requirement(s).

Core Areas Elective Courses

Code	Title	Credits
Core Area 1: Philosophy		
Select one of the following:		
PHIL 1304	Morality and Justice	3
PHIL 2304	Global Ethics	3
PSCI/PHIL/PPE 3016	Political Theory	3
PHIL/PPE 3314	Ethical Theory	3
PHIL/PPE 4304	Political Philosophy	3

PHIL 4324	Business and Professional Ethics	3
PHIL 4334	Jurisprudence	3
PPE/PHIL/PSCI/ ECON 3884	Topics in Philosophy, Politics, and Economics	3
Core Area 2: Political Science		
Select one of the following:		3
PSCI 1014	Introduction to United States Government and Politics	3
or PSCI 1014H	Honors Introduction to United States Government and Politics	
or PSCI 2014	Introduction to Political Theory	
PSCI/PPE 2024	Research Methods in Political Science	3
PSCI/GEOG/IS 2054	Introduction to World Politics	3
PSCI/GEOG/IS 2064	The Global Economy and World Politics	3
PSCI/PHIL/PPE 3016	Political Theory	3
PSCI/UAP 3344	Global Environmental Issues: Interdisciplinary Perspectives	3
PSCI 3554	Comparative Political Economy	3
PSCI 3724	Poverty and Welfare Policy	3
PSCI 3744	Public Policy Analysis	3
PSCI 3764	Contemporary Democratic Theory	3
PSCI/IS 4054	Seminar in Global Political Economy	3
PSCI 4214	Senior Seminar in Political Behavior	3
PSCI 4724	Senior Seminar in Political Theory	3
PPE/PHIL/PSCI/ ECON 3884	Topics in Philosophy, Politics, and Economics	3
Core Area 3: Economics		
Select one of the following:		
AAEC 1005	Economics of the Food and Fiber System (micro)	3
ECON 1104	Economics of Gender	3
ECON 1204	Economics of Race	3
ECON/PPE 1214	Economic History of Diversity and Inclusion	3

MGT 3404	Principles of Management	3
MGT 3444	Multicultural Diversity in Organizations	3
MKTG 3504	Advertising	3
MGT 3614	Strategy and Competition Analytics	3
MGT 4084	Management Consulting	3
MKTG 4304	Marketing Communications	3
MGT 4314	International Management	3
MGT 4334	Ethical Leadership and Corporate Social Responsibility	3
MKTG 4554	Principles of Professional Selling	3
MKTG 4644	Marketing, Society and the Public Interest	3
MKTG 4704	International Marketing	3
PPE 4964	Field Work/Practicum	3
Applied Area 2: Engineering		
ENGE 1215 & ENGE 1216	Foundations of Engineering and Foundations of Engineering (2+2 credit hours)	4
ENGR 1814		3
ISE 2404	Deterministic Operations Research I	3
ISE 3004	Industrial Cost Control	3
ENGR 3124	Introduction to Green Engineering	3
ISE 3414	Probabilistic Operations Research	3
ISE 3614	Human Factors Engineering and Ergonomics	3
ISE 3624	Industrial Ergonomics	3
ISE 4004	Theory of Organization	3
ISE 4015	Management Systems Theory, Applications, and Design	3
ENGR 4134	Environmental Life Cycle Assessment	3
ISE 4304	Global Issues in Industrial Management	3
PPE 4964	Field Work/Practicum	3
Applied Area 3: Urban Affairs and Planning		
UAP 1024	Leadership, Service, and Public Problem Solving	3
GEOG/SPIA 2244	Sustainable Urbanization	3

UAP 3014	Urban Policy and Planning	3
UAP/PSCI 3344	Global Environmental Issues: Interdisciplinary Perspectives	3
UAP 3354	Introduction to Environmental Policy and Planning	3
UAP 4264	Environmental Ethics and Policy	3
UAP 4344	Law of Critical Environmental Areas	3
UAP 4754	Legal Foundations of Planning	3
PPE 4964	Field Work/Practicum	3
Applied Area 4: Geography		
GEOG 2034	Geography of Global Conflict	3
GEOG/PSCI/IS 2054	Introduction to World Politics	3
GEOG/PSCI/IS 2064	The Global Economy and World Politics	3
GEOG 2134	Geography of the Global Economy	3
GEOG 2214		3
GEOG/SPIA 2244	Sustainable Urbanization	3
GEOG 3104	Environmental Justice, Resources and Development	3
GEOG 3254	Geography of East Asia	3
GEOG 4204	Geography of Resources	3
GEOG 4764	International Development Policy and Planning	3
PPE 4964	Field Work/Practicum	3
Applied Area 5: Agriculture and Applied Economics		
AAEC 1264		3
AAEC 3024	Monetary and Global Issues in Applied Economics	3
AAEC 3204	International Agricultural Development and Trade	3
AAEC 3314	Environmental Law	3
AAEC 3324	Environment and Sustainable Development Economics	3
AAEC/ECON 4135	International Economics	3
AAEC 4314	Environmental Economic Analysis and Management	3
AAEC 4344	Sustainable Development Economics	3
AAEC 4814	Food and Health Economics	3
PPE 4964	Field Work/Practicum	3
Applied Area 6: Fish, Wildlife, Forest, and Environmental Conservation		
FREC 2004	Forest Ecosystems	3
FIW 2114	Principles of Fish and Wildlife Conservation	3
FREC 2124	Forests, Society & Climate	3
FREC 2554	Leadership for Global Sustainability	3
FREC 2784	Global Forest Sustainability	3
FIW 3414		3
FREC 4014	Natural Resources Economics	3
FIW 4244	Applied Epidemiology of Fish and Wildlife Diseases	3
FREC 4424	Forest Resources Economics and Management	3
FREC 4434	Natural Resource Policy	3
FIW 4464	Human Dimensions of Fisheries and Wildlife	3
FREC 4454	Urban and Community Forestry	3
PPE 4964	Field Work/Practicum	3

Graduation Requirements

Additional Requirements and Guidelines

1. Departmental prerequisites and corequisites for all courses must be satisfied. Please consult the University Catalog for the latest statement of these requirements.
2. Students are strongly advised to take one (elective) course in each of the three core areas of the PPE Minor before they take the PPE Gateway Course.
3. The PPE Gateway Course must be taken before the PPE Capstone Course, which is assumed to be the final course for fulfillment of the PPE Minor requirements.
4. At least one (core or applied area) elective course must be taken at the 3000-4000 level.
5. All courses for the PPE Minor must be taken A/F and be completed with a minimum GPA of 2.0.
6. According to Policy 11(c) all courses used to fulfill the requirements of the minor will be used to determine the minor GPA.
7. A minimum of 18 credit hours is required to graduate with a PPE Minor.

Physics (PHYS) Minor

Code	Title	Credits
Required Minor Courses		
PHYS 2305	Foundations of Physics	4
PHYS 2306	Foundations of Physics	4
PHYS 3324	Modern Physics	4
Subtotal		12
Select nine credits of the following:		9
PHYS 2504	Math Methods in Physics	
PHYS 3355	Intermediate Mechanics [1]	
PHYS 3405	Intermediate Electricity and Magnetism [2]	
PHYS 3406	Intermediate Electricity and Magnetism [3]	
PHYS 3655	Introduction to Astrophysics	
PHYS 3656	Introduction to Astrophysics	
PHYS 3704	Thermal Physics	
PHYS 4254	Quantum Information Technologies	
PHYS 4514	Introduction to Nuclear Physics	
PHYS 4524	Intro Particle Physics	
PHYS 4554	Introduction to Solid State Physics	
PHYS 4564	Polymer Physics	
PHYS 4574	Nanotechnology	
PHYS 4614	Optics	
PHYS 4654	Modern Cosmology	
PHYS 4664	Astroparticle Physics	
PHYS 4674	Introduction to General Relativity	
PHYS 4714	Introduction to Biophysics	
PHYS 4755	Introduction to Computational Physics	
PHYS 4774	Intro to Physics of Galaxies	
Subtotal		9
Total Credits		**21**

[1] Acceptable Substitution: PHYS 3355 may be substituted with AOE 3154 Astromechanics **or** ESM 3124 Dynamics II- Analytical and 3-D Motion.
[2] Acceptable Substitution: PHYS 3405 may be substituted with ECE 3105 Electromagnetic Fields.
[3] Acceptable Substitution: PHYS 3406 may be substituted with ECE 3106 Electromagnetic Fields.

Graduation Requirements

Minimum Hours and GPA Required for Graduation

The Minor in Physics requires the completion of 21 credit hours. A minimum overall and in-minor GPA of 2.0 is required for graduation. All physics courses attempted are used in the calculation of the in-minor GPA.

Prerequisites and Corequisites

Courses in this minor have prerequisites or corequisites. Please check with your advisor or consult the Undergraduate Course Catalog.

Plant Health Sciences (PHS) Minor

Code	Title	Credits
Entry Level Course		
Select one of the following:		3
ALS/BIOL 2404	Biotechnology in A Global Society	
HORT 2184	Plants, Places, and Cultures in a Global Context	
HORT 2234	Environmental Factors in Horticulture	
PPWS 2004	Mysterious Mushrooms, Malicious Molds	
PPWS 2104	Plants, Genes, and People	
FREC 2114	Ecology of Appalachian Forests	
Subtotal		3
Required Minor Courses		**10**
PPWS 4104	Plant Pathology	
ENT 4254	Insect Pest Management	
CSES 4344	Crop Physiology and Ecology	
Subtotal		10
Plant/Plant Pest Course		
Select one of the following:		3
BIOL 3204	Plant Taxonomy	
CSES 4144	Plant Breeding and Genetics	
PPWS 2754	Weeds That Shape Our World	
PPWS/ENT 4264	Pesticide Usage	
PPWS 4604	Biological Invasions	
Subtotal		3
Elective Courses		
Select one of the following: [1]		2-3
CSES 3114	Soils	
or GEOS 3614	Soils	
ENSC/BIOL 4164	Environmental Microbiology	
ENT/BIOL 3014	Insect Biology	
ENT/BIOL 3024	Insect Biology Laboratory	
FREC 4514	Forest and Tree Pest Management	
HORT/BIOL 2304	Plant Biology	
PPWS 4114	Microbial Forensics and Biosecurity	
Subtotal		2-3
Total Credits		**18-19**

[1] Can select course from Elective Course List or can take an additional course from Plant/Plant Pest Course list, but may not repeat a course for credit in both sections

Graduation Requirements

Notes:

- Minimum credits to complete minor = 18
- Minimum GPA requirement of 2.0 for courses taken towards the minor
- Some courses listed for this minor may have pre-/co-requisites, please consult the University Course Catalog, or check with your advisor.

Political Science (PSCI) Minor

Code	Title	Credits
Required Minor Courses		
PSCI 1014	Introduction to United States Government and Politics	3
PSCI 1024	Comp Gov & Politics	3
Select one of the following:		3
PSCI 2014	Introduction to Political Theory	
PSCI 2054	Introduction to World Politics	
PSCI 2064	The Global Economy and World Politics	
Subtotal		9
POLITICAL SCIENCE ELECTIVES		
Select nine credit hours of Political Science electives [1]		9
Subtotal		9
Total Credits		**18**

[1] Limit on Repeatable Courses: No more than six credit hours in the following courses may contribute toward the 18 hours required by the minor: PSCI 4754 Internship Program, PSCI 4994 Undergraduate Research, and PSCI 4974 Independent Study.

Graduation Requirements

- PSCI 1034 Introduction to International Studies and Political Science: may not contribute toward the 18 credit hours required by the minor.
- PSCI 3004 Professionalism and Careers in Political Science and International Studies: may not contribute toward the 18 credit hours required by the minor.

Minimum Hours Requirement: A minimum of 18 hours is required for the minor. A minimum of 6 credit hours must be at the 3000 or 4000 academic level.

GPA: A 2.0 GPA is required for the minor. All courses used to fulfill the requirements of the minor will be used to determine the minor GPA.

Please Note: Students with a major in International Studies may not obtain a minor in Political Science.

Regarding Double Majors and Minors: The Department of Political Science offers majors in:

- Political Science
- International Studies
- International Relations
- National Security and Foreign Affairs, and
- International Public Policy

as well as minors in:

- Political Science
- International Studies
- International Relations
- National Security and Foreign Affairs, and
- International Public Policy.

Courses for the majors and minors overlap significantly. Therefore, students may not pursue multiple majors and/or minors within the department.

Popular Culture (POPC) Minor

The minor in Popular Culture requires the completion of 18 credit hours, including at least 9 hours at the 3000-level or above, as follows. All courses listed are three-credit-hour courses.

Code	Title	Credits
Required Minor Courses		
HUM 1504	Introduction to Popular Culture	3
HUM/RLCL 2504	Introduction to American Studies	3
Subtotal		6
Elective Courses		
Select at least 12 credit hours from the following: [1]		12
AFST 2754	Sports and the Afro-American Experience	
AFST 2774	Black Aesthetics	
APS 2434	The Cultural Politics of Music in Appalachia	
CINE 2054	Introduction to Cinema	
ENGL 1624	Introduction to Detective Fiction	
ENGL 1654	Introduction to Science Fiction and Fantasy	
ENGL 3514	Ethnic Literature for Children	
ENGL 3524	Literature for Children	
ENGL/CINE 3544	Literature and Cinema	
HIST 3744	Social History of Film [2]	
HTM 3484	Socio-Cultural Impacts of Tourism	
HUM 3034	Theories of Popular Culture	
RLCL 2124	Religion in American Life	
SOC 4114	The Sociology of Popular Music	
Subtotal		12
Total Credits		**18**

1 At least **two** of which must be the 3000-4000 level.
2 This topics course may be repeated for credit when the topic varies.

The following topics courses may be used when the topic pertains to popular, as approved by the minor coordinator.

Code	Title	Credits
AINS 4004	Topics in American Indian Studies [1]	3
APS/HUM 4414	Issues in Appalachian Studies [1]	3
HUM 4104	Explorations in Advanced Humanities Topics [1]	3
RLCL 4324	Topics in Religion and Culture [1]	3
WGS 3004	Topics in Feminism [1]	3

1 This topics course may be repeated for credit when the topic varies.

Graduation Requirements

Special offerings, including, Independent Study, Undergraduate Research, and Study Abroad, and relevant courses in this or other departments, may be uses to fulfill requirements of up to six (6) credits for the minor. Permission to count such courses must be granted by the minor coordinator. Courses taken to fulfill the requirements of the minor cannot be taken as pass/fail unless that is that is only way the course is taught. Students should check the course catalogue for the latest information on course pre-requisites.

To graduate with a minor in Popular Culture Studies, a student must have an over-all GPA of 2.0 and an in-minor GPA of 2.0 from all of the courses taken from the minor check-sheet.

Students who wish to complete this minor or want more information should consult with minor coordinator, Dr. Nicole Ni, 205 Major Williams Hall, (540) 231-1823, nizhange@vt.edu (satterwhite@vt.edu).

Professional and Technical Writing (PTW) Minor

Code	Title	Credits
The Minor in Professional and Technical Writing requires 18 hours distributed as follows: [1]		
Foundational Courses		
ENGL 2844	Introduction to Professional and Technical Writing	3
ENGL 3844	Writing and Digital Media	3
Subtotal		6
Elective Courses		
Select four of the following: [2]		12
ENGL 3474	Rhetoric for Professional Writers	
ENGL 3804	Technical Editing and Style	
ENGL 3814	Creating User Documentation	
ENGL 3824	Visual Rhetoric and Document Design	
ENGL 3834	Intercultural Issues in Professional Writing	
ENGL 4474	Special Topics in Professional and Technical Writing	
ENGL 4804	Grant Proposals and Reports	
ENGL 4814	Developing Online Content	
ENGL 4824	Science Writing	

ENGL 4964	Field Study (max 3 credit hours) [3]	
JMC 4144	Magazine Writing	
Subtotal		12
Total Credits		**18**

[1] All courses on listed on this checksheet (except ENGL 4964 Field Study) have as a prerequisite ENGL 1106 First-Year Writing or COMM 1016 Communication Skills.
[2] At least one of which (3 hours) must be at the 4000-level.
[3] ENGL 4964 is offered only as a Pass/Fail course. The course may count for the Technical and Scientific Communication Minor when taken Pass/Fail.

Graduation Requirements

1. Students declaring the minor who have already taken ENGL 3764 Technical Writing or ENGL 3774 Business Writing and who do not need that course to fulfill a major requirement may substitute that course for ENGL 2844.
2. To graduate with a Minor in Professional and Technical Writing, students must complete all courses comprising the minor with a GPA of 2.0 or better.
3. Minimum credits to complete minor: 18.

Professional Sales (PRFS) Minor

Code	Title	Credits
Required Minor Courses		
MKTG 3104	Marketing Management	3
MKTG 4054	Sales Technology	3
MKTG 4204	Consumer Behavior	3
MKTG 4454	Sales Force Management	3
MKTG 4554	Principles of Professional Selling	3
MKTG 4774	Advanced Professional Selling	3
Subtotal		18
Elective Courses		
Select one of the following:		3
MKTG 3134	Personal Well-being and Professional Success	
MKTG 3164	Introduction to Digital Marketing Strategy	
MKTG 4114	Introduction to AI in Marketing	
MKTG 4164	Social Media and Content Marketing	
MKTG 4254	Product and Price Management	
MKTG 4264	Analytics for Marketing	
MKTG 4354	Marketing Channels and Logistics	
MKTG 4404	Field Practicum in Marketing (by arrangement only)	
MKTG 4604	Retail Management	
MKTG 4974	Independent Study (by arrangement only; must be sales-focused)	
CHE/MKTG 4144	Business and Marketing Strategies for the Process Industries	
CMST 3064	Persuasion	
CMST 3124	Interpersonal Communication	
Subtotal		3
Total Credits		**21**

Graduation Requirements

Students must complete the minor with at least a 2.00 GPA in the **21 credit hours** required for the minor. If these criteria are met, the minor will be noted on the transcript.

Application Eligibility

Application to the minor in Professional Sales is open to all university students, with the exception of Marketing majors, with at least a 2.5 overall GPA at Virginia Tech.

Students can apply for the Professional Sales minor at http://pampl.in/addminor

Pre-requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Major and Minor Courses

No more than 50% of the graded course credits required for the Minor in Professional Sales may be double-counted by a student also enrolled in a non-marketing business degree.

Property Management (PM) Minor

Code	Title	Credits
Required Minor Courses		
PM 2664	Introduction to Property Management	3
PM 3674	Property Management Operations	3
PM 3684	Sustainable Property Management	3
Subtotal		9
Select at least 9 credit hours of the following:		9
AHRM 2404	Consumer Rights	
CONS 2304	Consumer and Family Finances	
RED 2644	Housing and the Consumer	
PM 2684	Marketing and Leasing Residential Properties	
PM 3634	Managing Affordable and Specialized Housing	
PM 3954	Study Abroad	
RED 4604	Environmental and Sustainability Issues in Housing	
PM 4644	Advanced Property and Asset Management	
RED 4664	Universal Design	
PM 4684	Leasing Commercial Properties	
PM 4964	Field Work/Practicum	
PM 4744	Housing Challenges and Policies in the United States (*)	
Subtotal		9
Total Credits		**18**

* RELC majors must take PM 4744 for their 21 credit hour restricted electives requirement.

Graduation Requirements

Students majoring in Residential Environments and Design must select at least 9 credits from the electives list that are not required for the Residential Environments and Design major.

UAP 2004 Principles of Real Estate is an additional elective option for RED students only.

6 hours must be completed at the 3000 level or above.

The minimum GPA for the minor is 2.0.

A minimum of 18 hours is required to graduate with a Property Management minor.

Psychology (PSYC) Minor

Code	Title	Credits
Introductory Requirements		
PSYC 1004	Introductory Psychology	3
PSYC 1094	Principles of Psychological Research [1]	3
Subtotal		6
Foundations of Psychology

Subtotal		2
Total Credits		**20**

1. These courses have prerequisites or corequisites. Students are required to double check course prerequisites and corequisites. Please see your advisor or consult the Undergraduate Course Catalog for more information.
2. This course can only count once. If taken in set I (Required courses), it cannot be counted as an elective from set III.
3. This course can only count once. If taken in set II, it cannot be counted as an elective from set IV.

Graduation Requirements

Credit hours

The Minor in Quantum Information Science and Engineering requires a minimum of 20 credit hours.

Minimum GPA

Must have a 2.0 or higher for all courses used to complete this minor.

Real Estate (REAL) Minor

Code	Title	Credits
A. Required Minor Courses		
ECON 2005	Principles of Economics	3
REAL 1014	Careers in Real Estate	1
REAL/UAP 2004	Principles of Real Estate	3
REAL 2034	Real Estate Data Analysis [1]	3
REAL 3044	Financing Real Estate Projects	3
REAL 4754	Real Estate Law	3
Subtotal		16

B. Additional Courses		
ACIS 2115	Principles of Accounting	3
PM 3674	Property Management Operations	3
or PM 4684	Leasing Commercial Properties	
REAL 3034	Real Estate Market Analysis	3
or MKTG 4734	Real Estate Marketing	
SPIA/GEOG 2244	Sustainable Urbanization	3
or SPIA 4454	Future of Cities	
Subtotal		12
Total Credits		**28**

[1] BIT 2405 Introduction to Business Statistics, Analytics, and Modeling is an approved substitute for REAL 2034 for all Pamplin majors minoring in Real Estate.

Graduation Requirements

Including all pre-requisites, students need a MINIMUM of 2 academic years or 4 semesters to complete the Real Estate minor. Total Credits Required: 28

Real Estate Minor

The Real Estate minor is open to students in all colleges of the University and draws its courses from several departments and colleges within the University. Advisement for the minor will be conducted by an Academic Advisor for the Blackwood Department of Real Estate. For more information, visit www.realestate.vt.edu (http://www.realestate.vt.edu/) or e-mail REALadvisor@vt.edu.

Admission Requirements

Any student (including first-year and transfer) is eligible to apply for the Real Estate minor. Students pursuing the BS Real Estate or BSBUF, Finance and Real Estate major are not eligible to pursue the Real Estate minor.

Students can apply for the Real Estate minor at http://pampl.in/addminor

Satisfactory Progress

The student must maintain a GPA of at least 2.5 for all courses in the minor.

Student Responsibility

Including all pre-requisites, students need a minimum of 2 academic years or 4 semesters to complete the Real Estate minor. It is the responsibility of the student to plan their courses and no course waivers will be processed. The only force adds that will be processed are for juniors, admitted to the minor, who require REAL 1014 Careers in Real Estate as a pre-requisite to register for upper-level courses in the minor.

Pre-requisites

Some courses listed on this checksheet have pre-requisites; please consult the Virginia Tech Undergraduate Catalog or check with your academic advisor for the current pre-requisite requirements.

Certification

In addition to fulfilling the requirements of their individual majors, students must complete the 28 credit hours listed with at least a grade of C- or higher REQUIRED courses and maintain a GPA of at least 2.5 for all courses in the minor. If these criteria are met, the minor will be noted on the student's transcript.

Questions

For additional information, contact an Academic Advisor for the Department of Real Estate: REALAdvisor@vt.edu.

Religion (REL) Minor

Code	Title	Credits
1000-Level or Above		
Select 6 credits (2 courses) of the following or of the lists below:		6
RLCL 1004	Introduction to Religion and Culture	
RLCL 1014	World Religions

RLCL/WGS/ AFST 2204	Race and Gender in Religion and Culture [1]	
RLCL 2324	Islam [1]	
RLCL/JUD 2414	Hebrew Bible/Old Testament	
RLCL 2424	New Testament	
RLCL/CLA/ ENGL 2444	Greek and Roman Myth	
RLCL/STS 2464	Religion and Science	
RLCL/IS 2474	Religion and Violence	
RLCL 2484	Religion and Politics	
Subtotal		6
3000- or 4000 Level		
Select 6 credits (2 courses) of the following:		6
RLCL/WGS 3014	Women and Gender in Islam [1]	
RLCL/ENGL 3024	Religion and Literature	
RLCL 3214	Religion and Culture in India [1]	
RLCL 3224	Religion and Culture in China and Japan [1]	
RLCL/JUD 3404	Torah and Tradition	
RLCL 3414	Jesus in Earliest Christianity	
RLCL 3424	Orthodoxy and Heresy in Early Christianity	

RLCL/JUD/ HIST 3494	The Holocaust	
RLCL/HIST 3504	The Age of The Crusades	
RLCL/JUD/ PSCI 3544	The State of Israel: A Political History	
RLCL/IS/ARBC 3644	Religion in the Middle East	
RLCL 4014	Religion and the Public Sphere	
RLCL/SOC 4024	Sociology of Religion	
RLCL 4324	Topics in Religion and Culture	
Subtotal		6
Total Credits		**18**

[1] At least 3 credits (one course) must be from RLCL courses marked with a [1] in the lists above.

Graduation Requirements

Graduation Requirements: The minor in Religion requires the completion of 18 credit hours (6 courses) from the above lists. To graduate with a minor in Religion, a student must have an over-all GPA of 2.0 and an in-minor GPA of 2.0 from all of the courses taken from the minor check-sheet

For more information, contact the minor coordinator, Dr. Shaily Patel, at 231-8456, or shailyp@vt.edu.

Residential Environments (RENV) Minor

Code	Title	Credits
Required Minor Courses		
RED 1604	Introduction to Residential Design	3
RED 2644	Housing and the Consumer	3
RED 3644	American Housing	3
RED 4604	Environmental and Sustainability Issues in Housing	3
Select two of the following (minimum of 6 credits):		6
RED 2614	Residential Construction	
RED 4224	Historic Preservation of Residential Properties	
RED 4664	Universal Design	
CONS 2304	Consumer and Family Finances	
AHRM 2404	Consumer Rights	
PM 2664	Introduction to Property Management	
PM 3634	Managing Affordable and Specialized Housing	
PM 4744	Housing Challenges and Policies in the United States	
RED 4964	Field Work/Practicum (Housing focus only, max 3 credit hours)	
RED 3954	Study Abroad (max 3 credit hours)	
SBIO 3324	Green Building Systems	
Total Credits		**18**

Graduation Requirements

Minor in Residential Environments not available to students majoring in Property Management.

A minimum of 18 hours is required to graduate with a Residential Environments minor.

An overall GPA of 2.0 or higher must be attained in the courses counting toward the minor.

Russian (RUS) Minor

Code	Title	Credits
Required Minor Courses		
RUS 2105	Intermediate Russian	3
RUS 2106	Intermediate Russian	3
or RUS 2114	Accelerated Intermediate Russian	
RUS 3105	Grammar, Composition and Conversation	3
RUS 3106	Grammar, Composition and Conversation	3
RUS 4204	Topics in Russian Culture and Civilization	3
or RUS 4304	Studies in Russian Literature	
Select one of the following courses taught in English:		3
RUS 2734	Introduction to Russian Culture and Civilization	
RUS 3304	Survey of Nineteenth-Century Russian Literature in Translation	
RUS 3314	Survey of Twentieth-Century Russian Literature in Translation	
RUS/ENGL 3424	Topics in Russian Literature in English	
RUS 3434	The Works of Vladimir Nabokov	
Total Credits		**18**

Graduation Requirements

Total Hours Required: 18 credits

Notes: A minimum grade of "C" must be earned in each course completed for the Russian minor. A minimum in-minor GPA of 2.0 is required. All courses used to complete the minor will count toward GPA.

- Courses used to fulfill minor requirements may not be taken Pass/ Fail.
- A form titled "Authorization to Take Courses Elsewhere" must be filled out and signed by the student, the Chair of the Department, and the Director of the Office of Global Education before the student departs on a study abroad program.
- Some courses in the minor requirements listed above have prerequisites, so be sure to consult the University Catalog or check with your advisor.

Russian Area Studies (RAS) Minor

Code	Title	Credits
Required Minor Courses		
1. Russian History		
HIST 3604	Russia to Peter the Great	3
HIST 3614	Imperial Russia	3
HIST 3644	Twentieth-Century Russia	3

Subtotal		9
2. Russian Politics		
Select one of the following:		3
PSCI 3524	Politics of Post-Communist Systems	
PSCI/IS 3626	US-Russia Foreign Policies	
PSCI/GIA 5424	Communist and Post-communist Systems	
Subtotal		3
3. Russian Literature and Culture		
Select one of the following:		3
RUS 2734	Introduction to Russian Culture and Civilization	
RUS/ENGL 3424	Topics in Russian Literature in English	
HIST 3684		
Subtotal		3
4. Capstone Research Project		
HIST 4994	Undergraduate Research	3
or PSCI 4994	Undergraduate Research	
or RUS 4994	Undergraduate Research	
Subtotal		3
Total Credits		**18**

Graduation Requirements

Minimum of 18 semester hours to complete minor, including a capstone research project submitted to the coordinator of minor upon completion.

Capstone research projects include but are not limited to: 20-page thesis, video or audio documentary, web site or other digital project. A public presentation or publication of the capstone research is recommended. Projects should use Russian sources whenever possible.

Required GPA: 2.0. All courses taken from the list of approved Russian studies courses count in the computation of the minor GPA.

Some courses listed on this checksheet may have prerequisites, please consult the University Course Catalog or check with your advisor.

Science, Technology & Law (STL) Minor

Subtotal		12
Total Credits		**24**

Graduation Requirements

The minor in Science, Technology, and Society consists of 18 credit hours. A minimum of 9 hours must be at the 3000 or 4000 level. No more than 3 hours total may be Independent Study; no more than 3 hours may be Internship. A minimum GPA of 2.0 in all courses taken to fulfill the minor is required. No more than 50% of the graded course credits required for Minor: Science, Technology, and Society may be double-counted in a student's major.

Smart and Sustainable Cities (SSC) Minor

Code	Title	Credits
SPIA 2004	Introduction to Urban Analytics	3
GEOG/SPIA 2244	Sustainable Urbanization	3
SPIA 2554	Collaborative Policy-Making and Planning	3
UAP 3024	Urban and Regional Analysis	3
SPIA 3554	Transdisciplinary Problem Solving for Social Issues	3
SPIA 4454	Future of Cities	3
Total Credits		**18**

Graduation Requirements

In-minor GPA: Students must have a 2.0 or above in-minor GPA to complete the SSC minor. All courses listed below are used in the computation of the in-minor GPA.

Intra-SPIA Program majoring and minoring: No more than 50% of the graded course credits required for the Minor in Smart and Sustainable Cities may be double-counted by a student also enrolling in a major under the Bachelor of Arts in Public and Urban Affairs.

Prerequisite Statement: Some courses listed on this checksheet have prerequisites. Be sure to consult the University Catalog and/or check with your advisor.

Sociology (SOC) Minor

Any student enrolled at Virginia Tech can minor in sociology.

Courses taken to fulfill the requirements of the sociology minor also can be used to fulfill the requirements of the Pathways to General Education Curriculum.

Courses taken to fulfill the requirements of the minor cannot be taken pass-fail. Courses with a letter grade of "F" do not count toward the minor requirements.

Sociology courses taken prior to declaring a minor in sociology can count toward meeting the requirements of the minor, including no more than 6 hours of transfer credits in sociology.

GPA Requirement: A minimum of 2.0 GPA in all sociology courses that are taken to fulfill the requirements of the sociology minor. All courses taken to fulfill the requirements of the sociology minor are considered in the calculation of the minor GPA.

Declaring a Sociology Minor

Obtain a Minor Checksheet from the Department of Sociology main office, 560 McBryde Hall.

Complete a **request to change major/minor form** and give it to the staff in the sociology office.

In order to have your minor in sociology processed for the Registrar's records, it is recommended that you submit this form no later than the semester **before** your last semester when you will be graduating. It is not necessary that you complete the 18 hours required for the minor before you submit the form; however, the earlier you submit the form the easier it will be for your advisor to check your DARS form and confirm that the minor requirements have been met. Graduating seniors should refer to the timetable for the last date that the form can be submitted prior to graduation.

Minor Advisor: Meeting with the sociology advisor is not required but highly recommended. Contact the Sociology Department, 560 McBryde, 540-231-8971.

Code	Title	Credits
Required Minor Courses		
SOC 1004	Introductory Sociology	3
Subtotal		3
Sociology Elective Courses		
Select 15 hours of the following:		
1000-2000 SOC courses. None required. No more than 6 hours.		
3000-4000 SOC courses. Minimum of 9 hours.		
Subtotal		15
Total Credits		**18**

Graduation Requirements

Number of Credits in Sociology Required for the Minor: 18 hours

No more than 50% of credits taken toward the minor can double count toward a declared major.

Courses taken to fulfill the requirements of the sociology minor can also be used to fulfill the requirements of the Pathways to General Education Curriculum.

Courses taken to fulfill the requirements of the minor cannot be taken pass-fail. Courses with a letter grade of "F" do not count toward the minor requirements.

Sociology courses taken prior to declaring a minor in sociology can count toward meeting the requirements of the minor, including no more than 6 hours of transfer credits in sociology.

GPA Requirement: A minimum GPA of 2.0 in all sociology courses that are taken to fulfill the requirements of the sociology minor. All courses taken to fulfill the requirements of the sociology minor are considered in the calculation of the minor GPA.

Spanish (SPAN) Minor

Code	Title	Credits
Required Minor Courses		
At least 12 hours of the 18 hours required for the minor must be at the 3000 level or above.		
SPAN 2105	Intermediate Spanish [1]	3
SPAN 2106	Intermediate Spanish [1]	3
or SPAN 2114	Accelerated Intermediate Spanish	
SPAN 3105	Grammar, Composition and Conversation [1,2]	3
SPAN 3106	Grammar, Composition and Conversation [1,2]	3
SPAN 3304	Introduction to Hispanic Literature [2]	3
Subtotal		15
Select one of the following:		3
SPAN 3404	Early Peninsular Culture and Literature [2]	
SPAN 3414	Topics in Modern Cultures of Spain [2]	
SPAN 3444	Topics in Early Spanish American Cultures [2]	
SPAN 3464	Topics in Modern Mexican and Central American Cultures [2]	
SPAN 3474	Topics in Modern Hispanic Caribbean Cultures [2]	
SPAN 3484	Topics in Modern Andean and Southern Cone Cultures [2]	
SPAN 3494	Introduction to Hispanic Linguistics [2]	
SPAN 3514	Spanish for Medical Professions [2]	
SPAN 3524	Introduction to Spanish Translation	
SPAN 3534	Spanish for Business Professions [2]	
SPAN 3544	Sounds of Spanish [2]	
SPAN 3554	Teaching Spanish	
SPAN 3564	Community through Service: Latino NRV [2]	
SPAN 3574	Spanish for Legal Professions	
Subtotal		3
Total Credits		**18**

1. Students who place out of SPAN 2105, SPAN 2106, SPAN 3105 and/or SPAN 3106 should take other Spanish courses at the 3000 or 4000 level to satisfy those credit requirements.
2. Courses may count toward Pathways, depending on students' enrollment date at Virginia Tech.

Graduation Requirements

Students must earn 18 SPAN credits regardless of initial course placement. If you have AP or IB Spanish credit, see your Spanish Advisor.

Additional Information

- A minimum grade of "C" must be earned in each course completed for the Spanish minor. A minimum in-minor GPA of 2.0 is required. Only courses listed on this checksheet or approved substitutions are to be included in the Spanish minor GPA. Courses for the major, minor, or Curriculum for Liberal Education cannot be taken Pass/Fail (exception: SPAN 3125 & SPAN 3126).
- AP exam credit or IB diploma credit may possibly be used to satisfy certain requirements for the minor; please see your Spanish Advisor as soon as possible to make these substitutions.
- Priority is given to Spanish majors and minors for registration in Spanish courses.

Transfer Credit

- Students may transfer no more than 18 of the last 45 cr. of coursework. Study Abroad credits fall under this rule if they are not VT-sponsored study abroad programs.
- At least 25% of the 120 hours required for the degree and 25% of the 18 hours required for the minor must be completed at VT. For a Spanish minor, that is at least 5 credits (2 classes, essentially).
- A form titled "Authorization to Take Courses Elsewhere" must be filled out and signed by the student, the student's Spanish Advisor, and the Director of the Office of Education Abroad before the student departs on the study abroad program.
- A maximum of 50% of the required credits for a degree program may be earned at a two-year college.

Statistics (STAT) Minor

Code	Title	Credits
Required Minor Courses		
Section I. Statistics Sequence		
Complete one statistics sequence by selecting one course from both Ia and Ib:		6
a. First Course:		
STAT 3005	Statistical Methods	
STAT 3615	Biological Statistics [1]	
STAT 4705	Probability and Statistics for Engineers	
CMDA 2005	Integrated Quantitative Sciences [2]	
b. Second Course:		
STAT 3006	Statistical Methods	
STAT 3616	Biological Statistics	
STAT 4706	Probability and Statistics for Engineers	
CMDA 2006	Integrated Quantitative Sciences [2]	
Subtotal		6
Section II.		
Select one of the following:		3
STAT 4204	Experimental Designs [3]	
STAT 4214	Methods of Regression Analysis [3]	
Subtotal		3
Section III.		
Select at least four of the following:		12
STAT/CMDA 3274	Introduction to Sports Analytics Research	
STAT 3504	Nonparametric Statistics	
STAT/CMDA/ CS 3654	Introductory Data Analytics and Visualization	
STAT 4004	Methods of Statistical Computing	
STAT 4204	Experimental Designs	
STAT 4214	Methods of Regression Analysis	

STAT/CMDA 4274	Sports Analytics Statistical Research	
STAT 4364	Introduction to Statistical Genomics	
STAT 4444	Applied Bayesian Statistics	
STAT 4504	Applied Multivariate Analysis	
STAT 4514	Introduction to Categorical Data Analysis	
STAT 4524	Sample Survey Methods	
STAT 4534	Applied Statistical Time Series Analysis	
STAT/CMDA/CS 4654	Intermediate Data Analytics and Machine Learning	
STAT/CMDA 4664	Computational Intensive Stochastic Modleing	
STAT 4744	Deep Learning	
STAT/AAEC 4804	Elementary Econometrics [4]	
ISE 4404	Statistical Quality Control	
MATH 4454	Applied Mathematical Modeling	
Subtotal		12
Total Credits		**21**

1 If a student completed STAT 3604 prior to becoming a minor, it may replace STAT 3615.
2 If CMDA 2005-CMDA 2006 is chosen, the total hours to complete the minor will increase to 27.
3 If STAT 4204 or STAT 4214 is taken to complete section II, it cannot also satisfy section III.
4 For students completing a major or minor in Economics. ECON 4304 Introduction to Economic Methods can be substituted for STAT 4804.

Graduation Requirements

Prerequisites and Course Duplications:

Some courses listed on this checksheet may have prerequisites: please consult the Undergraduate Course Catalog or check with your advisor for more information. Students are also required to check the duplicate course list.

Course Substitutions and Comments:

1. If a student completed STAT 3604 prior to becoming a minor, it may replace STAT 3615. Also, note prerequisite courses for Section III.

2. For students completing a major or minor in Economics. ECON 4304 Introduction to Econometric Methods can be substituted for STAT 4804.

Satisfactory Progress

A minor GPA of 2.0 or higher must be attained in the courses, counting toward the minor.

Strategic Communications (SCOM) Minor

This minor exposes students to core Pathways learning outcomes and knowledge about how strategic communication works in multiple non-communication industries such as business, sciences, and engineering. Some courses listed on this checksheet have prerequisites. Please consult the University Course Catalog, or check with your adviser.

Code	Title	Credits
I. Foundational Pathways Courses		
COMM 1016	Communication Skills (Pathways Concept 1 - Discourse ; Integrated Outcome: Ethical Reasoning) [1]	3
or COMM 2004	Public Speaking	
PR 2044	Principles of Public Relations (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrated Outcome: Ethical Reasoning) [1]	3
AHRM 1014	Design and Art for Consumers (Pathways Concept 6 - Critique and Practice in Design and the Arts ; Integrated Outcome: Intercultural and Global Awareness) [1]	3
ACIS 1004	Accounting Foundations (Pathways Concept 5 - Quantitative and Computational Thinking ; Integrated Outcome: Ethical Reasoning) [1, 2]	3
Subtotal		12
II. Upper-Level Elective Courses		
Select one of the following:		3
CMST 3064	Persuasion	
CMST 3134	Public Advocacy	
CMST 3214	Professional Communication	
COMM 4024	Communication Law	
FIN 4014	Cyberlaw and Policy (Pathways Concept 3 - Reasoning in the Social Sciences ; Integrated Outcome: Ethical Reasoning) [1]	
HTM 3424	Event Management (Pathways Concept 6 - Critique and Practice in Design and the Arts (design); Integrated Outcome: Ethical Reasoning) [1]	
MGT 3444	Multicultural Diversity in Organizations (Pathways Concept 3 - Reasoning in the Social Sciences and Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States ; Integrated Outcome: Intercultural and Global Awareness) [1]	
MN 4005	Leadership and Management/Ethics (Core Concept 3 Reasoning in the Social Sciences; Integrated Outcome: Intercultural and Global Awareness) [1]	
PR 3014	Public Relations Cases	
PR 3324	Corporate Communication	
PR 3334	Public Relations and Corporate Social Responsibility	
PR 4164	Public Relations Administration	
PR 4364	Crisis Communication and Issue Management	
Subtotal		3
III. Communication Capstone		
PR 4404	Strategic Communication Capstone [3]	3
Subtotal		3
Total Credits		**18**

1 Pathways General Education Course. If you are completing this minor to satisfy Pathways General Education requirements, please reference the core and/or integrated outcome(s) satisfied by each course when you select courses.
2 ACIS 2115 Principles of Accounting may be substituted for ACIS 1004 Accounting Foundations. ACIS 2115 Principles of Accounting is not approved to satisfy Pathways General Education requirements.

[3] Required of all minors.

Graduation Requirements

Minimum credits to Complete the minor: 18

GPA Requirement: A GPA of 2.0 or higher is required in the minor. The GPA is based on all courses a student has completed in the strategic communication minor.

Minor Requirement: All minors must take at least 6 hours of 3000 or 4000 coursework

Sustainable Biomaterials (SBIO) Minor

Minimum credit hours required for completion of minor is 18 with at least nine (9) at the 3000 or 4000 level as follows:

Code	Title	Credits
Required Minor Courses		
SBIO 1234	Introduction to Wood, Design and Craftmanship	3
SBIO 2124	Structure and Properties of Sustainable Biomaterials	3
Subtotal		6
Elective Courses		
Select 12 credit hours of the following: [1]		12
SBIO 2614	Introduction to Forest Products Marketing	
SBIO 2784	Global Forest Sustainability	
SBIO 3004	Sustainable Nature-Based Enterprises	
SBIO 3314	Mechanics of Sustainable Biomaterials and Packaging	
SBIO 3324	Green Building Systems	
SBIO 3434	Chemistry and Conversion of Sustainable Biomaterials	
SBIO 3444	Sustainable Biomaterials and Bioenergy	
SBIO 3454	Society, Sustainability Biomaterials and Energy	
SBIO 3464	Sustainable Operations Management	
SBIO 3524	Manufacture of Sustainable Biomaterials for Structures	
SBIO 3554	Sustainable Biomaterials Enterprises	
SBIO 4314	Design of Wood Structures	
SBIO 4444	Plant Polymers & Biocomposites	
SBIO 4714	Performance of Sustainable Biomaterials in Buildings	
Subtotal		12
Total Credits		**18**

[1] At least nine credit hours at the 3000 or 4000 level.

All courses must be taken on the letter grade (A/F) option and a minimum GPA of 2.0 is required for all courses taken in the minor. Some courses required for this minor have prerequisites. Please refer to Undergraduate Course Catalog or consult your advisor for information about prerequisite requirements.

Systems Biology (SYSB) Minor

Code	Title	Credits
Requried Minor Courses		
SYSB 2024	Fundamentals of Systems Biology	3
SYSB 2034	Mathematical Methods in Systems Biology	3
or MATH 2214	Introduction to Differential Equations	
SYSB 3035	Genomics and Bioinformatics	4
SYSB 3115	Network Dynamics and Cell Physiology	4
Subtotal		14
Elective Courses		
Select four credits from the list of courses below:		4
SYSB 3036	Genomics and Bioinformatics	
or CS 3824	Introduction to Computational Biology and Bioinformatics	
or CMDA 3654	Introductory Data Analytics and Visualization	
or STAT 4364	Introduction to Statistical Genomics	
SYSB 3116	Network Dynamics and Cell Physiology	
or CS 4214	Simulation and Modeling	
or CMDA 46(	Intermediate Topics in Mathematical Modeling	
or CMDA 46(	Computational Intensive Stochastic Modeling	
SYSB 4114	Applied Models of Gene Regulatory Networks	
SYSB 4224	Big Data Analysis Methods in Systems Biology (Choose at least four credits from the following list of electives)	
Subtotal		4
Total Credits		**18**

Graduation Requirements

Prerequisites

Some courses listed on these program requirements have prerequisites, please consult the University Course Catalog or check with your advisor

Total credit hours

A total of required hours is 18 credit hours.

Minimum GPA

A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.

Teaching and Learning in Agriculture (TLAG) Minor

The minor for Teaching and Learning in Agriculture will capture the interest of individuals interested in learning how to apply practical educational pedagogy in diverse career settings across all areas of agriculture and life sciences. Completion of the minor will offer students job market opportunities beyond these specifically associated with their major.

The minor in Teaching and Learning in Agriculture requires the completion of 18 credits; 12 credits required courses and 6 credit free

electives from the list below. All courses must be taken and passed on an A - F basis unless only offered on P/F basis.

Code	Title	Credits
Required Minor Courses		
ALCE 3004	Educational Programs in Agricultural and Life Sciences	3
ALCE/EDCT 4034	Methods of Planning Education Programs for Agriculture [1]	3
ALCE 4244	Teaching and Training Methods in Agricultural and Life Sciences	3
ALCE/EDCT 4884	Youth Program Management	3
Subtotal		12
Students will select two courses from either the Agricultural Education Applied Area or the Community Education Applied Area.		**6**
Agricultural Education Applied Area Restricted Electives		
ALCE/AINS 2414	Identity and Inclusion in Agricultural and Life Sciences [3]	
ALCE 3014	Leadership Effectiveness for Professionals in Agricultural Organizations	
ALCE 3084	Agricultural Metal Fabrication	
ALCE 4014	Introduction to Cooperative Extension	
ALCE 4024	Managing Agricultural Supervised Occupational Experience Project	
ALCE 4064	Ag Mechanical Lab Management	
ALCE 4234	Curriculum for Career and Occupational Education [2]	
Community Education Applied Area Restricted Electives		
ALCE/AINS 2414	Identity and Inclusion in Agricultural and Life Sciences [3]	
ALCE 3014	Leadership Effectiveness for Professionals in Agricultural Organizations	
ALCE 4014	Introduction to Cooperative Extension	
ALCE 4304	Community Education and Development	
ALCE 4234	Curriculum for Career and Occupational Education [2]	
LDRS 4514	Skills for Nonprofit Organizational Leaders	
Total Credits		**18**

1 Prerequisite: ALCE 3004 Educational Programs in Agricultural and Life Sciences
2 Asynchronous online
3 Prerequisite: ENGL 1106 First-Year Writing

Graduation Requirements

- Minimum credits to complete minor - 18
- Minimum GPA requirement - 2.0

Technology, Humans, and Environment (THE) Minor

Code	Title	Credits
Required Minor Courses		
ENGE 2094	Create!: Ideation & Innovation [1]	3
PHIL 3334	Ethical Perspectives on Artificial Intelligence	3
AAD 4234	Capstone Collaborations: Cross-Disciplinary Teams	3
Subtotal		9
Elective Courses		
Technology		
Select one of the following:		3
FREC 1004/ GEOG 1084	Digital Planet	
ITDS 3114	Sustainable Design and Biophilia	
FREC/LAR/NR 2554	Leadership for Global Sustainability	
MSE 1014	The Science of Materials in Everyday Life	
STS 2454	Science, Techology, and Environment	
Humans		
Select one of the following:		3
GEOS 1024	Earth Resources, Society, and Environment	
STS 3284	Technology and Disability	
STS 3334	Energy and Society	
Enviroment		
Select one of the following:		3
ENGR 3124	Introduction to Green Engineering	
ITDS 3114	Sustainable Design and Biophilia	
LAR 3264	People Community and Place	
MINE 2114	Energy and Raw Materials: Geopolitics and Sustainable Development	
SPIA 2554	Collaborative Policy-Making and Planning	
STS 2254	Innovation in Context	
Subtotal		9
Total Credits		**18**

1 It is preferred that students take CREATE! Ideation & Innovation early in the completion of the minor.

Graduation Requirements

All courses for the Technology, Humans, & Environment minor must be taken A/F and be completed with a minimum in-minor GPA of 2.0. Any course taken to fulfill the Technology, Humans, & Environment minor will count toward the minor GPA.

No more than 50% of the graded course credits required for the minor in Technology, Humans, and Environment (THE) may be doubled-counted in a student's major.

Theatre Arts (TA) Minor

A minimum of 18 credit hours are required to complete the Theatre Arts minor. Choose from the list provided here. Of the 18 hours required, a minimum 6 hours must be at the 3000 and/or 4000 level.

Below is a list of the courses that may be applied to the Theatre Arts minor:

Code	Title	Credits
TA 2014	Introduction to Theatre	3
TA 2024	Introduction to Acting	3

TA/AFST/ENGL 2044	Contemporary African American Theatre	3
CINE 2054	Introduction to Cinema	3
TA 2104	Fundamentals of Theatre and Production	3
TA 2114	Script Analysis	3
TA 2204	Creative Dance	3
TA 2404	Introduction to Applied Collaborative Techniques	3
TA 2414	Stage and Lighting Technology	3
TA 2604	Introduction to Arts Marketing	3
TA 2964	Field Study (variable credit)	1-19
TA 2974	Independent Study (variable credit)	1-19
TA 3014	Theatre Production Lab (9 credits max.; some topics are variable credit) [1]	1-3
TA 3024	Intermediate Acting for Non-Theatre Major	3
TA 3105	History of Drama and Theatre	3
TA 3106	History of Drama and Theatre	3
ENGL/TA 3315	Playwriting (consent of instructor required)	3
TA 3604	Arts Management	3
TA 3624	Stage Management	3
TA 3954	Study Abroad (variable credit)	1-19
TA 4304	Theatre Outreach (variable credit, consent of instructor required)	1-3

[1] Topics may include: Scene Shop, Costume Shop, Production Run Crew, Management, Stage Management, Cinema Production Crew, General

The following courses can be applied toward the minor, but they generally are restricted to majors. Instructor permission is required for students in the minor to enroll in these courses.

Code	Title	Credits
TA 2164	Scene Design Lab	3
TA 2174	Costume Design Lab	3
TA 2144	Foundations of Movement and Voice	3
TA 2224	Intermediate Performance Intensive	3
TA 3104	Sound Technology Topics (variable credit)	3-6
TA 3114	Scenography Topics (variable credit)	9
TA 3124	Costume Design and Technology Topics (variable credit)	1-9
TA 3134	Lighting Topics (variable credit)	1-9
TA 3144	Theatre Technology Topics (variable credit)	9
TA 3154	Acting Topics (variable credit)	9
TA 3164	Voice and Speech Topics (variable credit)	9
TA 3174	Movement Topics (variable credit)	9
TA 4014	Contemporary Theatre Seminar	3
TA 4315	Directing	3
TA 4316	Directing	3
TA 4704	Professional Theatre Internship (variable credit/ 9 min, 15 max)	9-15
TA 4964	Field Study (variable credit)	1-19
TA 4974	Independent Study (variable credit)	1-19
TA 4994	Undergraduate Research (variable credit)	1-19

Note: No CINE courses, with the exception of CINE 2054 Introduction to Cinema, may be applied to the Theatre Arts minor.

Graduation Requirements

Of the 18 hours required, a minimum of 6 hours must be in the 3000 and/or 4000 level courses.

A minimum minor GPA of 2.0 in all courses taken to fulfill the minor is required.

Transatlantic Studies (TRST) Minor

	SPAN 3304	Introduction to Hispanic Literature
	SPAN 3444	Topics in Early Spanish American Cultures
	SPAN 3464	Topics in Modern Mexican and Central American Cultures
	SPAN 3474	Topics in Modern Hispanic Caribbean Cultures
	SPAN 3484	Topics in Modern Andean and Southern Cone Cultures
	SPAN 4334	Special Topics in Hispanic Life, Literature, and Language [2]
	SPAN 4344	Hispanic Literature and the Representation of History
Subtotal		15
Total Credits		**18**

[1] At least twelve (12) credit hours at the 3000 level and above.

[2] Topics courses (marked with two asterisks) can be taken up to three times (9 credit hours).

[3] To count for the Minor in Transatlantic Studies the location or the content/topic of all experiential learning courses should be European in character. Those courses will be evaluated and approved by the International Studies Program advisor.

Graduation Requirements

Hours Requirement: A minimum of eighteen (18) credit hours is required to graduate with a Minor in Transatlantic Studies (TRST).

In major GPA: GPA of 2.0 is required for the minor. All courses listed on this checksheet are included in the minor GPA calculation.

Prerequisites: Some courses listed on this checksheet may have pre-/corequisites; please consult the University Catalog or check with your advisor.

Use of Courses: No more than 50% of the graded course credits required for the Minor in Transatlantic Studies (TRST) may be double-counted in a student's Major.

Turfgrass Management (TRFM) Minor Program Curriculum

Code	Title	Credits
Required Minor Courses		
Complete the following 9 credits:		
CSES 2564	Turfgrass Management	
CSES 3564	Golf and Sports Turf Management	
Select one of the following:		
CSES 3114/ GEOS 3614	Soils	
Or		
ENSC 3134	Soils in the Landscape	
Subtotal		9
Restricted Electives		
Select a minimum of 9 credits from the following courses:		
CSES 2224	Foundations of Precision Agriculture	
CSES 4214	Soil Fertility and Management	
CSES 4224	Applied Concepts in Precision Agriculture	
ENSC 3604	Fundamentals of Environmental Science	
ENSC 3644	Plant Materials for Environmental Restoration	
ENT 4254	Insect Pest Management	
ENT 4264	Pesticide Usage	
HORT 3325	Woody Landscape Plants	
HORT 3326	Woody Landscape Plants	
HORT 3664	Hardscape Materials and Installation	
HORT 4205	Public Gardens Maintenance and Management	
HORT 4206	Public Gardens Maintenance and Management	
HORT 4334	Greenhouse and Controlled Environment Agriculture Management	
HORT 4504	Landscape Contracting	
HORT 4545	Small Scale and Residential Landscape Design	
HORT 4546	Small Scale and Residential Landscape Design	

PPWS 4104	Plant Pathology	
Subtotal		9
Total Credits		**18**

Graduation Requirements

Notes:

- Minimum credits to complete minor = 18
- Minimum GPA requirement of 2.0 for courses taken towards the minor
- Some courses listed for this minor may have pre-/co-requisites, please consult the University Course Catalog, or check with your advisor

Urban and Community Forestry (UACF) Minor

Code	Title	Credits
Complete a minimum of 19 credits from the courses listed below.		
Required Minor Courses		
Select one of the following:		2-3
BIOL/HORT 2304	Plant Biology [1]	
or FREC 2314	Forest Biology and Dendrology	
Select one of the following:		1-3
FREC 2324	Dendrology Laboratory	
or HORT 3324	Woody Landscape Plants	
or HORT 3324	Woody Landscape Plants	
Select one of the following:		1
FREC 2254	Arboriculture Field Skills	
or FREC 3454	Trees in the Built Environment Lab	
Complete the following:		
FREC/HORT 3354	Trees in the Built Environment [1]	3
FREC 4454	Urban and Community Forestry [1]	3
Subtotal		10-13
Restricted Electives		**9**
If FREC 2314 or 2324 taken above, choose 9 credits below; otherwise, choose 6 credits below:		
FREC 2004	Forest Ecosystems	
FREC/HORT 2134	Plants and Greenspaces in Urban Communities	
FREC 3314	Forest Ecology and Silvics [1]	
FREC 3364	Environmental Silviculture [1]	
FREC 4114	Information Technologies for Natural Resource Management [1]	
FREC 4514	Forest and Tree Pest Management [1]	
GEOG 2084	Principles of Geographic Information Systems	
GEOG/SPIA 2244	Sustainable Urbanization	
GEOG 2314	Maps and Mapping	
GEOG 3244	The U.S. City	
LAR 1254	Environment and Natural Systems [1]	
LAR 2254	Social and Cultural Landscapes	
LAR 4034	Evolution of the American Landscape	
PSCI 1014	Introduction to United States Government and Politics	
PSCI 3424	State and Local Government [1]	
PSCI 3434	Urban Politics [1]	
UAP 3014	Urban Policy and Planning [1]	
UAP 4374	Land Use and Environment: Planning and Policy [1]	
Total Credits		**19-22**

[1] Course may have prerequisites or restrictions. Please check the course catalog or timetable for further information.

Graduation Requirements

NOTES FOR THE MINOR IN URBAN AND COMMUNITY FORESTRY

This Minor requires completion of a minimum of 19 credit hours.

1. A minimum of 6 credit hours must be completed at the 3000 or 4000 academic level.
2. A minimum GPA of 2.0 in courses comprising the minor ls required to complete the minor.
3. All courses must be taken for A-F grade unless only offered P/F.
4. Some listed courses have prerequisites or restrictions. These prerequisites and restrictions are determined by the department offering a course and may change without notice. Therefore, we recommend you consult the University Course Catalog and your advisor when planning classes.

COMPLETING THE MINOR IN URBAN AND COMMUNITY FORESTRY

1. Sign up for the minor in the Advising Center of the College of Natural Resources and Environment (138 Cheatham Hall).
2. If you have questions about the checksheet, ask the Advising Center to put you in contact with a faculty member In urban and community forestry.
3. When you request or update your DARS, be sure to Include the minor so that It will check your progress on both your major and minor.
4. Once you have enrolled in the minor, you cannot graduate until you either (I) satisfy the credit requirements for the minor, or (ii) withdraw from the minor by notifying the Advising Center of the College of Natural Resources and Environment (138 Cheatham Hall) and revising your DARS.

[1] Course has prerequisites or restrictions. Check course catalog or timetable for further information.

[2] If FREC 2314 Forest Biology and Dendrology or FREC 2324 Dendrology Laboratory taken in **Required Minor Courses**, choose 9 credits; otherwise, choose 6 credits.

Visual Arts and Society (VAS) Minor

Code	Title	Credits
Required Minor Courses (6 credits)		
ART 1104	Language of Visual Arts	3
Select one of the following:		
ART 2385	Survey of the History of Western Art	3
or ART 2386	Survey of the History of Western Art	
Practice-Based Art Courses (3 credits)		
Select one of the following:		3

ART 1004	Topics in Studio Art for Non-Majors	
ART 1204	Principles of 2D Art and Design	
ART 1214	Principles of 3D Art and Design	
ART 1234	Topics in Visual Communication Design for Non-Majors	
ART 1404	Principles of Drawing	
ART 1504	Contemporary Art and Practice	
ART 1604	Principles of 4D Art & Design	
Subtotal		9
Electives (6 credits; minimum 3 credits must be at the 3000-level or higher)		
Select two of the following:		6
AFST 1714	Introduction to African American Studies	
WGS 1824	Introduction to Womens and Gender Studies	
PSYC 1004	Introductory Psychology	
SOC 1004	Introductory Sociology	
SOC 3004	Social Inequality	
RLCL 1004	Introduction to Religion and Culture	
COMM 2084	Media and Society	
HUM/RLCL 3204	Multicultural Communication	
PSCI/IS 1024	Comp Gov & Politics	
PSCI/IS/GEOG 2054	Introduction to World Politics	
PSCI 3255 & PSCI 3256	The Politics of Race, Ethnicity and Gender and The Politics of Race, Ethnicity and Gender	
ART 3174	Introduction to Archaeology	
CINE 4144	Topics in Cinema Studies	
HORT 2184	Plants, Places, and Cultures in a Global Context	
GEOG 3104	Environmental Justice, Resources and Development	
HTM 3484	Socio-Cultural Impacts of Tourism	
Capstone Experience Required Course		
ART 4104	Interpretation of Visual Arts	3
Total Credits		**18**

Graduation Requirements

In order to graduate with a Minor in Visual Arts and Society, students must complete all courses required for the minor with a minimum GPA of 2.0 or better and maintain an overall GPA of 2.0. Any course taken to fulfill the Pathways Minor in Visual Arts and Society will count towards the minor GPA.

Viticulture (VITI) Minor

The number of vineyards across Virginia and the mid-Atlantic has expanded rapidly in the last two decades. Virginia has become the 5th largest wine producing region in the United States. The Department of Horticulture has created this minor to serve students interested in grape production and winemaking. The Viticulture minor, though housed in Horticulture, will provide an interdisciplinary learning experience in wine grape production, winemaking, and wine business and marketing, thanks to the cooperation of several other departments. Students of any major can enroll, the semester a course is offered is subject to change; check with the department/instructor for planning purposes.

Code	Title	Credits
Required Courses		
HORT 2234	Environmental Factors in Horticulture	3
HORT 4654	Viticulture	3
CSES 3114/ GEOS 3614	Soils	3
or ENSC 3134	Soils in the Landscape	
Subtotal		9
Restricted Electives		
Select a minimum of nine credits from the following:		9
CSES 3124	Soils Laboratory	
CSES 4214	Soil Fertility and Management	
GEOG 4054	Geography of Wine	
HORT/FST 3114	Wines and Vines (Students must be 21 years or older.)	
HTM 4444	Winery Tourism (Non-HTM Majors enroll during drop/add. Students must be 21 years or older.)	
PPWS 4104	Plant Pathology (4)	
SPES 3954	Study Abroad (1-3)	
SPES 4964	Field Study (1-3)	
SPES 4974	Independent Study (1-3)	
SPES 4994	Undergraduate Research (1-3)	
Subtotal		9
Total Credits		**18**

Graduation Requirements

Notes:

- **Minimum credits to complete minor**= 18
- **Minimum GPA Requirement** of 2.0 for courses taken towards the minor
- At minimum, 6 of the Restrictive Elective Credits must be at the at 3XXX and/or 4XXX level
- Some courses listed on this checksheet may have pre-requisites, please consult the Course Catalog or check with your advisor.

War and Society (WAS) Minor

Code	Title	Credits
I. Required Minor Courses		
Select a minimum of 9 credits of the following:		9
HIST 2534	America at War	
HIST 3014	The American Revolution	
HIST 3054	The American Civil War	
HIST 3174	Native American History	
HIST 3254	The Vietnam War	
HIST 3274	The Greek City	
HIST 3284	The Roman Revolution	
HIST 3304	The World of Alexander the Great	
HIST 3314	The Later Roman Empire	
HIST 3344	Early Modern and Reformation History, 1500-1650	
HIST 3374	French Empire	
HIST 3364	The Age of Revolution and Napoleon	

HIST 3484	Nazi Germany: History and Memory	
HIST/JUD/RLCL 3494	The Holocaust	
HIST/RLCL 3504	The Age of The Crusades	
HIST 3534	Modern Military History	
HIST 3544	World War II	
HIST 3564	The Cold War	
HIST 3604	Russia to Peter the Great	
HIST 3614	Imperial Russia	
HIST 3644	Twentieth-Century Russia	
HIST 3654	Arab-Israeli Conflict	
HIST 3664	Revolutionary China	
HIST 3714	War and Medicine	
Subtotal		9
II. Approved Electives		
Select a maximum of 9 hours of the following:		9
A. History Electives		
Select up to six hours of the following:		
HIST 1115/1116	History of the United States	
HIST 1024	Ancient History	
HIST 1025/1026	Introduction to European History	
HIST 1214	History of the Modern World	
HIST 1215/1216	Intro to World History	
HIST 1224	Mesoamerica and the Andes	
HIST 1354	Conflict and Security in Modern East Asia	
HIST 1515/1516	History of Africa	
HIST 2184	History of the Balkans	
HIST 2346	History of the Middle East	
HIST 2364	History of Japan	
HIST/RLCL 2384	Gandhi in the Making of Modern India	
HIST 2484	Modern Germany	
HIST/STS 2716	History of Technology	
HIST 3334	The Renaissance World, 1350-1500	
B. Interdisciplinary Electives		
Select up to six hours of the following:		
International Studies (IS)/Political Science (PSCI):		
IS/PSCI/GEOG 2034	Geography of Global Conflict	
IS/PSCI/FST 2044	Food, War and Conflict	
IS/PSCI 3134	Global Conflict and War	
IS/PSCI 3135	Strategies of Modern Warfare	
IS/PSCI 3136	Strategies of Modern Warfare	
IS/PSCI 3184	Human Security	
IS/PSCI 3634	Human Rights: Global Issues	
IS/PSCI 3694	Far-right Violence in the United States	
IS/PSCI 3704	National Security Strategy	
IS/PSCI 3734	National Security	
IS/PSCI 3735		
IS/PSCI 3736		
IS/PSCI 3795	Global Terrorism and Counterterrorism	
IS/PSCI 3796	Global Terrorism and Counterterrorism	
IS/PSCI 4024	Seminar in Diplomacy and Security	
IS/PSCI 4734	Theories and Practices of International Conflict Management	
Political Science:		
PSCI 3564	Violent Political Change	
Religion and Culture (RLCL):		
RLCL/IS 2474	Religion and Violence	
Management (MGT):		
MGT 3804	Topics for Cadet Global Leadership Studies	
Naval Science (MN):		
MN 2104	Seapower and Maritime Affairs	
MN 3204	Evolution of Warfare	
MN 4204	Amphibious Warfare	
Military Science (MS):		
MS 4006	Military Science IV, Army Reserve Officer Training Corps	
Aerospace Science (AS):		
AS 4215	National Security Forces in Contemporary American Society	
Peace Studies and Violence Prevention (PSVP):		
PSVP 2044	Peace and Violence	
PSVP 2444	Conflict Resolution, Mediation and Peacebuilding	
Sociology (SOC):		
SOC 3854	Globalization: Sociological Perspectives	
SOC 4044	Military Sociology	
Subtotal		9
Total Credits		**18**

Graduation Requirements

To earn a minor in **War and Society**, a student must satisfactorily complete a minimum of 18 credits from the approved list of required courses and electives and achieve a minimum 2.0 GPA in all courses taken to satisfy the minor. No more than 6 credits of 1xxx courses may count towards the minor. No more than 50% of the graded course credit required for the War and Society may be double-count by a student also enrolled in a History Major or Minor. Substitutions are allowed for independent studies, special studies courses and undergraduate research, if the topic is appropriate and if the advisor has granted permission. All courses are 3 credits.

Watershed Management (WSM) Minor

Code	Title	Credits
A. Required Core		
FREC 4354	Forest Soil and Watershed Management	3
or UAP 4374	Land Use and Environment: Planning and Policy	
ALS/WATR 4614	Watershed Assessment, Management, and Policy	2
Subtotal		5

B. Additional Courses

1. Watershed Hydrology		
Select one of the following:		3
BSE 3324	Small Watershed Hydrology	
BSE 4224	Field Methods in Hydrology	
CEE 4304	Hydrology	
CEE 4314	Groundwater Resources	
CEE 4324	Open Channel Flow	
FREC/WATR 3104	Principles of Watershed Hydrology	
GEOS 4804	Groundwater Hydrology	
LAR 3154	Watershed Sensitive Site Design and Construction	
Subtotal		3
2. Watershed Water Quality		
Select one of the following:		3
BSE 3334	Nonpoint Source Pollution Assessment and Control	
BSE 4304	Introduction to Watershed Modeling	
CSES 4644	Land-based Systems for Waste Treatment	
ENSC 4314	Water Quality	
FREC/WATR 3754	Watersheds and Water Quality Monitoring	
Subtotal		3
3. Watershed Ecology		
Select one of the following:		3
BIOL 4004	Freshwater Ecology	
BIOL 4164	Environmental Microbiology	
BIOL/ENT 4354	Aquatic Entomology	
CSES/ENSC 4444	Managed Ecosystems, Ecosystem Services, and Sustainability	
FREC 4374	Forested Wetlands	
FIW 4614	Fish Ecology	
Subtotal		3
4. Watershed Geospatial Information Systems		
Select one of the following:		3
BSE 4344	Geographic Information Systems for Engineers	
FREC 4114	Information Technologies for Natural Resource Management	
FREC 4214	Forest Photogrammetry and Spatial Data Processing	
FREC/WATR 4244	Hydroinformatics	
GEOG 2084	Principles of Geographic Information Systems	
GEOG/GEOS 4354	Introduction to Remote Sensing	
Subtotal		3
5. Watershed Law, Policy, and Planning		
Select one of the following:		3
AAEC 3314	Environmental Law	
AAEC 3324	Environment and Sustainable Development Economics	
AAEC 4344	Sustainable Development Economics	
FREC/WATR 4464	Water Resources Policy and Economics	
GEOG/WATR 2004	Water, Environment, and Society	
LAR 3044	Land Analysis and Site Planning	
UAP 4184	Community Involvement	
UAP 4344	Law of Critical Environmental Areas	
Subtotal		3
Total Credits		**20**

Wetland Science (WESC) Minor

Code	Title	Credits
Required Course for Basic Soil		**3-4**
CSES 3114/ GEOS 3614	Soils	
And		
CSES 3124/ GEOS 3624	Soils Laboratory	
Or		
ENSC 3134	Soils in the Landscape	
Subtotal		3-4
Required Courses for Wetland Science (Choose 2)		**6**
CSES 4854	Wetland Soils and Mitigation	
ENSC 4244	Ecological Restoration	
FIW 4534	Ecology and Management of Wetland Systems	
FREC 4374	Forested Wetlands	
FREC 4784	Wetland Hydrology and Biogeochemistry	
Subtotal		6
Required Electives (Choose 3)		**9**
BIOL 2804	Ecology	
BIOL 4004	Freshwater Ecology	
BSE 3324	Small Watershed Hydrology	
BSE 3334	Nonpoint Source Pollution Assessment and Control	
CSES 3614	Soil Physical and Hydrological Properties	
ENSC 3604	Fundamentals of Environmental Science	
ENSC 3644	Plant Materials for Environmental Restoration	
ENSC 4164	Environmental Microbiology	
ENSC 4314	Water Quality	
ENSC 4764	Bioremediation	
FREC/WATR 3104	Principles of Watershed Hydrology	
FREC 4354	Forest Soil and Watershed Management	
Subtotal		9
Total Credits		**18-19**

Graduation Requirements

- Minimum credits to complete minor =18
- Minimum from CSES or ENSC courses = 9
- Minimum GPA requirement of 2.0 for courses taken towards the minor

- Some courses listed for this minor may have pre-/co-requisites, please consult the University Course Catalog, or check with your advisor.

Wildland Fire Ecology (WLFE) Minor

Code	Title	Credits
Required Minor Courses		
FREC 2514	Wildland Fire: Ecology and Management [1]	3
FREC 4414	Advanced Wildland Fire Management [1]	3
GEOG 1514	Introduction to Meteorology	3
Subtotal		9
Applied Ecosystem Management Restricted Electives		
Select one of the following:		3-4
FIW 4434	Wildlife Habitat Ecology and Management [1]	3
FREC 3324	Silviculture Principles and Applications [1]	4
FREC 3364	Environmental Silviculture [1]	3
SUBTOTAL		3-4
Ecology Restricted Electives		
Select one of the following:		3
FREC 2004	Forest Ecosystems	3
FREC 2114	Ecology of Appalachian Forests	3
FREC 3314	Forest Ecology and Silvics [1]	3
SUBTOTAL		3
Geospatial Restricted Electives		
Select one of the following:		3
FREC 4114	Information Technologies for Natural Resource Management [1]	3
FREC 4214	Forest Photogrammetry and Spatial Data Processing	3
GEOG/GEOS 4354	Introduction to Remote Sensing	3
SUBTOTAL		3
Biometrics Restricted Electives		
Select one of the following:		3
FREC 3214	Forest Biometrics [2]	3
STAT 3615	Biological Statistics [1]	3
SUBTOTAL		3
Soils Restricted Electives		
Select one of the following:		3
CSES 3114	Soils [2]	3
ENSC 3134	Soils in the Landscape	3
FREC 4354	Forest Soil and Watershed Management [1]	3
FREC 4374	Forested Wetlands [1]	3
GEOG/CSES/GEOS 3304	Geomorphology [1]	3
SUBTOTAL		3
Total		24-25

[1] Courses may have prerequisite or registration restrictions. Check course catalog or timetable for further information.

[2] Course has a required corequisite lab.

Graduation Requirements

Notes for the Minor in Wildland Fire Ecology

1. A minimum G.P.A. average of 2.0 in these courses is required to complete the minor.
2. All courses must be taken for A–F grade unless only offered P/F.
3. Minor coursework aligns with recommendations from Association for Fire Ecology (fireecology.org (http://www.fireecology.org/)).
4. A minimum of 9 credit hours of the graded course credits required for the Minor in Wildland Fire Ecology (WLFE) should not be double-counted in a student's major.

Steps for Completing the Minor in Wildland Fire

1. Sign up for the minor in the Advising Center of the College of Natural Resources and Environment (138 Cheatham Hall).
2. When you request or update your DARS, include the minor so that it will check your progress on both your major and minor.
3. Once you have enrolled in the minor, you cannot graduate until you either:
   a. satisfy the credit requirements for the minor, or
   b. withdraw from the minor by notifying the Advising Center of the College of Natural Resources and Environment (138 Cheatham Hall) and revising your DARS.

Agriculture & Life Sciences

Our Website (http://www.cals.vt.edu)

Mission

The college creates, integrates, and shares knowledge to enhance:

- Life sciences, food, and agricultural systems
- The economic prosperity and life quality of the greater community
- The stewardship and health of land, water, and air for future generations
- Student learning through diverse, hands-on, experiential opportunities

Vision

We address current and emerging issues in agricultural and life sciences by building on the land-grant commitment of developing leaders and creating and sharing knowledge through diverse, hands-on applications.

Values

The College of Agriculture and Life Sciences embraces the following core values:

- A commitment to inclusive and diverse communities
- Freedom of inquiry
- Mutual respect
- Lifelong learning
- *Ut Prosim* (That I May Serve)
- Personal and institutional integrity
- A culture of continuous improvement
- Integrated scholarship across the land-grant missions
- International engagement
- Interdisciplinary collaboration

Undergraduate Programs

In the College of Agriculture and Life Sciences, our ambition to help communities thrive is at the center of our identity. We have identified four major strengths of CALS—food, health, economy, and environment—that we will continue to exercise as we seek to help communities thrive. Using these strengths, our work will address many of the grand challenges facing our world, including comprehensive health and wellness, community empowerment, predictive environmental solutions, cultivating lifelong learners, and resilience and efficiency through innovation. There is room for us to excel and grow while focusing on the theme of building thriving communities. By working together, we can all thrive.

The undergraduate program in the college is organized into majors designed for students with widely different interests. These majors permit the student to achieve a satisfactory degree of specialization while providing the fundamentals necessary for continuing professional growth after graduation.

Freshman students may enter the college with the designation LFSC (Exploring Life Sciences). Upon completion of the freshman year, a college major should be selected.

Students who plan to transfer to Virginia Tech and major in the College of Agriculture and Life Sciences after two years of community college enrollment are encouraged to complete as many of the Pathways curriculum courses as possible before they transfer.

Minors Offered

- Agribusiness and Entrepreneurship
- Agricultural and Applied Economics
- Animal and Poultry Sciences
- Crop and Soil Environmental Sciences
- Dairy Science
- Development and International Trade
- Ecosystems for Human Well-Being
- Entomology
- Environmental Economics
- Environmental Science
- Equine Science
- Food, Agriculture, and Society
- Food Science and Technology
- Global Food Security and Health
- Horticulture
- Integrative Health and Wellness
- Leadership and Social Change
- Plant Health Sciences
- Teaching and Learning in Agriculture
- Turfgrass Management
- Viticulture
- Wetland Science

College-wide Minors

The college offers three transdisciplinary and experiential-based minors: Food, Agriculture, and Society (FAS), Integrative Health and Wellness (IHW), and Global Food Security and Health (GFSH). The FAS and GFSH are Pathways minors. A cross-campus team of faculty, staff, students, and community partners collaborate to deliver these minors.

Living-Learning Community (LLC) and Residential College (IRC)

Meraki LLC

Students will be encouraged to put their passion, creativity, and soul into finding themselves through well-being.

Leadership and Social Change RC

The mission of the Leadership and Social Change Residential College is to offer students a theoretical foundation combined with the practical knowledge and skills necessary to lead in a complex global environment.

Experiential Learning

Students are encouraged to participate in internship and co-op opportunities to gain relevant work experience prior to graduation. Departmental career advisors can help students identify opportunities. In most cases, students receive credit for qualifying work experience. Enrichment studies include research field study opportunities, study abroad and summer laboratory experiences outside the university.

Research opportunities and experiencing the excitement of discovery can play an important part in undergraduate training in science. College of Agriculture and Life Sciences departments offer diverse research opportunities in which students may choose to participate. Individuals interested in undergraduate research should contact faculty members in the departments where they wish to conduct research.

The Academic Programs Office in the college, in cooperation with the Global Education Office, offers several avenues for students both in and outside the college to gain international knowledge and experience. These study opportunities allow students and faculty to become aware of and develop basic knowledge of food, fiber, and environmental issues in the world. Specific activities include study abroad programs and courses, international internships, formal student exchange programs, seminars and workshops on campus, and courses in the college, which focus on international topics. All of the departments in the college offer education abroad opportunities and students wishing to explore these opportunities should contact their advisor.

Advising

Students are assigned an advisor for their major during academic advising and course registration at Virginia Tech. In order to put together a solid plan to finish a degree, advising is critical. Advisors in the College of Agriculture and Life Sciences are among the best resources on campus. In fact, they consistently win awards for the quality of advising they provide. Virginia Tech is a big university, but advisors make it seem like a small town where everyone knows everyone else.

Each year approximately 50% of our graduating students continue their education in graduate or professional school. Pre-health advising (e.g. pre-dentistry, pre-medicine, and pre-veterinary) is coordinated through the Office of Health Professions located in Career and Professional Development.

Career advising is available from a number of sources. The university offers centralized career services and on-campus interviewing. The College of Agriculture and Life Sciences works with employers interested in hiring students with degrees from the college and organizes employer

panels and information sessions. The university office of Career and Professional Development offers several job/career fairs throughout the year, which gives students the opportunity to connect with potential employers.

Career and Professional Development also offers each student access to a computerized program to connect students with potential employers. Undergraduate students who are seeking any type of career-related employment, including internships, co-ops, career-related summer employment, and permanent positions are eligible to use this system.

Scholarships

College and departmental scholarships are available for students enrolled in the College of Agriculture and Life Sciences. Applications are accepted through the University's Scholarship Central. Descriptions and deadlines are available on the Scholarships and Financial Aid website at www.finaid.vt.edu (http://www.finaid.vt.edu).

Honor Societies

Gamma Sigma Delta - Gamma Sigma Delta is an organization having as its objectives the advancement of agriculture in all its phases, the maintenance and improvement of the relations of agriculture and related sciences to other industries, and the recognition of the responsibilities of those engaged in all aspects of agriculture to humankind. Our Society seeks to encourage high standards of scholarship and worthy achievements in all branches of the agricultural and related sciences as well as a high degree of excellence in the practice of agricultural pursuits.

Phi Kappa Phi - Phi Kappa Phi has chapters on nearly 300 select college and university campuses in North America and the Philippines. Membership is by invitation only to the top 10 percent of seniors and graduate students and 7.5 percent of juniors. Faculty, professional staff, and alumni who have achieved scholarly distinction also qualify. The Society's mission is "To recognize and promote academic excellence in all fields of higher education and to engage the community of scholars in service to others."

Phi Beta Kappa - Phi Beta Kappa is the oldest and most prestigious honor society dedicated to recognizing excellence in the liberal arts and sciences. Students in the College of Agriculture and Life Sciences who have exhibited outstanding academic ability in eligible coursework may be eligible for selection to Phi Beta Kappa.

Graduate Programs

All College of Agriculture and Life Sciences departments offer graduate degrees at both the Master and Ph.D. levels. There is also an Online Master of Agricultural and Life Sciences (OMALS) degree program (with 8 different concentrations (https://nam04.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cals.vt.edu%2Facademic-programs%2Fonline%2Fconcentrations.html&data=05%7C02%7Cataylor%40vt.edu%7C58f7012b6cb44198d4b708dc7917ead2%7C6095688410ad40fa863d4f32c1e3a37a%7C0%7C0%7C638518390849955733%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=D%2BlEvmDItFzjRVJr2OTDIRHLvsKVYUlWQ6rC5NW9geA%3D&reserved=0)) that is an approved accelerated undergraduate to graduate degree (https://nam04.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cals.vt.edu%2Facademic-programs%2Fonline%2Facceleratedmasters.html&data=05%7C02%7Cataylor%40vt.edu%7C58f7012b6cb44198d4b708dc7917ead2%7C6095688410ad40fa863d4f32c1e3a37a%7C0%7C0%7C638518390849969991%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=nXeasAb%2FmdwkXdGrM2FtqFSazrs3e1DWD7OjFDrYFko%3D&reserved=0). Complete information on these programs including descriptions of graduate courses can be found in the Graduate Catalog (https://catalog.vt.edu/graduate/).

- Agribusiness Major with Agribusiness Management Option (p. 503)
- Agribusiness Major with Veterinary Business Management Option (p. 504)
- Agricultural and Extension Education Major (https://catalog.vt.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-community-education/agricultural-extension-education/)
- Animal and Poultry Sciences Major (p. 552)
- Associate of Agriculture with Applied Agricultural Management Option (p. 514)
- Associate of Agriculture with Landscape and Turf Management Option (p. 515)
- Biochemistry Major (p. 522)
- Community Economic Development Major (p. 505)
- Community Leadership and Development Major (https://catalog.vt.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-community-education/community-leadership-development/)
- Crop and Soil Sciences Major (p. 567)
- Dairy Science Major with Dairy Business Management Option (p. 554)
- Dairy Science Major with Dual Emphasis Option (https://catalog.vt.edu/undergraduate/agriculture-life-sciences/animal-sciences/dairy-science-dual-emphasis/)
- Dairy Science Major with Science/Prevet Option (p. 556)
- Ecological Restoration Major (p. 569)
- Environmental Economics, Management, and Policy Major (p. 507)
- Environmental Horticulture Major (p. 572)
- Environmental Science Major (p. 574)
- Exercise and Health Sciences Major (p. 542)
- Food and Health Systems Economics Major (p. 508)
- Food Science and Technology Major with Food and Beverage Fermentation Option (p. 531)
- Food Science and Technology Major with Food and Health Option (p. 532)
- Food Science and Technology Major with Food Business Option (p. 533)
- Food Science and Technology Major with Science Option (p. 535)
- Integrated Agriculture Technologies Major (p. 576)
- International Trade and Development Major (p. 510)
- Landscape Design and Turfgrass Science Major (p. 578)
- Nutrition and Dietetics Major (p. 544)
- Plant Science Major (p. 581)

Dean: Alan Grant
Associate Dean & Director of Academic Programs: Susan S. Sumner
Associate Dean & Director of Virginia Agricultural Experiment Station: Mary Burrows

Associate Dean & Director of Virginia Cooperative Extension: Michael Gutter

Associate Dean & Director of Global Programs: Thomas L. Thompson
Assistant Dean of Inclusion, Diversity, and Equity: Chevon N. Thorpe

Undergraduate Course Descriptions (ALS)

ALS 1004 - Agriculture, the Arts and Society (1 credit)
Interpretive strategies applied to agriculture and the visual arts. Artistic representations of agriculture, farming, rural livelihoods, and agrarian landscapes. Exploration of global agricultural challenges balancing the production of food, fiber, and fuel. Apply principles of design and art using photography medium.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 1014 - Gardens as Art (1 credit)
Interpretive strategies applied to agriculture and gardening design. Artistic representations of agriculture and landscaping. Exploration of global agricultural challenges balancing the production of food, gentrification, and location. Application of principles design and elements of visual art using gardening medium.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 1024 - Digitized Agriculture (1 credit)
Interpretive strategies applied to agricultural art and design. Artistic representations of agriculture and nature. Agriculture through digital art (narrative art, stories, and data visualization). Exploration of global agricultural challenges balancing the production of food, fiber, fuel- and location. Elements, methods of interpreting, and principles and application of art and design using a narrative medium.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 1034 - The Aesthetics of Food (1 credit)
Food as a method of study for art and design. Taste, smell, color, shape, presentation, memory, and packaging of food related to human cultural experience. Food presentation, marketing, and food choices in global context influence how people experience food.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 1234 - CALS First Year Seminar (1 credit)
Exploration of topics related to the College of Agriculture and Life Sciences (CALS) from a multidisciplinary perspective with a focus on communication and teamwork, problem-solving, inquiry, and integration. Students explore resources to promote academic success, investigate careers and academic areas, and develop a comprehensive plan of study. Freshman and transfer students only.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 1984L - Special Study (1-19 credits)
Pathway Concept Area(s): 6D Critique & Prac in Design
Instructional Contact Hours: Variable credit course

ALS 2204 - Sustainable Food Systems (3 credits)
Introduction to the economic, social, and ecological foundations of civic agriculture. Topics include industrialization, localized food systems, and citizen participation in civic agriculture. Emphasis will be given to a range of civic agriculture models, strategies, and hands-on approaches to establish, retain and strengthen community-based food and agriculture systems, locally- nationally-globally.
Pathway Concept Area(s): 1A Discourse Advanced, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 2304 - Comparative Animal Physiology and Anatomy (4 credits)
Comparative anatomy and physiology of domestic mammals and birds including cell neural, musculoskeletal, respiratory, cardiovascular, urinary, and endocrine systems.
Prerequisite(s): BIOL 1106
Instructional Contact Hours: (3 Lec, 2 Lab, 4 Crd)

ALS 2404 - Biotechnology in A Global Society (3 credits)
Introduction to the world-wide impact of biotechnology and molecular biology, including applications to plants, animals, and microorganisms. Explores basic concepts of genetic engineering, scientific and ethical issues, and public concerns related to biotechnology. Topics include: environmental release of genetically engineering organisms, bioremediation, safety of genetically engineered food products, transgenic plants and animals, gene therapy, and genetic screening.
Prerequisite(s): (BIOL 1015 and BIOL 1016) or (BIOL 1105 and BIOL 1106) or (BIOL 1205H and BIOL 1206H) and (CHEM 1015 and CHEM 1016)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BIOL 2404

ALS 2504 - Animals in Society (3 credits)
Animal well-being and behavior, human-animal interactions, ethical responsibilities to animals, animal care, behavior, disease, and pain recognition. Current topics concerning companion animals, domestic animals, and wildlife.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 2604 - Intro to Interdisciplinary Research Practices (3 credits)
Introduction to formal undergraduate research and basic research methods. Engagement in interdisciplinary collaboration via team research projects. Exploration of scholarly literature, topic development, information evaluation, citation and data management, research ethics, and scientific communication. Connections to advanced information and digital literacy topics such as research impact and digital repositories. Formal proposal development and presentation.
Pathway Concept Area(s): 1A Discourse Advanced, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 2984L - Special Study (1-19 credits)
Pathway Concept Area(s): 6D Critique & Prac in Design
Instructional Contact Hours: Variable credit course

ALS 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 3104 - Animal Breeding and Genetics (3 credits)
Principles of genetics applied to improvement of domestic animals: factors affecting genetic improvement of economically relevant traits, estimation of breeding values, heritability, genetic correlations, relationships, inbreeding, crossbreeding, genetic abnormalities, genomic selection, and gene editing; ethical reasoning in animal breeding decisions.
Prerequisite(s): BIOL 1105 and (STAT 2004 or STAT 3005 or STAT 3615) and (APSC 1454 or DASC 2474 or DASC 2484)
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 3204 - Animal Nutrition and Feeding (3 credits)
Characteristics, sources, digestion, absorption, and metabolism of water, carbohydrates, lipids, proteins, vitamins, and minerals. Feeding systems for livestock, poultry and companion animals.
Prerequisite(s): ALS 2304 and (CHEM 1036 or CHEM 1036H or CHEM 1016)
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 3304 - Physiology of Reproduction (3 credits)
Physiological mechanisms that control and affect reproductive processes in domestic species. Investigation of the anatomy and physiology of the reproductive systems from cellular to whole-body levels with a particular emphasis on implications for reproductive function.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 3314 - Physiology of Reproduction Lab (1 credit)
Investigation of the structure and function of reproductive systems of domestic species. Practical application of this knowledge is then taught through demonstrations, hands-on experiences and assignments exploring current farm-animal production systems.
Corequisite(s): ALS 3304
Instructional Contact Hours: (0 Lec, 3 Lab, 1 Crd)

ALS 3404 - Ecological Agriculture: Theory and Practice (3 credits)
Presents an overview of historic and modern agricultural practices. Surveys the principles of ecology in the context of managed ecosystems, civic agriculture, and food systems. Explores ecologically based practices and their use in holistic and integrated agricultural systems.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 10 Ethical Reasoning
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

ALS 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 4204 - Concepts in Community Food Systems (3 credits)
Examination of the economic, political, socio-cultural, health and environmental issues related to community food systems and agricultural practices. Topics include local, regional and global food systems development, food production and biotechnology, food sovereignty and security, and population and environmental health. Analyze models, strategies, and policies within local, national and global food systems.
Prerequisite(s): ALS 2204
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 4214 - Capstone: Civic Agriculture and Food Systems (3 credits)
Multidisciplinary, experiential community-based course focusing on civic agriculture-food systems. Work in partnership with community stakeholders to propose viable solutions to real world issues revolving around civic agriculture and food systems. Connect with communities locally, regionally or globally.
Prerequisite(s): ALS 2204 and ALS 3404 and ALS 4204
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 4224 - Food, Agriculture, and Society Capstone Seminar (1 credit)
Explore the interplay between food, agriculture, and society from interdisciplinary perspectives. Engage in student-led discussions, presentations, and critical thinking and synthesizing of capstone experiences embedded within the Food, Agriculture, and Society Pathways minor curriculum. Integrate research, study abroad, internships, or other experiential learning initiatives to gain practical insights toward a more just and sustainable food system. Pre: (ALS 2204 and HIST 1084) and any Study Abroad, Independent Study, or Undergraduate Research course regardless of subject designator.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 4244 - Global Food Security and Health Capstone Experience (3 credits)
Food security and its relationship to human and global health challenges. Role of geography, economics, climate, politics, trade, and culture. Ethical issues and challenges to improving global food security and health. Creatively analyze, synthesize, and evaluate learned knowledge. Participate in successful discourse related to global food security and health.
Prerequisite(s): CSES 2244 and AAEC 3204
Pathway Concept Area(s): 1A Discourse Advanced, 10 Ethical Reasoning, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 4554 - Neurochemical Regulation (3 credits)
Neurochemical transmission within the vertebrate brain will be examined. Emphasis will be placed on the chemical coding underlying the control of various behaviors and how these systems can be modified by various drugs or diet.
Prerequisite(s): (ALS 2304 or BIOL 3404) and CHEM 2535
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BIOL 4554

ALS 4574 - Social Behavior of Birds and Mammals (3 credits)
This course examines origins, influences and implications of social behavior in a variety of avian and mammalian species. Emphasis is placed on understanding group organization and dynamics in inter and intra-species situations. Experimental data from several disciplines (e.g., genetics, physiology, biochemistry) are reviewed to demonstrate their associations with behavioral adaptive mechanisms. Avian and mammalian species living in wild, zoo, agricultural, companion and laboratory settings are discussed.
Prerequisite(s): ALS 3104 or BIOL 2004 and BIOL 1106
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BIOL 4574

ALS 4614 - Watershed Assessment, Management, and Policy (2 credits)
Multidisciplinary perspectives of assessment, management and policy issues for protecting and improving watershed ecosystems. Topics include: monitoring and modeling approaches for assessment, risk-based watershed assessment geographic information systems for watershed analysis, decision support systems and computerized decision tools for watershed management, policy alternatives for watershed protection, urban watersheds, and current issues in watershed management. Pre: Two 4000 level courses in environmental/natural resource science, management, engineering, and/or policy in BSE, CEE, FOR, FREC, GEOL, LAR, CSES, ENT, BIOL, GEOG, AAEC, UAP or equivalent.
Instructional Contact Hours: (2 Lec, 2 Crd)
Course Crosslist: WATR 4614

ALS 4714 - Global Seminar (1 credit)
Student-centered internet-based course including text and real-time video conferencing among students at collaborating institutions in the United States and Canada. Focus is contemporary North American environmental sustainability issues based on student-prepared case studies. Pre-requisite: Junior or Senior Standing required.
Instructional Contact Hours: (1 Lec, 1 Crd)
Course Crosslist: HORT 4714

ALS 4814 - Nutritional Neuroscience (3 credits)
Concepts in nutritional aspects of neuroscience. Energy metabolism in central nervous system and brain regulating ingestive behavior. Communication with peripheral organs, regulation of whole body energy homeostasis, brain physiology and pathology on molecular and cellular level. Role of appetite neurocircuitry in formulation of practical solutions to societal problems such as nutrition, eating disorders, and obesity.
Prerequisite(s): NEUR 2026 or ALS 2304
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: NEUR 4814

ALS 4964 - Field Study/Practicum (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 5024 - Building Multicultural Competence in Agriculture and Life Sciences (1 credit)
Diversity and inclusion within agriculture and life sciences in academic settings and communities: university, national, and global. Virginia Tech Principles of Community and appropriate avenues of redress. Shared responsibilities and issues of privilege, bias, power, prejudice, and discrimination. Governmental and institutional policies and their effects on diversity and inclusion. Pre: Graduate Standing.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 5094 - Effective Grant Writing for the Biomedical aand Behavioral Sciences (1 credit)
The grant writing process and developing student skills for successful grant writing to support research enterprises. Students will prepare a mock research grant proposal for obtaining funds from the National Institutes of Health, National Science Foundation, or the US Department of Agriculture and participate in panel review of grant proposals of peers.
Prerequisite(s): APSC 5004 or (ALS 5064 or BIOL 5064 or BCHM 5064 or PPWS 5064)
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 5104 - Communicating Research and Leadership in Agriculture and Life Sciences (2 credits)
Principles and strategies for effective leadership and communication in agricultural and life sciences (ALS). Analysis, synthesis and translation of research information for use in practical settings. Effective ALS knowledge. Evaluation of research design and methodology in action research. Pre: Graduate standing.
Instructional Contact Hours: (2 Lec, 2 Crd)

ALS 5116 - Nutrition (3 credits)
Digestion, absorption and metabolism of nutrients in animals including humans. 5115: Digestive physiology; digestion and absorption; bioenergetics; and carbohydrate and lipid metabolism with emphasis on substrate sources, interrelationships, and factors affecting utilization and metabolism. Graduate Standing required. 5116: Absorption, metabolism and function with emphasis on physiological and biochemical aspects of protein, amino acid, vitamins, and minerals; epidemiological, biochemical, cellular or molecular methodologies useful for study of macronutrients and micronutrients and their biological functions also will be covered.
Prerequisite(s): ALS 5115
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 5134 - Community-Based Applications of Qualitative Inquiry (3 credits)
Community-based applications of qualitative inquiry in Agricultural and Life Sciences. Qualitative methodology in community-based research with a focus on ethics and inclusivity. Interviews and focus groups. Professional best practices and enhance communication. Best practices for a community approach, interview facilitation, and reporting for professional audiences. Pre: Graduate standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 5204 - Research and Information Systems in the Life Sciences (3 credits)
A focus on research techniques and processes for life science professions. Topics include: history of applied life sciences, current structure of the scientific enterprise, the scientific method and quality assurances, researching the literature, scientific writing and presentation of research results, instructional techniques, professionalism, and ethical considerations. Information technology is employed throughout the course. Students learn to use digital technologies for communication, presentation, and publication.
Instructional Contact Hours: (1 Lec, 2 Lab, 3 Crd)

ALS 5214 - Information Systems and Research in the Life Sciences (3 credits)
Research techniques and processes used in the life science professions. History of applied life sciences, structure of the scientific enterprise, the scientific method and quality assurances, researching the literature and critically evaluating information, scientific writing and communication of research results, professionalism, and ethics. Graduate standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 5224 - Introduction to Genomic Data Science (3 credits)
Analysis of genomic data for applications in agriculture and life sciences. Computational tools for genomic data processing and quality control. Interpret results from genomic experiments. Summary statistics, machine learning and methods of visualization for genomic data. High Performance Computing (HPC) systems for genomic analysis. Genomic data analysis pipelines. Pre: Graduate standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 5234 - Advanced Concepts in Community Food Systems (3 credits)
Examination of the economic, political, social, and cultural issues related to community food systems and agricultural practices. Local and regional food systems development, food production and biotechnology, food sovereignty and security, and population and environmental health. Analysis of models, strategies, and policies of national food systems. Pre: Graduate Standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 5304 - Advanced Physiology and Anatomy of Domestic Animals (5 credits)
Mammalian physiology and anatomy will be evaluated in domestic animals, laboratory animals, and primates. Emphasis will be on the cardiovascular, renal, respiratory, neural, muscle, and digestive physiology.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (4 Lec, 3 Lab, 5 Crd)

ALS 5324 - Research Ethics in Agriculture and Life Sciences (1 credit)
Principles of and skills development in research ethics to enhance professional preparation in agriculture and life sciences. Pre: Graduate standing.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 5334 - Professional Communication Agriculture and Life Sciences (1 credit)
Principles of, and skill development in, academic communication to enhance professional preparation in the agricultural and life sciences. Pre: Graduate standing.
Instructional Contact Hours: (1 Lec, 1 Crd)

ALS 5404 - Management and Analysis of Agricultural Experiments (3 credits)
Problem-based learning approach to managing, analyzing, and interpreting experimental data common to agricultural research. Programming for statistical software packages and dissection of algorithms to troubleshoot and revise programming code.
Prerequisite(s): STAT 5615 and STAT 5616
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 5904 - Project and Report (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 5954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 5964 - Field Work/Practicum (1-12 credits)
Instructional Contact Hours: (1-12 Lec, 1-12 Crd)
Repeatability: up to 12 credit hours

ALS 5974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 5984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 6314 - Endocrinology (3 credits)
Hormones produced in animals and their roles in development, growth, appetite, digestion, metabolism, lactation, reproduction, homeostasis, and behavior. Mechanisms by which hormones act and the factors that regulate the production and action of hormones. Endocrine disorders and hormone-based application in medicine and animal agriculture. Major methodologies in current endocrine research.
Prerequisite(s): ALS 5304 or ALS 5344
Instructional Contact Hours: (3 Lec, 3 Crd)

ALS 6984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALS 7964 - Field Studies (1-12 credits)
Instructional Contact Hours: (1-12 Lec, 1-12 Crd)
Repeatability: up to 12 credit hours

Agricultural and Applied Economics

Our Website (http://www.aaec.vt.edu)

Inspired by our land grant mission and motto *Ut Prosim* (That I May Serve), we teach, conduct research, and distribute findings that empower a diverse audience of students, stakeholders, and alumni to change the world. Our faculty and graduates have expertise in applied economics and agribusiness principles that, in turn, help address the food, financial, health, development, policy, environmental, and social needs in Virginia and beyond.

Students receive a world-renowned education and leave as leaders prepared to serve their communities by addressing the world's most challenging problems. https://aaec.vt.edu/About.html

Major Options

- B.S. in Agribusiness w/ Agribusiness Management Option (AGBM)
- B.S. in Agribusiness w/ Veterinary Business Management Option (VBMG)
- B.S. in Applied Economic Management w/ Environmental Economics, Management, and Policy Major (EEMP)
- B.S. in Applied Economic Management w/ International Trade and Development Major (ITD)
- B.S. in Applied Economic Management w/ Community Economic Development Major (CED)
- B.S. in Applied Economic Management w/ Food and Health Systems Economics Major (FHSE)

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree.

Satisfactory progress requirements toward the degree can be found on the major checksheet by visiting the University Registrar website at https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

- Agribusiness Major with Agribusiness Management Option (p. 503)
- Agribusiness Major with Veterinary Business Management Option (p. 504)
- Community Economic Development Major (p. 505)
- Environmental Economics, Management, and Policy Major (p. 507)

- Food and Health Systems Economics Major (p. 508)
- International Trade and Development Major (p. 510)

Head: Matthew T. Holt
Professors: Jeffrey Alwang, Darrell Bosch, Kevin Boyle, George Davis, Matt Holt, Michael Ellerbrock, Mary Marchant, Bradford Mills, Klaus Moeltner, David Orden, Kurt Stephenson
Associate Professors: Susan Chen, Dixie Watts Dalton, Catherine Larochelle
Assistant Professors: Elinor Benami, John Bovay, Zhenshan Chen, Anubhab Gupta, Xi He, Chanit'a Holmes, Ford Ramsey, Shamar Stewart, Jonathan van Senten, Chi Ta, Wei Zhang
Assistant Professor of Practice: Jennifer Friedel
W.G. Wysor Professor of Agriculture: Jason Grant
John B. and Kristi L. Rowsell Professor: Olga Isengildina-Massa
Instructors: Ryan Musselman
Undergraduate advisor: TBD

Undergraduate Course Descriptions (AAEC)

AAEC 1005 - Economics of the Food and Fiber System (3 credits)
1005: How the individual economic actor makes rational choices as: consumer, producer, firm/farm, saver, investor, employee, employer, manager, trader. Economic principles that underlie exchange in business, government and household transactions. Utility maximization in the U.S. and global food and fiber system under conditions of scarcity. Evaluation of policy issues important to society. 1006: Overview of economic systems: capitalism versus communism, socialism, feudalism, mercantilism. Interrelationships of U.S. economic fiscal and monetary institutions and policies regarding agricultural productivity, business vitality, sustainable development, and human capital formation. Affordability, safety and security of food and fiber, cultural dynamics, consumer welfare, industrial profitability, natural resources conservation, rural economic infrastructure, international trade, and social justice.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 1006 - Economics of the Food and Fiber System (3 credits)
1005: How the individual economic actor makes rational choices as: consumer, producer, firm/farm, saver, investor, employee, employer, manager, trader. Economic principles that underlie exchange in business, government and household transactions. Utility maximization in the U.S. and global food and fiber system under conditions of scarcity. Evaluation of policy issues important to society. 1006: Overview of economic systems: capitalism versus communism, socialism, feudalism, mercantilism. Interrelationships of U.S. economic fiscal and monetary institutions and policies regarding agricultural productivity, business vitality, sustainable development, and human capital formation. Affordability, safety and security of food and fiber, cultural dynamics, consumer welfare, industrial profitability, natural resources conservation, rural economic infrastructure, international trade, and social justice.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 2104 - Personal Financial Planning (3 credits)
Survey of fundamental personal financial planning needs and decisions of young professionals. Introduction to the personal financial planning needs that special household circumstances or non-traditional household situations may precipitate. Application of cash, credit, and debt management principles to household scenarios. Completion of federal income tax forms for individuals. Managing the household's risk exposure. Introduction to investment decisions, particularly related to retirement accounts. Overview of basic estate planning tools and principles. Discussion of the ethical issues related to financial products and decisions.
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 2434 - Foundations of Agribusiness (3 credits)
Introduction to the primary management tools as they relate to farm production enterprises and agribusinesses. Principles and concepts of preparing farm and agribusiness financial statements and their analysis. Application of budgeting and risk management.
Prerequisite(s): AAEC 1005
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 3004 - Agricultural Production and Consumption Economics (3 credits)
The economic principles of production. Applications to decision-making and the allocation of resources for the agricultural firm. Consumer behavior and demand for agricultural products.
Prerequisite(s): (AAEC 1005 or ECON 2005) and (MATH 1025 or MATH 1225)
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3014 - Analytical Methods in Applied Economics (3 credits)
Quantitative methods used in applied empirical economic analysis including simple and multiple regression, estimation and application of elasticity, decision analysis, economic simulations, linear programming, and risk analysis. Analysis using spreadsheets stressed.
Prerequisite(s): STAT 3005 or BIT 2405 or STAT 3615
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3015 - Internship in Agricultural and Applied Economics (1 credit)
Preparation for, and follow-up to, a practical experience in a selected agricultural, resource, or governmental enterprise, which takes place under the direct supervision of an owner, manager, or supervisor. 3015: offers the student a broad management horizon on understanding the value and the process of setting goals and objectives, and provides methods for evaluating ones abilities, interests, and desires for making career-path choices. 3016: provides a forum for students to share work experiences, discuss human resource issues, and apply the problem solving process to a problem or concern witnessed during the internship.
Instructional Contact Hours: (1 Lec, 1 Crd)

AAEC 3024 - Monetary and Global Issues in Applied Economics (3 credits)
Economics of an open economy and its impact on agricultural and natural resource markets. History of the monetary system, national accounts, balance of payments, fiscal and monetary policy, foreign exchange determinants, trade deficits, international finance, globalization and economic growth. Linkages to agricultural policy and commodity markets stressed.
Prerequisite(s): AAEC 1005 and AAEC 1006
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3204 - International Agricultural Development and Trade (3 credits)
Examination of the role of agriculture in less developed countries and how that role is affected by public policies. Dimensions of world food, population, and income problems; theories of economic development and the role of agriculture; traditional agricultural systems and their evolution; agricultural modernization strategies; interactions among natural resources, biofuels, food prices, and sustainable agriculture; the impacts of international trade and aid; and the effects of international development on U.S. agriculture.
Prerequisite(s): AAEC 1005 or ECON 2005
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3314 - Environmental Law (3 credits)
Principles of law involved in environmental issues, survey of environmental litigation, legislation and administrative rulings. Law topics include natural resources, water pollution, private land use, air pollution, toxic substance, food, drug, pesticides, and biotechnology.
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3324 - Environment and Sustainable Development Economics (3 credits)
Sustainable development through an exploration of hard and soft green schools of thought. Hard Green Strategies – reliance on markets, technology, property rights, human ingenuity to increase production efficiency versus Soft Green Strategies-adoption of simpler lifestyles, government subsidies, natural design of buildings (biomimicry), and urban infrastructure to locate public transportation hubs nearest to densely populated neighborhoods to decrease consumption of natural resources. Connecting the influence of place in personal and group identity. Interdisciplinary examination of environmental justice among poor and minority U.S. communities. Social equity distribution of the economic costs and benefits of natural resources management policies. Roles of property rights, economic incentives, religious values, and political power in determining local communities' capacity to control their environmental destiny.
Prerequisite(s): AAEC 1005 or AAEC 1006 or ECON 2005
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3424 - Value-Based Management in Agribusiness (3 credits)
Focus on finance concepts in the agricultural and environmental sectors. Apply the value-based management principles and financial analysis to industry-related cases. Estimate cost of capital, free cash flow and net present value. Team-based approach on a real-world valuation case.
Prerequisite(s): AAEC 1005 and AAEC 1006 and ACIS 2115
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3454 - Small Business Management and Entrepreneurship (3 credits)
Characteristics of small business and entrepreneurs, and their economic importance. Development and operation of a small business, including concepts and principles such as franchising, business plans, capital acquisition, venture capital, financial and administrative control, marketing, human resource and operations management. Taxation, legal, insurance and ethics in small business.
Prerequisite(s): AAEC 2434 or ACIS 2115 or MGT 2064
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3504 - Marketing Agricultural Products (3 credits)
Structure of the agricultural marketing system with emphasis on factors determining farm level prices. Emphasis on how markets coordinate consumer desires and producer costs through marketing channels. Impact of market structure, grades, information, product form, and advertising on farm prices. International trade impacts on producers, consumers, agribusiness, and government.
Prerequisite(s): AAEC 1005 and AAEC 1006
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3514 - Agricultural Futures and Options (3 credits)
The role of agricultural futures and options in risk management strategies for producers and agribusiness firms and in the price discovery process. Fundamental supply-demand and technical analysis of the markets and pricing processes. Development and applications of effective price risk management strategies.
Prerequisite(s): AAEC 1005 and AAEC 1006 and AAEC 2434
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3604 - Agricultural Law (3 credits)
Legal problems of farm and agribusiness management. Practical application of principles of contracts, negligence, debt instruments and commercial transactions of the farm and agribusiness organization. Selected state and federal laws regulating the farm and agribusiness sector; basic animal laws including state and federal regulation of agricultural sector.
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

AAEC 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 3974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 4135 - International Economics (3 credits)
4135 International Trade: Factor mobility and commercial policy (tariffs, quotas, export licensing). 4136 International Finance: Liquidity, exchange rates, comparative international living standards, foreign aid.
Prerequisite(s): ECON 3104
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ECON 4135

AAEC 4136 - International Economics (3 credits)
4135: International Trade: Factor mobility and commercial policy (tariffs, quotas, export licensing). 4136: International Finance: Liquidity, exchange rates, comparative international living standards, foreign aid.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ECON 4136

AAEC 4204 - Food and Agricultural Policy (3 credits)
Examination of the role of agriculture in developed economies and how agriculture is affected by policy decisions in the public sector. Emphasis will be placed on the economic impacts of policies on the producers and consumers of agricultural products: price supports, food stamps, tariffs and quotas.
Prerequisite(s): AAEC 1005 and AAEC 1006
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4314 - Environmental Economic Analysis and Management (3 credits)
Quantitative methods and computer-aided tools used in the economic analysis of environmental/natural resource issues. Economic concepts and analytical tools will be applied to realistic, problem-solving situations. Topics include cost effectiveness analysis, benefit-cost analysis, economic simulations, and statistical analysis.
Prerequisite(s): AAEC 3324 or ECON 4014 or FREC 4014
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4324 - Rural and Regional Development Policy (3 credits)
Description of rural areas, their economic structure, and conditions for broad-based economic development. Emphasis on the role of markets in the development process. Introduction to tools to evaluate policies and programs, identify distributional impacts, identify appropriateness for long-term sustainable development, and analyze tradeoffs between policy goals. Alternatives to public financing in rural areas.
Prerequisite(s): AAEC 1005 and AAEC 3004
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4334 - Applications Rural Development (1 credit)
Evaluation of policy alternatives and programs for the development of rural areas. Intensive use of analytical techniques, including spreadsheet analysis of trends and changes over time, shift-share analysis of economic change, creation of indices of distribution and poverty for rural areas, creation and use of economic base multipliers, construction, use and interpretation of input-output models.
Prerequisite(s): AAEC 1005 and AAEC 3004
Corequisite(s): AAEC 4324
Instructional Contact Hours: (1 Lec, 1 Crd)

AAEC 4344 - Sustainable Development Economics (3 credits)
Sustainable development concepts are critically explored particular emphasis on implications for domestic and international sustainable development agriculture and for economic development. Students investigate case studies illustrating problems of sustainable development and potential policy solutions.
Prerequisite(s): AAEC 3324 or AAEC 3004 or ECON 4014
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4354 - Energy Economics (3 credits)
Theoretical and quantitative economic analyses of individual, regional, and global demand and supply of renewable and nonrenewable energy. Markets examined include solar, wind, oil, natural gas, electricity, and nuclear. Policies reviewed include those used to regulate energy prices, tax carbon emissions, and promote technology adoption. Countries studied include the U.S., Europe, and Asia, encompassing both developed and developing nations. Pre: Junior Standing.
Prerequisite(s): AAEC 1005 or AAEC 1006 or ECON 2005 or ECON 2006 or MATH 1025 or MATH 1225
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4404 - Agricultural Management and Problem-solving (3 credits)
Capstone course for students interested in agribusiness management. Application of concepts, tools, and principles including management, finance, marketing, economic theory, and quantitative methods to applied agricultural decisions. Application of knowledge on selected agricultural projects that enhance team-building, written, and oral communication skills. Senior Standing required.
Prerequisite(s): AAEC 2434
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4414 - Applied Economic Problem-Solving (3 credits)
Application of economic training and skillsets to real-world needs identified by clientele. Team problem-solving of financial, marketing, production, legal and regulatory, and human resources issues unique to the agriculture sector. Facilitated experiential learning environment focused on student-motivated solutions to economic risk management. This course may be repeated once.
Prerequisite(s): AAEC 1005
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4424 - Ag Financial Management (3 credits)
Principles and concepts of preparing agricultural financial statements. Analysis of these statements following professional farm financial guidelines. Economic concepts applied to management of agricultural enterprises. Leasing, purchasing, borrowing, and lending decisions in agriculture. Agricultural applications of budget, risk management and mitigation, and loan structuring.
Prerequisite(s): AAEC 1005 and AAEC 2434 and (FIN 3104 or AAEC 3424)
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4434 - Commodity Investing by Students (2 credits)
Students make real world investment decisions in agricultural and energy commodities, execute trades, evaluate their performance and report to the VT Foundation. This student-run organization provides leadership opportunities as well as collaboration and networking experiences. Restricted to COINS members. May be repeated with different content up to 8 credit hours. This course is Pass/Fail.
Prerequisite(s): AAEC 4504
Instructional Contact Hours: (2 Lec, 2 Crd)
Repeatability: up to 8 credit hours

AAEC 4464 - Water Resources Policy and Economics (3 credits)
Economic theory and methods to explain water use decisions. Efficiency, equity, and ethical considerations in U.S. water policy. Analysis of water markets, climate change, and environmental flows from diverse stakeholder perspectives.
Prerequisite(s): AAEC 1005 or ECON 2005
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 4464, WATR 4464

AAEC 4484 - Applied Economic Forecasting (3 credits)
Forecasting economic, agricultural and environmental data using basic linear and non-linear time series models. Programming and computational implementation of time series forecasting model selection techniques and practical applications.
Prerequisite(s): (AAEC 1005 or AAEC 1006) and (STAT 3005 or STAT 3604 or STAT 3615 or BIT 2405)
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4504 - Agricultural Price and Market Analysis (3 credits)
Estimation of agricultural supply, demand, and price relationships. Determination of market potential for new products. Students identify problem, collect data, estimate statistical relationship(s), interpret results, and write research report. Use of probability distribution in marketing strategy development.
Prerequisite(s): AAEC 3004 and STAT 3005 or STAT 3615 or BIT 2405
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4514 - Advanced Agribusiness Marketing (1-4 credits)
Applying concepts, principles, and analytical tools in developing a marketing plan for an existing or new agricultural product or service. Students will define the market, perform competitive marketing analysis, outline market assumptions and objectives, and perform a three-year financial evaluation of the action plan. Course can be repeated once.
Prerequisite(s): AAEC 2434 and AAEC 3504
Corequisite(s): 3504 or 3004.
Instructional Contact Hours: (1-4 Lec, 1-4 Crd)
Repeatability: up to 4 credit hours

AAEC 4804 - Elementary Econometrics (3 credits)
Economic applications of mathematical and statistical techniques: regression, estimators, hypothesis testing, lagged variables, discrete variables, violations of assumptions, simultaneous equations.
Prerequisite(s): AAEC 1005 and (STAT 3615 or STAT 3005 or STAT 3604 or BIT 2405)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: STAT 4804

AAEC 4814 - Food and Health Economics (3 credits)
Microeconomics of food, nutrition, and health. Overview of nutrition, nutrition recommendations, and implications for economics based decisions. Individual and household food consumption and health production models. Farm to consumer market linkage models with nutrition and health implications Effectiveness of food and nutrition interventions and policies. Cost-benefit and cost-effectiveness analysis of health interventions. Pre: Senior Standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

AAEC 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAEC 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Agribusiness Major with Agribusiness Management Option

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
AAEC 2434	Foundations of Agribusiness [1]	3
AAEC 3454	Small Business Management and Entrepreneurship [1]	3
AAEC 3504	Marketing Agricultural Products [1]	3
AAEC 3604	Agricultural Law	3
AAEC 4424	Ag Financial Management [1]	3
AAEC 3024	Monetary and Global Issues in Applied Economics [1]	3
ACIS 2115	Principles of Accounting	3
Subtotal		21
Major Requirements		
ALS 1234	CALS First Year Seminar	1
AAEC 3014	Analytical Methods in Applied Economics [1]	3
or BIT 2406	Introduction to Business Statistics, Analytics, and Modeling	
or STAT 3006	Statistical Methods	
or STAT 3616	Biological Statistics	
AAEC 3424	Value-Based Management in Agribusiness [1]	3
or FIN 3104	Introduction to Finance	
or ACIS 2116	Principles of Accounting	
ENGL 3774	Business Writing [1]	3
or ENGL 3764	Technical Writing	
or ENGL 3754	Advanced Writing and Research	
or ALCE 3624	Communicating Ag and Life Sciences in Writing	
Subtotal		10
Option Required Courses		
Major Option Core Courses		
AAEC 3004	Agricultural Production and Consumption Economics [1]	3
AAEC 3015	Internship in Agricultural and Applied Economics	1
AAEC 4514	Advanced Agribusiness Marketing [1]	3
Select one of the following: [2]		3
AAEC 3514	Agricultural Futures and Options [1]	
AAEC 4504	Agricultural Price and Market Analysis [1]	
AAEC 4804	Elementary Econometrics [1]	
AAEC 4484	Applied Economic Forecasting [1]	
Restricted Electives		
Select three AAEC courses (6 hours must be at the 3000 level or higher)		9
Subtotal		19
Area of Specialization and Free Electives		
A. Area of Specialization		

AAEC undergraduate advisor must approve area of specialization courses. Students should consider obtaining a minor or double major to satisfy the area of specialization. At least 9 hours must be at the 3000 level or higher (unless noted otherwise for a minor in another academic department). Students majoring in Agribusiness are not eligible to minor in any of the AAEC minors. [3]		18
B. Free Electives		
Select 7 hours		7
Subtotal		25
Pathways to General Education		
Pathways Concept 1 - Discourse		
ENGL 1105	First-Year Writing (1F)	3
ENGL 1106	First-Year Writing (1F)	3
COMM 2004	Public Speaking (1A)	3
or ALCE 3634	Communicating Ag and Life Sciences in Speaking	
Pathways Concept 2 - Critical Thinking in the Humanities		
Select 6 credits in Pathway 2 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G02)		6
Pathways Concept 3 - Reasoning in the Social Sciences		
AAEC 1005	Economics of the Food and Fiber System	3
or ECON 2005	Principles of Economics	
AAEC 1006	Economics of the Food and Fiber System	3
or ECON 2006	Principles of Economics	
Pathways Concept 4 - Reasoning in the Natural Sciences		
Select 6 credits in Pathway 4 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G04)		6
Pathways Concept 5 - Quantitative and Computational Thinking		
MATH 1025	Elementary Calculus (5F)	3
or MATH 1225	Calculus of a Single Variable	
Select one of the following:		3
MATH 1026	Elementary Calculus (5F) [4]	
or MATH 12	Calculus of a Single Variable	
CS 1014	Introduction to Computational Thinking (5F)	
CS 1064	Introduction to Programming in Python (5F)	
FREC 1004	Digital Planet (5F)	
STAT 1014	Data in Our Lives (5F)	
STAT 3615	Biological Statistics (5A) [1]	3
or STAT 3005	Statistical Methods	
or BIT 2405	Introduction to Business Statistics, Analytics, and Modeling	
Pathways Concept 6 - Critique and Practice in Design and the Arts		
Select 3 credits in Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D)		3
Select 3 credits in Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A)		3
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select 3 credits in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07)		3
Subtotal		45
Total Credits		**120**

[1] **Pre-requisites:** Some courses required for this major have pre-/co-requisites and/or enrollment requirements. Please refer to the Undergraduate Course Catalog or consult your advisor for information about pre-/co-requisites and enrollment requirements.

[2] Students with interest in GIS may also take GEOG 2084 Principles of Geographic Information Systems or BSE 4344 Geographic Information Systems for Engineers

[3] AAEC minors: Agribusiness Management and Entrepreneurship (ABAE), Environmental Economics (EECO), Development and International Trade (DAIT), Agricultural and Applied Economics (AEMN) and Commodity Market Analytics (CMAM) .

[4] Students considering graduate school in applied economics are encouraged to take MATH 1225 Calculus of a Single Variable-MATH 1226 Calculus of a Single Variable.

Satisfactory progress: By the end of the academic year in which the student has attempted 72 hours (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" will consist of

1. an overall GPA of at least 2.0;
2. at least 30 credits that apply to the Pathways to General Education, and
3. 9 semester credits of departmental requirements.

Graduation Requirements

Program Total Hours: 120 credit hours required for graduation with this degree.

GPA: In major calculation is from all AAEC and ECON classes taken. An overall GPA of at least 2.0 is required to meet the University's minimum standard for good academic standing. Overall and in-major GPA's of at least 2.00 are required for graduation.

Foreign Language Requirements

Foreign Language Requirement: Students who do not successfully complete at least two units of a single foreign language, classical language, or American Sign Language during high school must successfully complete six semester hours of a single college-level foreign or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the Undergraduate Catalog for details.

Subtotal		45
Total Credits		**120**

[1] **Pre-requisites:** Some courses required for this major have pre-/co-requisites and/or enrollment requirements. Please refer to the Undergraduate Course Catalog or consult your advisor for information about pre-/co-requisites and enrollment requirements.

[2] AAEC minors: Agribusiness Management and Entrepreneurship (ABAE), Environmental Economics (EECO), Development and International Trade (DAIT), Agricultural and Applied Economics (AEMN), and Commodity Market Analytics (CMAM).

[3] Students considering graduate school in applied economics are encouraged to take MATH 1225 Calculus of a Single Variable-MATH 1226 Calculus of a Single Variable.

Satisfactory progress: By the end of the academic year in which the student has attempted 72 hours (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" will consist of

1. an overall GPA of at least 2.0;
2. at least 30 credits that apply to the Pathways to General Education, and
3. 9 semester credits of departmental requirements.

Graduation Requirements

Program Total Hours: 120 credit hours required for graduation with this degree.

GPA: In major calculation is from all AAEC and ECON classes taken. An overall GPA of at least 2.0 is required to meet the University's minimum standard for good academic standing. Overall and in-major GPA's of at least 2.00 are required for graduation.

Acceptable Substitutions

Can take any of the classes below as an AAEC-restricted elective:

- APS 3464 Appalachian Communities /AHRM 3464 Appalachian Communities /GEOG 3464 Appalachian Communities /HD 3464 Appalachian Communities /HUM 3464 Appalachian Communities /SOC 3464 Appalachian Communities /UAP 3464 Appalachian Communities [1]
- ECON 4074 Labor Economics [1]
- ECON 4044 Public Economics [1]
- ECON 4054 Public Finance [1]
- UAP 4374 Land Use and Environment: Planning and Policy [1]

Foreign Language Requirement

Foreign Language Requirement: Students who do not successfully complete at least two units of a single foreign language, classical language or American Sign Language during high school must successfully complete six semester hours of a single college level foreign or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the Undergraduate Catalog for details.

Agricultural Technology

Our Website (http://www.cals.vt.edu)

Overview

The Agricultural Technology Program offers a concentrated academic experience for individuals pursuing an associate degree in preparation for careers in the agriculture and green industries. Students can specialize in Applied Agricultural Management or Landscape and Turfgrass Management.

Applied Agricultural Management (AAM)

- Agribusiness
- Crop Production
- Livestock Production

The AAM specialty provides students with a balanced education that prepares them for diverse job opportunities.

The animal science curriculum includes courses in genetics, nutrition, reproduction, and management. It focuses on the biological and economic aspects of animal production and management. Soils, forages, mechanics and chemical application courses round out the AAM curriculum.

Business courses provide instruction in financial recordkeeping, professional selling, personnel management, strategic marketing, whole business planning, and information systems, focusing on strategic management and economic issues of the agricultural industry. Laboratories stress the use of modern management methods for problem solving.

The crop science curriculum provides students knowledge and hands-on experiences relative to Virginia's major crop and forage systems. Students learn about cash crop rotations and grazing management as well as precision agriculture, integrated pest management, pesticide application, and pesticide safety. Students gain experience using the latest technologies in precision agriculture through labs held in partnership with leaders from the farm equipment industry.

Landscape and Turf Management (LTM)

- Landscape Management
- Turf Management

In the LTM specialty, students prepare for a career in the green industry — including landscape design, landscape contracting, golf course management, horticulture production and nursery management, and sports turf management. They learn about turfgrass and landscape installation, maintenance, and management.

The LTM curriculum focuses on developing well-rounded students who are in high demand by many branches of the green industry. Students learn about various types of plants, turfgrass management, soils and nutrient management, landscape design, and Irrigation and drainage.

Additional courses are offered in horticulture production, hardscaping, landscape contracting, golf and sports turf management, integrated pest management, and chemical application. Special study classes allow students to work on the Virginia Tech golf course and athletic fields and compete in national competitions. A strong core of business courses is also offered. Laboratories for each class focus on hands-on learning and expose students to a range of applied landscape and turf management skills.

Course Requirements for Major

All students are required to complete an occupational internship for academic credit to provide practical experience in a work environment. The internship is divided into three semesters: a one-credit preparatory course, a summer 10-week/400-hour component, and a one-credit post internship course. Students, in consultation with faculty members, select their internships that may be located anywhere in the United States or abroad.

All admission offers for this program are made though the Agricultural Technology Program. Foreign language is not a requirement of this program. Recommended high school courses include English, Algebra I, and Geometry (minimum), two lab sciences, and a computer class. Students are encouraged to pursue an Advanced or Standard Diploma from high school. Agricultural Technology students have the same rights and privileges as other students at Virginia Tech, except for membership in the Corps of Cadets and participation in NCAA sports. Selected agricultural technology courses can be transferred to a bachelor's degree program in the College of Agriculture and Life Sciences at Virginia Tech.

Satisfactory Progress towards Degree

Students must achieve and maintain a cumulative 2.00 GPA each semester;

All AT courses will be used in the calculation of the GPA.

- Associate of Agriculture with Applied Agricultural Management Option (p. 514)
- Associate of Agriculture with Landscape and Turf Management Option (p. 515)

Director: Susan Sumner
Senior Instructors[1]**:** R. Kohl and T. Martin
Advanced Instructor: W. Gwaltney
Instructor: R. Jeter, J. Dickerson, and M. Holder
Assistant Program Directors: T. Martin and R. Kohl

[1] In addition, selected faculty members from departments within the College of Agriculture and Life Sciences teach courses in the program.

Undergraduate Course Descriptions (AT)

AT 0124 - Ag Mach Mech (3 credits)
Introduction to the operation and maintenance of internal combustion engines, field machinery, tractor and power units, and shop to include the fundamentals of gas and arc welding.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0144 - Communication Skills (4 credits)
Written and oral communication skills, including business and technical writing, public speaking, and interpersonal communication. Instruction and practice in the application of communication skills for business and agriculture. Emphasis on effective use of word processing and email software.
Instructional Contact Hours: (3 Lec, 2 Lab, 4 Crd)

AT 0164 - Introduction to Animal Science (4 credits)
Study of animal products, production methods, and management systems for beef, sheep, horses, dairy, swine and poultry. Classroom instruction, demonstrations, and hands-on experience with livestock and poultry.
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

AT 0174 - Fundamentals of Turfgrass Mgmt (4 credits)
Turfgrass identification, morphology, adaptations, and management systems for parks, lawns, athletic fields, roadsides, and golf courses. Mowing, irrigation, fertilization, soil management, pest management, and other practices that impact turf management. Turfgrass management planning utilizing Integrated Pest Management and Best Management Practices.
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

AT 0184 - Plant Science for Agriculture and the Green Industries (3 credits)
Basic botanical and chemical principles and their applications to sound plant production and management practices. Emphasis on practical experiences in laboratory and field settings.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

AT 0194 - AT Internship (1-6 credits)
Practical experience in a selected agricultural enterprise, under the direct supervision of owner, manager, or supervisor. Internship will be evaluated by faculty member. Written reports of work experience activities are required. Completion of at least 28 credits with a minimum GPA of 2.00 required.
Instructional Contact Hours: (1-6 Lec, 1-6 Crd)
Repeatability: up to 6 credit hours

AT 0204 - Applied Agricultural Personal Finance (3 credits)
Examines issues of agricultural financial principles, financing individual and family needs. This course includes: financial institutions, budgeting, banking services, investing, borrowing, credit management, types of insurance, personal taxes, expense management, personal investments, and time value of money.
Instructional Contact Hours: (3 Lec, 3 Crd)

AT 0224 - Agricultural Technology Management of Personnel and Sales (3 credits)
Principles and practices in recruitment, selection, training, compensation, evaluation, discipline, and dismissal of employees for businesses in the agricultural and green industries. Emphasis is placed on employer/employee relationships. Fundamental understanding of professional selling in the agricultural and green industries. Preparation of sales presentations for agricultural products.
Instructional Contact Hours: (3 Lec, 3 Crd)

AT 0234 - Intro Agribus & Financial Mgt (3 credits)
Functions of agribusiness enterprises within the U.S. economic framework. Economic systems, cooperatives, essential elements of business organization, management tools for decision-making, creating financial statements, business planning, development and analysis of budgets, investing in a business, and time value of money.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0274 - Agribus Marktng & Entrepreneur (3 credits)
Principles of marketing through the agribusiness industry including the strategic management of products, distribution, promotion, and pricing to improve business performance. Entrepreneurship is explored as a career alternative including methods for acquiring necessary start-up capital. Solving business problems utilizing finance and marketing tools.
Prerequisite(s): AT 0234
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

AT 0294 - Livestock Merchandising (2 credits)
A comprehensive study of the principles and activities involved in successfully promoting and merchandising livestock. A livestock auction will be held at the conclusion of the course to provide experiences in advertising, salesmanship, facility development, sale management, and budgeting. Pre: Second year student.
Instructional Contact Hours: (2 Lec, 2 Crd)

AT 0324 - Livestock Reproduction (2 credits)
Principles and practices of reproductive management used to maximize reproductive efficiency in dairy and beef cattle, sheep, swine, and horses. Must be second year student in Agriculture Technology.
Prerequisite(s): AT 0164
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

AT 0344 - Grain Crop Management (3 credits)
Principles and practices of efficient grain crop management with an emphasis on Virginia cropping systems.
Prerequisite(s): AT 0184 and AT 0414
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0354 - Feeds and Feeding (2 credits)
Principles and practices of livestock feeding. Anatomy and physiology of ruminant and non-ruminant digestive systems. Emphasis on nutrient requirements and ration formulation. Computerized ration formulation and evaluation.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

AT 0364 - Ath Fld Prac- Football/Soccer (2 credits)
Learn the principles and techniques of game preparation and routine maintenance on the NCAA football and soccer fields at Virginia Tech. Students laboratory experience will be field work with the Virginia Tech Athletic Department staff. Focusing the football and soccer fields during the NCAA competition season.
Instructional Contact Hours: (6 Lab, 2 Crd)

AT 0374 - Ath Fld Prac- Base/Softball (2 credits)
Learning the principles and techniques of game preparation and routine maintenance on the NCAA baseball and softball fields at Virginia Tech. Students laboratory experience will be field work with the Virginia Tech Athletic Department Staff. Focusing on the baseball and softball fields during the NCAA competition season.
Instructional Contact Hours: (6 Lab, 2 Crd)

AT 0394 - Golf Course Practicum (2 credits)
Principles and techniques of golf course preparation and maintenance required for a high-end golf course. Off-site fieldwork, laboratory experience. Practice maintenance procedures needed to rejuvenate the golf course from the summer season.
Prerequisite(s): AT 0174
Instructional Contact Hours: (0 Lec, 6 Lab, 2 Crd)

AT 0404 - Irrigation and Drainage (3 credits)
Principles applied to solving irrigation and drainage problems. Emphasis placed on hydraulics, irrigation design, irrigation scheduling, and components including heads, valves, controllers, backflow prevention, wire, pipe, and fittings.
Corequisite(s): AT 0114
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

AT 0414 - Soils and Nutrient Management (3 credits)
Physical, chemical, and biological properties of soils; soils suitability for production of a range of agricultural crops to include turfgrass and landscape plants. Properties of common liming, biosolid, manure, and fertilizer materials with emphasis on their environmental impacts. Soil and plant sampling procedures and the analysis of soil tests. Nutrient management plans.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

AT 0424 - Nutrient Management Planning (3 credits)
Basic soil science and fertility principles necessary for crop production. Environmental impacts of phosphorus and nitrogen, environmentally sensitive site considerations, regulations, and how to write a nutrient management plan.
Prerequisite(s): AT 0184 and AT 0414
Instructional Contact Hours: (3 Lec, 3 Crd)

AT 0434 - Pest Management (4 credits)
Identification, classification, and life cycles of economically important insects, plant pathogens, and weeds. Pest management methods: cultural practices, chemical control, biological control, host plant resistance, etc.
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

AT 0444 - CAD for Landscaping (2 credits)
In-depth study and hands-on experience essential to landscape horticulture graphics in a digital format using industry appropriate software.
Prerequisite(s): AT 0684
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

AT 0464 - Forages and Forage Animal Systems (3 credits)
Use of cool-season and warm-season forage species currently grown in Virginia in forage-based animal systems.
Prerequisite(s): AT 0184 and AT 0414
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0484 - Precision Ag and Data Mgmt (2 credits)
Introduction to various tools and applications related to precision agriculture. Collection, analysis, and effective interpretation and utilization of precision agriculture data, including soil test data, precision fertilizer, and pesticide data.
Prerequisite(s): AT 0184 and AT 0344
Instructional Contact Hours: (2 Lec, 2 Crd)

AT 0494 - Dairy Management (3 credits)
Concepts of efficient and profitable management of modern dairy herds. Application of basic principles of business, milking, mastitis control, milk quality, herd replacements, feeding, breeding, reproduction, herd health, housing, and milk marketing management to profitable dairy farming.
Prerequisite(s): AT 0164
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0504 - AT First Year Experience (2 credits)
Orientation course for first semester AT students providing skills, resources and fundamental knowledge to enhance learning experiences and support success. Introduction to study skills and good testing habits, program requirements, opportunities and careers within options, and skills that are essential to become leaders in the agriculture and green industries.
Instructional Contact Hours: (2 Lec, 2 Crd)

AT 0514 - Cont Ag Issues (3 credits)
A survey course designed to acquaint the student with the concerns and critical issues impacting the field of agriculture. Contemporary agricultural issues will be explored.
Instructional Contact Hours: (3 Lec, 3 Crd)

AT 0524 - Whole Farm Planning (2 credits)
Principles of whole farm and agricultural business planning including creating business plans, personal financial plans, and farm/business transition plans. Identifying and solving real-world agribusiness problems utilizing proper planning.
Prerequisite(s): AT 0234
Instructional Contact Hours: (2 Lec, 0 Lab, 2 Crd)

AT 0544 - Horticulture Production (3 credits)
Production of vegetable, fruit, flowering, and nursery crops, including propagation of these crops. Focus is on the culture of these commodities as alternative agricultural crops, including environmental and cultural requirements for high quality production.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

AT 0554 - Chemical Application (2 credits)
Proper application of pesticides and other agricultural chemicals used in landscape and turf management and in production agriculture; including application methods, equipment calibration and configuration, occupational health and safety, and pesticide laws and regulations.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

AT 0564 - Herbaceous Plants (2 credits)
Identification, selection, requirements, and uses of herbaceous plant materials commonly found in landscapes; includes annuals, perennials, bulbs, and grasses.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

AT 0574 - Woody Landscape Plants (2 credits)
Identification and uses of evergreen and deciduous woody plant materials common in the landscape industry; including trees, shrubs, and ground covers; proper plant selection and location in the landscape site.
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

AT 0614 - Beef and Sheep Management (3 credits)
Beef cattle/sheep production and management. Emphasis on genetics, nutrition, herd health, reproduction, and marketing to optimize performance and profit. Management and flock decisions based on economic and business principles. Practical experience enhanced through laboratory activities.
Prerequisite(s): AT 0164
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0624 - Horse Management (3 credits)
Horse production and management. Emphasis on genetics, nutrition, herd health, reproduction, and marketing to optimize performance and profit. Management decisions based on economic and business principles. Practical experience enhanced through laboratory activities.
Prerequisite(s): AT 0164
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0654 - Golf Course Design and Rules (2 credits)
Principles of golf course design and rules of the game, including: evolution, fairness, progression, hazards, shot value, and safety. The United States Golf Associations rules of golf will be covered.
Instructional Contact Hours: (2 Lec, 2 Crd)

AT 0664 - Golf & Sports Turf Management (3 credits)
Management of turfgrass on modified soil. Advanced management techniques and manipulation of nutrition and cultural practices to reduce plant stress or increase plant tolerance. Intensive turfgrass pest identification, life cycles, environmental conditions, and methods of effective control. Integrated pest management and best management practices.
Prerequisite(s): AT 0174
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

AT 0674 - Spanish for the Green Industry (3 credits)
Dialogue-based language skills focused on vocabulary and grammatical structures common to agricultural and green industries. Includes vocabulary and contexts specific to activities in greenhouse, nursery, turf, and landscape environments. Elements of Spanish culture are included throughout the course. Pre: Prior study in Spanish is helpful but not required.
Instructional Contact Hours: (3 Lec, 3 Crd)

AT 0684 - Landscape Design (3 credits)
Principles and practices involved in the development and interpretation of landscape designs; proper selection and use of landscape construction materials and methods of construction. Introduction to utilizing computer-aided drafting.
Prerequisite(s): AT 0564
Corequisite(s): AT 0574
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0694 - Landscape Contracting (3 credits)
Interpreting a landscape design and properly installing plant materials. Preparing bids for customers using cost accounting principles. Maintaining and renovating landscapes as well as exploring careers and business opportunities in the landscaping industry.
Prerequisite(s): AT 0564 and AT 0574
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

AT 0704 - Turfgrass Capstone Project (3 credits)
Capstone course for the Landscape Turfgrass Management option of the Agricultural Technology program. Problem based learning course to evaluate selected turfgrass problems for stakeholders such as golf courses, athletic fields and parks and recreation departments facility administrators. Students to look holistically at a problem and use critical thinking, experiences and knowledge from previous class work to create custom solutions. For second-year students only.
Prerequisite(s): AT 0664
Instructional Contact Hours: (1 Lec, 4 Lab, 3 Crd)

AT 0714 - Hardscape Materials & Instal (2 credits)
Non-plant portions of landscape construction such as rock walls, paver floors, arbors, and water gardens. The course covers the materials, construction. Restricted to students in the Landscape & Turf Management option in the Agricultural Technology Program.
Instructional Contact Hours: (6 Lab, 2 Crd)

AT 0724 - Landscape Skills Practicum (1 credit)
This course provide an introduction to a multitude of skills that are important for success in the landscape industry. Each session is set in a competitive environment emphasizing the development of a selection of hands-on skills, including safe equipment operation, landscape and hardscape installation, management and estimating techniques, and arboculture methods.
Instructional Contact Hours: (2 Lab, 1 Crd)

AT 0734 - Risk Management in Agriculture (2 credits)
Fundamentals of managing risk in agriculture, particularly for production of row crops and livestock, including sources of risk and cost/benefit analysis of various risk mitigation strategies. Commodity futures contracts and options as price risk management tools. Government policies, particularly crop and livestock insurance provisions of the current Farm Bill.
Corequisite(s): AT 0234
Instructional Contact Hours: (2 Lec, 2 Crd)

AT 0974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AT 0984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AT 0994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Associate of Agriculture with Applied Agricultural Management Option

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
AT 0144	Communication Skills	4
AT 0184	Plant Science for Agriculture and the Green Industries	3
AT 0194	AT Internship	3

AT 0204	Applied Agricultural Personal Finance	3
AT 0224	Agricultural Technology Management of Personnel and Sales	3
AT 0234	Intro Agribus & Financial Mgt	3
AT 0414	Soils and Nutrient Management	3

AT 0544	Horticulture Production	
AT 0554	Chemical Application	
AT 0614	Beef and Sheep Management	
AT 0624	Horse Management	
AT 0674	Spanish for the Green Industry	
AT 0734	Risk Management in Agriculture	
Subtotal		27
Total Credits		**64**

[1] Prerequisites/corequisites may apply for these elective courses - see your advisor.

Students must achieve a 2.0 cumulative GPA for all hours attempted (including transfer, advanced placement, and credit by examination). All Agricultural Technology courses will be used in calculation of the GPA.

Graduation Requirements

Each student must complete 64 credit hours, as delineated on the program requirements, with a minimum overall GPA and an in-major GPA of 2.0. The in-major GPA calculation will be based on all courses with an AT designator.

Please consult the University Course Catalog or see your academic advisor to develop a plan of study that includes necessary prerequisites.

Foreign Language Requirement

No requirement.

Associate of Agriculture with Landscape and Turf Management Option

Program Curriculum

Code	Title	Credits

No requirement.

Agricultural, Leadership, and Community Education

Our Website (http://www.alce.vt.edu)

Overview

The Department of Agricultural, Leadership, and Community Education at Virginia Tech is committed to preparing students for success in professions that apply agricultural content to social settings. We offer a majors in Agricultural and Extension Education and Community Leadership and Development. Our minors include Leadership and Social Change and Teaching and Learning in Agriculture. Our students will experience an interdisciplinary program of study designed to address the growing needs of today's evolving agricultural and food systems. The Leadership and Social Change minor is for students planning to pursue careers in a variety of different fields including non-profit organizations, government governmental and non-governmental agencies, industry, and educational sectors. The minor for Teaching and Learning in Agriculture is a great opportunity to learn more about the practical skills of teaching agriculture to supplement your major. Throughout this minor's curriculum, you will examine educational practices and use them to learn applicable skills for your future career.

Agricultural and Extension Education Major (AEE)

The Agricultural and Extension Education major prepares individuals to excel in careers related to youth education in community programs, middle and high school agricultural education, and adult education.

Community Leadership and Development (CLD)

The Community Leadership and Development major is intended for students interested in bridging community-based education efforts with leadership development in agricultural contexts, including non-profit, government, commodities, and industry/corporate roles.

Degree Requirements

For additional information about both degrees, contact Courtney Collins, Academic Advisor and Program Coordinator, cswanson8@vt.edu, 540-231-3694.

Leadership and Social Change Minor (ILRM)

The Leadership and Social Change minor introduces students to the academic study of leadership and provides them with interdisciplinary skills to solve complex societal issues at the local, national, and international levels. While engaging in the study of leadership, students will also learn about the Social Change Model of Leadership Development created specifically for college students. This model helps students understand themselves (individual values), how to work with others (group values), and how to better serve their communities (society values). In this process, students will not only learn *about* leadership but will also answer the question: leadership *for what*?

The Leadership and Social Change minor requirements may be found by visiting the University Registrar website at https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

For additional information about the minor, contact Dr. Austin Council at (540) 231-8188 or adc@vt.edu.

Teaching and Learning in Agriculture Minor (TLAG)

The minor for Teaching and Learning in Agriculture will capture the interest of individuals interested in learning how to apply practical educational pedagogy in diverse career settings across all areas of

agriculture and life sciences. Completion of the minor will offer students job market opportunities beyond those specifically associated with their major.

The Teaching and Learning in Agriculture minor requirements may be found by visiting the University Registrar website at https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html (https://nam04.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.registrar.vt.edu%2Fgraduation-multi-brief%2Fchecksheets.html&data=05%7C02%7Cmgreaud%40vt.edu%7Cbf0faeda90f6418c155708dc8729037d%7C6095688410ad40fa863d4f32c1e3a37a%7C0%7C0%7C638533857415601467%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C&sdata=uLFeG1x52ecd7v6SNx6FFDm3TSROgsrk93J%2F8Wo4Vtg%3D&reserved=0).

For more information about the minor, contact Dr. Brett Milliken at (540) 231-1003 or bmilliken@vt.edu (https://nam04.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvt-next.courseleaf.com%2Fcourseleaf%2Fbmilliken%40vt.edu&data=05%7C02%7Cmgreaud%40vt.edu%7Cbf0faeda90f6418c155708dc8729037d%7C6095688410ad40fa863d4f32c1e3a37a%7C0%7C0%7C638533857415616227%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C0%7C%7C%7C%7C&sdata=F8%2FPho6iQWjYRU3L2ctR1NHw6VFCX3iryxN1Dmkf8Is%3D&reserved=0).

Satisfactory Progress

Once students enrolled in the AEE or CLD major have attempted 72 hours (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" will consist of:

- GPA of at least 2.0
- at least 24 credits that apply to the Curriculum for Liberal Education, and
- at least 9 semester credits of departmental requirements.

- Agricultural and Extension Education Major (https://catalog.vt.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-community-education/agricultural-extension-education/)
- Community Leadership and Development Major (https://catalog.vt.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-community-education/community-leadership-development/)

Head: Tracy Rutherford
Professors: L. V. Crowder, E. K. Kaufman, K. L. Niewolny, R. D. Rudd, T. A. Rutherford, and D. M. Westfall-Rudd
Associate Professors: T. G. Archibald, C. R. Friedel, and H. H. Scherer
Assistant Professors: T. A. Drape, R. Nayak, J. Parrella, and H. M. Sunderman
Collegiate Faculty: A. D. Council, K. McCain, D. B. Milliken, and J. H. Walz
Instructor/Lecturer: S. C. Mariger and M. M. Seibel
Adjunct/Affiliate Faculty: S. J. Manchester, D. Odoom, J. Obeng-Baah, and R. J. Rateau
Adjunct Associate Professor: F. Shushok
Emeritus Faculty: S. R. Burke, W. G. Camp, J. R. Crunkilton, and J. H. Hillison

Undergraduate Program Director: D. M. Westfall-Rudd (540) 231-5717; mooredm@vt.edu

Undergraduate Course Descriptions (ALCE)

ALCE 2094 - Introduction to Metal Fabrication (1 credit)
Introduction to metal working tools, equipment/operation and safety practices. Including the fundamentals of Oxy-Acetylene (OA) gas welding, Shielded Metal Arc Welding (SMAW) and Gas Metal Arc Welding (GMAW).
Instructional Contact Hours: (3 Lab, 1 Crd)

ALCE 2294 - Animal Structures and Environment (3 credits)
Functional considerations in facilities development for production agriculture. Concepts of farmstead planning and system development. Techniques for providing safe and efficient animal production environments, especially for confinement facilities.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 2414 - Identity and Inclusion in Agricultural and Life Sciences (3 credits)
Examines histories of persons representing different social identities, statuses, space, place, and traditions in agricultural and life sciences. Explores how differences influence experiences individuals may have in agricultural and life sciences. Apply ethical reasoning practices to recognize and addresses critical issues surrounding inclusion of diverse populations within agricultural and life sciences education and leadership.
Prerequisite(s): ENGL 1106
Pathway Concept Area(s): 1A Discourse Advanced, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AINS 2414

ALCE 2484 - Engine and Power Train Technology (3 credits)
Engine and power train technology with an emphasis on the fundamentals of internal combustion engines, electrical systems, power transmission systems and maintenance practices.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

ALCE 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALCE 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALCE 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALCE 3004 - Educational Programs in Agricultural and Life Sciences (3 credits)
Offers a foundation for student engagement and exploration of educational programs within agricultural and life sciences. Formal and non-formal learning contexts in local community programs. Opportunities include fieldwork assignments.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 3014 - Leadership Effectiveness for Professionals in Agricultural Organizations (3 credits)
Leadership theory and skills required to perform effectively in leadership positions within agricultural organizations and communities. Leadership skills, personal development, teamwork, and social responsibility in agriculture industry.
Prerequisite(s): LDRS 1015 or LDRS 1414
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 3084 - Agricultural Metal Fabrication (3 credits)
Introduction to metal working tools, equipment, and processes. Fundamentals of hot and cold metal working, plumbing, and welding applications, including inert gas welding processes. Junior standing or consent of instructor is required.
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)

ALCE 3494 - Advanced Welding Technology (1 credit)
Techniques in metal work and welding that include tool maintenance, Oxy-Acetylene (OA), Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Gas Tungsten Arc Welding (GTAW). Design of welded structures, fundamentals of heat treatment, plastic welding and Plasma Arc Cutting (PAC). Pre: Junior standing.
Instructional Contact Hours: (3 Lab, 1 Crd)

ALCE 3624 - Communicating Ag and Life Sciences in Writing (3 credits)
Communication skills necessary to carry out work with the general public and audiences in the food, agriculture, and natural resources fields. Professional writing for diverse audiences, assessing best written communication practices, and on creation of a portfolio, utilizing multiple platforms of written communication. Pre: Junior standing.
Prerequisite(s): ENGL 1106
Pathway Concept Area(s): 1A Discourse Advanced, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 3634 - Communicating Ag and Life Sciences in Speaking (3 credits)
Strategies and techniques for effective oral communication in professions related to food, agriculture, and natural resources. Oral, visual, and interpersonal communication, ethical framing of complex problems, group leadership, and meeting management.
Prerequisite(s): ENGL 1106
Pathway Concept Area(s): 1A Discourse Advanced, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 3814 - Life Sciences Communication & Public Engagement (3 credits)
Identifying principles of inclusive and culturally responsive public engagement. Creating life sciences communication strategies and community-centered approaches that maximize public engagement. Evaluating effects of life sciences communication strategies on public engagement.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

ALCE 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ALCE 4004 - Teaching Adults in Agriculture (2 credits)
Organizing classes, developing programs of instruction and teaching techniques applicable to out-of-school groups in Agriculture.
Instructional Contact Hours: (2 Lec, 2 Crd)

ALCE 4014 - Introduction to Cooperative Extension (3 credits)
An overview of the Cooperative Extension Service as it applies to non-formal education for citizens and communities. Major areas discussed include history, organization, functional areas, responsibilities of local agents, employment in extension, and educational program planning.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 4024 - Managing Agricultural Supervised Occupational Experience Project (2 credits)
Major emphasis will be given to the agricultural teachers responsibility for supervision of the Supervised Occupational Experience Program (SOEP). The course will emphasize the ownership project, the cooperative placement project, maintaining record books, and supervising the SOEP.
Instructional Contact Hours: (2 Lec, 2 Crd)

ALCE 4034 - Methods of Planning Education Programs for Agriculture (3 credits)
Course examines the procedures involved in the development of courses, curriculum, and instructional materials for education programs in agriculture.
Prerequisite(s): ALCE 3004
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)
Course Crosslist: EDCT 4034

ALCE 4044 - Agricultural Sciences Seminar (3 credits)
A senior capstone course addressing issues of importance for majors in Agricultural Sciences. The course will emphasize a synthesis of research results from collected data and information on contemporary problems in agriculture and related fields and a sharing of the results. It will emphasize the development of skills in critical analysis. Senior Standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 4054 - Internship in Coop Extension (1-16 credits)
Off-campus participation experience for those preparing to become extension agents in the Cooperative Extension Service. Variable Credit; 6-16 credits.
Instructional Contact Hours: (1-16 Lec, 1-16 Crd)

ALCE 4064 - Ag Mechanical Lab Management (3 credits)
Plan, organize, and manage secondary school mechanics laboratories. Management of the instructional program, facility, equipment, inventory, safety, liability, personnel, material control, and student customer work.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

ALCE 4234 - Curriculum for Career and Occupational Education (3 credits)
Provides current and prospective career and occupational education teachers with research bases, resources, and available curricula for teaching content in the respective disciplines. Develops the ability to plan, manage, develop, and evaluate curricula. The prerequisite EDCT 2604 will be waived for Agricultural Education students. Pre: Junior Standing
Prerequisite(s): EDCT 2604
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 4244 - Teaching and Training Methods in Agricultural and Life Sciences (3 credits)
Survey of strategies for design, implementation, and evaluation of instruction and training practices in agricultural life sciences. Applications of principles in formal and non-formal educational settings, including schools, extension, and industry. Pre: Junior standing
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 4254 - Adult Vocational&Technical Ed (3 credits)
Theory, practices, and procedures involved in planning, developing, implementing, managing, and evaluating adult education programs in Vocational and Technical Education. Completion of, or concurrent enrollment in, courses in teaching methods and curriculum required.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 4304 - Community Education and Development (3 credits)
Comprehensive examination of community education and development. Community/sustainable community development, strategies for mobilizing social change in/with communities. Explore participatory, popular, and community-based education from rural and urban settings. Globalization, sustainability, and social movement discourse with emphasis on agricultural, health, and food system examples. Pre: Junior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

ALCE 4744 - Methods, Materials and Practices in Instruction (1-6 credits)
Planning, using, evaluating classroom procedures; selection and organization of subject content and materials in vocational and technical education. Maximum credit: 6 Consent required.
Corequisite(s): EDCT 4754
Instructional Contact Hours: (1-6 Lec, 1-6 Crd)

ALCE 4754 - Internship in Education (1-16 credits)
Planned program of clinical practice in education under the direction and supervision of a university supervisor and a selected practitioner. Recommendation of program area and successful completion of Professional Studies required.
Instructional Contact Hours: (1-16 Lec, 1-16 Crd)

ALCE 4884 - Youth Program Management (3 credits)
Organizational design of educational youth programs such as 4-H and FFA, including administrative planning, human resource development, recruitment, marketing, and budgeting.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: EDCT 4884

ALCE 4964 - Field Study/Practicum (1-19 credits)
Instructional Contact Hours: Variable credit course

ALCE 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALCE 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ALCE 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Undergraduate Course Descriptions (LDRS)

LDRS 1414 - Citizen Leadership (3 credits)
Language, theories, concepts, and competencies associated with practicing effective leadership and social change and developing intercultural and global awareness.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

LDRS 1424 - Citizen Leadership Praxis (3 credits)
Application of foundational knowledge of leadership, intercultural and global awareness, the social change model, and socially responsible leadership concepts toward a service-learning project.
Prerequisite(s): LDRS 1414
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

LDRS 2014 - Principles of Peer Leadership (3 credits)
Theories and basic principles associated with being a positive influence on fellow students, identification of contemporary college student issues, leadership skills utilized to motivate peers in teamwork-based scenarios, leadership skills associated with human development, ethics, maintaining community, and conflict in decision making. May be repeated once for a maximum of 6 credits.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

LDRS 2964 - Field Study (1-19 credits)
May be repeated for a maximum of 6 credits.
Instructional Contact Hours: Variable credit course
Repeatability: up to 6 credit hours

LDRS 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LDRS 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LDRS 3104 - The Dynamics of Leadership (3 credits)
This course examines advanced leadership theories and leadership effectiveness in todays organizations.
Prerequisite(s): LDRS 1015 or LDRS 1414
Instructional Contact Hours: (3 Lec, 3 Crd)

LDRS 3304 - Elements of Team Leadership (3 credits)
Develop effectiveness in leading, delegating, and communicating within a team environment. Emphasis on motivation of team members, emotional intelligence, ethical issues, team member dynamics, team management, and effective team processes.
Prerequisite(s): LDRS 1015 or LDRS 1414
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

LDRS 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

LDRS 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LDRS 4044 - Leadership Studies Capstone (1 credit)
Culmination of comprehensive knowledge gained about leadership and social change throughout a students undergraduate career. Involves reflection on collegiate leadership experiences and coursework in the leadership and social change minor. Results in student development of an electronic portfolio (i.e., ePortfolio). Pre: Senior standing.
Prerequisite(s): LDRS 1015 or LDRS 1414
Instructional Contact Hours: (1 Lec, 1 Crd)

LDRS 4514 - Skills for Nonprofit Organizational Leaders (3 credits)
Skills essential for leading nonprofit organizations. Nonprofit sector, governance, fundraising, financial administration, managing personnel, media communications, strategic planning, and leadership skills. Pre: Junior Standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

LDRS 4754 - Internship (1-19 credits)
Instructional Contact Hours: Variable credit course

LDRS 4964 - Field Study (1-19 credits)
May be repeated for a maximum of 6 credits.
Instructional Contact Hours: Variable credit course
Repeatability: up to 6 credit hours

LDRS 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LDRS 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LDRS 4994 - Undergraduate Research (1-19 credits)
Honors
Instructional Contact Hours: Variable credit course

LDRS 4994H - Undergraduate Research (1-19 credits)
Honors
Instructional Contact Hours: Variable credit course

Biochemistry

Our Website (http://www.biochem.vt.edu)

Overview

The Bachelor of Science in biochemistry is designed to provide students with a thorough foundation in chemistry and biology and an appreciation of how these sciences are integrated to explore the molecular mechanisms underlying biological processes. The plan of study prepares students for careers in medicine, veterinary medicine, biomedical research, agriculture, industrial biochemistry, or biotechnology. In addition, it provides the background for post-graduate studies in the life sciences or professional studies in medicine, nursing, veterinary medicine, dentistry, pharmacy, and clinical chemistry.

The department offers the undergraduate biochemistry degree in the College of Agriculture and Life Sciences.

Bioinformatics/Genomics

The department supports students' interest in bioinformatics/genomics by providing instruction and laboratory experience in those areas. Students are advised of appropriate supporting courses in computer science that may be used toward a minor in Computer Science.

Satisfactory progress requirements toward the B.S. in Biochemistry can be found on the major checksheet by visiting the University Registrar website at https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Degree Requirements

To qualify for a major in biochemistry, the department requires that students maintain a minimum 2.0 grade point average (GPA) for the hours passed in all required biochemistry, biology, and chemistry courses. In addition, the department requires that a student earn a C- or better in all required biochemistry, chemistry, and biology courses.

The plan of study allows time for qualified students to participate in undergraduate research (BCHM 4994 Undergraduate Research). Qualified students are strongly encouraged to initiate research activity prior to their senior year. A minimum GPA of 2.5 is required for enrollment in BCHM 4994 Undergraduate Research. Students participating in undergraduate research are encouraged to present a senior thesis. Students admitted to the Honors College may use undergraduate research credits toward an Honors Laureate Diploma.

Biochemistry majors may participate in the Cooperative Education Program that alternates academic study with employment experience. Additional information pertaining to the CO-OP program is included in the "General Information" section of this catalog. Summer internships with various businesses and governmental agencies are frequently available, particularly to rising seniors.

The minimum number of credits required for the B.S. in Biochemistry is 120.

The department also offers a graduate program leading to the M.S. and Ph.D. The Department of Biochemistry offers a route to earn a Master of Science in the Life Sciences for students currently enrolled in our B.S. program, who earn an accelerated B.S./M.S. degree combination. Twelve credits may be counted toward the requirements for both degrees.

- Biochemistry Major (p. 522)

Head: G. E. Gillaspy
Associate Head: P. Sobrado
Professors: D. R. Dean, G. E. Gillaspy, P. J. Kennelly, T. J. Larson, J. Li, B. Mukhopadhyay, P. Sobrado, Z. Tu, and J. Zhu
Associate Professors: R. F. Helm, M. W. Klemba, and D. Slade
Assistant Professors: K. D. Allen, B. J. Jutras, C. Lahondere, J. Lemkul, C. Vinauger
Professor of Practice: J. Tokuhisa
Research Assistant Professors: K. Phillips and E. Purwanti
Collegiate Professors: K. Hite, and S. Marine
Adjunct Faculty: D. Capelluto, B. Costa, C. Finkielstein, D. Good, J. Mahaney, D. Tholl, C. Thorpe
Academic Support Advisors: A. Rasor (231-8734) arasor@vt.edu, J. Stewart (231-077) jen2@vt.edu
Undergraduate Program Director: J. Zhu (231-3841) zhujin@vt.edu
Undergraduate Lab Coordinator: T. J. Larson (231-7060) tilarson@vt.edu
Study Abroad Program Director: M.W. Klemba (231-5729) klemba@vt.edu

Undergraduate Course Descriptions (BCHM)

BCHM 1014 - Biochemistry First Year Experience (1 credit)
Academic and career planning for biochemistry majors and students considering biochemistry as a major. Topics discussed: academic success, careers, diversity and inclusion, graduate school, professional health opportunities, library resources, wellness, undergraduate research, internships, study abroad, and service-learning opportunities. Introduction to biochemistry discipline and faculty. Development of a comprehensive academic plan of study and opportunity for self-awareness/reflection.
Instructional Contact Hours: (1 Lec, 1 Crd)

BCHM 1024 - Introductory Experience in Biochemistry Research Skills (1 credit)
Introduction of foundational knowledge on the central tenets of biochemistry and research skills. Development of critical thinking skills and professional development through networks. Collection, analysis, and interpretation of data. Evaluation of literature, use of citation management programs, and development of scientific writing and presentation skills. Data management, visualization, and ethics in the context of biochemistry. Emphasis on teamwork, literature reading, and scientific communication skills.
Instructional Contact Hours: (1 Lec, 1 Crd)

BCHM 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 2024 - Concepts of Biochemistry (3 credits)
Short course in fundamentals of the chemistry of living systems. Introduction to major categories of biochemical substances, metabolic pathways, and principles of biochemical information transfer. (No credit for majors).
Prerequisite(s): CHEM 2514 or CHEM 2535
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 2114 - Biochemical Calculations (2 credits)
Fundamental mathematical relationships in biochemistry. Calculations central to the investigation of biochemical phenomena including aqueous chemistry, spectrophotometry, enzyme kinetics and thermodynamics. Introduction to the core calculations used in experimental biochemistry and the strategies employed for solving biochemical problems.
Prerequisite(s): CHEM 2535 or CHEM 2565
Instructional Contact Hours: (2 Lec, 2 Crd)

BCHM 2354 - Biochemical Techniques (3 credits)
Fundamental aspects of biochemical laboratory measurements. Properties of biomolecules and methods for their isolation, separation, detection and quantification. Calculations required to provide quantitative biomolecular data. Common instrumentation in biochemical laboratories, their principles of operation, and their roles in biochemical assays and measuring biochemical interactions. Overview of on-line resources for biochemical information.
Prerequisite(s): CHEM 2514 or CHEM 2535 or CHEM 2565
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 2364 - Biochemical Techniques Laboratory (1 credit)
Operation of key equipment found in a biochemistry/molecular biology laboratory (e.g., enzyme kinetics, PCR); analyzes, interpretation and presentation of data acquired in laboratory-based protocols; report of results of experiments; use of laboratory automation for biochemical measurements.
Corequisite(s): BCHM 2354
Instructional Contact Hours: (3 Lab, 1 Crd)

BCHM 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 2974H - Independent Study (1-19 credits)
Honors section.
Instructional Contact Hours: Variable credit course

BCHM 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 3114 - Biochemistry for Biotechnology and the Life Sciences (3 credits)
Survey presentation of the basic principles of biochemistry as they apply to biotechnology. Topics covered include protein structure, enzymology, cellular organization, and biochemical regulation. Special emphasis will be given to gene structure, transcription, and translation, cellular organization, and cloning, sequencing, modification and expression of recombinant DNA. Examples will be given of agricultural/medical/industrial applications of cellular and molecular biochemical knowledge. Non-majors only.
Prerequisite(s): CHEM 2536 or CHEM 2566
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 3634 - Analysis of Biochemical Literature (3 credits)
Analysis of primary scientific literature using recently published biochemical research articles. Application of the CREATE model (Consider, Read, Elucidate and generate a hypothesis, Analyze and interpret the data, and Think of next Experiment) as a conceptual framework. Evaluation of article data, limitations and broader impacts. Impact of scientific philosophy, experimental design, and peer review in scientific research and publishing. Pre: Junior standing.
Prerequisite(s): (BIOL 2134 or BIOL 2604) and CHEM 2535
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

BCHM 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 4054 - Genomics (3 credits)
A contemporary analysis of the development, utility and application of high-resolution methods for the study and manipulation of the complete genomes of organisms. The use of new techniques for genomic, metabolic and protein engineering (functional genomics), including high-throughput methods and nanotechnology, will be emphasized.
Prerequisite(s): BCHM 3114 or BCHM 4116 or BIOL 3774
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: APSC 4054

BCHM 4074 - Career Orientation (1 credit)
Examination of various career opportunities for biochemists in industry, academia, medicine and related health sciences. Introduction to resources for locating career opportunities, resume preparation and interview skills. Restricted to biochemistry majors. Junior standing required. I
Corequisite(s): BCHM 4115
Instructional Contact Hours: (1 Lec, 1 Crd)

BCHM 4115 - General Biochemistry (4 credits)
Metabolism and chemistry of carbohydrates, proteins, lipids, and nucleic acids with emphasis on interactions and comparative aspects of microbial, plant, and animal forms. For students in the biochemistry curriculum and other students interested in a foundation course. (Students are required to have at least a C- in both CHEM 2535 and 2536 to be admitted to BCHM 4115).
Prerequisite(s): (CHEM 2536 or CHEM 2566) and (BCHM 2114 or CHEM 2154)
Instructional Contact Hours: (4 Lec, 4 Crd)

BCHM 4116 - General Biochemistry (3 credits)
Metabolism and chemistry of carbohydrates, proteins, lipids, and nucleic acids with emphasis on interactions and comparative aspects of microbial, plant, and animal forms. For students in the biochemistry curriculum and other students interested in a foundation course. (Students are required to have at least a C- in both CHEM 2535 and 2536 to be admitted to BCHM 4115). I,II
Prerequisite(s): BCHM 4115
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 4124 - Laboratory Problems in Biochemistry and Molecular Biology (6 credits)
Presentation of major analytical techniques of importance to biochemistry and molecular biology, including spectrophotometry, electrophoresis, chromatography. Lab study of selected principles and methods used in biochemistry and molecular biology.
Prerequisite(s): BCHM 4115 and (CHEM 2114 and CHEM 2124) or (CHEM 3114 and CHEM 3124)
Corequisite(s): BCHM 4116
Instructional Contact Hours: (3 Lec, 9 Lab, 6 Crd)

BCHM 4354 - Biochemical Communication (3 credits)
Exploration of how chemical signals are produced, transported, and influence microbes (Bacterial and unicellular organism (chemotaxis), plants, and animals (olfactory neuroethology). Applications to cell biology, neurobiology, and ecology. Analysis of the interaction between biochemical communication systems and health (diseases). Management, statistical analysis, and interpretation of large datasets related to biochemical communication, using computational approaches.
Prerequisite(s): (BCHM 3114 or BCHM 4115) and (STAT 2004 or STAT 3615)
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 4554 - Biophysics for Biochemistry (3 credits)
Thermodynamics, quantum mechanics, and statistical mechanics in biological systems, with emphasis on theoretical understanding of experimental biophysical methods. Fundamental concepts in protein and nucleic acid folding, dynamics from bond vibrations to kinetics and diffusion, molecular orbital theory, protein-ligand interactions and associated molecular visualization tools. Computational modeling, calculations, and simulation using both quantum and classical mechanics.
Prerequisite(s): BCHM 3114 or BCHM 4115
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 4754 - Internship (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 4784 - Applications in Molecular Life Science (3 credits)
Synthesis and application of biochemistry, cell biology, genetics, genomics, physiology, immunology concepts and techniques to address medical and agricultural problems. Gene characterization and manipulation, protein-based drugs, diagnostics, vaccines, transgenic plants/animals. Analysis, critique, application of research in molecular life science.
Prerequisite(s): (BCHM 3114 and BCHM 3124 and BIOL 3774 and BIOL 4774) or (BCHM 4116 and BCHM 4124)
Instructional Contact Hours: (3 Lec, 3 Crd)

BCHM 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 4974H - Independent Study (1-19 credits)
Honors section.
Instructional Contact Hours: Variable credit course

BCHM 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

BCHM 4994H - Undergraduate Research (1-19 credits)
Honors section.
Instructional Contact Hours: Variable credit course

Total Credits		**120-121**

[1] Concept 7 course may also be used to fulfill part of Concept 2 or Concept 3 requirement.

[2] Students in their senior year with a 3.0 or better GPA may enroll in 5000-level courses satisfying undergraduate degree requirements within their department with the permission of the course instructor and the department head.

Satisfactory Progress Toward Degree

1. After having attempted 36 semester credits (including transfer, advanced placement, advanced standing, credit by examination and course withdrawal hours), students must have completed at least 12 semester credits of the Pathways to General Education.
2. After having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination and course withdrawal hours), students must have completed at least 24 semester credits of the Pathways to General Education.
3. After having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination and course withdrawal hours), students:
   a. Must have an in-major grade point average of 2.0 or greater; and
   b. Must have completed: BCHM 2354 Biochemical Techniques,BCHM 2364 Biochemical Techniques LaboratoryBIOL 1105 Principles of Biology-BIOL 1106 Principles of Biology; BIOL 1115 Principles of Biology Laboratory-BIOL 1116 Principles of Biology Laboratory; BIOL 2004 Genetics; CHEM 1035 General Chemistry-CHEM 1036 General Chemistry; CHEM 1045 General Chemistry Laboratory-CHEM 1046 General Chemistry Laboratory; CHEM 2535 Organic Chemistry-CHEM 2536 Organic Chemistry; CHEM 2545 Organic Chemistry Laboratory-CHEM 2546 Organic Chemistry Laboratory; PHYS 2205 General Physics-PHYS 2206 General Physics; PHYS 2215 General Physics Laboratory-PHYS 2216 General Physics Laboratory.

Graduation Requirements

Credit Hours and GPA Requirements

Graduation requires completion of a minimum of 120 credit hours with a GPA of 2.0 or greater for all hours attempted. In addition, students must have an in-major GPA of 2.0 or greater. **The following courses are used to calculate the in-major GPA (students must earn a grade of C- or better in each of these courses or their approved substitutions):**

Code	Title	Credits
BCHM 4115	General Biochemistry	4

- For ENGL 1106 First-Year Writing: ENGL 1204H
- For STAT 3615 Biological Statistics: STAT 3005 Statistical Methods
- For CHEM 4615 Physical Chemistry for the Life Sciences-CHEM 4616 Physical Chemistry for the Life Sciences: CHEM 3615 Physical Chemistry-CHEM 3616 Physical Chemistry
- For MATH 1025 Elementary Calculus-MATH 1026 Elementary Calculus: MATH 1225 Calculus of a Single Variable-MATH 1226 Calculus of a Single Variable
- For PHYS 2205 General Physics-PHYS 2206 General Physics and PHYS 2215 General Physics Laboratory-PHYS 2216 General Physics Laboratory: PHYS 2305 Foundations of Physics-PHYS 2306 Foundations of Physics

Foreign Language Requirement

Students who did not successfully complete at least two units of a single foreign, classical, or sign language during high school must successfully complete six semester hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement do not count toward the hours required for graduation. Please consult the Undergraduate Catalog for details.

Biological Systems Engineering

Our Website (http://www.bse.vt.edu)

Overview

The mission of the Department of Biological Systems Engineering (BSE) is to develop and disseminate engineering knowledge and practices that protect natural resources and improve sustainable production, processing, and utilization of biological materials.

The teaching program in BSE offers engineering B.S., M.S., and Ph.D. programs for students enrolled in the College of Engineering and service courses for students enrolled in the College of Agriculture and Life Sciences and other colleges. The degree programs in BSE are administered by the College of Engineering; therefore, the curriculum and courses offered for the B.S. in biological systems engineering are listed in the College of Engineering section of this catalog. Students interested in pursuing an undergraduate degree program in Biological Systems Engineering must first be admitted to the College of Engineering.

Service courses designed to meet the needs of students enrolled in different programs in CALS are listed in the following section. These courses generally are not taken to meet engineering degree requirements except as free electives.

Department Head: D. R. Edwards
Associate Head for Undergraduate Studies: D. T. Scott
Graduate Program Director: C. W. Hession
H.E. and Elizabeth F. Alphin Professor: Z. M. Easton
Elizabeth and James E Turner Jr Faculty Fellows: L.-A. H. Krometis and C. Zhang
Professors: J. R. Barone, B. L. Benham, Z. M. Easton, D. R. Edwards, W. C. Hession, L.-A. H. Krometis, D.J. Sample, D. T. Scott, J.S. Wayne, and C. Zhang
Associate Professors: J. Arogo Ogejo, F. Batarseh, J. A. Czuba, R. S. Senger, J. E. Shortridge, V. R. Sridhar, T. M. Thompson, and Z. Wang
Assistant Professors: A. Chandel, J. Chen, A. Duraj-Thatte, W. Sun, and R. C. Wright
Academic Advisor: P. Baker

Undergraduate Course Descriptions (BSE)

BSE 1004 - Engineering Biological Systems for the Global Good (1 credit)
Survey of global societal and technological issues that engage biological systems engineers in the areas of health, environment, food and energy. Application of systems-level approaches to meet engineering challenges that intersect with crucial societal issues, including sustainability and equity. Evaluation of key factors that affect the design, communication, and public acceptance of engineered solutions. Analysis of cultural intelligence, with a specific focus on personality and problem solving styles amongst individuals and teams and productive conflict resolution.
Instructional Contact Hours: (1 Lec, 1 Crd)

BSE 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 2004 - Introduction to Biological Systems Engineering (3 credits)
Introduction to the fundamental concepts of Biological Systems Engineering, including statistics and material and energy balances, through applications in protein separation, hydrology, sediment/nutrient transport, and microbial metabolism. Engineering design process. Engineering problem-solving tools and techniques. Resolving ethical dilemmas. Development of oral and written communication skills; introduction to job searching resources; strategies for career development, and the importance of teamwork and ethics in Biological Systems Engineering.
Prerequisite(s): ENGE 1215 or ENGE 1414
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

BSE 2304 - Landscape Measurements and Modeling (3 credits)
Introduction to land surveying, computer-aided design, and drafting for land and water resources engineering. Representation of features in two and three dimensions for documentation and visualization of watershed engineering projects. Create plans, cross sections, detail drawings, and three dimensional visualizations using computer-aided design and drafting tools.
Prerequisite(s): MATH 1206 or MATH 1226
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

BSE 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 3144 - Engineering Analysis for Biological Systems using Numerical Methods (2 credits)
Solving engineering problems related to biological systems using numerical analysis including root finding, numerical integration, differentiation, interpolation and numerical solution of ordinary differential equations. Error analysis and programming with engineering software. Course requirements may be satisfied by taking MATH 2214 prior to or concurrent with course.
Prerequisite(s): MATH 1226
Instructional Contact Hours: (2 Lec, 2 Crd)

BSE 3154 - Thermodynamics of Biological Systems (3 credits)
Description of biological, chemical and mechanical mechanisms of energy storage and conversion to work. Derivation and use of the first and second laws of thermodynamics (energy and entropy) to analyze processes found in biotechnology, ecological engineering, and living systems. Analysis of thermodynamic cycles and their relevance to biological systems. Introduction of Gibbs energy, equilibrium at specified pH, and calorimetry of biological reactions.
Prerequisite(s): CHEM 1036 and PHYS 2305 and (MATH 2204 or MATH 2204H)
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 3324 - Small Watershed Hydrology (3 credits)
Precipitation, soil physics, infiltration, evapotranspiration, groundwater hydrology, overland flow, open channel flow, flow routing, hydraulic analysis.
Prerequisite(s): PHYS 2305
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 3334 - Nonpoint Source Pollution Assessment and Control (3 credits)
Erosion prediction and control; transport and fate of sediment, nutrients, and microorganisms; design of nutrient management plans, wetlands, detention facilities and other management practices for rural and urban nonpoint source pollution control.
Prerequisite(s): BSE 3324
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

BSE 3504 - Transport Processes in Biological Systems (3 credits)
Introduction to material and energy balances in biological systems. Fundamentals of heat and mass transfer in biological systems. One and two dimensional conduction, convection, and diffusion of thermal energy and mass. Heat and mass transfer rates, steady and unsteady state conduction, convection, diffusion; design of simple heat exchangers. Application of these topics and fluid mechanics to fluid handling, bacterial growth, plant nutrient uptake, enzymatic reactions.
Prerequisite(s): BSE 3154 and ESM 3024 and MATH 2214
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 3524 - Unit Operations in Biological Systems Engineering (3 credits)
Description of unit operations for processing biological materials including evaporation, drying, gas-liquid separations, adsorption, membrane separation, and mechanical separation.
Prerequisite(s): BSE 3154 and MATH 2214
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 3534 - Bioprocess Engineering (3 credits)
Engineering concepts for biological conversion of raw materials to food, pharmaceuticals, fuels, and chemicals. Metabolic pathways leading to products, enzyme kinetics, cell growth kinetics, and analysis of bioreactors and fermenters.
Prerequisite(s): BSE 3154
Corequisite(s): BIOL 2604, BSE 3504
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 4125 - Comprehensive Design Project (2 credits)
4125: Identify and develop an engineering design project using the team approach; use of literature resources to define project objectives and approach; present project proposal in a professional written and oral manner; engineering ethics, professionalism and contemporary issues. Pre: Completion of 96 hours, overall GPA of 2.0 or better. 4126: Complete a comprehensive design project using the team approach, test approach, test prototype, and prepare and present a professional engineering design report.
Prerequisite(s): BSE 3334 or BSE 3524
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

BSE 4126 - Comprehensive Design Project (3 credits)
4125: Identify and develop an engineering design project using the team approach; use of literature resources to define project objectives and approach; present project proposal in a professional written and oral manner; engineering ethics, professionalism and contemporary issues. Pre: Completion of 96 hours, overall GPA of 2.0 or better. 4126 Complete a comprehensive design project using the team approach, test prototype, and prepare and present a professional engineering design report.
Prerequisite(s): BSE 4125
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)

BSE 4204 - Instrumentation for Biological Systems (3 credits)
Introduction to instrumentation and sensors for measurement and control of biological systems. Sensor response dynamics, data acquisition, sensor selection, signal processing and signal conditioning principles. Experimental determination of velocity, pressure, strain, displacement, forces and chemical constituents. Data analysis focused on uncertainty, error and statistical concepts.
Prerequisite(s): PHYS 2306 and ESM 3024
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

BSE 4224 - Field Methods in Hydrology (3 credits)
Site characterization: surveying, channel and floodplain mapping, land use, electronic data acquisition. Techniques for measuring surface and subsurface hydrologic processes: water flow, hydrologic conductivity, precipitation, evaporation. Sampling techniques: surface water, groundwater, and soil pore water sampling. In-situ monitoring: automatic samplers, dataloggers, water quality sondes. Laboratory analyses: good laboratory practices, selection of analytical method, calibration, quality assurance/quality control.
Prerequisite(s): BSE 3324 or FREC 3104 or WATR 3104 or CEE 3314
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

BSE 4304 - Introduction to Watershed Modeling (3 credits)
Fundamental modeling principles used to quantifywatershed hydrology, energy budgets,and associated ecosystem functions, such asplant dynamics and biogeochemical processes, at scales ranging from soil poresto watersheds. Code development and model integration to simulate watershed hydrologyandnutrient and sediment transport. Model calibration and performance assessment. Data discovery, acquisition, and processing of data relevant to hydrologic/watershed modeling.
Prerequisite(s): BSE 3334
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

BSE 4324 - Applied Fluvial Geomorphology (3 credits)
Introduction to landscape evolution. Influence of geology and climate on stream form and processes. Fundamental river mechanics and sediment transport. Stream surveying and classification. River system response to changes in hydrology and sediment supply. Interactions between ecosystems and fluvial systems. Human impacts on stream systems.
Prerequisite(s): BSE 3324 or CEE 3314 or FREC 3104 or WATR 3104
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 4344 - Geographic Information Systems for Engineers (3 credits)
Conceptual, technical, and operational aspects of geographic information systems as a tool for storage, analysis, and presentation of spatial information. Focus on engineering applications in resource management, site selection, and network analysis. Laboratory work and senior standing required.
Prerequisite(s): BSE 3324 or CEE 3314 or FREC 3104 or WATR 3104
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

BSE 4394 - Water Supply and Sanitation in Developing Countries (3 credits)
Social, economic and engineering principles of water supply and sanitation in developing countries as affected by climate, cultural and sociological factors, and material and financial resources. Pre: Junior or Senior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 4524 - Biological Process Plant Design (3 credits)
Engineering principles for design of systems for processing biological materials into primary and secondary products. Delivery, scheduling, storage requirements, economic analysis. Process control and instrumentation of bioprocessing plants.
Prerequisite(s): BSE 3524
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 4534 - Bioprocess Engineering Lab (1 credit)
Unit operations commonly used in processing biological materials, including filtration, heat transfer, ultrafiltration, crystallization, and protein expression by fermentation, purification by chromatography, and characterization by gel electrophoresis.
Prerequisite(s): BSE 3524 and BSE 3534
Instructional Contact Hours: (3 Lab, 1 Crd)

BSE 4544 - Protein Separation Engineering (3 credits)
Concepts, principles and applications of various unit operations used in protein separations. Properties of biological materials, such as cells and proteins, and their influences on process design. Design of processes for protein purification based on the impurities to be eliminated. Concepts and principles of scale-up of unit operations. Case studies in practical protein recovery and purification issues, with a focus on enhanced protein purification by genetic engineering. Protein purification process simulation and optimization using process simulation software.
Prerequisite(s): BSE 3504 or CHE 3144
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CHE 4544

BSE 4554 - Creating the Ecological City (3 credits)
Multidisciplinary, team oriented, problem-solving approaches to creating cities that foster healthy interconnections between human and ecological systems. Analysis of problems from practical and ethical perspectives in the context of the diverse knowledge bases and values of decision-makers. Formation and utilization of integrated design teams to solve complex urban design and planning problems at a variety of scales. Senior standing.
Prerequisite(s): HORT 2134 or FREC 2134
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 4554, HORT 4554, LAR 4554, SPIA 4554

BSE 4564 - Metabolic Engineering (3 credits)
Engineering concepts for analyzing, designing, and modifying metabolic pathways to convert raw materials to food, pharmaceuticals, fuels and chemicals. Cell metabolism, pathway design, bioenergetics, regulatory mechanisms, metabolic modeling, and genetic tools.
Prerequisite(s): BSE 3534 or BCHM 4115 or BIOL 3774
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 4604 - Food Process Engineering (3 credits)
Analysis and design of food processing operations including thermal pasteurization and sterilization, freezing, extrusion, texturization, and mechanical separation.
Prerequisite(s): BSE 3504 and BSE 3524
Instructional Contact Hours: (3 Lec, 3 Crd)

BSE 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BSE 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Entomology

Our Website (http://www.ento.vt.edu)

Overview

Entomology is both a basic and an applied science which deals with the study of insects and their effects upon the health, economy, and welfare of humankind.

The department offers graduate programs leading to the MSLFS (thesis or non-thesis) and PhD (see Graduate Catalog). The departmental teaching, research, and extension programs are closely coordinated with those of other departments.

Insects are important as agricultural, health, and aesthetic pests and as beneficial organisms which serve as pollinators, biological control agents for pest populations, and as components of natural ecosystems. While entomologists have only scratched the surface in the study of insects and related arthropods, their research has yielded great benefits to humankind. Examples include reductions in human diseases transmitted by insects and the leadership shown by entomologists in the development of integrated pest management principles and procedures.

Head: T. J. Kring
Professors: S. A. Entrekin, T. J. Kring, T. P. Kuhar, D. M. Miller, D. G. Pfeiffer, A. Rashed, S. M. Salom, and I. V. Sharakhov
Associate Professors: J. A. Auguste, W. Booth, M. J. Couvillon, G. Eastwood, A. D. Gross, P. Marek, K. B. Rice, S. L. Paulson, and M. V. Sharakhova
Assistant Professors: A. Del Pozo-Valdivia, R. Schürch, and C. S. Yang
Collegiate Assistant Professor: J. M. Wilson

Undergraduate Course Descriptions (ENT)

ENT 2004 - Insects and Human Society (3 credits)
Past, present, and future role of insects in human society. Insect biology, diversity, and identification of common insects and other arthropods. Effects of insects on disease transmission, global food security, and human health. Management of pests of plants, animals, insects as food, and its effects on environmental pollution. Critique popular science communication and its effect on public policy. Human perceptions of insect conflicts, benefits of insects, and arthropod conservation across the world.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ENT 2254 - Bees and Beekeeping (2 credits)
An introduction to honey bee biology, the social organization of the honey bee colony and to modern apiculture, including the use of bees for pollination. Topics on beekeeping include equipment, how to get started, and colony management practices. II
Instructional Contact Hours: (2 Lec, 2 Crd)

ENT 2264 - Bees and Beekeeping Laboratory (1 credit)
A laboratory course which examines the principles and practices of modern apiculture as they relate to honey bee biology. An emphasis is placed on students gaining practical field experience in modern management techniques. II
Corequisite(s): ENT 2254
Instructional Contact Hours: (3 Lab, 1 Crd)

ENT 2804 - Bees: Biology, Diversity, and Sustainability (3 credits)
Foundational introduction to bees. Behavior, communication, and social organization of honey bees; diversity and use of alternative (non honey bee) pollinators; scientific inquiry in ecosystem services management; and current global challenges to and sustainable solutions for pollination in the modern-day agricultural landscape.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ENT 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENT 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENT 3014 - Insect Biology (2 credits)
Insect biology provides an introduction to the science of entomology. The course covers the diversity of insects, their biology and behavior, the importance of insects and insect control programs in agriculture, and the effects that insects have had on human history and culture. Laboratory (3024) is optional.
Prerequisite(s): (BIOL 1005 and BIOL 1006) or (BIOL 1105 and BIOL 1106) or (BIOL 1205H and BIOL 1206H)
Instructional Contact Hours: (2 Lec, 2 Crd)
Course Crosslist: BIOL 3014

ENT 3024 - Insect Biology Laboratory (2 credits)
Taxonomy and ecology of insects commonly encountered. Identification of all orders and many common families. Ecological attributes of each taxon, including food, habitat, life cycle, and behavior. An insect collection is required. I
Prerequisite(s): (BIOL 1005 and BIOL 1006) or (BIOL 1105 and BIOL 1106) or (BIOL 1205H and BIOL 1206H)
Corequisite(s): ENT 3014
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)
Course Crosslist: BIOL 3024

ENT 3254 - Medical and Veterinary Entomology (3 credits)
An introduction to the roles of insects and other arthropods in the direct causation of disease in humans and animals, and as vectors in the transmission of disease organisms. The epidemiology and replication cycles of vector-borne pathogens with major medical and veterinary importance will be examined. Information will be provided on the biology and behavior of disease vectors and external parasites, and on the annoying and venomous pests of humans and animals. Mechanisms of control will be discussed.
Prerequisite(s): (BIOL 1005 and BIOL 1006) or (BIOL 1105 and BIOL 1106) or (BIOL 1205H and BIOL 1206H)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BIOL 3254

ENT 3264 - Medical and Veterinary Entomology Laboratory (1 credit)
Taxonomy and anatomy of insects and arthropods of medical and veterinary importance. Examination of feeding behavior and ecology. Emphasis on the mechanism of injury or pathogen transmission by each group.
Prerequisite(s): (BIOL 1105 and BIOL 1106) or (BIOL 1005 and BIOL 1006) or (BIOL 1205H and BIOL 1206H)
Corequisite(s): ENT 3254
Instructional Contact Hours: (3 Lab, 1 Crd)
Course Crosslist: BIOL 3264

ENT 4254 - Insect Pest Management (3 credits)
Principles of insect pest management with application to the major insect pests found in Virginia. Pest management involves the utilization of all effective control practices in a program which is ecologically and economically efficient. This course is intended for all students with an interest in efficient agricultural production and in reducing losses to our most diverse competitor. One year of General Biology required.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

ENT 4264 - Pesticide Usage (3 credits)
An interdisciplinary study of pesticides used in urban and agricultural environments. Topics studied will include: classification, toxicology, formulation, application techniques, safety, legal considerations, environmental impact, and research and development of new pesticides.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)
Course Crosslist: PPWS 4264

ENT 4354 - Aquatic Entomology (4 credits)
Biology and taxonomy of insects and other macroinvertebrates most commonly encountered in freshwater environments. Selected aspects of biology, such as habitat, feeding, locomotion, and life history. Identification of individual taxa, mostly at family and genus level. Significance of these organism in aquatic ecology, pollution monitoring, and natural resource management.
Prerequisite(s): (BIOL 1005 and BIOL 1006) and (BIOL 1015 and BIOL 1016) or (BIOL 1105 and BIOL 1106 and BIOL 1115 and BIOL 1116)
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)
Course Crosslist: BIOL 4354

ENT 4484 - Freshwater Biomonitoring (4 credits)
Concepts and practices of using macroinvertebrates and fish to monitor the environmental health of freshwater ecosystems. Effects of different types of pollution and environmental stress on assemblages of organisms and underlying ecological principles. Role of biological studies in environmental regulation. Study design, field and laboratory methods, data analysis and interpretation, verbal and written presentation of results.
Prerequisite(s): (BIOL 2804) and (BIOL 4004 or BIOL 4354 or ENT 4354 or FIW 4424 or FIW 4614)
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)
Course Crosslist: BIOL 4484, FIW 4484

ENT 4624 - Animal and Plant Biosafety and Biosecurity (3 credits)
A One Health approach to the concept of biosafety and biosecurity. Principles, tools and techniques of disease detection, early warning, and containment of animal and plant pathogens. Regulatory agencies and guidelines that work to protect human, animal, plant, and environmental health and prevent economic and public health disasters. Pre: Junior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

ENT 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENT 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENT 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Exploring Life Sciences

Overview

The College of Agriculture and Life Sciences offers a program for students who are exploring their major during the first two years at Virginia Tech. This flexibility allows students to explore career opportunities in different fields, to meet faculty in different departments, and to investigate the wide-range of majors and options within the college as well as in the university. Working closely with an advisor in the Office of Academic Programs, students will take foundation courses required of most majors (biological sciences, math, English and chemistry) in the college and be encouraged to take exploratory courses in different departments to sharpen their career focus.

Advisor: Jennifer Carr

Food Science and Technology

Our Website (http://www.fst.vt.edu)

Overview

Food science benefits consumers every day with healthier diets, better tasting affordable foods, and increased food safety. In the Department of Food Science and Technology, you really do get to play with your food! Food Science is an exciting area that applies a blend of basic sciences such as biology, chemistry and physics with microbiology, biochemistry, mathematics and engineering to improve the taste, nutrition and value of the world's food supply. The Food Science and Technology curriculum includes hands-on experiences that supports classroom instruction with practical applications and creative opportunities for product development.

Demand for Food Science and Technology graduates has never been greater. Practically 100% of Virginia Tech's Food Science and Technology graduates have jobs in product development, research, sales and marketing, quality assurance, production management, analytical and technical services and regulatory affairs at graduation. Food processing is the largest industry in the United States. This industry employs nearly 2 million people and accounts for more than 16 percent of the country's gross national product. In a recent survey of U.S. Food Science programs, Virginia Tech ranked 6th nationally in placing Food Science B.S. graduates into graduate or professional schools.

The Virginia Tech Department of Food Science and Technology is the only food science department in Virginia. The program is recognized by the national Institute of Food Technologists (IFT) as having curricula and options that meet the "IFT Undergraduate Education Standards for Degrees in Food Science." Students enrolled in these programs are eligible to apply for IFT Scholarships. The Virginia Tech Food Science Club is a student chapter of the national IFT organization and houses the Product Development and College Bowl teams that permits students to meet professionals in the food industry, develop leadership skills and enhance their educational experience. Students have excellent opportunities for internships as an additional way to explore different facets of the food industry.

The Food Science and Technology building is home to a 5,000 square-foot processing pilot plant, a fully-equipped research winery, a cutting-edge high-pressure processing area as well as laboratories modernly equipped for chemical, physical and microbiological analysis of foods. Due to the department's success and growth we expanded to the Human and Agricultural Biosciences Building (HABB1) and the Integrated Life Sciences Building in the VT Corporate Research Park. HABB1 is, located across the street from our present building provides the department with additional laboratories, pilot plants, taste panel and

food preparation facilities, conference rooms, graduate student research spaces and faculty and staff offices. In the Department of Food Science and Technology you may receive a Bachelor of Science in one of four options: Food Business, Food and Health, Science or Food and Beverage Fermentation.

The Department also offers a minor, as well as a double-major option in Food Science and Technology to students in all other colleges of the university. Students completing the Science or Food & Health option requirements will also be prepared for graduate schools and professional schools of pharmacy medicine, dentistry and veterinary medicine. Food Science and Technology students have the opportunity to participate in stimulating undergraduate research projects and internships.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree.

Satisfactory progress requirements toward the specific degree can be found on the major checksheet by visiting the University Registrar website at http://registrar.vt.edu/graduation-multi-brief/index1.html.

- Food Science and Technology Major with Food and Beverage Fermentation Option (p. 531)
- Food Science and Technology Major with Food and Health Option (p. 532)
- Food Science and Technology Major with Food Business Option (p. 533)
- Food Science and Technology Major with Science Option (p. 535)

Head: R. R. Boyer
Professors: R. R. Boyer, J. D. Eifert, S.F. O'Keefe, M.A. Ponder, S.S. Sumner,
Associate Professors: D. D. Kuhn, A.C. Stewart, L. Strawn, H.Huang, J. Lahne
Assistant Professors: Y. Cheng, R. Cheng, D. Cladis, A. Hamilton, Y. Yin
Assistant Professor of Practice and Undergraduate Program Director: H. Bruce
Graduate Program Director: J. D. Eifert
Collegiate Faculty: K. Hurley
Undergraduate Laboratory Manager: J. A. Eifert
Research Assistant Professor: R. Carneiro
Research and Extension Faculty: B. Driver, K. Parraga-Estrada, A. Sandbrook, L. Schonberger, B. Wiersema, M. Wright
Research Associates: M. Ac-Pangan, Q. Jin, X. Liu, X. Su
Adjunct Faculty: T. Lorca, D. Weller

Research Staff: S. Hayes, H. Wang, K. Waterman
Communication: A. Hood
Administrative Staff: J. Boling, D. Eastwood, T. Pauley, T. Rakestraw

Undergraduate Course Descriptions (FST)

FST 2004 - Exploring Food Science Careers (1 credit)
Food science specialization areas and career opportunities. Experiential learning opportunities developed through bridge experience platform. Introduction to research, internship, study abroad and individualized learning. Career preparation, job and internship search strategies.
Instructional Contact Hours: (1 Lec, 1 Crd)

FST 2014 - Introduction to Food Science (2 credits)
Fundamentals for food science and technology. Integration of basic principles of food safety, human nutrition, food spoilage, and sensory evaluation with the appropriate technology of food preservation and processing.
Instructional Contact Hours: (2 Lec, 2 Crd)

FST 2024 - From Raw to Burnt: Exploring Science and Society through Foods (3 credits)
Food as a method of studying scientific principles and development of society, including acquiring, preserving, processing and consuming foods. Integration of chemistry, biology and physics of grains; salt and spices; meat, poultry, and fish; dairy and eggs; fruits and vegetables; and fat and oils, with the advancements in and the cost to human civilization from historical and ethical perspectives of food production. Scientific principles demonstrated in food preparation.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 4 Reasoning in Natural Sci., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 2044 - Food, War and Conflict (3 credits)
Explores the history of food production and processing relative to the commencement or continuation of conflict. Examines why and how wars have been fought over economic policies, food trade and control of food supplies. Examines efforts to protect food and water supplies from intentional contamination and acts of terrorism. Focus on food products and the preservation, processing and distribution technologies that arose from war and conflict.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: IS 2044, PSCI 2044

FST 2244 - Topics in Food Science and Technology (1-3 credits)
Variable topics in food science and technology such as emerging trends, challenges and regulatory policy. Qualitatively and quantitatively explore relevant and timely issues facing food systems. May be repeated for a maximum of six credits with different topics. Pre: Sophomore standing.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 6 credit hours

FST 2424 - Introduction to Food and Beverage Fermentation (3 credits)
Principles, processes, and applications of fermentation in the context of food and beverage production. Explores various fermentation techniques, the chemical processes and microbiology involved, and the role of fermentation in enhancing flavor, texture, preservation, and nutritional value. Hands-on experience through workshops and sensory evaluation.
Prerequisite(s): CHEM 1036
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 2544 - Functional Foods for Health (3 credits)
Introduction to functional foods (foods with additional value beyond basic nutrition) including development of functional foods, novel sources, and traditional foods with value-added health benefit; regulatory issues; and media messages.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: HNFE 2544

FST 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FST 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FST 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

FST 3024 - Principles of Sensory Evaluation (3 credits)
Principles of sensory evaluation including theory, sensory physiology and psychology, experimental methods, applications, and statistical analysis.
Prerequisite(s): STAT 3005 or STAT 3615
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 3114 - Wines and Vines (3 credits)
Development of a working knowledge of world wine styles, wine appreciation, and sensory evaluation of wine. Emphasis on the influences of grape growing and winemaking practices on wine quality, style, economic value, and significance in global food culture. Pre: Must be at least 21 years of age.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: HORT 3114

FST 3124 - Brewing Science and Technology (3 credits)
Study of chemical reactions important in brewing of beer and hard cider. Effects of variations in malting, mashing, and other processing steps on characteristics and quality of beer; fruit sugar, acid and fermentation impacts on cider composition and quality. Investigation of reactions that cause flavor deterioration.
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 3214 - Principles of Meat Science (3 credits)
Muscle biology and biochemistry, fresh meat processing, meat merchandising, processed meats, food safety, meat cookery, and regulations.
Prerequisite(s): ALS 2304 and CHEM 1036
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: APSC 3214

FST 3514 - Food Analysis (4 credits)
Data analysis, sampling techniques, theory and practice of chemical and physical methods of food analysis for determination of food composition; application of analytical methods of quality control and food laws and regulations.
Prerequisite(s): (STAT 3615 or BIT 2405) and (CHEM 2535 or CHEM 2514)
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

FST 3604 - Food Microbiology (4 credits)
Role of microorganisms in foodborne illness, food quality, spoilage, and preservation. Control of microorganisms in foods. Method to enumerate, identify, and characterize microorganisms in foods.
Prerequisite(s): BIOL 2604 and BIOL 2614
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)
Course Crosslist: BIOL 3604

FST 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

FST 4004 - Food Science Experiential Learning Reflection (1 credit)
Reflection of skills and knowledge developed during food science experiential learning process. Analyze curriculum. Development of communication skills to reflect and evaluate their experience.
Instructional Contact Hours: (1 Lec, 1 Crd)

FST 4014 - Concepts of Food Product Development (3 credits)
Application to the food industry of principles and standard practices of research and product development; functionality of food ingredients; students will work in teams to design and develop a new food product.
Prerequisite(s): FST 3604
Corequisite(s): FST 4405, FST 4504
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 4104 - Applied Brewing Science and Engineering (3 credits)
Chemistry, biochemistry, and engineering aspects of brewing operations in the production of beer. Barley, malting, hops, brewing operations, fermentation chemistry, yeast characteristics and finishing operations examined. Calculations of raw materials, brewing and fermentation schedules, and final specifications conducted. Laboratory exercises focused on brewing, brewery engineering, and analysis of intermediate and final products.
Prerequisite(s): FST 3604
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

FST 4204 - Advanced Topics in Food Science and Technology (1-3 credits)
Variable advanced topics in food science and technology such as emerging trends, challenges and regulatory policy. Qualitative and quantitative exploration of relevant and timely issues facing food systems. May be repeated for a maximum of six credits with different topics. Pre: Junior standing.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 6 credit hours

FST 4304 - Food Processing (3 credits)
Basic principles of unit operations. Heat and mass transfer. Equipment in commercially important food processing applications. Raw food materials and packaging. Processing methods to ensure food safety and quality.
Prerequisite(s): BIOL 2604 and BIOL 2614 and (MATH 1025 or MATH 1524)
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 4314 - Food Processing Laboratory (1 credit)
Safety and good manufacturing practice of food processing. Operation of key equipment found in the food industry. Collection, analysis and interpretation of data acquired in lab exercises. Documentation and reporting of findings.
Corequisite(s): 4304 or BSE 4604.
Instructional Contact Hours: (1 Lab, 1 Crd)

FST 4414 - Fermentation Process Technology and Instrumentation (2 credits)
Process design considerations for food and beverage fermentations, and other industrial fermentation processes. Critical process parameters, and instrumentation for fermentation process monitoring. Hands-on process instrumentation for fermentation.
Prerequisite(s): FST 4504 or FST 3604
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

FST 4504 - Food Chemistry (3 credits)
Overview of the chemical and functional properties of food components including major (water, proteins, carbohydrates, enzymes and lipids) and minor (vitamins, minerals, flavors, pigments) constituents; chemical, biochemical reactions and physical phenomena occuring during food handling, processing, and storage; their impact on the nutritional and sensorial quality of food.
Prerequisite(s): BCHM 2024
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 4524 - Food Safety and Quality Assurance (3 credits)
Monitoring safety and quality of food as well as compliance with government regulations. Description of regulatory agencies and food regulations. Development of specifications, food standards and safety critical control points. Systems to assure a safe and quality product, including acceptance sampling and statistical process control.
Prerequisite(s): FST 3604 and FST 4304
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 4534 - Food Chemistry Lab (1 credit)
Investigation of functional properties of proteins, carbohydrates, and lipids in processed foods including effect of environmental conditions; solubility, foaming ability and textural properties of proteins, carbohydrate crystallization, ability of polysaccharides to form gels and pastes, lipid absorption and tenderization, characterization of a natural-occurring enzyme.
Corequisite(s): FST 4504
Instructional Contact Hours: (3 Lab, 1 Crd)

FST 4544 - Distillation and Fermentation Analysis (3 credits)
Sampling and analysis of pre-and post-fermentation foods and beverages to determine process termination, efficiency, and formation of desired and non-desired products. Laws and regulations pertaining to fermented foods and beverages. Distillation as an analytical tool and as a production method for food/beverage products.
Prerequisite(s): FST 4504 and FST 3514
Corequisite(s): FST 4104
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

FST 4634 - Epidemiology Foodborne Disease (3 credits)
Overview of causes, transmission, and epidemiology of major environmental, food, and water borne diseases. Outbreak and sporadic detection, source tracking and control of pathogens. Overview of the impact of foodborne outbreaks on regulatory activities at the national and international level. Corequisite: Enrollment in either FST 3604 or BIOL 4674.
Corequisite(s): BIOL 4674, FST 3604
Instructional Contact Hours: (3 Lec, 3 Crd)

FST 4644 - Fermentation Microbiology (2 credits)
Physiology, biochemistry, and genetics of microorganisms used for production of food ingredients, fermented foods, and beverages. How microorganisms are used in fermentation and the effects of processing and manufacturing conditions on production of fermented foods.
Prerequisite(s): BIOL 2604
Instructional Contact Hours: (2 Lec, 2 Crd)

FST 4654 - Food and Beverage Fermentation (2 credits)
Introduction to the broad range of fermented foods and beverages. Defining quality parameters of fermented foods and beverages. In-depth examination of the processing methods and equipment employed in commercial-scale production of fermented foods and beverages. Historical, cultural, sensory, and nutritional attributes of fermented foods and beverages. Course requirements may be satisfied by taking FST 3604 or FST 4504 prior to or concurrent with course.
Prerequisite(s): FST 4504 or FST 3604
Corequisite(s): FST 4644
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

FST 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FST 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FST 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Food Science and Technology Major with Food and Beverage Fermentation Option

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
ALS 1234	CALS First Year Seminar	1
BCHM 2024	Concepts of Biochemistry	3
BIOL 1105	Principles of Biology	3
BIOL 1106	Principles of Biology	3
BIOL 2604	General Microbiology	3

FST 4654	Food and Beverage Fermentation	
FST 4974	Independent Study [1]	
FST 4994	Undergraduate Research [1]	
PHYS 2206	General Physics	
Study Abroad (As approved by department) [1]		
Free Electives (Please note students may need to take more or less free electives to reach the 120 required credit hours)		
Select remaining credits of free electives		6
Subtotal		16-19
Pathways to General Education		
Pathways Concept 1 - Discourse		
ENGL 1105	First-Year Writing (1F)	3
ENGL 1106	First-Year Writing (1F)	3
ENGL 3764	Technical Writing (1A)	3
Pathways Concept 2 - Critical Thinking in the Humanities		
Select six credits in Pathway 2 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G02)		6
Pathways Concept 3 - Reasoning in the Social Sciences		
Select six credits in Pathway 3 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G03)		6
Pathways Concept 4 - Reasoning in the Natural Sciences		
CHEM 1035	General Chemistry	3
CHEM 1036	General Chemistry	3
CHEM 1045	General Chemistry Laboratory	1
CHEM 1046	General Chemistry Laboratory	1
Pathways Concept 5 - Quantitative and Computational Thinking		
MATH 1025	Elementary Calculus (5F)	3
MATH 1026	Elementary Calculus (5F)	3
STAT 3615	Biological Statistics (5A)	3
Pathways Concept 6 - Critique and Practice in Design and the Arts		
Select six credits in Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D) and Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A)		6
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States [2]		
Select three credits in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07)		3
Subtotal		47
Total Credits		**120-126**

[1] Credits vary depending on course, maximum of three credits allowed for each item.

[2] Pathways 7 may be completed with another Pathways requirement.

Eligibility for Continued Enrollment

1. After having attempted 36 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and freshman rule hours), students must have passed at least 12 semester credits of Curriculum for Liberal Education requirements.
2. After having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and freshman rule hours), students must:
   a. have passed at least 24 semester credits of Curriculum for Liberal Education requirements.
   b. have passed 9 semester credits in the Food and Beverage Fermentation Option requirements.

Graduation Requirements

1. A minimum of 120 credit hours are required for graduation.
2. A minimum 2.0 overall GPA is required for graduation.
3. A minimum 2.0 in-major GPA is required for graduation (only FST courses will be used for in-major GPA calculation).
4. This check sheet contains no hidden prerequisites. Please refer to the Undergraduate Course Catalog or consult your advisor for information about prerequisites.

Foreign Language Requirement

A sequence of 2 foreign languages courses is required for graduation unless 2 high school credits of the same foreign language or 6 transfer credits of foreign language have been earned. These credits do not count toward graduation.

Pathways Concept 6 - Critique and Practice in Design and the Arts		
Select six credits in Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D) and Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D)		6
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States [2]		
Select three credits in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07)		3
Subtotal		47
Total Credits		**120**

[1] Credits vary depending on course, maximum of three credits allowed for each item.

[2] Pathways 7 may be completed with another Pathways requirement.

Eligibility for Continued Enrollment

1. After having attempted 36 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and freshman rule hours), students must have passed at least 12 semester credits of Curriculum for Liberal Education requirements.
2. After having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and freshman rule hours), students must:
   a. have passed at least 24 semester credits of Curriculum for Liberal Education requirements.
   b. have passed 9 semester credits in the Science Option requirements.

Graduation Requirements

This check sheet contains no hidden prerequisites. Please refer to the Undergraduate Course Catalog or consult your advisor for information about prerequisites.

1. A minimum of 120 credit hours are required for graduation.
2. A minimum 2.0 overall GPA is required for graduation.
3. A minimum 2.0 in-major GPA is required for graduation (only FST courses will be used for in-major GPA calculation).

Foreign Language Requirement

A sequence of 2 foreign languages courses is required for graduation unless 2 high school credits of the same foreign language or 6 transfer credits of foreign language have been earned. These credits do not count toward graduation.

1.

Human Nutrition, Foods, and Exercise

Our Website (http://www.hnfe.vt.edu)

Overview

Human Nutrition, Foods, and Exercise (HNFE) is a unique department that examines aspects of human health, including psychosocial aspects of health, behavioral intentions, human movement and performance, and weight management with a focus on chronic disease and prevention. The curriculum builds on the biological, physical, and social sciences. Many health issues including obesity, heart disease, and cancer have been associated with a person's food intake and level of exercise. This has led to increasing emphases on health promotion and disease prevention, and nutrition and exercise professionals are integral members of the health care team. Additionally, students prepared in these content areas are sought after by healthcare professional programs such as nutrition and dietetics, physical therapy, occupational therapy, physician assistant, medicine, athletic training, pharmacy, dentistry, nursing etc. Expanding research by private and government agencies focusing on the role of nutrition and physical activity in health, growth, and aging has created a demand for graduates at the Bachelor of Science (B.S.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) levels who have a background and interest in laboratory and experimental methods in nutrition, foods and exercise science. Faculty and staff in HNFE include interdisciplinary teams that work towards molecular and clinical advances for the prevention and improved treatment of chronic diseases, behavioral discoveries that lead to effective intervention programs for youth and adults and speed the movement from research to practice.

Undergraduate students earn a Bachelor of Science degree in Human Nutrition, Foods, and Exercise with a major in Exercise and Health Sciences and/or Nutrition and Dietetics.

The department participates in the university's Honors Program.

HNFE offers master's and doctoral degrees in specialized areas as they relate to nutrition, physical activity, and health. Graduate students may earn a M.S. or a Ph.D. in HNFE with an emphasis in Molecular and Cellular Science, Clinical Physiology and Metabolism, or Behavioral and Community Science. HNFE also offers a M.S. in Nutrition and Dietetics. Completion of the M.S. in Nutrition and Dietetics leads to eligibility to become a Registered Dietitian Nutritionist (RDN).

Exercise and Health Sciences (EAHS)

Consult: Renee Eaton, Undergraduate Program Director

Students in the Exercise and Health Sciences (EAHS) major are well-prepared for graduate work in many areas of nutrition, exercise physiology, or related sciences. This major also meets admission requirements for medical, dental, physical therapy, pharmacy, physician assistant, athletic training, nursing, and other health professions programs. Flexibility to tailor the degree toward individual long-term goals, including continued education in a health profession or employment, is a key feature of the major. Students who enter the workforce have position titles such as patient care coordinator, clinical technician, fitness and health program coordinator, clinical research coordinator, medical scribe, surgical technician, rehabilitation aide, hospital recruiting specialist, exercise physiologist, health coach, strength and conditioning coach, hospital credentialing specialist, medical device sales associate, and health educator. Students in this major gain knowledge, skills, and abilities specified by the American College of Sports Medicine for certification as an Exercise Physiologist and Clinical Exercise Physiologist as well as the National Strength and Conditioning Association for certification as a Strength and Conditioning Specialist. With the growing attention to the role of nutrition and exercise in health promotion and disease prevention, the EAHS major is especially appropriate for the student preparing for a career in medicine, physical therapy, or a related health field. Most students in the EAHS plan to attend graduate or professional school. Students in the EAHS major must

maintain an overall GPA of 2.5 to remain in the major. Please see the Satisfactory Progress section for additional requirements.

Students in the EAHS major do not meet the ACEND® requirements for a degree in dietetics, and therefore do not earn a DPD Verification Statement. Students, however, may choose to major in both EAHS and Nutrition and Dietetics.

Nutrition and Dietetics (NAD)

Consult: Heather Cox, Director, Didactic Program in Dietetics

The Nutrition and Dietetics (NAD) major is a Didactic Program in Dietetics (DPD), fully accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND®). ACEND® is the education program accrediting agency of the Academy of Nutrition and Dietetics and is recognized by the U.S. Department of Education as a Title IV gatekeeper. Following completion of the B.S. degree, a student will have earned an ACEND® DPD Verification Statement. A student must then complete a graduate degree and an ACEND®-accredited supervised practice program in nutrition and dietetics to be eligible for the Registration Examination for Dietitians. Examples of eligible pathways to the RDN credential include a graduate dietetics program or graduate program completed before, or along with, a dietetic internship. Graduates from the NAD major are competitive applicants for the varied ACEND®-accredited supervised practice programs.

Nutrition and Dietetics students are also eligible to apply to the accelerated track of the HNFE Master of Science in Nutrition and Dietetics in the spring semester before they begin their final academic year. Accepted students are dual enrolled in the B.S. and M.S. programs and complete eligibility to take the board exam to become a Registered Dietitian Nutritionist (RDN) in an accelerated route.

The NAD major prepares graduates to assume a professional role in health care, research, the business/industry environment, public health, and to pursue graduate studies. Most alumni pursue adietetics supervised practice program and become an RDN. Clinical RDNs in hospitals and outpatient clinics provide care to individuals with disease-related nutritional problems. Sports RDNs work with professional sports teams or university sports teams. Community RDNs work in cooperative extension, worksite wellness programs, and community programs serving mothers and children, families of low-income, or older individuals. Business focused RDNs work for food and grocery companies, companies manufacturing nutritional supplements, and may represent medical or health products. Administrative RDNs with management interests find positions in management in a variety of settings such as school nutrition, health care facilities, college or university dining, or hotels and resorts. Registered Dietitians Nutritionists counsel clients of all ages, cultural and ethnic backgrounds, and levels of education.

Students in the NAD major must maintain an overall GPA of 3.0 to remain in the major. Students who want to change their major into NAD must have an overall GPA of 3.0. Please see the Satisfactory Progress section for additional requirements.

Satisfactory Progress

A student in HNFE will be considered to have made satisfactory progress toward the degree when they have successfully completed:

- Overall GPA 3.0 or higher (NAD) or 2.5 or higher (EAHS)
- Grade of C or better in HNFE 1004 Foods, Nutrition And Exercise
- Grade of C- or better in CHEM 1036 General Chemistry, CHEM 1036 General Chemistry, and CHEM 2535 Organic Chemistry or CHEM 2514 Survey of Organic Chemistry.
- These courses must be completed by the time the student has attempted 72 hours:
  - BIOL 1105 Principles of Biology-BIOL 1106 Principles of Biology or equivalent
  - CHEM 1035 General Chemistry-CHEM 1036 General Chemistry or equivalent
  - CHEM 2535 Organic Chemistry or CHEM 2514 Survey of Organic Chemistry
  - HNFE 1004 Foods, Nutrition And Exercise

Students not meeting Satisfactory Progress will have one probationary semester in which to resolve their standing.

Nutrition and Dietetics Restricted Major status: Current Virginia Tech students who wish to change majors to NAD (or add it as a second major) are required to have an overall GPA at or above 3.0 , a grade of C- or higher in CHEM 1035 General Chemistry, and a plan of study that shows appropriate course sequencing and Satisfactory Progress. The GPA threshold of 2.5 (EAHS) and 3.0 (NAD) is required for all students regardless of transfer status. Satisfactory progress towards the B.S. degree is enforced.

- Exercise and Health Sciences Major (p. 542)
- Nutrition and Dietetics Major (p. 544)

Head: Stella L. Volpe
Professors: G. Davis, B. Davy, K. Davy, R. Grange, E. Larson-Meyer, D. Liu, E. Serrano, E. Schmelz, S. Volpe, and J. Williams
Associate Professors: D. Good, S. Harden, Y. Ju, and V. Kraak
Assistant Professors: J. Basso, S. Craige, A. DiFeliceantonio, J. Drake, V. Hedrick, C. Rafie, S. Shin, and J. Stein
Collegiate Associate Professor: A. Anderson
Senior Instructors: H. Cox, N. Girmes-Grieco, and C. Papillon
Advanced Instructor: R. Eaton
Instructors: K. Chang and A. LaFalce
Adjunct Instructors: M. Rockwell, A. Steketee
Academic Advisors: E. Engel, S. Nelson, D. Pollio, and K. Wogenrich

Undergraduate Course Descriptions (HNFE)

HNFE 1004 - Foods, Nutrition And Exercise (3 credits)
Scientific information applied to current concerns in foods, nutrition and exercise as it affects the nutritional health well-being of humans. I,II
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 1114 - Orientation to HNFE (1 credit)
An introduction to the academic and career planning for students in the Human Nutrition, Foods & Exercise major.
Instructional Contact Hours: (1 Lec, 1 Crd)

HNFE 1214 - Topics in Lifetime Activities (1 credit)
Participation in physical activity, fitness assessment, motor skill development. Awareness and development of the physical, spiritual, emotional, social, and intellectual components of wellness. Application of healthy lifestyle choices for improved quality of life. May be repeated with varying content, for a maximum of 6 credits. Pass/Fail Only
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 6 credit hours

HNFE 1215 - Meraki Living Learning Community, Be Well, Be You (1 credit)
Introduces students in the Meraki Living Learning Community to six dimensions of well-being: purpose, social, financial, community, physical, and emotional. Classroom learning, guided practice, connection to well-being resources, and individual exploration to promote lifelong holistic health and well-being. Personal well-being focused on developing a concept of self, understanding purpose, and learning positive health behaviors to support physical activity, nutrition, mindfulness, and personal finance.
Instructional Contact Hours: (1 Lec, 1 Crd)

HNFE 1216 - Meraki Living Learning Community, Be Well, Be You (1 credit)
Introduces students in the Meraki Living Learning Community to six dimensions of well-being: purpose, social, financial, community, physical, and emotional. Classroom learning, guided practice, and individual exploration to promote lifelong holistic health and well-being. Community well-being focused on mental health initiatives, student leadership, developing and sustaining relationships, and service.
Prerequisite(s): HNFE 1215
Instructional Contact Hours: (1 Lec, 1 Crd)

HNFE 1804 - Principles of Sport Science (3 credits)
Introduction to the principal concepts of improving human physical capacity through sport, exercise training and diet. Emphasis on critical thinking and evidence-based decision making in describing the limits to human performance, responses, adaptations, and health benefits of exercise.
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 2004 - Professional Dietetics (1 credit)
Introduction to the profession of dietetics with emphasis on competencies, preparation, and responsibilities associated with dietetic practice. Overview of the structure of The American Dietetic Association (ADA) and its relationship to the dietetic professional. Discussion of current professional concerns. II
Corequisite(s): HNFE 2014
Instructional Contact Hours: (1 Lec, 1 Crd)

HNFE 2014 - Nutrition Across the Life Span (3 credits)
Nutritional requirements and related health concerns of pregnant and lactating women, infants, children, adults and the elderly are studied in relation to the physiological and metabolic aspects of pregnancy, lactation, growth and development, maintenance of health, prevention of disease, and aging. 1 year of biology or chemistry required. CHEM 1056 may be substituted for co-requisite CHEM 1036.
Prerequisite(s): HNFE 1004
Corequisite(s): CHEM 1035
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 2014H - Nutrition Across the Life Span (3 credits)
Nutritional requirements and related health concerns of pregnant and lactacting women, infants, children, adults and the elderly are studied in relation to the physiological and metabolic aspects of pregnancy, lactation, growth and development, maintenance of health, prevention of disease, and aging. 1 year of biology or chemistry required. CHEM 1056 may be substituted for co-requisite CHEM 1036.
Prerequisite(s): HNFE 1004
Corequisite(s): CHEM 1035
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 2104 - Moving Body, Moving Mind (3 credits)
Methods of working intentionally towards cultivating optimal brain states. Mind/body practices to develop connections between contemporary neuroscience, movement, and meditative practices. Studies in the intersection of consciousness, movement, and thought. Introduction to yoga, meditation, authentic movement, experiential anatomy, and somatic work. Emphasis on holistic perspectives of the body through active listening, ethical reasoning, healthy self-image, and attention to the practices of intentional embodiment.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: DANC 2104

HNFE 2204 - Medical Terminology (3 credits)
Structure, pronunciation, and use of medical terms; anatomical structures and body systems; terms used in pathology, testing, diagnosis, surgery, pharmacology and treatment.
Prerequisite(s): (BIOL 1005 or BIOL 1105 or BIOL 1205H) and (BIOL 1006 or BIOL 1106 or BIOL 1206H) or ISC 2105
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 2254 - Exercise Leadership - Group Fitness Instructor (3 credits)
Development of theoretical and practical skills for leading exercise in a group setting. Topics include: general guidelines for instructing safe, effective, and purposeful exercise, essentials of the instructor-participant relationship, the principles of motivation to encourage adherance in the group fitness setting, effective instructor-to-participant communication techniques, methods for enhancing group leadership, and the group fitness instructors professional role. Obtain knowledge of programming for multiple populations. Will complete a CPR and AED certification as a part of in-class instruction. Pass/Fail only.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HNFE 2264 - Exercise Leadership- Personal Trainer (3 credits)
Development of practical skills for conducting one-on-one exercise sessions for general healthy adults and special populations. Exercise selection, testing, training principles, and behavioral change skills required to be an effective personal trainer. Preparation for a nationally accredited personal training certification. CPR and AED certification. Pass/Fail only.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HNFE 2274 - Wilderness First Responder (3 credits)
Assessment and treatment of emergencies in remote settings. Anatomy, physiology, and pathophysiology, personal and group safety and hygiene, patient assessment and documentation of treatment for trauma, medical emergencies, environmental emergencies, and long-term care. Team management of medical emergencies in wilderness context, organization and implementation of rescues, decision-making, leadership, judgment, and prevention. Prepares students to successfully complete a national certification exam. Pass/fail only.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HNFE 2314 - Active Transportation for a Healthy, Sustainable Planet (3 credits)
Connections among active transportation (e.g., bicycling, walking) and significant global challenges such as physical inactivity, health, the environment, and the economy on local to global scales. Methods to assess walkability among communities with different worldviews and the influence of the built environment on rates of active transportation. Approaches to evaluate demographic and psychosocial predictors and physical and policy barriers to use of active transportation. Successful strategies to increase active transportation through community design guidelines, behavior change tools, transportation planning, and policy.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: SPIA 2314

HNFE 2334 - Introduction to Integrative Health (3 credits)
Introduction to the principles of integrative health that promote health and well-being. Examination of the person- centered integrative health treatment methods including holistic stress management, the human spirit, communication, energy healing, elements of meditation, healing environments, Chinese medicine, Ayurvedic medicine, voice work, nutrition, therapeutic massage and bodywork, and healing effects of physical activity. Review of scientific evidence of integrative treatments.
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 2484 - Evidence-Based Practice in Health Science (1 credit)
Evidence-based practice in the field of health science. Utilization and evaluation of published research in literature. Answers to health and healthcare related questions. Identification of well-defined research questions using current frameworks. Best practices of healthcare policies.
Prerequisite(s): HNFE 1004
Corequisite(s): HNFE 2014
Instructional Contact Hours: (1 Lec, 1 Crd)

HNFE 2544 - Functional Foods for Health (3 credits)
Introduction to functional foods (foods with additional value beyond basic nutrition) including development of functional foods, novel sources, and traditional foods with value-added health benefit; regulatory issues; and media messages.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FST 2544

HNFE 2664 - Behavioral Theory in Health Promotion (3 credits)
Introduction to behavioral theories used to design, implement and evaluate health promotion programs, and theories underlying health behavior change. Interactions between individuals, physical and social environments, interpersonal, and intrapersonal determinants of health behavior. Epidemiological evidence of benefits of healthful eating and physical activity.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 2774 - Topics in HNFE (1-3 credits)
A variable-content course. Explores significant contemporary topics in the areas of nutrition, foods, exercise and health. May be repeated for up to six credits.
Prerequisite(s): HNFE 1004
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 6 credit hours

HNFE 2804 - Exercise and Health (3 credits)
Introduction to the foundations of exercise science as applied to healthy living, and the concept of exercise as medicine. Fundamentals of health appraisal, foundations of fitness training principles and prescription; nutrition and energy cost, and application of exercise prescription for disease prevention and treatment.
Prerequisite(s): HNFE 1004 and BMSP 2135
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 2824 - Prevention and Care of Athletic Injuries (2 credits)
An introduction to the techniques and principles of athletic training. I,II.
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

HNFE 2954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 2964 - Field Work/Practicum (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 2984A - Special Study (1-19 credits)
Pathway Concept Area(s): 1A Discourse Advanced
Instructional Contact Hours: Variable credit course

HNFE 2984N - Special Study (1-19 credits)
Pathway Concept Area(s): 1F Discourse Foundational
Instructional Contact Hours: Variable credit course

HNFE 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 3024 - Science of Food Prep Lab (2 credits)
Application of the principles of food science and food preparation techniques related to health promotion, disease prevention, and disease management. Selection, production, and evaluation of foods and beverages. Emphasis on experimentation illustrating chemical and physical reactions, sensory and physical properties, nutrient manipulation, cooking applications, and functions of foods.
Prerequisite(s): (HNFE 1004 and CHEM 1036) or CHEM 1056 or (ISC 2106 and FST 2014)
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

HNFE 3034 - Methods of Human Health Assessment (2 credits)
Evidence-based practice in areas of human health assessment including: anthropometric measurements, vital signs, body composition, aerobic capacity, muscular strength, energy requirements, and health behaviors. Comparison and analysis of assessment methods.
Prerequisite(s): (HNFE 2014 or HNFE 2014H) and BMSP 2136
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

HNFE 3114 - Foodservice and Meal Management (4 credits)
Foodservice and meal management for the dietetics professional. Emphasis is placed on understanding food procurement, production, distribution, and marketing in a safe and well managed operation. I
Prerequisite(s): HNFE 3024 or HNFE 2224
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

HNFE 3224 - Communicating with Food (3 credits)
Development of oral and written communication skills to communicate food and nutrition information to diverse populations. II
Prerequisite(s): (HNFE 2014 or HNFE 2014H) and (HNFE 3024 or HNFE 2224)
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HNFE 3634 - Epidemiologic Concepts of Health and Disease (3 credits)
Designed to give students in the health sciences a basic understanding of the modern concepts regarding health and disease as well as skills in organizing epidemiological data, disease investigation and surveillance. Includes a survey of terms, concepts, and principles pertinent to epidemiology. Lifestyles of populations and the relationships between lifestyles and health status are studied. II.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: PHS 3634

HNFE 3804 - Exercise Physiology (3 credits)
Effects of exercise on physiology: neuromuscular, metabolic, cardiopulmonary. Scientific basis of physical training. I
Prerequisite(s): BMSP 2136 and HNFE 2804
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 3824 - Kinesiology (3 credits)
The anatomical and biomechanical basis of human motion, with applications for motor skill acquisition, and development and rehabilitative exercises. I
Prerequisite(s): BMSP 2135 and BMSP 2136
Corequisite(s): PHYS 2205 or PHYS 2305.
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 4004 - Seminar in HNFE: Writing and Discourse in the Major (3 credits)
Focused review of relevant and current literature in selected areas of food, nutrition and exercise. Develop practical strategies for finding research articles on specific topics utilizing a variety of search tools (e.g., library, on-line search engines, etc.). Develop analytical skills to critically assess the significance of published research data. Develop competence in written and verbal presentation of current research in formats suitable for a scientific or a lay audience.
Prerequisite(s): COMM 2004 or ALCE 3634 and HNFE 2484
Corequisite(s): HNFE 4025
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4024 - Emerging Issues in Dietetics (1 credit)
Investigation of emerging dietetics topics including professional development, new technologies, current legislative issues, and promising evidence-based practice strategies. Integration of knowledge from previous courses to support quality dietetics practice will be emphasized.
Prerequisite(s): HNFE 4026
Corequisite(s): HNFE 4125
Instructional Contact Hours: (1 Lec, 1 Crd)

HNFE 4025 - Metabolic Nutrition (3 credits)
4025: Study of bioenergetics and macronutrients, with emphasis on sources, interrelationships, and factors affecting utilization and metabolism. Emphasis on how carbohydrates, lipids, and proteins are metabolized following a meal, during fasting conditions, and when exercising. How metabolism of carbohydrates, lipids and proteins affects and is effected by metabolic disease such as obesity and diabetes will also be examined. 4026: Study of essential vitamins and minerals and their interaction with body systems, especially as these relate to food, exercise and health. Emphasis on how deficiency, toxicity and genetic conditions affect various organ systems, including bone, skin, digestive, and blood. Historical and regulatory policies, and scientific studies establishing recommended dietary allowances for micronutrients are considered.
Prerequisite(s): (HNFE 2014 or HNFE 2014H) and (BCHM 2024 or BCHM 3114 or BCHM 4115)
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4026 - Metabolic Nutrition (3 credits)
Prerequisite(s): HNFE 4025
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4114 - Food and Nutritional Toxicology (3 credits)
Principles of food and nutritional toxicology with primary emphasis on food components and food toxins including absorption, metabolism and excretion. An overview of types of adverse food reactions including food allergy, food sensitivity, and food intolerance. An overview of U.S. and international lawas and regulation of safety assessment of foods including food additives, dietary supplements, and residues of contaminants, pesticides, and antibiotics. Analysis of food and nutritional toxicity cases in the context of the food system, regulatory policies, and public communication.
Prerequisite(s): BMSP 2136 and BCHM 2024 and HNFE 2484
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4125 - Medical Nutrition Therapy (3 credits)
Study of nutritional diagnostic, therapeutic and counseling services provided by a registered dietitian. 4125: Emphasis on the relationship between principles of nutritional care and the medical treatment of individuals with selected diseases or clinical problems. 4126: Integration of knowledge of pathophysiology, biochemical, and clinical parameters, medical treatment and nutrition therapy for patients with selected clinical problems/disease states.
Prerequisite(s): HNFE 2004 and HNFE 4026
Corequisite(s): HNFE 3034
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4126 - Medical Nutrition Therapy (3 credits)
Study of nutritional diagnostic, therapeutic and counseling services provided by a registered dietitian. 4125: Emphasis on the relationship between principles of nutritional care and the medical treatment of individuals with selected diseases or clinical problems. 4126: Integration of knowledge of pathophysiology, biochemical, and clinical parameters, medical treatment and nutrition therapy for patients with selected clinical problems/disease states. 4125: I. 4126: II.
Prerequisite(s): HNFE 4125
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4134 - Experiential Approach to Nutritional Therapy (2 credits)
Use of didactic and experiential methods to learn and apply theories of behavior change in diverse nutrition counseling situations. Pre: Instructor approval. I
Prerequisite(s): HNFE 4644
Corequisite(s): HNFE 4125
Instructional Contact Hours: (2 Lec, 2 Crd)

HNFE 4174 - Nutrition and Physical Performance (3 credits)
Nutritional requirements for the wellbeing and optimal performance of athletes. Methods of assessment and modification of diet, performance, and body composition in athletes. Evaluation of dietary ergogenic aids and supplements for performance and body composition.
Prerequisite(s): HNFE 2804
Corequisite(s): HNFE 4025
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4224 - Alternative and Complementary Nutrition Therapies (2 credits)
Critical evaluation of health claims, mechanisms of action, and research literature for a wide variety of alternative nutrition therapies used for disease prevention and treatment. Practical application of knowledge through completion of problem-based learning projects.
Prerequisite(s): (BIOL 1005 or BIOL 1105 or BIOL 1205H) and (BIOL 1006 or BIOL 1106 or BIOL 1206H) and (CHEM 1036 or CHEM 1056) or ISC 2106 and HNFE 2484
Instructional Contact Hours: (2 Lec, 2 Crd)

HNFE 4254 - Experimental Foods (2 credits)
Experimental study of the functions of ingredients and factors affecting food quality with emphasis on an independent project.
Prerequisite(s): HNFE 3234
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

HNFE 4354 - Dietary Supplements and Health (3 credits)
Practical and fundamental aspects of widely used dietary supplements (micronutrients, macronutrients, prebiotics, probiotics, plant extracts, bioactive compounds,). Efficacy and mechanism of dietary and botanical supplements in weight management, health promotion, and disease prevention. Interaction of dietary supplements with gut microbiome. Safety and regulatory considerations of dietary supplements. Project-based learning practice with the integration of literature review, project development, writing, and oral presentation.
Prerequisite(s): (BCHM 2024 or BCHM 3114) and (BMSP 2136 and HNFE 2484)
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4514 - Nutritional Genomics (3 credits)
Interactions between foods and nutrients with genetics, genomic DNA, and gene expression in humans and animals. Genetic variants that affect optimal health, metabolism and nutrition in individuals, as well as inheritance of these variants in individuals, and allele frequencies in populations. Scientific, ethical, and legal considerations of genes and nutrition knowledge, personalized testing, and genetic engineering. Junior standing.
Prerequisite(s): HNFE 2484
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4624 - Community Nutrition (3 credits)
The application of nutrition principles to an analysis of current applied nutrition programs and a study of the political and legislative processes affecting the practice of dietetics. I
Prerequisite(s): (HNFE 2014 or HNFE 2014H) and HNFE 4026
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4634 - Socio-Cultural Food Systems (3 credits)
Study of social, cultural, and economic aspects of food systems, using quantitative and qualitative methods to assess nutritional status.
Prerequisite(s): HNFE 1004 and SOC 3004
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

HNFE 4644 - Health Counseling (3 credits)
Roles, responsibilities, legal requirements and scope of the health professional. Interviewing, counseling, education, health promotion and behavior change strategies for diverse populations. Guidance and referral, health assessment, communication skills, and problem-solving. Application of counseling techniques such as goal-setting, ethical practice, cultural competence, evidence-based practice. Pre: Junior Standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4645 - Applications in Nutrition Counseling (2 credits)
4645: Experiential methods to apply theories of behavior change to promote nutrition and health changes. Learn and apply nutrition care process using evidence-based knowledge through providing client-centered counseling to individuals. Understanding of contemporary issues related to behavior change and emerging issues through review of lay and professional literature. 4646: Advance nutrition counseling skills through work with more diverse clients. Learn and apply quality improvement skills to enhance nutrition counseling service. Identify information on emerging issues and apply appropriately in counseling setting.
Prerequisite(s): HNFE 4644
Corequisite(s): HNFE 4125
Instructional Contact Hours: (2 Lec, 2 Crd)

HNFE 4646 - Applications in Nutrition Counseling (2 credits)
Prerequisite(s): HNFE 4645
Instructional Contact Hours: (2 Lec, 2 Crd)

HNFE 4754 - Advanced Human Anatomy and Pathophysiology (3 credits)
Advanced laboratory course in human anatomy and physiology with an emphasis on how pathologic disease states affect human homeostasis. Congenital, genetic, chronic, and common global diseases with recognition and evaluation of causes, risk factors, and impact on body systems. Cadaver prosections will supplement models, specimens, and an advanced anatomy visualization system. Intended for students pursuing graduate education in health sciences.
Prerequisite(s): BMSP 2136 and BMSP 2146
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HNFE 4774 - Advanced Contemporary Topics in HNFE (1-3 credits)
A variable-content course. Explores advanced topics in the areas of nutrition, foods, exercise or health using higher- order thinking and problem-solving skills. Qualitatively and quantitatively assess current facts supported by scientific literature, as well as controversial issues with conflicting data. May be repeated for a maximum of six credits. Junior Standing.
Prerequisite(s): HNFE 2014 or HNFE 2014H and HNFE 2484
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 6 credit hours

HNFE 4804 - Exercise Metabolism and Disease (3 credits)
Explores the role of exercise in the pathophysiology of human metabolic disease with an emphasis on obesity, diabetes, insulin resistance, and exercise tolerance at whole body, cellular and molecular level dysfunction. In-depth assessment of the prospect of exercise as preventive and therapeutic for treatment of metabolic diseases.
Prerequisite(s): HNFE 4025 and HNFE 2804
Corequisite(s): HNFE 3804
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4814 - Advanced Athletic Injuries (2 credits)
Medical documentation and administration. Practical experience in locating, identifying, and evaluating anatomic structures Mechanisms of injury and healing process, testing and evaluation of athletic injuries, treatment and rehabilitation of injury to return to play. Not part of an accredited athletic training program.
Prerequisite(s): HNFE 2824 and HNFE 3804
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

HNFE 4824 - Advanced Kinesiology (3 credits)
Advanced study of human movement during exercise. Integration of biomechanical, anatomical and neuromuscular concepts in the regulation of joint movement associated with exercise, injury and disease.
Prerequisite(s): HNFE 3824 and HNFE 2484
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4834 - Applications in Clinical Exercise (3 credits)
Supervised experience with the Therapeutic Exercise and Community Health Center. Direct Involvement with rehabilitative and preventive exercise and lifestyle programming for cardio-vascular, musculo-skeletal, and other conditions. Exercise leadership, case management, and daily operations. Included seminars, lab experience, and individual meetings with participants and supervisors, related projects.
Prerequisite(s): HNFE 3874
Instructional Contact Hours: (9 Lab, 3 Crd)

HNFE 4844 - Exercise and Neuromuscular Performance (3 credits)
Functional properties of the neuromuscular system. Emphasis placed on the acute and chronic responses of muscle in exercise, rehabilitation and the factors which determine human performance. Special emphasis on the molecular biological factors responsible for skeletal muscle development and differentiation, as well as adaptation to training and disease states, including activation of signal cascades responsible for the changes in muscle performance.
Prerequisite(s): HNFE 3804 and HNFE 2484
Instructional Contact Hours: (3 Lec, 3 Crd)

HNFE 4854 - Internship in Exercise Science and Health Promotion (1-3 credits)
Capstone internship experience in the fields of exercise science and/or health promotion. The student will be immersed in the day-to-day challenges and responsibilities of a practicing health-fitness professional. The 45 contact hours per credit will involve work experience in some aspect of exercise science and/or health promotion. Senior standing and Exercise and Health Promotion majors only. May be repeated for maximum 3 credits.
Prerequisite(s): HNFE 4834
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

HNFE 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

HNFE 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select course that meets Concept 7 and another Concept. If course meets only Concept 7, Pathways credit reaches 47		
Subtotal		44
Total Credits		**120**

1. Included in in-major GPA.
2. Credit cannot be received for both COMM 1016 and COMM 2004 if COMM 1015-COMM 1016 was taken for Concept 1f.
3. Course is part of Pathways General Education and can be counted in both locations.
4. Topics in HNFE (2774 and 4774) are not taught on a regular basis.

Satisfactory Progress Towards the Degree: An HNFE (**Exercise and Health Sciences**) student will be considered to have made satisfactory progress toward the degree when:

1. Overall GPA ≥ 2.50.
2. A minimum grade of "C" is required in HNFE 1004 Foods, Nutrition And Exercise and a "C-" or better is required in CHEM 1035 General Chemistry and CHEM 1036 General Chemistry and CHEM 2535 Organic Chemistry or CHEM 2514 Survey of Organic Chemistry.
3. These courses must be completed by the time the student has attempted 72 hours:

   BIOL 1105 Principles of Biology-BIOL 1106 Principles of Biology or equivalent.

   CHEM 1035 General Chemistry-CHEM 1036 General Chemistry or equivalent.

   CHEM 2535 Organic Chemistry or CHEM 2514 Survey of Organic Chemistry.

   HNFE 1004 Foods, Nutrition And Exercise.

Graduation Requirements

Note: Completion of this major does NOT qualify a student to apply to an Accreditation Council for Education in Nutrition and Dietetics (ACEND) accredited Dietetic Internship.

Graduation Requirement: Overall GPA ≥ 2.50.

A minimum grade of "C" is required in HNFE 1004 Foods, Nutrition And Exercise and a "C-" or better is required in CHEM 1035 General Chemistry and CHEM 1036 General Chemistry and CHEM 2535 Organic Chemistry or CHEM 2514 Survey of Organic Chemistry.

Foreign Language Requirement

A sequence of two foreign language courses is required for graduation unless two years of high school credits of the same foreign language or six transfer credits of one foreign language have been earned. These credits do not count towards graduation.

Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select course that meets Concept 7 and another Concept. If course meets only Concept 7, Pathways credit reaches 47		

Subtotal	44
Total Credits	**120-121**

[1] Included in in-major GPA.
[2] Credit cannot be received for both COMM 1016 and COMM 2004 if COMM 1015-COMM 1016 were taken for Concept 1f.

Satisfactory Progress Towards Degree: An HNFE (**Nutrition and Dietetics major**) student will be considered to have made satisfactory progress toward the degree when he/she has successfully completed:

1. Overall GPA ≥ 3.00.
2. A minimum grade of "C" is required in HNFE 1004 Foods, Nutrition And Exercise and a "C-" or better is required in CHEM 1035 General Chemistry and CHEM 1036 General Chemistry and CHEM 2535 Organic Chemistry or CHEM 2514 Survey of Organic Chemistry.
3. These courses must be completed by the time the student has attempted 72 hours:

   BIOL 1105 Principles of Biology-BIOL 1106 Principles of Biology or equivalent.

   CHEM 1035 General Chemistry-CHEM 1036 General Chemistry or equivalent.

   CHEM 2535 Organic Chemistry or CHEM 2514 Survey of Organic Chemistry.

   HNFE 1004 Foods, Nutrition And Exercise.

Students not meeting Satisfactory Progress will have one probationary semester in which to resolve their standing. Students who do not return to good standing at the end of the probationary semester must leave the major. Internal or external transfers will be required to create a plan of study that demonstrates how the student will attain Satisfactory Progress in regards to coursework. The GPA threshold will stand for all students regardless of transfer status.

Graduation Requirements

Nutrition and Dietetics Graduation Requirements: Overall GPA 3.0

Nutrition and Dietetics is a restricted major. Students who wish to change into, transfer into, and/or continue to study within HNFE must have and maintain the following:

1. Overall GPA ≥ 3.0.

2. A minimum grade of “C” is required in HNFE 1004, and a “C-“or better is required in CHEM 1035, CHEM 1036 and CHEM 2514 or CHEM 2535.

Prerequisites for courses are listed in the Undergraduate Course Catalog and associated with the CRN hyperlink on the on-line Timetable. It is the responsibility of the student to make sure the prerequisites for each course have been met. HNFE checks for prerequisites both during course request and at the beginning of the semester. Students who enroll in a course for which they clearly have not satisfied the prerequisites or equivalent may be dropped from the course. Deliberate false statements testifying to the satisfaction of prerequisites constitute a violation of the honor code.

Foreign Language Requirement

A sequence of two foreign language courses is required for graduation unless two years of high school credits of the same foreign language or six transfer credits of one foreign language have been earned. These credits do not count towards graduation.

Code	Title	Credits

School of Animal Sciences

Our Website (http://www.apsc.vt.edu)

Overview

The School of Animal Sciences offers two degree programs (Animal and Poultry Sciences and Dairy Science) as well as several options within each degree. With expert faculty in fields and species across the animal sciences, our students are well-trained in science-based education and hands-on learning for careers in the animal sciences as well as graduate and professional schools, such as veterinary school.

Degree Programs

Animal and Poultry Sciences

The Animal and Poultry Sciences degree provides students with a broad science-based education tailored to meet their needs and career goals. The program prepares students for careers in livestock, poultry, and equine industries, and with companion animals, laboratory animals, agribusiness, research, and teaching. The curriculum also provides preparation for professional schools including veterinary medicine, medical school and other health professions, as well as graduate school. This major combines education in the basic sciences of animal nutrition, genetics, and physiology with management principles as applied to the raising and merchandising of beef cattle, horses, poultry, sheep, swine, and their products, as well as pets and other companion animals. Students are encouraged to participate in independent studies, undergraduate research, and internship programs. Study abroad opportunities are also available.

Animal and Poultry Sciences Options

The Animal and Poultry Sciences curriculum allows students to tailor their education to their academic and career goals. Students combine an option and an emphasis based on their specific interests.

- Pre-vet option: Prepares students for post-graduate education such as veterinary, medical, pharmacy, and other professional schools.
- Science option: Designed for students whose interests include nutrition, physiology, genetics, behavior, biotechnology, food safety.
- Production-Business option: For students interested in careers in production management, extension, agricultural education, agribusiness, feed and pharmaceutical sales.
- Within each option, students select an emphasis in Companion/Lab Animal, Equine, Livestock, or Poultry.

Animal and Poultry Sciences Minors

Two minors are offered in the Animal and Poultry Sciences program: Animal and Poultry Sciences and Equine Science. Both minors require a minimum of 18 credits. Minor checksheets can be found at the following website - https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Dairy Science

The purpose of the Dairy Science degree is to offer students the opportunity to prepare themselves for a wide variety of careers by developing their technical and interpersonal skills. We offer a challenging yet flexible curriculum that can be individualized to meet the educational needs and interests of each student, counseling to assist each student in designing individual programs, and extracurricular activities to enhance development of interpersonal skills.

Dairy Science Options

Students may select from three curricula: Dairy Business Management, Science/Pre-Veterinary, and Dual Emphasis. All options provide students with the opportunity to acquire a broad education in the sciences, social sciences, economics, mathematics, and communications while learning the basic principles of dairy enterprise management.

- Dairy Business Management option: This is the most flexible curriculum, with at least 30 credits of electives. Suited to students with an interest in various fields of dairy production (herd manager, farm manager), allied agri-business industries (feed, genetics, equipment), agricultural communications, public relations, extension, breed field person, and a variety of other positions. Graduates in this option have also gone on to careers in college instruction, elementary school instruction, bank investment management, feed sales, and milk marketing, to name a few.
- Dual option: This is recommended for students who plan to concentrate in more than one academic area as they prepare for future careers. Common minors and double majors that students may earn while completing their Dairy Science degree requirements include Agricultural Economics, Animal and Poultry Sciences, Biology, Crop and Soil Environmental Sciences, Spanish, Communications, Professional and Technical Writing, etc.
- Science Pre-Vet option: This option is recommended for students who plan to continue into veterinary college or other graduate or professional schools, or who plan a career in quality control, laboratory work, or research and product development. It provides an excellent base in chemistry, mathematics, physics, biology and biochemistry for advanced study in many areas. Students are encouraged and mentored to apply for early admission to veterinary school.

Opportunities to Excel in Dairy Science

Nearly all Dairy Science students complete a second major or minor and they are encouraged to actively participate in extracurricular clubs, judging teams and the dairy management team. Ninety five percent of students complete at least one internship prior to graduation and nearly half complete undergraduate research, an independent study, or serve as a teaching assistant.

Active participation in research projects in lactation, genetics, nutrition, nutrient management, and management provide qualified students valuable research experience with departmental scientists as well as part-time employment opportunities. These opportunities are available to students in all options and enhance their preparation for advanced study and provide a better understanding of the research process.

Requirements for a Dairy Science Minor

Students may minor in Dairy Science. The minor requires the completion of a total of 19 credit hours. Courses that may be taken for the minor are listed on the minor checksheet found on the following website - https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Note: Advisors work with students to individualize the course of study.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Pathways) (see "Academics (https://www.undergradcatalog.registrar.vt.edu/1617/academic-policies.html)") and toward the degree.

Satisfactory progress requirements toward the specific degree can be found on the major checksheet by visiting the University Registrar website at https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

- Dairy Science Major with Dairy Business Management Option (p. 554)
- Dairy Science Major with Dual Emphasis Option (https://catalog.vt.edu/undergraduate/agriculture-life-sciences/animal-sciences/dairy-science-dual-emphasis/)
- Dairy Science Major with Science/Prevet Option (p. 556)

Director: D. E. Gerrard
Horace E. and Elizabeth F. Alphin Professor of Dairy Science: A. D. Ealy
Colonel Horace E. Alphin Professor of Dairy Science: K. F. Knowlton
David R. and Margaret Lincicome Professor of Agriculture: M. D. Hanigan[6]
Paul Mellon Distinguished Professor of Agriculture: S. E. Johnson
John W. Hancock Professor: M. E. Persia
Professors: A. D. Ealy, M. J. Estienne, D. E. Gerrard, S. P. Greiner, M.D. Hanigan, H. Jiang, S. E. Johnson, J. W. Knight, K.F. Knowlton, J. J. Maurer, K. Medler, M. E. Persia, R. P. Rhoads Jr., and E. J. Smith
Associate Professors: F. Biase, B. A. Corl, R. Cockrum, K. M. Daniels, S. W. El-Kadi, D. E. Eversole, G. Ferreira, E. Feuerbacher, L. Jacobs, T. J. Jarome, C. S. Petersson-Wolfe, V. Mercadante, M. L. Rhoads, R. White, and C. M. Wood
Assistant Professors: A. Azahar, J. Chen, L. Gunter, R. Marques, and J. Osorio
Associate Professor of Practice: J. S. Bedore and M. Miller
Assistant Professor of Practice: K. J. Heiderscheit
A/P Faculty: M. Arant, K. Carter, T. Golightly, H. Liles, and B. Sheely
Advanced Instructor: L. Bergamasco and W. A. White
Lecturer: D. R. Winston
Research Associate Professor: T. Fernandes, and T.H. Shi
Research Assistant Professor: E.T. Helm and M. Lima

Career Advisors: J. S. Bedore, R. Cockrum, B. A. Corl, D. E. Eversole, K. J. Heiderscheit, and C. M. Wood

Undergraduate Course Descriptions (APSC)

APSC 1454 - Introduction to Animal and Poultry Science (3 credits)
Survey of systems of livestock and poultry production including: concepts and terminology pertaining to management and marketing; types and breeds of livestock and poultry; and an introduction to nutrition, genetics, physiology, and management of beef cattle, horses, sheep, swine and poultry.
Corequisite(s): APSC 1464
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 1464 - Animal and Poultry Science Laboratory (1 credit)
Management practices and concepts related to efficient livestock and poultry production and marketing are taught through demonstrations and hands-on experience.
Corequisite(s): APSC 1454
Instructional Contact Hours: (3 Lab, 1 Crd)

APSC 1504 - Animal and Poultry Sciences First Year Experience (1 credit)
Orientation course for freshman and transfer APSC students providing skills, resources and fundamental knowledge to enhance learning experiences and support success. Skills, resources, opportunities, curriculum, and career planning. Emphasis on inquiry, problem-solving skills, critical thinking and integration of ideas and experiences to encourage life-long learning.
Instructional Contact Hours: (1 Lec, 1 Crd)

APSC 1524 - Beginning Equitation (1 credit)
Beginning work in equitation, the science of horseback riding. The five natural aids of the rider and rein aides. Secure positions of the rider's leg and seat at the walk, trot, and canter. Basic leg and seat position for jumping. Concepts of horse welfare, health, behavior, and communication pertaining to horseback riding. The German training scale, including rhythm, relaxation, connection, impulsion, straightness, and collection of the horse. Use of small cavaletti obstacle courses to improve horse strength and straightness. Grooming techniques, hoof care, and tack conditioning for equitation horses. Position emphasis will be on the forward riding seat and elementary dressage movements. COURSE FEE $1,500
Instructional Contact Hours: (3 Lab, 1 Crd)

APSC 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 2004 - Animal and Poultry Sciences Seminar (1 credit)
Identification of primary and secondary career objectives for Animal and Poultry Science majors; planning for completion of a capstone learning experience in the major. Identification of curricular and extracurricular activities to increase career opportunities. Improvement of professional and technical writing skills applicable to the animal sciences field.
Prerequisite(s): APSC 1504
Instructional Contact Hours: (1 Lec, 1 Crd)

APSC 2104 - Poultry Laboratory (1 credit)
Anatomy and physiology of birds including species-specific specializations in anatomical structure and body composition, musculoskeletal, respiratory, reproductive, endocrine, digestive and urinary systems. Relationship of these concepts to growth and egg production. Includes handling live birds.
Prerequisite(s): APSC 1454 and APSC 1464
Corequisite(s): ALS 2304
Instructional Contact Hours: (3 Lab, 1 Crd)

APSC 2114 - Livestock Management and Handling (1 credit)
Safety in livestock handling; animal behavior; care, housing, and managerial practices related to beef cattle, sheep, and swine taught through experiential activities.
Prerequisite(s): APSC 1454 and APSC 1464
Instructional Contact Hours: (3 Lab, 1 Crd)

APSC 2124 - Horse Handling Practicum (2 credits)
Stable management, haltering and leading horses, equine vital signs, and hoof care. Identification of horses by coat colors and markings. Breed characteristics of horses. Equine behaviors. Types and amounts of feed and forages commonly fed to horses. Anatomical parts of the horse. Careers in the horse industry and sports in which horses participate. Involvement with daily management and handling of the campus equitation and breeding horses.
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

APSC 2164 - Companion and Laboratory Animal Care and Handling (1 credit)
Brief history of companion and laboratory animals. Outline of the major anatomical and physiological characteristics, first aid and basic care. Principles of husbandry and handling techniques. Institutional Animal Care and Use Committee training.
Prerequisite(s): APSC 1454 and APSC 1464
Instructional Contact Hours: (2 Lab, 1 Crd)

APSC 2424 - Introduction to the Equine Industry (3 credits)
Introduction to the horse and equine industry. Survey of breeds and conformation; breeding, management, equipment, facilities, and marketing of the successful horse operation.
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 2524 - Intermediate Equitation (1 credit)
Intermediate work in horseback riding with special emphasis on development of the forward seat and skills required for jumping. Elementary dressage movements. COURSE FEE: $1,500.
Prerequisite(s): APSC 1624
Instructional Contact Hours: (4 Lab, 1 Crd)

APSC 2574 - Domesticated Animal Behavior (3 credits)
Behavioral systems, social behavior, learning, and cognition of domesticated animals. Ethological and psychological approaches to, and ultimate and proximate methods of, studying behavior. Evolutionary processes and natural selection, genetics and epigenetics, and neural and physiological mechanisms of behavior.
Prerequisite(s): APSC 1454 or BIOL 1105
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 2624 - Beginning Equitation Over Fences (1 credit)
Introduction of jumping skills for the unskilled as well as review of jumping skills for experienced riders. Rider should have skills at trot and canter. COURSE FEE: $1,500.
Prerequisite(s): APSC 2524
Instructional Contact Hours: (4 Lab, 1 Crd)

APSC 2714 - Design of Precision Animal Agricultural Systems (3 credits)
Design methods, interpretation, and historical context of precision animal agriculture systems, including technologies, networking, sensors, and data analytics. Elements of animal production systems designed with precision animal agriculture technologies. Advantages and disadvantages of traditional and technology-enhanced production systems. Impacts of precision system design on economics and environmental impacts of animal agriculture and wellbeing. Data acquisition, pipelines, and analytics that link data with decision making. Design of connected systems.
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 2824 - Equine Conformation and Biomechanics (2 credits)
Evaluation of equine conformation as related to locomotion, athletic performance and soundness. Basic understanding of breed standards, gaits, and rules and regulations pertaining to various equine sports disciplines, from both domestic and global perspectives. Investigation of current scientific literature regarding equine conformation and biomechanics.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

APSC 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 3024 - Equine Science and Management (3 credits)
Management of horses at maintenance, in light work, and breeding stock. Conformation, forages and concentrate requirements, common diseases and health conditions, health maintenance, vaccination and deworming protocols, behavioral modification and training practices, facility management, breeding practices, and welfare. Career paths in the horse industry. Emphasis on application and analysis of case studies.
Prerequisite(s): APSC 2124
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

APSC 3064 - Companion and Laboratory Animal Science (3 credits)
Comparative aspects of companion and laboratory animals including physiology, anatomy, nutrition, genetics and reproduction. Normal behaviors along with techniques of behavior modifications.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 3134 - Animal Agriculture and the Environment (3 credits)
Environmental issues associated with animal agriculture. Nutrient contamination of water resources, odor emission from livestock farms, environmental regulations affecting animal agriculture, and management practices to reduce the impacts of livestock farms on air and water quality.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: DASC 3134

APSC 3214 - Principles of Meat Science (3 credits)
Muscle biology and biochemistry, fresh meat processing, meat merchandising, processed meats, food safety, meat cookery, and regulations.
Prerequisite(s): ALS 2304 and CHEM 1036
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FST 3214

APSC 3224 - Meat Science Laboratory (1 credit)
Harvesting of livestock, carcass fabrication into wholesale and retail cuts, fresh meat processing and cookery. Handling, processing and displaying fresh and processed beef, pork, and lamb. Applications of Hazard Analysis Critical Control Point (HACCP) and food safety concepts to meat processing environments.
Corequisite(s): APSC 3214
Instructional Contact Hours: (3 Lab, 1 Crd)

APSC 3254 - Animal Products (3 credits)
Products obtained from animals (meat, eggs, dairy, by-products). Effect of production and processing of food animals upon product safety and quality.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

APSC 3334 - Animal Welfare and Bioethics (3 credits)
Historical overview of animal welfare and bioethics. Animal welfare issues in farm and companion animals with respect to their use and treatment in the United States and in the global community. The influences of animal protection organizations, consumer groups, politicians, the scientific community, and other stakeholders on the development and enforcement of policies. Pre: Junior Standing.
Prerequisite(s): APSC 1454 and ALS 2304
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 3434 - Host Microbe Interactions (3 credits)
Microbes and their physiology in animal production. Host-microbe interactions at a cellular/system level. Microbial pathogenesis, microbiome, and metabolism in animal health. Cellular responses to microbe colonization of its animal host. Relate microbial metabolism with diet and animal growth and development. Examine the underlying mechanism behind disease or health resulting from microbe interactions.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 3504 - Poultry Science and Health (3 credits)
Avian embryology and physiological systems, poultry genetics, microbiome, diseases, biotechnology, health and welfare. Social and economic issues facing the poultry industry.
Prerequisite(s): APSC 1454 and APSC 1464
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 3524 - Intermediate Equitation Over Fences (1 credit)
Establishment of sound jumping skills. Continuation of more advanced flat work. Study of hunter courses and cross country jumping. COURSE FEE: $1,500.
Prerequisite(s): APSC 2624
Instructional Contact Hours: (4 Lab, 1 Crd)

APSC 3624 - Advanced Equitation Over Fences (1 credit)
Advanced methods and techniques for jumping and precision riding. COURSE FEE: $1,500.
Prerequisite(s): APSC 3524
Instructional Contact Hours: (4 Lab, 1 Crd)

APSC 3684 - Special Topics in Animal and Poultry Sciences (1,2 credits)
An advanced, variable-content course which explores a topic in the animal sciences such as a significant contemporary issue; an emerging research area of interest to undergraduates; or a semester-long project involving a small group of students. May be repeated for up to three credits, no more than two credits per term.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (1,2 Lec, 1,2 Crd)
Repeatability: up to 3 credit hours

APSC 3754 - Principles of Livestock Evaluation (2 credits)
Selection of market and breeding animals based on subjective and objective methods of evaluation. Basic understanding of evaluation principles, form-to-function, expected progeny differences, and performance records of beef cattle, swine, and sheep. Involves accurate decision making and oral reason presentations.
Prerequisite(s): APSC 1454
Instructional Contact Hours: (6 Lab, 2 Crd)

APSC 3764 - Livestock Merchandising (2 credits)
A comprehensive study of the principles and activities involved in successfully promoting and merchandising livestock. A livestock auction (Hokie Harvest Sale) is held at the conclusion of the course to provide experiences in advertising, salesmanship, livestock photography, facility development, sale management, and budgeting. Pre: Junior standing or consent.
Instructional Contact Hours: (2 Lec, 2 Crd)

APSC 3824 - Equine Training and Marketing (2 credits)
Application of fundamental behavioral concepts and principles to the training of horses in routine handling and groundwork. Preparation, marketing and presentation of horses for show and sale.
Prerequisite(s): APSC 2124
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

APSC 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 3964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 3974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 4004 - Contemporary Issues in the Animal Sciences (3 credits)
Applying critical thinking, ethical reasoning and problem solving in order to make ethical decisions in regard to important contemporary issues in animal agriculture and other areas of the animal sciences; discourse through oral and written communication.
Prerequisite(s): APSC 2004
Pathway Concept Area(s): 1A Discourse Advanced, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 4054 - Genomics (3 credits)
A contemporary analysis of the development, utility and application of high-resolution methods for the study and manipulation of the complete genomes of organisms. The use of new techniques for genomic, metabolic and protein engineering (functional genomics), including high-throughput methods and nanotechnology, will be emphasized.
Prerequisite(s): BCHM 3114 or BCHM 4116 or BIOL 3774
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BCHM 4054

APSC 4064 - Issues in Companion Animal Management (3 credits)
Comparative aspects of companion animals including physiology, anatomy, nutrition, genetics, reproduction and well-being. Normal and aberrant behaviors along with techniques of behavior modification and pharmacological intervention. Critical evaluation of current legal and ethical issues in the companion animal industry. Limited to dogs, cats and caged birds. Pre-requisite: Junior Standing required Pre-requisites may be waived with permission of instructor.
Prerequisite(s): APSC 2464 and ALS 3104 and ALS 2304
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 4124 - Equine Health and Disease (4 credits)
Application of principles needed to effectively monitor and manage equine herd health. Focus on information synthesis, situation assessment and decision-making skills to develop preventative care protocols and treat illness. Practical application of horse health care techniques for routine and minor emergency situations.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (2 Lec, 4 Lab, 4 Crd)

APSC 4204 - Advanced Equine Nutrition and Feeding (3 credits)
Analysis, formulation, and improvement of diets fed to horses in different physiological stages and metabolic statuses. Nutrient digestion, absorption, and utilization of nutrients. Computer-based ration formulation for horses. Applying economic principles to ration formulation and communicate equine nutrition concepts.
Prerequisite(s): ALS 3204
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 4224 - Equine Exercise Physiology (3 credits)
Comprehensive study of conditioning the equine athlete using the principles of exercise physiology, energetics, kinetics, and sports medicine. Anatomy and physiology as it relates to exercise, conditioning and fitness assessment; exercise intolerance; performance nutrition; and medical practices used to support equine athletics.
Prerequisite(s): ALS 2304 and APSC 2124
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 4264 - Companion and Exotic Animal Nutrition (3 credits)
Idiosyncrasies and conformities of digestive systems and metabolic characteristics of cats, dogs, reptiles, small mammals, birds, and fish. Nutrient requirements by life-stage of cats, dogs, reptiles, small mammals, birds, and fish. Food ingredients, software-based pet food formulations, pet food labels, and regulatory frameworks. Modifications of pet food formulations for life stage and physiological conditions. Attributes of food ingredients that impact quality and nutritional value. Pet food packaging nutritional claims. Evaluation of newly emerging information and scientific literature regarding nutritional requirements of cats, dogs, reptiles, small mammals, birds, and fish.
Prerequisite(s): ALS 3204
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 4304 - Principles and Practices of Bovine Reproduction (2 credits)
Principles and techniques in reproductive physiology and herd management related to health, record keeping, estrus detection and synchronization, uterus and ovary condition. Ovarian function and superovulation, semen handling, artificial insemination and pregnancy detection are also considered.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)
Course Crosslist: DASC 4304

APSC 4324 - Equine Reproduction and Neonatal Care (4 credits)
Principles and techniques in equine reproductive physiology and endocrinology. In-depth examination of equine reproduction strategies combined with practical techniques leading to synthesis and evaluation of breeding decisions. Anatomy and physiology of the mare and stallion, estrus detection and manipulation, artificial insemination, semen handling and processing, parturition and early care of neonates will be covered. Other topics will include selection of breeding stock and mating decisions.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (2 Lec, 4 Lab, 4 Crd)

APSC 4404 - Commercial Poultry Enterprise Management (4 credits)
Production, management, and reproduction of meat- and egg-type chickens and turkeys. Emphasis is on the application of basic poultry science principles as they relate to commercial poultry enterprises. Advanced topics of economic analysis, program management, and problem solving used in decision making processes in integrated poultry operations.
Prerequisite(s): APSC 2104 and ALS 3104 and ALS 3204 and ALS 3304
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

APSC 4414 - Beef and Sheep Production and Industry (4 credits)
Study of the commercial and purebred beef cattle and sheep industries. Principles and applications for successful and profitable beef and sheep production.
Prerequisite(s): APSC 2114 and ALS 3104 and ALS 3204 and ALS 3304
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

APSC 4424 - Horse Production and Management (4 credits)
Reproduction, genetics, nutrition, herd health, planning and economics of private and commercial horse farms, and current issues in the horse industry.
Prerequisite(s): APSC 2124 and APSC 2424 and ALS 3104 and ALS 3204 and ALS 3304
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

APSC 4444 - Swine Production (3 credits)
Principles for commercial and seedstock swine production; current management practices, housing and marketing; issues and challenges in the swine industry. Experience in husbandry, research, and other management techniques obtained during laboratory.
Prerequisite(s): APSC 2114 and ALS 3104 and ALS 3204 and ALS 3304
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

APSC 4464 - Companion and Laboratory Animal Health and Management (4 credits)
Animal health, management, well-being, and government regulation in the maintenance, use and enjoyment of companion and laboratory animals.
Prerequisite(s): APSC 2164 and APSC 3064 and ALS 3104 and ALS 3204 and ALS 3304
Instructional Contact Hours: (3 Lec, 2 Lab, 4 Crd)

APSC 4514 - Animal Growth and Development (3 credits)
Meat animal growth and development processes, micro and gross anatomy, stem cell biology and growth, body and carcass composition with application to animal and carcass evaluation.
Prerequisite(s): ALS 2304 and ALS 3204
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 4554 - Advanced Livestock Enterprise Management (3 credits)
Application of principles needed to manage profitable and sustainable beef cattle, sheep, and swine enterprises. Use of techniques to develop and evaluate strategies resulting in sound livestock enterprise management decisions. Focus on advanced animal management protocols, enterprise analysis, resource allocation, marketing options and risk management.
Prerequisite(s): APSC 4414 or APSC 4444
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

APSC 4624 - Topics in Equine Science (2 credits)
Review and critique of scientific literature related to equine science. Focus on creative and critical thinking. Principles and practice of information analysis, synthesis and evaluation through discourse and technical writing. Practical application of research and communication skills.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (2 Lec, 2 Crd)

APSC 4774 - Nutrition and the Animal Brain (3 credits)
Relationship of diet and nutrients to animal behavior and neurobiology. Nervous system control of feeding behavior and metabolism to regulate whole body energy homeostasis in companion, livestock, and poultry species. Interactions of dietary formulations and nutrients affecting brain physiology and pathology.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (3 Lec, 3 Crd)

APSC 4954 - Capstone Experience in Animal and Poultry Sciences (1-19 credits)
Student-defined learning experience that utilizes knowledge and skills already learned to acquire new skills, synthesize information and solve problems in the animal sciences. Requires approval from the department before commencement of the experience, and a final report at its conclusion. Open to APSC majors only. Completion of 75 credits towards the APSC degree required.
Prerequisite(s): APSC 2004
Instructional Contact Hours: Variable credit course

APSC 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

APSC 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Undergraduate Course Descriptions (DASC)

DASC 1464 - Dairy Cattle Handling (1 credit)
Safety in dairy cattle handling; animal behavior; care, housing, and managerial practices related to dairy cattle. Experiential activities. Herding, sorting, halter training, health scoring, and milking.
Instructional Contact Hours: (3 Lab, 1 Crd)

DASC 1574 - Dairy Science First Year Experience (1 credit)
The scope of the dairy science undergraduate program, preparation for careers in dairy and related industries. Hands-on experience working with dairy cattle. Inquiry, problem solving, and integration of ideas and experiences with a focus on the dairy industry.
Instructional Contact Hours: (1 Lec, 1 Crd)

DASC 2204 - Entrepreneurship in Animal Agriculture (3 credits)
Impact of animal entrepreneurship on the US agricultural economy. Innovative products and services for the dairy and livestock industries. Strategic planning, human resources, production scheduling, marketing, and financial management for animal enterprises. Capital acquisition. Sensitivity analysis for key planning assumptions. Contingency planning and risk management. Identification of non-traditional career paths in the animal industry. Pre: Sophomore Standing.
Prerequisite(s): AAEC 1005
Instructional Contact Hours: (3 Lec, 3 Crd)

DASC 2474 - Dairy Science and Industry (3 credits)
Sustainable production, processing, and marketing of milk and milk products domestically and globally. Biology of dairy cattle with emphasis on genetics, reproduction, lactation, and nutrition. Management of dairy herds.
Instructional Contact Hours: (3 Lec, 3 Crd)

DASC 2484 - Dairy Cattle Evaluation (2 credits)
Critical appraisal of dairy cattle conformation and experience in linear trait scoring, linear trait relationships to profitability, competitive judging; written and oral justification; organization and conduct of shows and contests; showmanship. II.
Instructional Contact Hours: (6 Lab, 2 Crd)

DASC 2664 - Professional Discourse and Career Development (1 credit)
Emphasis on writing and speaking skills for livestock industry or post-baccalaureate education. Self-marketing, job acquisition, press relations, and conduct of meetings and labor management techniques.
Instructional Contact Hours: (1 Lec, 1 Crd)

DASC 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

DASC 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

DASC 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

DASC 3134 - Animal Agriculture and the Environment (3 credits)
Environmental issue associated with animal agriculture. Nutrient contamination of water resources, odor emission from livestock farms, environmental regulations affecting animal agriculture, and management practices to reduce the impacts of livestock farms on air and water quality.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: APSC 3134

DASC 3274 - Applied Dairy Cattle Nutrition (3 credits)
Application of basic principles of nutrition in developing rations for dairy herds. Emphasis is placed on appropriate use of forages, ration formulation techniques, development of profitable rations, and ration delivery.
Corequisite(s): ALS 3204
Instructional Contact Hours: (3 Lec, 3 Crd)

DASC 3474 - Dairy Information Systems (3 credits)
Development, function, and use of dairy information systems including computerized performance testing programs for dairy cattle improvement and dairy herd management. Dairy management software applications. Precision dairy farming. Whole herd evaluation. Pre: Junior standing.
Prerequisite(s): DASC 2474
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

DASC 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

DASC 4174 - Applied Dairy Cattle Genetics (3 credits)
Application of genetic principles to dairy cattle improvement. Setting goals for genetic improvement, characteristics of traits included in selection, current methods of estimating breeding values, the role of artificial insemination and breed associations in genetic improvement, cattle genetics.
Prerequisite(s): ALS 3104
Instructional Contact Hours: (3 Lec, 3 Crd)

DASC 4274 - Dairy Ration Formulation (1 credit)
Develop entry level professional animal nutritionist skills; use customer and feed databases, use optimization algorithms to formulate least cost diets and feed mixes, simultaneous consideration of diet cost, animal product return, and environmental constraints; further develop intergrative thinking and problem solving skills.
Corequisite(s): DASC 3274
Instructional Contact Hours: (0 Lec, 3 Lab, 1 Crd)

DASC 4304 - Principles and Practices of Bovine Reproduction (2 credits)
Principles and techniques in reproductive physiology and herd management related to health, record keeping, estrus detection and synchronization, and ultrasonography. Ovarian function and superovulation, semen handling, artificial insemination and pregnancy detection are also considered.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)
Course Crosslist: APSC 4304

DASC 4374 - Physiology of Lactation (3 credits)
Anatomy of the mammary gland and physiology of lactation in domestic and laboratory mammals with emphasis on dairy cattle. Mammary gland health and factors affecting lactation. Principles and techniques in dairy herd milking management.
Prerequisite(s): ALS 2304
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

DASC 4384 - Mammary Immunology (3 credits)
This course is designed to provide students with basic knowledge of immunology as related to diseases of the mammary gland. Concepts of mammary gland immunity, disease etiology, immunopathology, diagnosis and therapy will be covered with a focus on ungulate species. Host pathogen interactions, solving problems, writing intensive, literature search.
Prerequisite(s): ALS 2304 and ENGL 1106
Instructional Contact Hours: (3 Lec, 3 Crd)

DASC 4474 - Advanced Dairy Management Evaluation (2 credits)
Students will learn to critically evaluate all aspects of dairy farm management on working farms. The assessment and recommendations will be developed using information gathered from herd production records and financial statements, visual observations at the farm, and an interview of the farm owner and workers. Data assessed will include milk, growth, health, reproduction, and culling records; cash flow and profit loss statements; nutrition and nutrient management records; and labor management structure. The assessments and reports will further develop integrative thinking, oral communication, and written communication skills.
Prerequisite(s): DASC 3474 and ALS 3204 and ALS 3304
Corequisite(s): DASC 4475
Instructional Contact Hours: (6 Lec, 0 Lab, 2 Crd)

DASC 4475 - Dairy Enterprise Management (3 credits)
Decision strategies for modern dairy businesses. 4475: Emphasis on relationships of enterprises and techniques for evaluation of business alternatives, efficiency of production, and profit. Use of microcomputer software to support management decisions. 4476: Concentration on herd replacements, personnel, facilities and issues of management associated with rapidly changing national and international markets, environmental regulations, and computer applications. Group projects and hands-on management of university dairy herd.
Prerequisite(s): DASC 2474
Instructional Contact Hours: (3 Lec, 3 Crd)

DASC 4476 - Dairy Enterprise Management (3 credits)
Decision strategies for modern dairy businesses. 4475: Emphasis on relationships of enterprises and techniques for evaluation of business alternatives, efficiency of production, and profit. Use of microcomputer software to support management decision. 4476: Concentration on herd replacements, personnel, facilities and issues of management associated with rapidly changing national and international markets, environmental regulations, and computer applications. Group projects and hands-on management of university dairy herd. Pre-requisite may be waived with permission of instructor.
Prerequisite(s): (DASC 4475 or AAEC 3454) and DASC 3474
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

DASC 4664 - Translating Dairy Science (1 credit)
Analysis and interpretation of peer-reviewed literature in dairy science. Focus on dairy industry issues discussed in social media. Critical reasoning, information synthesis, and oral and written discourse. Paper presentations and discussion. Pre: Senior Standing
Prerequisite(s): DASC 2664
Instructional Contact Hours: (1 Lec, 1 Crd)

DASC 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

DASC 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

DASC 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

DASC 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Animal and Poultry Sciences Major

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
Many courses in this list have prerequisites. Click on each course for its description and any co- or prerequisites.		
CHEM 1035	General Chemistry	3
CHEM 1036	General Chemistry	3
CHEM 1045	General Chemistry Laboratory	1
CHEM 1046	General Chemistry Laboratory	1
APSC 1454	Introduction to Animal and Poultry Science (C) [1]	3
APSC 1464	Animal and Poultry Science Laboratory [1]	1
APSC 1504	Animal and Poultry Sciences First Year Experience [1]	1
APSC 2004	Animal and Poultry Sciences Seminar [1]	1
ALS 2304	Comparative Animal Physiology and Anatomy [1]	4
ALS 3204	Animal Nutrition and Feeding [1]	3
Subtotal		21
Major Requirements		
Many courses in this list have prerequisites. Click on each course for its description and any co- or prerequisites.		
Economics Requirement		
Select one of the following:		3
AAEC 1006	Economics of the Food and Fiber System	
AAEC 2104	Personal Financial Planning	
AAEC 2434	Foundations of Agribusiness	
Experiential Learning Requirement		
Select one of the following:		1
APSC 4954	Capstone Experience in Animal and Poultry Sciences	
APSC 3954	Study Abroad (Approved on a case-by-case basis.)	
APSC 4964	Field Study (Approved on a case-by-case basis.)	
APSC 4974	Independent Study (Approved on a case-by-case basis.)	
APSC 4994	Undergraduate Research (Approved on a case-by-case basis.)	
3954, 4964, 4974, and 4994 courses hosted in other departments will be approved on a case by case basis.		
Species Requirement [1,2]		
Many courses in this list have prerequisites. Click on each course for its description and any co- or prerequisites.		
Select one of the following:		3
APSC 3504	Poultry Science and Health	
APSC 3064	Companion and Laboratory Animal Science	
APSC 4404	Commercial Poultry Enterprise Management	
APSC 4414	Beef and Sheep Production and Industry	
APSC 4424	Horse Production and Management	
APSC 4444	Swine Production	
APSC 4464	Companion and Laboratory Animal Health and Management	
Animal Science/Management Requirement [1,2]		

Many courses in this list have prerequisites. Click on each course for its description and any co- or prerequisites.		
Select four of the following. At least 12 credits total.		12
ALS 3304	Physiology of Reproduction	
ALS 4554	Neurochemical Regulation	
ALS 4574	Social Behavior of Birds and Mammals	
APSC 3134	Animal Agriculture and the Environment	
APSC 3214	Principles of Meat Science	
APSC 3254	Animal Products	
APSC 3334	Animal Welfare and Bioethics	
APSC 3434	Host Microbe Interactions	
APSC 3504	Poultry Science and Health	
APSC 3064	Companion and Laboratory Animal Science	
APSC 4054	Genomics	
APSC 4124	Equine Health and Disease	
APSC 4204	Advanced Equine Nutrition and Feeding	
APSC 4224	Equine Exercise Physiology	
APSC 4324	Equine Reproduction and Neonatal Care	
APSC 4404	Commercial Poultry Enterprise Management	
APSC 4414	Beef and Sheep Production and Industry	
APSC 4424	Horse Production and Management	
APSC 4444	Swine Production	
APSC 4464	Companion and Laboratory Animal Health and Management	
APSC 4514	Animal Growth and Development	
APSC 4554	Advanced Livestock Enterprise Management	
DASC 3274	Applied Dairy Cattle Nutrition	
DASC 3474	Dairy Information Systems	
DASC 4174	Applied Dairy Cattle Genetics	
DASC 4374	Physiology of Lactation	
DASC 4384	Mammary Immunology	
DASC 4475	Dairy Enterprise Management	
DASC 4476	Dairy Enterprise Management	
Subtotal		19
Elective Courses		
Restricted Electives [3,4]		
Many courses in this list have prerequisites. Click on each course for its description and any co- or prerequisites.		
Take 21 credits from the following list.		21
AAEC 2104	Personal Financial Planning	
AAEC 2434	Foundations of Agribusiness	
AAEC 3XXX and higher		
ACIS 1504	Introduction to Business Analytics and Business Intelligence	
AHRM 2404	Consumer Rights	
ALCE 3XXX and higher		
ALS 2XXX and higher		
APSC 2XXX and higher		
BCHM 2XXX and higher		
BIOL 2XXX and higher except 3404		
BIT 2XXX and higher		
BMVS 4XXX (except 4054 and 4064)		
BSE 2XXX and higher		
CHEM 2XXX and higher		
COMM 2XXX and higher		
CONS 2304	Consumer and Family Finances	
CSES 2XXX and higher		
DASC 2XXX and higher		
ECON 2XXX and higher		
ENGL 3774	Business Writing	
or ENGL 3764	Technical Writing	
ENSC 3XXX		
ENT 2XXX and higher		
FIN 3XXX and higher		
FIW 2XXX and higher		
FST 2XXX and higher		
GEOG 4XXX		
HNFE 1004	Foods, Nutrition And Exercise	
HNFE 2XXX and higher		
HORT 2XXX and higher		
HTM 2XXX and higher		
IS 2XXX and higher		
MATH 1025	Elementary Calculus (and higher)	
MGT 3XXX and higher		
MKTG 3XXX and higher		
NEUR 2XXX and higher		
PHS 4XXX		
PHYS 2XXX and higher (except 2074, 2325, 2326)		
PPWS 2XXX and higher		
PSYC 2074	Animal Behavior	
STAT 3XXX and higher		
SPES 2004	Cannabis - Science, Industry, and Culture	
SPES 2244	World Crops: Food and Culture	
Free Electives		
Select credit hours to fulfill degree requirement.		12
Subtotal		33
Pathways to General Education [5]		
Pathways Concept 1 - Discourse		
ENGL 1105	First-Year Writing (1F)	3
ENGL 1106	First-Year Writing (1F)	3
APSC 4004	Contemporary Issues in the Animal Sciences (1A) [1]	3
Pathways Concept 2 - Critical Thinking in the Humanities		
Select six credits in Pathway 2 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G02)		6
Pathways Concept 3 - Reasoning in the Social Sciences		
AAEC 1005	Economics of the Food and Fiber System	3
or ECON 2005	Principles of Economics	
Select an additional three credit hours of Pathway 3 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G03)		3
Pathways Concept 4 - Reasoning in the Natural Sciences		
BIOL 1105	Principles of Biology	3
BIOL 1106	Principles of Biology	3
BIOL 1115	Principles of Biology Laboratory	1
BIOL 1116	Principles of Biology Laboratory	1
Pathways Concept 5 - Quantitative and Computational Thinking		

MATH 1014	Precalculus with Transcendental Functions (5F)	3
or MATH 1025	Elementary Calculus	
STAT 2004	Introductory Statistics (5F)	3
or STAT 3005	Statistical Methods	
ALS 3104	Animal Breeding and Genetics (5A) [1]	3
Pathways Concept 6 - Critique and Practice in Design and the Arts		
Select three credits in Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A) and three credits in Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D) or six credits in integrated arts and design.		6
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select three credits in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07) Students may have 3 more credits of free electives by choosing a course that double counts for Pathways 7 and Pathways 2, Pathways 3, or Pathways 6.		3
Subtotal		47
Total Credits		**120**

1. These courses are included in the in-major GPA calculation and must be taken A-F unless offered P-F only.
2. At least 6 credits of Species and/or Animal Science/Management courses must be 4XXX. Cannot double count courses in Species Requirement and Animal Science/Management Requirement.
3. All restricted electives must be taken on an A-F basis, unless only offered P/F. Only free electives may be taken P/F if offered A-F. At least 6 credits of approved restricted electives must be 4XXX. 1984, 2964, 2974, 2984, 2994, 3954, 3964, 3984, 4964, 4974, 4984, and 4994 courses will be considered on a case-by-case basis. Courses used for Major Requirements cannot double count as Restricted Electives or Free Electives. Enrollment in specific courses listed as Restricted Electives is not guaranteed. Consult with your advisor when choosing restricted electives.
4. APSC majors completing a foreign language minor may use up to 6 credits of 3xxx or 4xxx courses from the minor as restricted electives. APSC majors completing a Psychology minor may use 1 3XXX or 4XXX course towards their restricted electives if they also complete PSYC 2074.
5. Courses used for Pathways 1-7 or Degree Core cannot be used for Major Requirements, Restricted Electives, or Free Electives.

Upon the completion of 72 credits, APSC students must have completed CHEM 1036 General Chemistry, CHEM 1046 General Chemistry Laboratory, APSC 1454 Introduction to Animal and Poultry Science, APSC 1464 Animal and Poultry Science Laboratory, and 6 credits from ALS 2304 Comparative Animal Physiology and Anatomy, ALS 3104 Animal Breeding and Genetics, or ALS 3204 Animal Nutrition and Feeding; have a minimum overall GPA of 2.00; and have completed at least 24 credits that apply to the Pathway to General Education requirements.

Graduation Requirements

Students must complete the courses listed to equal at least 120 credits, with a minimum overall GPA of 2.00 and a minimum in-major GPA of 2.00.

For purposes of GPA computation, courses included in the calculation of **in major** GPA are courses notated with the applicable footnote.

An APSC degree may be earned in combination with the first year of work in an accredited medical, dental, or veterinary school, provided that the following requirements are met: at least two of the three years of pre-professional work, including the third year, are in residence at VT; a minimum of 90 semester credits of undergraduate work that include all the courses listed above as Pathway to General Education and Degree Core, and at least one course listed under the Species Requirement.

Students majoring in Animal and Poultry Sciences cannot minor in Animal and Poultry Sciences or in Equine Sciences.

Foreign Language Requirements

Four credits of accelerated foreign language or two semesters of a single foreign language are required unless 2 units of a single foreign language are completed in high school. These credits do not count toward graduation requirements.

School of Plant and Environmental Sciences

Our Website (http://www.spes.vt.edu)

Overview

The School of Plant and Environmental Sciences increases the University's capacity to tackle challenges in agriculture and food security, the green industry, plant biology, and the environment. Currently, the School offers two undergraduate degrees and seven majors: 1) Crop and Soil Sciences, 2) Ecological Restoration, 3) Environmental Horticulture, 4) Environmental Science, 5) Integrated Agriculture Technologies, 6) Landscape Design and Turfgrass Science, and 7) Plant Science.

Degree Programs

Environmental Science

The Environmental Science degree program brings the basic sciences to bear on many crucial concerns about the environment. The environments of particular interest are terrestrial and wetland ecosystems and associated land and water resources. Specific concerns include environmental protection, pollution prevention and remediation, land-use planning, waste management, ground- and surface-water quality, reclamation and remediation of disturbed or contaminated sites, and minimizing human impacts on the environment.

Plant Science

The Plant Science degree program trains students to improve the productivity, utilization, and sustainability of plants grown for human use. Students obtain a thorough education in the applied plant sciences related to the major disciplinary areas in our School - Crop and Soil Sciences, Environmental Horticulture, Landscape Design and Turfgrass Science, and Plant Science.

Majors

Crop and Soil Sciences

Crop and Soil Sciences major prepares students for graduate school and crop-related management careers in the private and public sectors.

Students in this major learn the principles of crop production, soil science, nutrient management, and pest management to improve the productivity of large-scale field crops while protecting the environment.

Ecological Restoration

Ecological Restoration is the process of guiding the recovery of degraded or destroyed ecosystems in agricultural, urban, and mined landscapes and associated waters. Students in the Ecological Restoration major engage in a structured program of learning that moves from introductory courses in the biological and physical sciences to courses in soil science, ecology, geology, plant science, and ecological restoration. The curriculum accommodates both in-class and field-based learning and was designed in conjunction with the Society for Ecological Restoration's Certified Ecological Restoration Practitioner In-Training program (CERPIT).

Environmental Horticulture

Horticulture is an applied plant science that covers the study of ornamental plants, floriculture, and intensively managed crops like fruits and vegetables. In addition to plant science, students also learn about principles of greenhouse management and other controlled environmental agriculture systems (e.g., vertical farming). The program covers a range of applied and basic environmental plant science topics, from plant-soil interactions, biotechnology, landscape design, sustainable urban landscaping, urban forestry, crop production, and plant breeding.

Environmental Science

The Environmental Science curriculum is multidisciplinary and strongly science and technology oriented. Students learn about preserving, protecting, and remediating resources and the ecosystems that provide them. Our rigorous program has established an excellent reputation among employers and our graduates are in great demand primarily working in environmental engineering fields, environmental consulting, and various governmental agencies.

Integrated Agriculture Technologies

The Integrated Agriculture Technologies major seeks to prepare a new generation of students that will work in the applied plant sciences using advanced technologies to improve plant productivity and protecting the environment. Students learn to work with drones, robots, environmental sensors, satellite imaging, and data analytics to improve the sustainability field crops and horticultural systems. Students in the major gain a unique combination of technological know-how and extensive practical knowledge in the plant and soil sciences.

Landscape Design and Turfgrass Science

Landscape Design and Turfgrass Science major learn to design, build, and manage beautiful and functional landscapes using science-based practices that improve the living environment and contribute to environmental sustainability. Students choose a concentration area that best meets their chosen career path- Landscape Design or Turfgrass Management. Students in the Landscape Design concentration learn principles related to the design, installation, and maintenance of different types of landscapes in the public and private sectors. Students working in Turfgrass Management concentration learn principles related to the care and management of lawns, landscapes, golf courses, and athletic fields.

Plant Science

The Plant Science major prepares students for graduate school and careers in the private and public sectors working in the fields of plant breeding, biotechnology, plant pathology, and weed science. Students learn principles of plant biology, molecular biology, biochemistry, plant genetics, and crop breeding and apply these to better understand how to improve plant productivity and sustainability.

Minors

The School offers minors in Crop and Soil Environmental Sciences, Environmental Science, Horticulture, Plant Health Sciences, Turfgrass Management, Viticulture, and Wetland Science. The course requirements for each vary and include a required course (s) plus 15 or 16 more credit hours selected from courses from within and outside the department. Consult the department office (330 Smyth) or website at http://registrar.vt.edu/graduation-multi-brief/index1.html for more information on a minor.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree.

Satisfactory progress requirements toward the specific degree can be found on the major checksheet by visiting the University Registrar website at http://registrar.vt.edu/graduation-multi-brief/index1.html.

Opportunities to Excel

Students with outstanding records can qualify for the Honors Program and graduate "in honors" in crop and soil environmental sciences. Other opportunities for personal and professional growth and for recognition include Agronomy Club, Environmental Student Organization, Horticulture Club, and Turf Club. Membership in Alpha Zeta, Gamma Sigma Delta, Pi Alpha Xi or other honoraries, and several scholarships are also available. Many students participate in internships that are commonly available in the respective disciplines.

Graduate courses and research opportunities lead to M.S. and Ph.D. specializations in the Crop, Soil, and Environmental Sciences, Horticulture, and Plant Pathology and Weed Science. (See the Graduate Catalog (https://catalog.vt.edu/graduate/) for more information.)

- Crop and Soil Sciences Major (p. 567)
- Ecological Restoration Major (p. 569)
- Environmental Horticulture Major (p. 572)
- Environmental Science Major (p. 574)
- Integrated Agriculture Technologies Major (p. 576)
- Landscape Design and Turfgrass Science Major (p. 578)
- Plant Science Major (p. 581)

Head: Michael Evans
Associate Director for Undergraduate Programs: Benjamin Tracy (231.8259, bftracy@vt.edu)
Professors: A. O. Abaye, E. Beers, J. F. Derr, M. J. Eick, J. D. Eisenback, G. K. Evanylo, J. H. Fike, J. M. Goatley Jr., C. Hong, C. S. Johnson, D.B. Langston Jr, R. O. Maguire, J. M. McDowell, A. Niemiera, M. A. Saghai Maroof, D. G. Schmale III, T. Thompson, B. F. Tracy, B. A. Vinatzer, G. Welbaum, J. H. Westwood, M. Williams, K. Xia
Associate Professors: S. D. Askew, B. D. Badgley, M. Balota, J. N. Barney, A. B. Baudoin, E. Colláková, M. L. Flessner, W. H. Frame, J. M. Galbraith, D. Holshouser, J. G. Jelesko, S. Li, G. Pilot, M.S. Reiter, S. L. Rideout, R. Stewart, X. Wang, C. A. Wilkinson, and B. Zhao

Assistant Professors: B. Bargmann, P. Brown, D. C. Haak, D. S. McCall, M. Nita, B.B. Posadas, A. Possinger, J. L. Reid, J. Samtani, D. Sandor, N. Santantonio, H. Seyyedhasani, S. Shafian, S. Sherif, V. Singh, K. South, M. Steele, and B. Zhang
Affiliate Professor: A. Pereira
Adjunct Professors: J. Atland, M. Chaungsheng, K. Da, Y. Dan, B. Flinn, R. F. Follett, Z. Liu, S. Lowman J. E. Perry III, P. J. Thomas, R. W. Tiner, M. J. Vepraskas, and S. Zhang
AP Faculty Professional: S. Douglas, J. Freeborn, S. Gugercin, L. Fox, A. Straw, and A. Vallotton
Instructors: J. Kardos, B. Leshyn, and L.R. Salamanca
Special Research Faculty: E. A. Bush, S. Y. Park, and E. Unglesbee

Undergraduate Course Descriptions (CSES)

CSES 2224 - Foundations of Precision Agriculture (3 credits)
Integrated technologies in the plant and environmental sciences including: global positioning systems (GPS), geographic information systems (GIS), remote and proximal sensing, variable rate technology (VRT) and decision support systems (DSS). Application to site-specific nutrient, water, weed and disease management.
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 2244 - Agriculture, Global Food Security and Health (3 credits)
Agriculture and food security within the larger context of applied agronomy, gender role, cultural and political aspects of food production, food policy, production contraints, and global population growth. Emphasis on gender iniquity and globalized food systems will be made. Service learning experience both local and global to promote career opportunity in international development.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 10 Ethical Reasoning, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 2434 - Crop Evaluation (2 credits)
Identification of more than 200 crops, weeds, seeds and crop diseases. Seed testing for purity according to the rules of the Association of Official Seed Analysts. Crops graded according to the official USDA grain grading standards.
Instructional Contact Hours: (6 Lab, 2 Crd)

CSES 2444 - Agronomic Crops (3 credits)
An introduction to crop production in Virginia, presenting basic climatic, crop, and soil characteristics and their relation to cropping systems. Introduces basic mechanical, chemical, and managerial tools of crop production and examines feed quality and seed and forage storage.
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 2564 - Turfgrass Management (3 credits)
Growth, development, adaptation, and selection of the major turfgrass species. Principles of establishment, mowing, nutrition, irrigation, cultivation, and pest control of lawns and utility turfs.
Corequisite(s): BIOL 1105
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

CSES 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 3114 - Soils (3 credits)
Characterization of soils as a natural resource emphasizing their physical, chemical, mineralogical, and biological properties in relation to nutrient availability, fertilization, plant growth, land-use management, waste application, soil and water quality, and food production. For CSES, ENSC, and related plant-and earth-science majors. Partially duplicates 3134.
Prerequisite(s): CHEM 1036
Corequisite(s): CSES 3124
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: GEOS 3614

CSES 3124 - Soils Laboratory (1 credit)
Parent materials, morphology, physical, chemical, and biological properties of soils and related soil management and land use practices will be studied in field and lab. Partially duplicates 3134.
Corequisite(s): CSES 3114
Instructional Contact Hours: (3 Lab, 1 Crd)
Course Crosslist: GEOS 3624

CSES 3144 - Soil Description and Interpretation (3 credits)
Describing, classifying, evaluating, and interpreting soil and site properties in the class and field. Local field trips supplement lecture and laboratory studies. Required for students interested in attending soil judging contests.
Corequisite(s): CSES 3114, CSES 3124
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)

CSES 3304 - Geomorphology (3 credits)
Examines the variety of landforms that exist at the earths surface. Detailed investigation of major processes operating at the earths surface including: tectonic, weathering, fluvial, coastal, eolian, and glacial processes. Field excursion.
Prerequisite(s): GEOG 1104 or GEOS 1004 or GEOS 2104
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: GEOG 3304, GEOS 3304

CSES 3564 - Golf and Sports Turf Management (3 credits)
Principles of turfgrass science and culture required for successful establishment and management of intensely utilized fine golf and sports turf surfaces. Pre: CSES 3564 or equivalent turfgrass science fundamentals course from transfer institution.
Prerequisite(s): CSES 2564
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 3614 - Soil Physical and Hydrological Properties (3 credits)
Soil physical and mechanical properties and the physical processes controlling soil water retention and flow in agronomic and natural settings. Grain size distribution, weight-volume relationships, specific surface, electrical charge density, consistency, stress, compaction, rainfall runoff, water retention, steady/non-steady water flow in saturated/unsaturated soil, infiltration, bare soil evaporation, and soil water balance.
Prerequisite(s): (CSES 3114 and CSES 3124) or (GEOS 3614 and GEOS 3624)
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 4064 - Soil Microbiology (3 credits)
Soil microbes as determinants of plant growth, sustainable agricultural systems, and global nutrient cycles. Environmental controls of soil microbes and relationship to soil decomposition. Soil as a micro-habitat. Application to soil management and plant growth, plant-microbe mutualisms, probiotics, biocontrol, composting, ecosystem restoration, and disease suppression.
Prerequisite(s): BIOL 1105 and (CSES 3114 or ENSC 3114 or GEOS 3614) or (CSES 3134 or ENSC 3134)
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4134 - Soil Genesis and Classification (3 credits)
Formation of soils across landscapes, soil-forming factors and processes, applied soil geology/geomorphology, applied soil biochemistry, soil hydrology, diagnostic horizons and characteristics used in Soil Taxonomy; soil classification and mapping. Three outdoor lectures and one 3-day field trip are mandatory.
Prerequisite(s): (CSES 3114 and CSES 3124) or (ENSC 3114 and ENSC 3124) or (GEOS 3614 and GEOS 3624) or CSES 3134 or ENSC 3134
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

CSES 4144 - Plant Breeding and Genetics (3 credits)
Genetic variation in plants and its importance in plant breeding, and comparisons of theories and procedures in breeding of self-pollinated versus cross-pollinated plants.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

CSES 4174 - Soil Evaluation and Sampling (3 credits)
Naming, describing, classifying, sampling, and interpreting soil and site properties in the field to assess environmental impacts and suitability under specific land use scenarios. Selecting and evaluating sites of representative soil resources across the landscape using accepted professional protocols, simulating workplace responsibilities and performance. Local and regional field trips and sampling projects provide professional skill development evaluated by practitioners and potential employers.
Prerequisite(s): CSES 3114 or CSES 3144
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

CSES 4214 - Soil Fertility and Management (3 credits)
Soil productivity and nutrients required for crop growth; fertilizer sources and nutrient reactions in soil; methods of fertilizer nutrient placement in major tillage systems; and interpretation of soil tests and plant analyses for determining crop nutrient requirements.
Prerequisite(s): CSES 3114 or CSES 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4224 - Applied Concepts in Precision Agriculture (3 credits)
Advanced applications of core components and technologies used for integrated plant and environmental studies. Global Navigation Satellite Systems (GNSS), remote sensing technologies, Geographic Information Systems (GIS), soil sampling, yield monitoring, and analysis and decision-making systems applied for site specific management of production agriculture resources.
Prerequisite(s): CSES 2224
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4234 - Agro Data Integration (3 credits)
Data science applications in the agricultural sciences. Data pipelines and modern Linux, cluster and cloud-based computing environments. Command line interface and shell scripting. Programming and data processing in Python programming language. Data analysis and visualization in R programming language. Agronomic data analysis and data mining.
Prerequisite(s): CSES 2224 and CS 1014
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4324 - Water Quality Laboratory (1 credit)
Teach students a variety of laboratory chemical and biological techniques for water quality analysis. Complementary to ENSC/CSES 4314.
Prerequisite(s): CHEM 1046
Corequisite(s): CSES 4314, ENSC 4314
Instructional Contact Hours: (3 Lab, 1 Crd)
Course Crosslist: ENSC 4324

CSES 4334 - Principles and Practice of Agroforestry (3 credits)
Biological, social, economic, and technical aspects of agroforestry, training and technology transfer techniques, and application of forestry and agriculture principles. Roles of animals and fish, trees, and agricultural crops in agroforestry systems. Community involvement in planning and implementation of agroforestry projects.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 4334

CSES 4344 - Crop Physiology and Ecology (3 credits)
Developmental and ecological processes important in cropping situations: seed physiology, root and canopy development, flowering, water stress, energy flow, competition; emphasis on physiological adaptations, limitations to yield, and yield-optimizing strategies.
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4354 - Advanced Agronomic Crops (3 credits)
Survey of major agronomic crops grown in the Eastern US and their production including: corn, soybean, wheat, barley, cotton, peanut, tobacco and alfalfa. Covers impact of environmental conditions and management on crops, resource requirements for productivity, and effects on soil resources.
Prerequisite(s): CSES 2444
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4444 - Managed Ecosystems, Ecosystem Services, and Sustainability (3 credits)
Description and interactions of climate, soils, and organisms within intensively managed ecosystems used to produce food, fiber, bioenergy, fresh water, recreation, cultural, and other ecosystems services essential for human well-being. Ecological concepts applied to agricultural, grassland, and urban/turf ecosystems. Ecologically-based principles for sustainably managed ecosystems. Regional and global significance of managed ecosystems in context of sustainable food systems, and the Millennium Ecosystem Assessment. Pre-Requisite: Junior Standing required.
Prerequisite(s): CSES 3114 or CSES 3134
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ENSC 4444

CSES 4524 - Drone Applications in Ag Systems (3 credits)
Unmanned Aerial Systems (UAS) or drones as an advanced remotely sensed technology to collect ultra-high spatial resolution images. Components of drones and sensors. UAS operational concepts, and legal requirements, principles of drone data collection and drone platforms. Overview of data processing software and generation of land maps from drone photogrammetry. Image analysis to make recommendations for water, nutrient and pesticide applications.
Prerequisite(s): CSES 2224
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4534 - Internet of Things (IoT) for Smart Farming (3 credits)
Internet of Things (IoT) technology in the plant and environmental sciences and applications to smart-farming ecosystems and agricultural industry. IoT platforms and systems used in smart farming programs related to field equipment management, IoT components, data management, and cybersecurity. Applying wireless sensors, controllers, computers, actuators, and software via wireless network devices.
Prerequisite(s): CSES 2224
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4544 - Forage Crop Ecology (3 credits)
Species adaptation interrelated with soil, climatic, and biotic factors as associated with establishment, production, utilization, and nutritional value of forages.
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4644 - Land-based Systems for Waste Treatment (3 credits)
Soils as a medium for waste treatment; potential for environmental degradation from biologicals and chemicals added to soils; development of land-based treatment and utilization systems for solid and liquid wastes; issues and concerns relating to large-scale applications of municipal and industrial wastes to land.
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4854 - Wetland Soils and Mitigation (3 credits)
Wetland soils as components of natural landscapes: biogeochemistry, hydrology, geomorphology, hydric soil indicators, and wetlands functions under various land uses. Soil and hydrologic factors important to wetland delineation and jurisdictional determination. Mitigation of wetland impacts with emphasis on restoration and creation. Outdoor lectures at local wetlands and a two-day long field trip to observe and identify wetland soils are mandatory.
Prerequisite(s): (CSES 3114 and CSES 3124) or (ENSC 3114 and ENSC 3124) or (GEOS 3614 and GEOS 3624) or CSES 3134 or ENSC 3134
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

CSES 4864 - Capstone: Crop & Soil Sciences (3 credits)
Experiential and discussion-based learning that utilizes prior knowledge gained in the major to synthesize information, and prepare a written comprehensive work plan that is defended orally. Review available careers in the crop and soil sciences. Compose and critique resumes and cover letters. CSS majors only. Pre: Senior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

CSES 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

CSES 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Undergraduate Course Descriptions (ENSC)

ENSC 1015 - Foundations of Environmental Science (3 credits)
Interrelationships between human activities and the environment; emphasis on biological, chemical, and physical principles that govern the flow of energy, materials, and information among physical, ecological and human systems.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 1016 - Foundations of Environmental Science (3 credits)
National and global perspective on societal concerns about the environment and human sustenance, including agriculture. Emphasizes the relationship between human systems and natural systems; ecosystem services and land, water and atmospheric resources.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENSC 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENSC 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENSC 3134 - Soils in the Landscape (3 credits)
A study of soils as functional landscape components, emphasizing their physical, chemical, mineralogical, and biological properties in relation to plant growth, nutrient availability, land-use management, and soil and water quality. Primarily for FOR/FIW, LAR, and other plant/earth science related majors. May not be taken by CSES or ENSC majors. Partially duplicates 3114 and 3124. Pre: one year of introductory CHEM or BIOL or GEOS.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

ENSC 3604 - Fundamentals of Environmental Science (3 credits)
Interrelationships between human activities and the environment; provides national and global perspective; emphasis is on the physical, chemical, and biological principles and processes that are essential to an understanding of human-environment interactions; the role of energy in human and natural systems; environmental legislation and human behavior.
Prerequisite(s): BIOL 1105 or CHEM 1035
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 3634 - Physics of Pollution (3 credits)
Physical processes that control the fate of pollutants in our land, air, and water resources. Types and sources of pollutants, physical processes in the soil-water-atmosphere continuum controlling the dispersion and deposition of pollutants, the movement of pollutants, including radionuclides, by surface and subsurface water flow in soils, and physics of disturbed soils.
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 3644 - Plant Materials for Environmental Restoration (3 credits)
Overview of ecological principles related to revegetation and restoration of disturbed sites. Function and species requirements of plants in stabilizing disturbed areas including mines, rights-of-way, constructed wetlands, and for the remediation of contaminated soils.
Prerequisite(s): BIOL 1106
Corequisite(s): CSES 3114
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENSC 4164 - Environmental Microbiology (3 credits)
Ecology, physiology, and diversity of soil and aquatic microorganisms; incorporates the significance of these topics within the context of environmental applications such as bioremediation, wastewater treatment, control of plant- pathogens in agriculture, and pollution abatement in natural systems. The laboratory portion of the course will stress methodology development, isolation and characterization of microorganisms from natural and engineered systems, and examination of the roles of microorganisms in biogeochemical cycling.
Prerequisite(s): BIOL 2604
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)
Course Crosslist: BIOL 4164

ENSC 4244 - Ecological Restoration (3 credits)
Process of assisting the recovery of degraded ecosystems by linking ecological concepts to restoration interventions. Invasive species management, revegetation methods, soil and water quality, faunal restorations. Restoration project design, planning, monitoring and implementation.
Prerequisite(s): BIOL 2804
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 4314 - Water Quality (3 credits)
Provide comprehensive information on the physical, chemical, biological, and anthropogenic factors affecting water quality, fate and transport of contaminants in water, water quality assessment and management, and current water quality policies.
Prerequisite(s): MATH 1026 or MATH 1226 and (BIOL 1105 or BIOL 1106) and (CHEM 1035 or CHEM 1036)
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 4324 - Water Quality Laboratory (1 credit)
Teach students a variety of laboratory chemical and biological techniques for water quality analysis. Complementary to ENSC/CSES 4314.
Prerequisite(s): CHEM 1046
Corequisite(s): CSES 4314, ENSC 4314
Instructional Contact Hours: (3 Lab, 1 Crd)
Course Crosslist: CSES 4324

ENSC 4344 - Ecological Restoration Field Practicum (2 credits)
Hands-on experience in planning ecological restoration projects, designing ecological restoration strategies, preparing degraded sites for restoration, managing invasive species in ecological restoration projects, implementing ecological restoration techniques, and monitoring restoration outcomes in degraded sites. Additional topics include adaptive management, stakeholder relationships, effective communication in ecological restoration projects, and challenges and barriers to restoration success.
Prerequisite(s): BIOL 1106
Instructional Contact Hours: (2 Lec, 2 Crd)

ENSC 4414 - Monitoring and Analysis of the Environment (2 credits)
Provides comprehensive hands-on-laboratory-and field-based experience and information on the principles and methods for field monitoring and sampling, as well the physical, chemical, and biological analysis of soil, surface water, groundwater, and solid wastes within the context of regulatory compliance. Optional 40-hour Hazards Materials (HAZMAT) training will be available. Senior standing required.
Prerequisite(s): (ENSC 3604 or ENSC 4314 or CSES 4314 or BIOL 4004) and (MATH 1026 or MATH 2015 and CHEM 1036 and BIOL 1105)
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

ENSC 4444 - Managed Ecosystems, Ecosystem Services, and Sustainability (3 credits)
Description and interactions of climate, soils, and organisms within intensively managed ecosystems used to produce food, fiber, bioenergy, fresh water, recreation, cultural, and other ecosystems services essential for human well-being. Ecological concepts applied to agricultural, grassland, and urban/turf ecosystems. Ecologically-based principles for sustainably managed ecosystems. Regional and global significance of managed ecosystems in context of sustainable food systems, and the Millennium Ecosystem Assessment. Pre-Requisite: Junior or Senior Standing required.
Prerequisite(s): CSES 3114 or CSES 3134
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CSES 4444

ENSC 4734 - Environmental Soil Chemistry (3 credits)
Chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibria, sorption phenomena, ion exchange processes, reaction kinetics, redox reactions, and acidity and salinity processes.
Prerequisite(s): CSES 3114 or ENSC 3114 or GEOS 3614 and CSES 3124 or ENSC 3124 or GEOS 3624 and CHEM 2514 or CHEM 2535 and CHEM 2114 and (MATH 1026 or MATH 1226)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CHEM 4734

ENSC 4764 - Bioremediation (3 credits)
Overview of environmental biotechnology and the use of microbes and other organisms to remove contaminants and improve environmental quality. Topics include treatment of contaminated soils, waters, and wastewaters, as well as remediation of industrial waste streams.
Prerequisite(s): BIOL 2604
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 4774 - Reclamation of Drastically Disturbed Lands (3 credits)
Remediation, rehabilitation, revegetation strategies for lands disturbed by mining, construction, industrialization, and mineral waste disposal. Disturbed site characterization and materials analysis procedures. Regulatory and environmental monitoring frameworks for mining sites and other disturbed lands. Prediction and remediation of water quality impacts from acid drainage.
Prerequisite(s): CSES 3114 or ENSC 3114 or GEOS 3614 or CSES 3134 or ENSC 3134 or CSES 3304 or GEOG 3304 or GEOS 3304
Instructional Contact Hours: (3 Lec, 3 Crd)

ENSC 4864 - Captstone: Env Science (1 credit)
Discussion based learning that utilizes prior knowledge gained in the major to synthesize information, and prepare a written comprehensive work plan. The work plan will demonstrate the students understanding of contaminant fate and mobility in different environmental media and will be defended orally. Review and explore available careers in environmental science through seminars and working groups within environmental professionals discussing the role and responsibilities of environmental scientists in industry, consulting, regulatory agencies, and non-profits. ENSC majors only. Senior Standing.
Prerequisite(s): (CSES 3634 or ENSC 3634) and (ENSC 4414) and (CHEM 4734 or CSES 4734 or ENSC 4734) and (CSES 4854 or ENSC 4854)
Instructional Contact Hours: (3 Lab, 1 Crd)

ENSC 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENSC 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENSC 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ENSC 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Undergraduate Course Descriptions (HORT)

HORT 1264 - Landscape Skills Practicum (1 credit)
Relevant skills important for the success in the landscape industry. Safe equipment operation, landscape, irrigation and hardscape installation, management and estimating techniques, marketing and sales strategies, and arboriculture methods.
Instructional Contact Hours: (3 Lab, 1 Crd)

HORT 2134 - Plants and Greenspaces in Urban Communities (3 credits)
Modern concepts of sustainability changing plant use in urban settings. Fundamentals of urban plant systems in the context of urban ecosystem management. Philosophy and critical analysis of sustainability related to green infrastructure, including urban forests, green roofs, urban soils, urban wildlife, urban agriculture, and innovations merging plant and ecosystem functions with building and site engineering. Multi-disciplinary emphasis at site, regional, and global, scales.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 2134

HORT 2144 - Indoor Plants (3 credits)
Basic horticultural principles, identification and cultural criteria applicable to foliage and flowering plants grown indoors. Specific plant groups discussed include ferns, cacti and succulents, and carnivorous plants, among many others.
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 2164 - Floral Design (3 credits)
Fundamental art theory, historical and cultural influences, tools and techniques as applied to current floral art. Emphasis on applied experiential learning through designing, building and producing acceptable floral displays for home and public environments. Sustainable and ethical practices in growing and purchasing flowers. Fee $128.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HORT 2184 - Plants, Places, and Cultures in a Global Context (3 credits)
Impact of worldwide production and trade in fruits, vegetables, and cut flowers (horticultural commodities) on societies, cultures, economies, politics, and environment. Case studies covering history, economics, social/cultural impacts of producing fruit, vegetables, tea, coffee, and other horticultural crops in producing and consuming countries. Case studies illustrate inextricable interactions and interconnectedness between horticultural crops and cultures.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 2224 - Horticulture Science and Industry (2 credits)
Survey course of horticultural crops (fruits, vegetables, ornamentals) and enterprises. Includes plant science and business aspects of horticultural production and service industries, and introduces related issues and emerging technologies such as work force characteristics, organic production, and biotechnology. I.
Instructional Contact Hours: (2 Lec, 2 Crd)

HORT 2234 - Environmental Factors in Horticulture (3 credits)
Principles and practices in managing environmental factors - temperature, water, light, atmospheric gases and pollutants, and soil and minerals - that influence growth and production of horticultural plants.
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 2244 - Plant Propagation (3 credits)
Principles and practices of plant propagation by sexual and asexual methods.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

HORT 2304 - Plant Biology (3 credits)
Introductory botany. Form, growth, function, reproduction, and ecological adaptations of major groups of plants.
Prerequisite(s): (BIOL 1105 or ISC 2105) and BIOL 1106
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BIOL 2304

HORT 2834 - Sustainable Agriculture Practicum (3 credits)
Hands-on training in sustainable agricultural production at a student-operated vegetable and fruit farm. Participation in tasks required in managing a diversified sustainable horticulture operation, including planting, pest management, irrigation, and post-harvest handling. Discussion of soil fertility, planning, efficiency, food safety and community food systems. May be repeated with different content, for a maximum of 6 credits.
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)
Repeatability: up to 6 credit hours

HORT 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HORT 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HORT 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HORT 3114 - Wines and Vines (3 credits)
Development of a working knowledge of world wine styles, wine appreciation, and sensory evaluation of wine. Emphasis on the influences of grape growing and winemaking practices on wine quality, style, economic value, and significance in global food culture. Pre: Must be at least 21 years of age.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FST 3114

HORT 3324 - Herbaceous Landscape Plants (3 credits)
Identification, growing requirements, culture, landscape use, physiology, and propagation of native and non-native herbaceous landscape plants for temperate environments. Ornamental annuals and perennials; cultivated wildflowers, plants for wetland and aquatic systems.
Prerequisite(s): HORT 2244
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HORT 3325 - Woody Landscape Plants (3 credits)
Functions, growing requirements, hardiness, problems, and methods of identification of landscape plant materials. 3325: Commonly available woody landscape plants. 3326: Native and rare woody landscape plants.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HORT 3326 - Woody Landscape Plants (3 credits)
Functions, growing requirements, hardiness, problems, and methods of identification of landscape plant materials. 3325: Commonly available woody landscape plants. 3326: Native and rare woody landscape plants.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HORT 3354 - Trees in the Built Environment (3 credits)
Science and practice of tree cultivation, conservation, and management in human-dominated environments along an urban to rural gradient. Holistic study of landscape tree management: planning, planting, inspection, maintenance, removal, and wood waste utilization. Examination of tree responses to urbanization and tree influences on built environments. Emphasis on sustainable, ethical stewardship of landscape trees for the benefit of people and the environment.
Prerequisite(s): (FREC 2314 or BIOL 2304 or HORT 2304) and (FREC 2324 or HORT 3325 or HORT 3326)
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 3354

HORT 3664 - Hardscape Materials and Installation (2 credits)
Non-plant portions of landscape construction such as rock walls, paver floors, arbors, and water gardens. The course covers the materials, construction methods, and business aspects required for hardscape construction.
Prerequisite(s): HORT 2224
Instructional Contact Hours: (6 Lab, 2 Crd)

HORT 4004 - Horticulture Seminar (1 credit)
Assessment of fundamental horticultural skills developed through academics and employment. Includes career placement preparation and problem solving through research and production project design and implementation using a team approach. Junior standing required.
Instructional Contact Hours: (1 Lec, 1 Crd)

HORT 4205 - Public Gardens Maintenance and Management (1 credit)
4205: Principals and practices of winter annuals and spring blooming bulb production and installation; water garden cultivation and systems maintenance; fall fertilization programming; vegetative waste management; information dissemination and communication methods for public outreach including education, interpretive programs, and fundraising. 4206: Principles and practices of pruning, summer annual production; soil amendment and protection; plant collections/ accessions curation and database management; personnel and financial management issues unique to public gardens. Pre: Junior standing required.
Instructional Contact Hours: (3 Lab, 1 Crd)

HORT 4206 - Public Gardens Maintenance and Management (1 credit)
4205: Principals and practices of winter annuals and spring blooming bulb production and installation; water garden cultivation and systems maintenance; fall fertilization programming; vegetative waste management; information dissemination and communication methods for public outreach including education, interpretive programs, and fundraising. 4206: Principles and practices of pruning, summer annual production; soil amendment and protection; plant collections/ accessions curation and database management; personnel and financial management issues unique to public gardens. Junior status required.
Instructional Contact Hours: (3 Lab, 1 Crd)

HORT 4324 - Greenhouse Management (3 credits)
For persons who intend to manage or advise those managing commercial or institutional greenhouses. Includes greenhouse construction, environmenal controls, disease/insect identification and management, control of plant growth, root-zone management, and marketing and management principles specific to greenhouse operations. Pre: Coursework or experience in plant growth and environmental management required.
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 4334 - Greenhouse and Controlled Environment Agriculture Management (3 credits)
Managing commercial or institutional greenhouses and/or controlled environment operations. Construction, environmental controls, disease/ insect identification and management, control of plant growth, root-zone management. Marketing, accounting, and management principles specific to greenhouse and controlled environment operations.
Prerequisite(s): HORT 2234
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 4344 - Production of Food Crops in Controlled Environment Agriculture (3 credits)
Controlled environment agriculture. Study of major hydroponic systems used in the production of horticultural food crops. Crop life cycles, nutrient requirements. Cost analysis and troubleshooting common problems that arise in controlled environment systems.
Prerequisite(s): HORT 4334
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 4504 - Landscape Contracting (2 credits)
Capstone course for students entering the landscape contracting industry. Includes contracts, site plan interpretation, cost estimation and bidding, project sequencing, business marketing, irrigation design, and current issues. Emphasis on real-world skills and problem solving. Pre: Senior Standing Required.
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Crd)

HORT 4545 - Small Scale and Residential Landscape Design (4 credits)
Development of graphic skills with concentration on a variety of media and techniques. Basic theory and principles on design of small scale and residential landscapes with emphasis on spatial composition, user needs, ecology, and uses of plant materials and light construction.
Prerequisite(s): HORT 3325
Instructional Contact Hours: (2 Lec, 6 Lab, 4 Crd)

HORT 4546 - Small Scale and Residential Landscape Design (4 credits)
Development of graphic skills with concentration on a variety of media and techniques. Basic theory and principles on design of small scale and residential landscapes with emphasis on spatial composition, user needs, ecology, and uses of plant materials and light construction. 4545, I; 4546, II.
Prerequisite(s): HORT 3325
Instructional Contact Hours: (2 Lec, 6 Lab, 4 Crd)

HORT 4554 - Creating the Ecological City (3 credits)
Multidisciplinary, team oriented, problem-solving approaches to creating cities that foster healthy interconnections between human and ecological systems. Analysis of problems from practical and ethical perspectives in the context of the diverse knowledge bases and values of decision-makers. Formation and utilization of integrated design teams to solve complex urban design and planning problems at a variety of scales. Senior standing.
Prerequisite(s): HORT 2134 or FREC 2134
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BSE 4554, FREC 4554, LAR 4554, SPIA 4554

HORT 4614 - Ornamental Plant Production and Marketing (3 credits)
In-depth production and marketing of woody and herbaceous plants in wholesale nursery and floriculture/greenhouse and related retail outlets. Includes production laboratory.
Prerequisite(s): HORT 2234 and HORT 2244 and HORT 4324 and AAEC 2434
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HORT 4644 - Small Fruit Production (3 credits)
Propagation, production, and marketing of small fruit crops for the mid-Atlantic region. Emphasis on sustainable practices, market sectors, and health and nutritional benefits. Blueberries, strawberries, brambles and other crops.
Prerequisite(s): HORT 2234 and HORT 2244 and AAEC 2434
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 4654 - Viticulture (3 credits)
Overview of grapevine growth and development, factors affecting yield and grape quality, and regional industry. Vineyard financial considerations, site evaluation, varietal characteristics plus cultural practices of pruning, training, canopy management, fertilization and pest management.
Prerequisite(s): HORT 2234
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 4744 - Plant Establishment and Environmental Design (3 credits)
Plant establishment and environmental design process for sustainable landscapes emphasizing the relationship between design of human-constructed landscapes and ecosystems at larger scales. Site assessment, urban soils, site rehabilitation, plant response to disturbed environments, green infrastructure and other contemporary landscape forms. Plant selection, sourcing, and installation to achieve environmental design goals. Emphasis on hands-on, experiential learning to achieve sustainable landscapes. Pre: Senior Standing.
Prerequisite(s): HORT 2134 or FREC 2134 or CSES 3134 or ENSC 3134 or CSES 3114 or ENSC 3114 or GEOS 3614 or LAR 1254
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

HORT 4764 - Vegetable Crops (3 credits)
A comprehensive study of major and minor vegetable crops of Virginia, the U.S., and world in relation to production practices, crop development, nutritional value, and quality characteristics.
Prerequisite(s): HORT 2234
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 4784 - Vegetable Seed Production (2 credits)
The study of production agriculture or reproductive biology. Seed production, handling, identification, conditioning, enhancement, packaging, storage, testing, federal standards, and biotechnology. Pre: 4764 or 2244 or equivalent experience in vegetable crops, plant propagation, or plant growth and development.
Prerequisite(s): HORT 4764 or HORT 2244
Instructional Contact Hours: (2 Lec, 2 Crd)

HORT 4794 - Medicinal Plants and Herbs (3 credits)
Comprehensive study of medicinal plants/herbs history, production, processing, lore and documented scientific benefits. Traditional plant medicinal practices of Native Americans, Chinese, Indians, European and African cultures will be contrasted with use of contemporary herbal products.
Prerequisite(s): BIOL 1005 or BIOL 1105
Instructional Contact Hours: (3 Lec, 3 Crd)

HORT 4835 - Organic Vegetable Production (2 credits)
Detailed practices in organic vegetable production. Issues in starting organic production, profitability, organic transition strategies and organic certification.
Prerequisite(s): HORT 2254 and ALS 3404
Instructional Contact Hours: (2 Lec, 2 Crd)

HORT 4836 - Organic Vegetable Production (2 credits)
Detailed practices in organic vegetable production. Issues of initial and improving soil quality in organic systems, factors that affect produce quality and whole-farm weed/disease/pest management.
Prerequisite(s): HORT 4835
Instructional Contact Hours: (2 Lec, 2 Crd)

HORT 4845 - Organic Vegetable Production Laboratory (1 credit)
Field experiences, demonstrations, and farm tours complementing 4835 and 4836 lectures.
Corequisite(s): HORT 4835
Instructional Contact Hours: (3 Lab, 1 Crd)

HORT 4846 - Organic Vegetable Production Laboratory (1 credit)
Field experiences, demonstrations, and farm tours complementing 4835 and 4836 lectures.
Corequisite(s): HORT 4836
Instructional Contact Hours: (3 Lab, 1 Crd)

HORT 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HORT 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HORT 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HORT 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Undergraduate Course Descriptions (PPWS)

PPWS 2004 - Mysterious Mushrooms, Malicious Molds (3 credits)
Study of the fungi and their close relatives, with special attention to their roles in the natural world and in shaping the course of human history. Historical and practical significance of fungi as sources of medicine, pathogens of plants and animals, rotters and decayers of organic matter, makers of food and drink, manufacturers of dangerous toxins, and producers of mind-altering chemicals. A student must have a basic understanding of biology.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

PPWS 2104 - Plants, Genes, and People (3 credits)
Explores how and why humans have manipulated plant genomes from prehistory through the current genomic era by examining the scientific, cultural, historical, and legal aspects of plant gene management in both conventional and transgenic crops.
Prerequisite(s): BIOL 1005 or BIOL 1105
Instructional Contact Hours: (3 Lec, 3 Crd)

PPWS 2754 - Weeds That Shape Our World (3 credits)
How weeds shape our world, and why society will never get rid of them. Introduction to weed identification, weeds in their socio-cultural, environmental, and economic context. Consideration of the tension among their beneficial aspects, control, human attitudes, and the ethical dilemmas they post to society.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

PPWS 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

PPWS 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

PPWS 2994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

PPWS 4104 - Plant Pathology (4 credits)
Introduction to plant pathology as a science and a crop protection discipline. Plant disease diagnosis, biology, and identification of plant disease-causing agents, factors leading to disease build-up, and management of plant diseases. Diseases of specific crops are studied as examples to illustrate general principles.
Prerequisite(s): (BIOL 1005 or BIOL 1105) and (BIOL 1006 or BIOL 1106)
Instructional Contact Hours: (3 Lec, 3 Lab, 4 Crd)

PPWS 4114 - Microbial Forensics and Biosecurity (3 credits)
Concepts of comparative and evolutionary genomics for pathogen characterization and identification taught through case studies of bioterrorism, involuntary and voluntary disease transmission, infectious disease epidemics, and genetically modified organisms; emphasis placed on unambiguous source attribution of a disease outbreak to a particular microbe, risk assessment, response as individual, community, and nation to a bioterrorism attack or disease outbreak, federal biosecurity regulations, and career opportunities.
Prerequisite(s): BIOL 2604 or PPWS 2104
Instructional Contact Hours: (3 Lec, 3 Crd)

PPWS 4154 - Plant Problem Diagnosis (3 credits)
Plant problem diagnosis in the laboratory and field, including recognition of disease, insect and abiotic (nonliving) problems, as well as the major groups of plant pathogens of a variety of regionally important horticultural and agronomic crops. General management options for pests and pathogens.
Corequisite(s): PPWS 4104
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

PPWS 4264 - Pesticide Usage (3 credits)
An interdisciplinary study of pesticides used in urban and agricultural environments. Topics studied will include: classification, toxicology, formulation, application techniques, safety, legal considerations, environmental impact, and research and development of new pesticides.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)
Course Crosslist: ENT 4264

PPWS 4504 - Fundamentals of Plant Physiology (3 credits)
Fundamental principles of plant physiology (photosynthesis, respiration, transpiration, nutrition, translocation, and development) will be integrated with discussion of the relationship between abiotic environmental factors and plant physiological processes. Both agricultural and non-crop plants will be emphasized.
Prerequisite(s): (BIOL 1006 or BIOL 2304) and CHEM 1036
Instructional Contact Hours: (3 Lec, 3 Crd)

PPWS 4604 - Biological Invasions (3 credits)
Broad overview of the causes, consequences, and epidemiology of invasive plants, animals, and microbes. Conceptual, mechanistic, societal, and political components of invasive species from Darwin to modern day, covering the invasion process from introduction to ecological or economic impact. Taxonomy, management, and risk assessment will be covered via case studies, within a policy context.
Prerequisite(s): BIOL 1105 and BIOL 1106
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

PPWS 4754 - Weed Science: Principles and Practices (3 credits)
Weeds and human affairs; costs and losses; emphasis on weed biology, weed identification and weed-crop ecology; agronomic, physiological, and chemical principles underlying prevention, eradication, and control of undesired vegetation; methods of weed control available for modern agronomic, forestry, horticultural, and non-crop situations.
Prerequisite(s): BIOL 2304 and CHEM 1036
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

PPWS 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

PPWS 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

PPWS 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

PPWS 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Undergraduate Course Descriptions (SPES)

SPES 1004 - First Year Seminar (1 credit)
Exploration of topics related to the School of Plant and Environmental Sciences from a multidisciplinary perspective focusing on communication and teamwork, problem-solving, inquiry, and digital literacy.
Instructional Contact Hours: (1 Lec, 1 Crd)

SPES 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 2004 - Cannabis - Science, Industry, and Culture (3 credits)
Major crops in the genus Cannabis (hemp and marijuana). Historical development, botanical aspects, and current research. Medicinal, recreational and industrial products and their use. Legal, cultural, political and socioeconomic issues surrounding cannabis crops.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPES 2244 - World Crops: Food and Culture (3 credits)
How to feed the world in 2050, world crops, primary regions of production, factors that determine where they are grown, economic importance, and use in the human diet. Linkage between food and culture, recipe preparation, and their role in defining who we are, where we come from, and what we have experienced along the way. Tracing of food migration and the African, Caribbean, Asian, Latin American, and European influence on the American cuisine. The universality of food and how every single culture and religion uses food as part of the celebration of life, death, and many cultural events.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

SPES 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 4114 - Topics: StudyAway: Production, Culture and Social Aspects US Agriculture (3 credits)
Experiential learning, hands-on and face-to-face experience with agricultural industries involved in food production, marketing and consumption. Comparative analysis of agriculture production history, practices and constraints in different regions of the US. The course has two components. One; the in-class (onsite) discussion, analysis, and comparison of the diverse agricultural production systems between Virginia and, two; the studying “away” part (Example, California, Arizona, the Mississippi Delta). Pre: Junior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

SPES 4864 - Plant Sciences Capstone (2 credits)
Writing and discussion-based learning synthesizing prior knowledge gained in Plant Science degree program. Practice in science-based expository writing and speaking applied to undergraduate coursework, undergraduate research, or work-related experience in the Plant Sciences. Restricted to students in Plant Science degree program. Pre: Junior or Senior standing.
Instructional Contact Hours: (2 Lec, 2 Crd)

SPES 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

SPES 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Crop and Soil Sciences Major

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
ALS 1234	CALS First Year Seminar	1
or SPES 1004	First Year Seminar	
ALCE 3634	Communicating Ag and Life Sciences in Speaking	3
or ALCE 3624	Communicating Ag and Life Sciences in Writing	
BIOL 1105	Principles of Biology	3
BIOL 1106	Principles of Biology	3
ENSC 1015	Foundations of Environmental Science	3
or ENSC 1016	Foundations of Environmental Science

Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select three credits of Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07) (may be double-counted with another Pathways concept)		3
Subtotal		45
Total		
Total Credits		**120**

* **Approved Minors**

- Agribusiness Management and Entrepreneurship
- Agricultural and Applied Economics
- Animal and Poultry Sciences
- Civic Agriculture and Food Systems
- Dairy Science
- Development and International Trade
- Entomology
- Environmental Economics
- Environmental Science
- Food Science & Technology
- Global Food Security and Health
- Horticulture
- Leadership & Social Change
- Plant Health Sciences
- Turfgrass Management
- Wetland Science

Satisfactory Progress

Upon having attempted 60 credits (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" toward a BS PLSC degree will include passing the following:

- At least 24 credits that apply to the Pathways to General Education
- CHEM 1035 General Chemistry and CHEM 1036 General Chemistry

- ALS 1234 CALS First Year Seminar or SPES 1004 First Year Seminar, CSES 3114 Soils and CSES 3124 Soils Laboratory
- 6 credits of Math

Graduation Requirements

- Total Hours Required: Minimum of 120
- GPA Requirements:
  - Overall GPA: 2.0 (each semester in order to be in good academic standing)
  - In-major GPA: 2.0 (by the time the student graduates)
    - Includes classes in: CSES, HORT, and PPWS
  - Prerequisites: Some courses listed may have pre/co-requisites; please consult the University Catalog or check with your advisor.

Acceptable Substitutions

SPES 1004 First Year Seminar : Any University approved First Year Experience (FYE) Course

Foreign Language Requirement

Language Study Requirement

A sequence of two foreign language courses (Classical or ASL) is required unless two years of the same high school foreign language or 6 transfer credits of the same foreign language are completed. These credits **do not** count toward graduation requirements.

First Year		
Fall Semester		**Credits**
BIOL 1105	Principles of Biology	3
CHEM 1035	General Chemistry	3
CHEM 1045	General Chemistry Laboratory	1
ENGL 1105	First-Year Writing	3

Ecological Restoration Major

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
ALS 1234	CALS First Year Seminar	1
or SPES 1004	First Year Seminar	
BIOL 1105	Principles of Biology	3
BIOL 1106	Principles of Biology	3
CSES 3114	Soils	3
or GEOS 3614	Soils	
CSES 3124	Soils Laboratory	1
or GEOS 3624	Soils Laboratory	
ENSC 3604	Fundamentals of Environmental Science	3
GEOS 1004	Earth Science: Our Past, Present, and Future	3
or GEOS 2104	Elements of Geology	
Select one of the following:		3
GEOG 2084	Principles of Geographic Information Systems	
GEOG/GEOS 4354	Introduction to Remote Sensing	
FREC 4114	Information Technologies for Natural Resource Management	

Subtotal		20
Major Requirements		
BIOL/HORT 2304	Plant Biology	3
BIOL 2804	Ecology	3
BIOL 3204	Plant Taxonomy	3
ENSC 3644	Plant Materials for Environmental Restoration	3
ENSC 4244	Ecological Restoration	3
ENSC 4774	Reclamation of Drastically Disturbed Lands (even years)	3
PPWS 4604	Biological Invasions	3
Subtotal		21
Restricted Electives		
Ecology		
Select nine credit hours of the following:		9
ALS 3404	Ecological Agriculture: Theory and Practice	
BIOL 4004	Freshwater Ecology	
BIOL 4114	Global Change Ecology	
BIOL 4334	Chemical Ecology	
CSES 4334	Principles and Practice of Agroforestry	
CSES 4544/ FREC 4334	Forage Crop Ecology	
ENSC 4764	Bioremediation	
FIW 4614	Fish Ecology	
FIW 4624	Marine Ecology	
FREC 2004	Forest Ecosystems	
FREC 2114	Ecology of Appalachian Forests	
Subtotal		9
Plant and Soil Sciences		
Select six credit hours of the following:		6
HORT 2244	Plant Propagation	
HORT 3324	Herbaceous Landscape Plants	
CSES 4064	Soil Microbiology	
CSES 4174	Soil Evaluation and Sampling	
CSES 3144	Soil Description and Interpretation (Soil Judging Team Preparation Course)	
CSES 4214	Soil Fertility and Management	
CSES 4854	Wetland Soils and Mitigation	
Subtotal		6
Human Dimensions		
Select three credit hours of the following:		3
AAEC 3314	Environmental Law	
AAEC 3324	Environment and Sustainable Development Economics	
ALCE 4304	Community Education and Development	
UAP/PSCI/IS 3344	Global Environmental Issues: Interdisciplinary Perspectives	
UAP 3354	Introduction to Environmental Policy and Planning	
UAP 4344	Law of Critical Environmental Areas	
Subtotal		3
Restricted Electives		
Select 12 credit hours of the following:		12
BIOL 2504	General Zoology	
BIOL 2704	Evolutionary Biology	
CSES 3614	Soil Physical and Hydrological Properties	
ENSC/BIOL 4164	Environmental Microbiology	
ENSC 4344	Ecological Restoration Field Practicum	
ENSC 4414	Monitoring and Analysis of the Environment	
ENSC 4734	Environmental Soil Chemistry	
FIW 2114	Principles of Fish and Wildlife Conservation	
FIW 2314	Wildlife Biology	
FIW 2324	Wildlife Field Biology	
FIW 4114	Biodiversity Conservation	
FIW 4534	Ecology and Management of Wetland Systems	
GEOG/WATR 2004	Water, Environment, and Society	
GEOG 3104	Environmental Justice, Resources and Development	
GEOG 4084	Modeling with Geographic Information Systems	
GEOG 4314/ GEOS 4084	Spatial Analysis in Geographic Information Systems	
HORT 2134	Plants and Greenspaces in Urban Communities	
HORT 3325	Woody Landscape Plants	
HORT 3326	Woody Landscape Plants	
UAP 4374	Land Use and Environment: Planning and Policy	
Up to 3 credit hours can be selected from the following courses:		
SPES 3954	Study Abroad (1-3)	
SPES 4964	Field Study (1-3)	
SPES 4974	Independent Study (1-3)	
SPES 4994	Undergraduate Research (1-3)

Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select three credits in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07) (may be double-counted with another core concept)		
Subtotal		44
Total Credits		**120**

Satisfactory Progress Towards Degree

- Upon having attempted 60 semester credits (including transfer, advanced placement, advanced standing, and credit by examination) satisfactory progress towards a B.S. degree in ENSC will include passing the following:
  - At least 24 semester credits that meet the Pathways of General Education requirements,
  - BIOL 1105 Principles of Biology, BIOL 1106 Principles of Biology, CSES 3114 Soils, CSES 3124 Soils Laboratory, ENSC 3604 Fundamentals of Environmental Science, SPES 1004 First Year Seminar or ALS 1234 CALS First Year Seminar, and
  - 8 credits of CHEM, with 6 credits of MATH or STAT

Graduation Requirements

- Total Hours Required: 120
- GPA requirements:
  - Overall GPA: 2.0 each semester
  - In major GPA: 2.0 by graduation
    - Includes classes in : BIOL, CHEM, CSES, ENSC, FREC, GEOS
- Prerequisites: Some courses listed may have pre/co-requisites; please consult the University Catalog or check with your advisor.

Acceptable Substitutions

1. SPES 1004 First Year Seminar: Any University approved First Year Experience (FYE) Course

Foreign Language Requirement

A sequence of two foreign language courses is required unless two years of the same high school foreign language or 6 transfer credits of the same foreign language are completed. These credits **do not** count toward graduation requirements.

First Year		
Fall Semester		**Credits**
BIOL 1105	Principles of Biology	3

Satisfactory Progress

Upon having attempted 60 credits (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" toward a BS PLSC degree will include passing the following:

- At least 24 credits that apply to the Pathways to General Education
- MATH 1014 Precalculus with Transcendental Functions, CHEM 1035 General Chemistry and CHEM 1036 General Chemistry,
- HORT 2224 Horticulture Science and Industry or HORT 2234 Environmental Factors in Horticulture or HORT 2244 Plant Propagation
- 6 additional HORT courses
- 6 credits from ENSC 3134 Soils in the Landscape, ENT 4254 Insect Pest Management, PPWS 4104 Plant Pathology

Graduation Requirements

- GPA Requirements
  - Total Credit Hours Required: Minimum of 120
    - Overall GPA: 2.0 (each semester in order to be in good academic standing)
    - In-major GPA: 2.0 (by the time the student graduates)
      - Includes classes in: CSES, HORT, and PPWS
    - Prerequisites: Some courses listed may have pre/co-requisites; please consult the University Catalog or check with your advisor.

Acceptable Substitutions

Subtotal		44
Total Credits		**120**

Satisfactory Progress

- Upon having attempted 60 semester credits (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" toward a BS ENSC will include passing the following courses:
  - At least 24 credits that apply to the Pathways of General Education,
  - BIOL 1105 Principles of Biology, BIOL 1106 Principles of Biology, CSES 3114 Soils , CSES 3124 Soils Laboratory, ENSC 3604 Fundamentals of Environmental Science, SPES 1004 First Year Seminaror ALS 1234 CALS First Year Seminar and
  - 12 credits of CHEM, 9 credits of MATH and/or STAT.

Graduation Requirements

- Total Hours Required: Minimum of 120
- GPA Requirements:
  - Overall GPA: 2.0 (each semester in order to be in good academic standing)
  - C- or better grade in CHEM 1035, CHEM 1036, CHEM 2514 or CHEM 2535, and CHEM 2114
- In-major GPA: 2.0 (by the time the student graduates)
  - Includes classes in BIOL, CHEM, CSES, ENSC, FREC, GEOS, PHYS
- Prerequisites: Some courses listed may have pre/co-requisites; please consult the University Catalog or check with your advisor.

Acceptable Substitutions

SPES 1004 First Year Seminar: Any University approved First Year Experience (FYE) Course.

Foreign Language Requirement

A sequence of two foreign language courses (Classical or ASL) is required unless two years of the same high school foreign language or 6 transfer credits of the same foreign language are completed. These credits **do not** count toward graduation requirements.

Total Credits	**120-122**

Satisfactory Progress

Upon having attempted 60 credits (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" toward a BS PLSC degree will include passing the following:

- At least 24 credits that apply to the Pathways to General Education
- CHEM 1035 General Chemistry and CHEM 1036 General Chemistry
- ALS 1234 CALS First Year Seminar or SPES 1004 First Year Seminar
- 6 credits of Math

Graduation Requirements

- Total Credit Hours Required: Minimum of 120
- GPA Requirements:
  - In-major GPA: 2.0 (by the time the student graduates)
    - Includes classes in: CSES, HORT, and PPWS
  - Overall GPA: 2.0 (each semester in order to be in good academic standing)
- Prerequisites: Some courses listed may have pre/co-requisites; please consult the University Catalog or check with your advisor.

Acceptable Substitutions

SPES 1004 First Year Seminar : Any University approved First Year Experience (FYE) Course

Foreign Language Requirement

A sequence of two foreign language courses (Classical or ASL) is required unless two years of the same high school foreign language or 6 transfer credits of the same foreign language are completed. These credits **do not** count toward graduation requirements.

Architecture, Arts, and Design

Our Website (http://www.aad.vt.edu)

Overview

The College of Architecture, Arts, and Design is comprised of four schools. The School of Architecture includes accredited undergraduate and graduate programs in architecture. The School of Design includes accredited undergraduate and graduate programs in landscape architecture, interior design, and an undergraduate program in industrial design. The School of Visual Arts offers undergraduate programs in art history, creative technologies, studio art, and graphic design as well as a Master of Fine Arts in creative technologies and a Master's in Material Culture and Public Humanities, jointly with the College of Liberal Arts and Human Sciences. The School of Performing Arts offers undergraduate programs in music, theatre, and cinema as well as a Master's in Theatre. The School of Performing Arts also offers a graduate certificate in arts leadership. These programs share a common purpose—to understand and shape the spaces and places where we live, work and play.

Research and outreach programs supplement instructional efforts and are carried out through college centers and laboratories. Specialized research and outreach centers offer students and faculty members opportunities for concentrated investigations in such areas as history and theory of art and architecture, housing, community design, high performance learning environments, music education, community health, women in architecture, environmental design, design research, and visual design.

The college offers a range of advanced digital technologies including an array of rapid prototyping devices and a wide range of computing and graphic equipment in support of the instructional and research programs of the college. The Environmental Systems Laboratory (ESL) and the Research and Demonstration Facility (RDF) are available to faculty members and students for the conduct of research, in-depth investigations of environmental systems, prototype development, and industrial, graphic, and product design. To support these endeavors, the college has the Virtual Environments Laboratory (VE Lab), Center for Advanced Visual Media, and the Visual Design Studio for Education, Research, Exhibition, and Outreach.

The Art and Architecture Library, a branch of the University Libraries, is located in Cowgill Hall and houses more than 60,000 volumes, 200 periodicals, and 65,000 architectural slides. The college also provides media facilities - VTR systems, photographic darkroom, printmaking, ceramics, and cinematographic space and equipment, 3-D printing, and plastics, wood and metal shops.

The college's Washington-Alexandria Architecture Center and Northern Virginia Center in Old Town Alexandria provide opportunities for architecture, landscape architecture, public administration, and urban and regional planning students to spend one or more semesters in the Washington, DC metropolitan area examining the range of design and planning problems found in large urban centers. In addition to classes, studios, and curricula at the undergraduate and graduate levels, the centers offer research and continuing education opportunities for students, faculty, and alumni, and facilitates participation in the rich educational and cultural opportunities of the greater Washington area.

The Europe Studio, based at the university's Steger Center for European Studies and Architecture in Riva San Vitale, Switzerland, provides undergraduate and graduate study opportunities for students college-wide. Studios, seminars, and organized travel are offered. The college also sponsors an array of additional study abroad opportunities, including study-travel programs elsewhere in the world.

Students who wish to combine degree options within the college or with related disciplines within the university should contact the major school or department regarding special undergraduate and graduate program requirements.

- Architecture Major (p. 593)
- Art Major with Art History Option (p. 639)
- Cinema Major (p. 652)
- Creative Technologies Major (p. 641)
- Graphic Design Major (p. 643)
- Industrial Design Major (p. 596)
- Interior Design Major (p. 599)
- Landscape Architecture Major (p. 604)
- Music Major with Composition Option (p. 614)
- Music Major with Creative Technologies in Music Option (p. 616)
- Music Major with Music Education Choral/General Option (p. 618)
- Music Major with Music Education Instrumental Option (p. 619)
- Music Major with Performance Liberal Arts Option (p. 621)
- Music Major with Performance Professional Instrumental Option (p. 623)
- Music Major with Performance Professional Vocal Option (p. 625)
- Music Major with Technology Liberal Arts Option (p. 626)
- Music Major with Technology Professional Option (p. 628)
- Studio Art Major (p. 645)
- Theatre Arts Major with Design Option (p. 653)
- Theatre Arts Major with General Theatre Option (p. 654)
- Theatre Arts Major with Performance Option (p. 655)

Dean: Lu Liu
Associate Dean for Academic Affairs: Kathryn Clarke Albright
Interim Associate Dean for Research and Creative Scholarship: Michael Borowski
Associate Dean for Graduate Studies: Paul Emmons
Associate Dean for Outreach and Engagement: Ariana Wyatt

Undergraduate Course Descriptions (AAD)

AAD 1004 - Exploring Architecture, Arts, and Design (2 credits)
First-Year Experience course for Explore AAD majors. Overview of the college and its degrees, majors and minors, and career opportunities available to CAUS graduates. Presents college and university resources and services that support student success. Introduces students to the basic principles of the research process by focusing on inquiry, problem-solving, and integration of ideas and experiences within the fields in the College of Architecture, Arts, and Design.
Instructional Contact Hours: (2 Lec, 2 Crd)

AAD 1204 - Thinking Globally (1 credit)
Seminar for first-year students enrolled in Rhizome Living-Learning Community. Introduction to systems thinking. Simple and complex systems. Systems approach to sustainable development. International perspectives on, and goals for, sustainable development. Considers United Nations Sustainable Development Goals (SDGS), SDGs History, global progress towards SDGs and Criticisms of SDGs and United Nations. Exploration of Rhizome LLC yearly theme.
Instructional Contact Hours: (1 Lec, 1 Crd)

AAD 1214 - Acting Locally (2 credits)
Course for first-year students enrolled in Rhizome Living-Learning Community. Project-based learning through student-client collaborations. Applies systems thinking concepts and United Nations Sustainable Development Goals. Introduces design thinking as a model for problem solving, including problem definition and iteration. Student presentations, proposal development, exhibition, client feedback and peer critiques.
Prerequisite(s): AAD 1204
Instructional Contact Hours: (2 Lec, 2 Crd)

AAD 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAD 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAD 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAD 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

AAD 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

AAD 3974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAD 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

AAD 3984L - Special Study (1-19 credits)
Pathway Concept Area(s): 6D Critique & Prac in Design
Instructional Contact Hours: Variable credit course

AAD 3984M - Special Study (3 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: (3 Lec, 3 Crd)

AAD 4234 - Capstone Collaborations: Cross-Disciplinary Teams (3 credits)
Collaborative cross-disciplinary research teams support discipline-specific capstones. Analyzes the interactive relationships between place, space, identity, and community in the United States and beyond. Engages in iterative research processes through reflective teamwork addressing complex problems in senior capstone projects. Synthesizes multiple, complex sources and creates coherent arguments including ethical analyses.
Prerequisite(s): ENGE 2094 and PHIL 3334
Pathway Concept Area(s): 1A Discourse Advanced, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

AAD 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

AAD 5954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

School of Architecture

Our Website (https://arch.vt.edu/)

Overview

Architecture enriches our lives by offering us environments that are sensibly compelling, thought provoking, and capable of lifting our spirits. In addition to being beautiful, architecture is, by ancient definition, functional and durable. Like art, architecture is permeated by dualities. It is stable and transitory, measurable and immeasurable, and capable of both being touched and touching us. Like science, architecture involves systematic study. Its methods are iterative, experimental, and rely on intense observation. By intertwining the poetic and practical, architecture is uniquely poised to address the challenges of contemporary life and reflect the culture of the 21st century.

The professional curriculum in architecture requires five years of study for the first professional degree, the Bachelor of Architecture (B. Arch.).

The first professional degree programs at Virginia Tech, the five-year Bachelor of Architecture degree (B. Arch.), the Master of Architecture II (M.Arch.2), and the Master of Architecture III (M.Arch.3) degrees, are fully accredited for the current maximum six-year term of accreditation by the National Architectural Accrediting Board.

All students in the School of Architecture begin their studies in a common first year foundation program. Following the foundation program, students pursue professional studies in the 2-3 and 4-5 programs.

Foundation Design Program - First Year

Foundation Design Lab is an immersive, interactive learning environment focused on inquiry, experimentation, discovery, and synthesis for students studying architecture. The design lab develops self-reliance and self-critique, opens intellectual horizons, and challenges students to continually expand and deepen their aesthetic judgment and critical understanding. Studies are undertaken in two and three dimensions across multiple scales.

Professional Program - Second, Third, Fourth, and Fifth Years

The Professional Program employs design theory and processes to study the design of buildings. Students conduct an interactive investigation of architectural space, environmental forces, and building technology. Foundations of discipline-specific knowledge are progressively introduced, discussed, and examined as they contribute to the complex totality of a work of architecture. Students explore natural and cultural forces as they relate to architecture through means of representation specific to the discipline. With architecture at the core, the program examines interdisciplinary sources such as art, science, and philosophy for the purpose of establishing the content the discipline shares with other forms of knowledge.

Concepts in the Professional Program are communicated through both physical drawings and models, as well as through virtual tools and digital production. All coursework seeks to develop the ability to conduct a professional written and verbal discourse. Further emphasis is placed on intellectual discipline, constructive dialogue, assertion of interest, and a self-motivated search for critical issues.

The **second year** is characterized by an increase in the complexity of design exercises to foster a better understanding of the interplay between situation, time and desired spatial definition. Architectural constructs of smaller scales build on knowledge of basic design principles studied in the first year. The laboratory discourse focuses on principal elements of architecture and their compositional and material role in space.

Architecture as the art of building is conveyed through the detailed study of exemplary built works.

The **third year** provides for study of fundamental design principles, technical concepts and their applications, including measures of quality in architecture. The instructional content of this year articulates and communicates to students the unique nature of architecture through the study of interrelationships of material, construction systems, site, and building programs. The Architecture III design laboratory guides the student's growing experience with practical design problems and provides order to the gradual exploration and learning of the nature and means of achieving architecture. Associated with Architecture Ill are lectures, presentations, and workshops intended to challenge students toward sensible integration of necessary systems and legal responsibilities in the design and construction of buildings.

The **fourth year** builds on the increased comprehension of building systems acquired during the third year. On-campus or off-campus, the aim of the various program options is to promote an in-depth understanding of the relationship between architectural idea and physical building form. On-campus students are offered studio courses with various focus topics. Off-campus options include several VT and non-VT Study Abroad Programs, the Extern Program, the Washington-Alexandria Architecture Campus, or the Chicago Studio.

Off-campus programs directed by the Architecture program include:

- *The Europe Study Abroad Travel Program studies* seminal European historic and contemporary architectural works and urban spaces, which are visited and documented with analytical drawings, sketches, and photographs, supplemented by on-site lectures by architects and professionals. Documented research before and after the program leads students to greater depth of understanding of the issues surrounding the architecture.
- *The Steger Center Residency Program:* Each semester, 16 architecture students take part in this program at Virginia Tech's European Steger Center for International Scholarship in Riva San Vitale, Switzerland. An 18th century villa and its gardens on the southern tip of Lake Lugano provide residence and dining facilities for Architecture students, as well as 30 Virginia Tech students from other academic disciplines. Studio work, courses, research, and travel are directed to advance first-hand knowledge of the architecture, geography, and culture of Europe.
- *Boston, Chicago, and other City Lab* options are alternatives to the traditional fourth year Blacksburg-based semester. These off-campus programs integrate design education with interactions between the profession within an urban context.
- *Professional Extern Program* allows students to spend one semester in an approved professional setting and receive up to 12 hours of academic credit. This program provides a valuable link between the academic environment and architectural practices, discipline-related government agencies, and other design offices throughout the world.
- *The Washington-Alexandria Architecture Campus* affords students from the School of Architecture and from related College disciplines the opportunity to study with students and faculty from a national and international consortium of schools in the historic urban context of Old Town Alexandria. The WAAC complex offers studio space, classrooms, exhibition and review spaces, shops, and computer labs for the students and faculty of the consortium. The University also offers a limited number of apartments for students studying in Alexandria.

In the **fifth year**, students conduct a yearlong advanced study with individual faculty advisors. The in-depth engagement with research, theory, and design is intended to broaden a student's expertise in a particular area within the field of architecture. Fifth-year students are expected to formulate and accomplish advanced high-level work in the form of a terminal project. Working with their advisors, students develop and discuss their research and design progress, and have periodic formal peer reviews throughout the year. Students are required to leave the project documentation of their 5th-year work with the school upon graduation.

The first professional degree programs (B.Arch., M.Arch.2 & M.Arch.3) in architecture are accredited by the National Architectural Accrediting Board (NAAB).

- In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.
- Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.
- Next accreditation visit for all Architecture programs: 2027

A four-year, pre-professional degree is not offered at Virginia Tech.

Program Requirements

Graduation Requirements

Upon successful completion of program requirements of the foundation level of study and the professional levels of study in architecture and with completion of 160 credit hours of study, a first professional degree of Bachelor of Architecture is awarded.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree in Architecture.

Satisfactory progress requirements toward the degree can be found on the University Catalog by visiting https://catalog.vt.edu/.

- Architecture Major (p. 593)

Director - School of Architecture: J. Bassett
Chair - Foundation Program: C. Pritchett
Chair - Undergraduate Architecture Program: P. Doan
Chair - Graduate Program: D. Dugas
Professors: K. Albright, M. Breitschmid, H. de Hahn, R. Dunay, P. Emmons, M. Ermann, J. Jones, S. Piedmont-Palladino, M. Setareh, M. Stamm, and J. Wheeler

Associate Professors: J. Bassett, E. Becker, J. Bedford, H. Bryon, P. Doan, D. Dugas, W. Galloway, S. Gartner, R. Gibbson, P. Kelsch, S. Martin, M. McGrath, H. Pittman, H. Schnoedt, G. Tew, S. Tomer, and P. Zellner-Bassett
Assistant Professors: A. Algargoosh, L. Borunda Monsivais, G. Cannici, A. Gipe-Lazarou, R. Haghnazar, G. Muñoz-Vera, E. Keslacy, N. King, K. Washco, and C. Williamson
Collegiate Associate Professor: R. Pieper, C. Pritchett
Collegiate Assistant Professor: C. Vorster
Associate Professor of Practice: K. Jones
Visiting Associate Professors of Practice: B. Green, and C. Von Wiese
Visiting Assistant Professors of Practice: M. Cook, E. Garcia, D. Haney, J. Hernandez, A. Linn, B. Pennell, D. Regan
Adjunct Instructors: R. Daniel, D. Dea, T. Green, D. Lever, P. MacDowell, R. Mars, A. Shaver, K. Sullivan, and J. Syvertsen
Professor Emeritus: W. Brown, R. Chiang, S. Choudhury, R. Daniel, A.J. Davis, D. Dunay, D. Egger, L. Ferrari, J. Holt, W. Kark, S. Poole, H. Rodriquez-Camilloni, H. Rott, F. Ruiz, R. Schubert, D. Sunshine, S. Thompson, and J. Wang
Associate Professor Emeritus: M. Cortes, M. Feuerstein, and D. Jones
Assistant Professor Emerita: E. Braaten

Undergraduate Course Descriptions (ARCH)

ARCH 1004 - Understanding Community through your Campus (2 credits)
The Virginia Tech campus as both a place and an idea. Explore the physical campus and learn how to recognize its elements. Determine where you are physically, as a community, and as part of an academic tradition. Identification of campus landmarks and navigational exploration. Measure and assess the campus and its spaces and objects, both real and virtual. Place this campus in relation to wider campus ideal and Virginia Tech history. Discussion of custodianship of land by indigenous people and history of black communities in Blacksburg and surrounding areas. Discussion of how and to whom the campus is accessible. Analysis of its buildings, spaces, and branded artifacts in verbal, digital, and drawn representation of the images, forms, and spaces students have observed. Recognition and analysis of both explicit and implicit messages in buildings, objects, and spaces. Come to an understanding of how human-made structures act as stage sets or active frameworks in which we can act out our roles of as members of communities of various kinds and at various scales.
Instructional Contact Hours: (2 Lec, 2 Crd)

ARCH 1015 - Foundation Design Laboratory (6 credits)
Foundation Design Lab is an immersive, interactive learning environment focused on inquiry, experimentation, discovery, and synthesis for students studying architecture, landscape architecture, interior design, and industrial design. The design lab develops self-reliance and self-critique, opens intellectual horizons, and challenges students to continually expand and deepen their aesthetic judgement and critical understanding. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ARCH 1016 - Foundation Design Laboratory (6 credits)
Foundation Design Lab is an immersive, interactive learning environment focused on inquiry, experimentation, discovery, and synthesis for students studying architecture, landscape architecture, interior design, and industrial design. The design lab develops self-reliance and self-critique, opens intellectual horizons, and challenges students to continually expand and deepen their aesthetic judgement and critical understanding. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ARCH 1024 - Innovative Design Thinking (3 credits)
Engages students in learning environment of the design laboratory, which is interactive inquiry, experimentation, discovery, and synthesis. Develops thinking and making skills in 2D and 3D across multiple scales. Advances abilities to solve problems through exploring strategies with viable consequences. Engages students in a series of iterative drawing, and modeling exercises relevant to architecture and design education. ARCH 1024 is restricted to incoming freshmen.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 1034 - Seeing Design: Transforming Observations (3 credits)
Introduces students to ways of perceiving, and recording the built and natural environment in Southwest Virginia. Introduces students to travel studies as an essential part of their architecture and design education. Transforms students observational skills. Employs photography and sketching as means of documenting findings. Employs screenprinting and digital technologies as a way to transform documentation. Prepares students for an exhibition of their work, including oral presentations. ARCH 1034 is restricted to incoming freshmen.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 1044 - Life in the Built Environment (3 credits)
Development of the human-made environment has shaped our social relations, culture, and identity. Discussion of how the imposition of built form has served both to define a shared culture and as a means of exclusion and injustice. Study of equity and ethics as evidenced and continued in planning, construction, and public space. Learn how the knowledge of these past structures might shape the future of the built environment in the United States in ways that are more equitable, inclusive, and sustainable.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: SPIA 1044

ARCH 1115 - Qualifying Design Laboratory (3 credits)
1115: An immersive, interactive course focused on inquiry, experimentation, discovery, and synthesis. Employs a series of iterative drawing and modeling exercises, at a beginners level, in two and three dimensions across multiple scales. Develops self-reliance and self-critique, which opens intellectual horizons. Challenges expand and deepen aesthetic judgment and critical understanding. Develops fundamental thinking and making skills that advance their abilities to solve problems by exploring strategies toward viable consequences. Restricted to students transferring into the School of Architecture + Design and changing their major to architecture, landscape architecture, interior design, or industrial design. 1116: An immersive, interactive course focused on inquiry, experimentation, discovery, and synthesis. Employs a series of iterative drawing and modeling exercises, at an intermediate level, in two and three dimensions across multiple scales. Develops self-reliance and self-critique, which opens intellectual horizons. Challenges expand and deepen aesthetic judgement and critical understanding. Advances foundational thinking and making skills that develop their abilities to solve problems by exploring strategies toward viable consequences. Restricted to students transferring into the School of Architecture + Design and changing their major to architecture, landscape architecture, interior design, or industrial design.
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)

ARCH 1116 - Qualifying Design Laboratory (3 credits)
An immersive, interactive course focused on inquiry, experimentation, discovery, and synthesis. Employs a series of iterative drawing and modeling exercises, at an intermediate level, in two and three dimensions across multiple scales. Develops self-reliance and self-critique, which opens intellectual horizons. Challenges expand and deepen aesthetic judgement and critical understanding. Advances foundational thinking and making skills that develop their abilities to solve problems by exploring strategies towards viable consequences. Restricted to students transferring into the School of Architecture + Design and changing their major to architecture, landscape architecture, interior design, or industrial design.
Prerequisite(s): ARCH 1115
Instructional Contact Hours: (1 Lec, 6 Lab, 3 Crd)

ARCH 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 2004 - Architecture and Culture: Buildings, Equity and Climate (3 credits)
Interdisciplinary and cross-cultural study of architecture and its context - fundamental architectural ideas, how and why buildings are built, how spaces are occupied and by whom, and how external forces (such as social, political, economic, and environmental) inform architecture's construction and occupation. Examine key buildings from cultures around the world through architectural artifacts, texts, and drawings, employing both disciplinary and interdisciplinary perspectives. Analyze how these buildings operated within diverse cultures to investigate the mutual influence between architecture and its context over time. Develop coherent, evidence-based arguments, drawing on insights from both discipline-specific and interdisciplinary approaches. Develop recommendations for inclusive, equitable, and climate-responsive architecture.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 2015 - Architecture II (7 credits)
Introduction to the theory and practice of architecture. Discipline-specific investigations into how architecture concentrates and conveys natural and cultural influences. Focus on building design as a comprehensive activity balancing numerous concerns including aesthetic, history, materiality, tectonics, and spatial expression. Examination of the relationship between the built and natural environments, including the effects of construction and environmental factors. Qualitative approaches to how architecture contributes to human wellbeing. Identification of relevant areas of interest and modes of inquiry to enrich current work and serve as a basis for self-directed learning. Immersion in the design laboratory ('studio') learning environment. 2015: How architecture concentrates and expresses natural and cultural influences, as well as how it addresses the well-being of individuals and society, through design investigations of varied scales and complexity. Identifying and connecting the fundamentals that comprise the multidimensional wholeness of a work of architecture. Selecting, describing, and analyzing relevant precedents. How architecture and the arts are similar and different, as well as how different fields of knowledge relate to architecture as a cultural and technological production. Discipline-specific modes of communication. 2016: Continued exploration of the dynamic between built and natural environments, including site, environmental forces, and construction impacts; how architecture contributes to human wellbeing. Speculation, development, and communication of architectural proposals. Developing creative source materials by examining a problem from various disciplinary and cultural perspectives. Increasingly complex design work. Hybrid Lecture (2H, 2C), Lab (12L, 4C), Design Lab/Studio (2L, 1C) (2H,14L,7C)
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (2 Lec, 14 Lab, 7 Crd)

ARCH 2016 - Architecture II (7 credits)
Introduction to the theory and practice of architecture. Discipline-specific investigations into how architecture concentrates and conveys natural and cultural influences. Focus on building design as a comprehensive activity balancing numerous concerns including aesthetic, history, materiality, tectonics, and spatial expression. Examination of the relationship between the built and natural environments, including the effects of construction and environmental factors. Qualitative approaches to how architecture contributes to human wellbeing. Identification of relevant areas of interest and modes of inquiry to enrich current work and serve as a basis for self-directed learning. Immersion in the design laboratory ('studio') learning environment. 2015: How architecture concentrates and expresses natural and cultural influences, as well as how it addresses the well-being of individuals and society, through design investigations of varied scales and complexity. Identifying and connecting the fundamentals that comprise the multidimensional wholeness of a work of architecture. Selecting, describing, and analyzing relevant precedents. How architecture and the arts are similar and different, as well as how different fields of knowledge relate to architecture as a cultural and technological production. Discipline-specific modes of communication. 2016: Continued exploration of the dynamic between built and natural environments, including site, environmental forces, and construction impacts; how architecture contributes to human wellbeing. Speculation, development, and communication of architectural proposals. Developing creative source materials by examining a problem from various disciplinary and cultural perspectives. Increasingly complex design work. Hybrid Lecture (2H, 2C), Lab (12L, 4C), Design Lab/Studio (2L, 1C) (2H,14L,7C)
Prerequisite(s): ARCH 2015
Instructional Contact Hours: (2 Lec, 14 Lab, 7 Crd)

ARCH 2034 - Art of Building (2 credits)
Introduction to architecture identifying the fundamental considerations that contribute to the complex totality of a work of architecture. Interrelationships of context, structure, materiality, and technology toward accommodation and advancement of human activities and well-being. Context as preexisting factors and forces of any given site of architecture, not limited to cultural, historical, geographical, and environmental, including topography and climate. Contemporary precedents emphasizing the diversity of cultural practices and values around the globe.
Prerequisite(s): ARCH 1016
Corequisite(s): ARCH 2015
Instructional Contact Hours: (3 Lab, 2 Crd)

ARCH 2044 - Building Materials (2 credits)
Introduction to the attributes of materials with which buildings are built such as masonry, reinforced concrete, steel, stone, timber, glass and insulation; introduction of the impact of soil, vegetation, watersheds and other natural conditions on buildings and their material fabrication.
Prerequisite(s): ARCH 1015
Instructional Contact Hours: (2 Lec, 2 Crd)

ARCH 2114 - Sustainability by Design (3 credits)
Design decision-making in complex contexts. Ethical issues underlying design for sustainability. Evaluation of design in systems, products, places, and modes of living using the Framework for Strategic Sustainable Development (FSSD). Historical and cultural underpinnings of design and sustainability.
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: UAP 2114

ARCH 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 3015 - Architecture III (7 credits)
Architectural design principles, technical concepts, applications, and measures of quality. Ongoing development of key professional skills such as modes of inquiry, problem structuring, drawing and modeling, workflows, and critique. Site, program, structural, regulatory, and environmental influences addressed in architectural formulations. Development of independent interests, research pursuits, and modes of working. 3015: Various materials and techniques of building design. The technical language of describing designed structures. Human experience, health & wellness, user needs, and regulatory standards in the built environment at multiple scales. Analysis of programmatic and site variables that influence design decisions and resource and environmental stewardship objectives. How fundamental design concepts (idea, movement, structure) and human occupation (context, program, experience) intersect with technical constructive knowledges (assembly, materials, building systems). Subjective measures of quality in design. 3016: Continued studies in materials and techniques of building design. Building assemblies documented in technical drawing, modeling, and writing. Interweaving of fundamental design concepts, human occupation, and technical constructive knowledges. How subjective and measurable (resource, environmental stewardship) criteria impact design decisions. Hybrid Lecture (2H, 2C), Lab (12L, 4C), Design Lab/Studio (2L, 1C) (2H,14L,7C)
Prerequisite(s): ARCH 2016
Corequisite(s): ARCH 3065
Instructional Contact Hours: (2 Lec, 14 Lab, 7 Crd)

ARCH 3016 - Architecture III (7 credits)
Architectural design principles, technical concepts, applications, and measures of quality. Ongoing development of key professional skills such as modes of inquiry, problem structuring, drawing and modeling, workflows, and critique. Site, program, structural, regulatory, and environmental influences addressed in architectural formulations. Development of independent interests, research pursuits, and modes of working. 3015: Various materials and techniques of building design. The technical language of describing designed structures. Human experience, health & wellness, user needs, and regulatory standards in the built environment at multiple scales. Analysis of programmatic and site variables that influence design decisions and resource and environmental stewardship objectives. How fundamental design concepts (idea, movement, structure) and human occupation (context, program, experience) intersect with technical constructive knowledges (assembly, materials, building systems). Subjective measures of quality in design. 3016: Continued studies in materials and techniques of building design. Building assemblies documented in technical drawing, modeling, and writing. Interweaving of fundamental design concepts, human occupation, and technical constructive knowledges. How subjective and measurable (resource, environmental stewardship) criteria impact design decisions. Hybrid Lecture (2H, 2C), Lab (12L, 4C), Design Lab/Studio (2L, 1C) (2H,14L,7C)
Prerequisite(s): ARCH 3015
Corequisite(s): ARCH 3066
Instructional Contact Hours: (2 Lec, 14 Lab, 7 Crd)

ARCH 3054 - Building Analysis (2 credits)
Study of exemplary built works of architecture through analysis of design documents, interviews, and inspection of actual construction. Course is completed as a group project resulting in both an oral presentation and a written document.
Prerequisite(s): ARCH 3015
Corequisite(s): ARCH 3016, ARCH 3046
Instructional Contact Hours: (2 Lec, 2 Crd)

ARCH 3065 - Building Materials and Assemblies (3 credits)
Study of what buildings are made of and how buildings are made, in support of architectural design decisions. Attributes of building materials informing their selection and use in buildings. Design and representation of building assemblies, systems, and details, including primary and secondary structural systems, the building envelope, and sub-assemblies, as influenced by formal design ideas, geometry, structure, construction processes, weather resistance, human health and well-being, and environmental impact and sustainability. 3065: Focus on wood, masonry, concrete, and steel construction systems; subsurface conditions and foundations; building codes, life-safety, and accessibility; and basic principles of building envelope systems. 3066: Review of wood, masonry, concrete, and steel construction. Focus on design of building envelope/enclosure wall systems and roofs, including consideration of water resistance, thermal insulation, air infiltration, and vapor control; building cost considerations; and appropriate modes of representation for detailed design decisions.
Prerequisite(s): ARCH 2016
Corequisite(s): ARCH 3015
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 3066 - Building Materials and Assemblies (3 credits)
Study of what buildings are made of and how buildings are made, in support of architectural design decisions. Attributes of building materials informing their selection and use in buildings. Design and representation of building assemblies, systems, and details, including primary and secondary structural systems, the building envelope, and sub-assemblies, as influenced by formal design ideas, geometry, structure, construction processes, weather resistance, human health and well-being, and environmental impact and sustainability. 3065: Focus on wood, masonry, concrete, and steel construction systems; subsurface conditions and foundations; building codes, life-safety, and accessibility; and basic principles of building envelope systems. 3066: Review of wood, masonry, concrete, and steel construction. Focus on design of building envelope/enclosure wall systems and roofs, including consideration of water resistance, thermal insulation, air infiltration, and vapor control; building cost considerations; and appropriate modes of representation for detailed design decisions.
Prerequisite(s): ARCH 3065
Corequisite(s): ARCH 3016, ARCH 3054
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 3115 - Histories of Architecture (3 credits)
Disciplinary study of architecture across time (pre-history to present) and across continents (Eastern, Western, Northern, and Southern hemispheres). Histories, principles, and factors grounding architecture's expression, form, and methods. Architecture as a cultural production reflective of its social, political, artistic, intellectual, technological, and environmental context. Exploration through artifacts, texts, drawings. ARCH 3115: emphasis on artifacts and architecture between 25000 BCE and 1600 CE; ARCH 3116: includes architectural productions from 1600 CE to present.
Prerequisite(s): ARCH 1015
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 3116 - Histories of Architecture (3 credits)
Disciplinary study of architecture across time (pre-history to present) and across continents (Eastern, Western, Northern, and Southern hemispheres). Histories, principles, and factors grounding architecture's expression, form, and methods. Architecture as a cultural production reflective of its social, political, artistic, intellectual, technological, and environmental context. Exploration through artifacts, texts, drawings. ARCH 3115: emphasis on artifacts and architecture between 25000 BCE and 1600 CE; ARCH 3116: includes architectural productions from 1600 CE to present.
Prerequisite(s): ARCH 3115
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 3204 - Topics Modules in Architecture History & Theory (1 credit)
Discrete topics in design theory, history, criticism, research methods, and representation. How historic, social, political, technological, and/or economic factors shape the built environment. Historical and contemporary significance of architectural productions within cultural dimensions of human history. How discrete modes of verbal, textual, visual, graphic, or spatial representation influence and reflect understanding relative to architectural form and ideas. May be repeated 2 times with different content for a maximum of 3 credit hours.
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

ARCH 3214 - Topic Modules in Building Science and Technology (1 credit)
Focused topics in building technology, systems, materials, construction, assembly and details. Develop scientific expertise that couples quantitative and qualitative dimensions using tools, methods, science, processes of the given field through study, reflection, and application. Utilize empirical knowledge, including building performance, environmental responsibility, and occupant well-being, to advance design excellence. May be repeated 2 times with different content for a maximum of 3 credit hours.
Prerequisite(s): ARCH 2015
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

ARCH 3224 - Topics Modules in Architectural Media and Methods (1 credit)
Properties and uses of media, materials and processes as tools for analysis, documentation, and presentation of the designed environment. Media properties and processes. Selection of workflows. Appropriate use and maintenance of tools. Iterative design and evaluating outcomes. May be repeated 2 times with different content for a maximum of 3 credit hours. Design Lab/Studio (2L, 1C)
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (2 Lab, 1 Crd)
Repeatability: up to 3 credit hours

ARCH 3234 - Topics Modules in Architecture and Praxis (1 credit)
Specialized topics in the practice of architecture related to designing, planning, and managing the built environment. Factors that inform and impact both design processes and outcomes, such as environmental justice, professionalism, sustainability, inclusivity, and technology. Established and emerging frameworks of architectural practice in fostering the continuous improvement of the discipline. How architects and architecture can contribute to a variety of academic and professional contexts. Teamwork and leadership. May be repeated 2 times with different content for a maximum 3 credit hours.
Prerequisite(s): ARCH 2015
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

ARCH 3304 - Topics in Architecture History & Theory (3 credits)
Discrete topics in architecture theory, history, criticism, research methods, and representation. How historic, social, political, technological, and economic factors shape the built environment. Historical and contemporary significance of architectural productions within cultural dimensions of human history. The works and ideas of architects, urban planners, historians, theorists, and educators in the context of contemporary architecture. Critical discourse and inquiry. May be repeated 2 times with different content for a total of 9 credit hours.
Prerequisite(s): ARCH 3116
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

ARCH 3404 - Topics in Building Science and Technology (3 credits)
Focused topics in building technology, systems, materials, construction, assembly and details. Develop scientific expertise that couples quantitative and qualitative dimensions using empirical and design-based tools, methods, science, processes of the given field through study, reflection, and application. Research methods. Representing and communicating research objectives and findings. Using findings to inform decision-making in design. May be repeated 2 times with different content for a maximum of 9 credit hours.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

ARCH 3504 - Topics in Architectural Media and Methods (3 credits)
Topics in properties and uses of media, materials, and processes as tools for craft, analysis, documentation, and presentation of the designed environment. Media properties, materials and processes. Selection of workflows. Appropriate use and maintenance of tools. Interplay between media properties and workflows. Iterative design and evaluating outcomes. Parallel practices, techniques, and structures of thinking and making. May be repeated 1 time with different content for a maximum of 6 credit hours. Design Lab/Studio (1H, 3L, 3C)
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (1 Lec, 3 Lab, 3 Crd)
Repeatability: up to 6 credit hours

ARCH 3604 - Topics in Architecture and Praxis (3 credits)
Specialized topics in the practice of architecture related to designing, planning, and managing the built environment. Develop professional expertise with the knowledge, tools, and processes of the given topic through study, use, and reflection. Existing and emerging theories and frameworks that govern the practice of architecture and its outcomes in the constructed environment. Tools, methods, and practices towards the design of responsive, inclusive, and sustainable works of architecture. Position taken on an individual level within the profession of architecture. May be repeated 1 time with different content for a maximum of 6 credit hours.
Prerequisite(s): ARCH 2015
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

ARCH 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

ARCH 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 3974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 4004 - Architecture IV - Option Lab (7 credits)
Advanced architecture laboratory with specialized design options, off-campus domestic and study abroad opportunities, technical research, and professional internships. Role of design processes in shaping the built environment in response to multiple factors and across diverse contexts. Immersion in professional or specialized settings to contextualize the student's position in the discipline. Development of student-driven course of action for pursuing ongoing professional interests through engagements with, and contributions to, disciplinary research and discourse. Engagement of new territories of inquiry and representation in design work. Critical professional skills in documentation of technical and discursive dimensions of architectural works. Hybrid Lecture (2H, 2C), Lab (12L, 4C), Design Lab/Studio (2L, 1C) (2H,14L,7C)
Prerequisite(s): ARCH 3016
Instructional Contact Hours: (2 Lec, 14 Lab, 7 Crd)

ARCH 4014 - Architecture IV - Integrative Design (8 credits)
Integration of site, program, constructive systems, and regulatory and environmental frameworks to develop conceptually sound and technically feasible architectural works. Application of design research, including precedent analysis and case studies of existing works. Advanced representation techniques including written, graphic, and physical artifacts. Criticism and dialogue. Individual growth in areas of ongoing interest, research, and modes of study in architectural practice. Repeatable one time, Max. 16 cr. Hybrid Lecture (2H, 2C), Lab (15L, 5C), Design Lab/Studio (2L, 1C) (2H, 17L, 8C)
Prerequisite(s): ARCH 3016 and ARCH 3054
Instructional Contact Hours: (2 Lec, 17 Lab, 8 Crd)
Repeatability: up to 16 credit hours

ARCH 4034 - Building Cities (3 credits)
Analytical studies in the historical evolution of cities, towns and villages. Comparative studies of urban form in relation to their constructive and imaginative means with an emphasis on modern construction processes. Specific case studies in designing and building cities.
Corequisite(s): ARCH 4016
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4044 - Professional Practice in Architecture (3 credits)
Role and responsibilities of the profession on the environment, public health, and social welfare. Professional ethics. Contributions to policymaking and the building enterprise through leadership, advocacy, and civic engagement. Issues of equity, diversity, and inclusion in the profession, the environments where we practice, and the places we design. Roles, responsibilities and viewpoints of the commissioning, design, and construction ensemble. Contracts, compliance, and risk management. Starting, running, and maintaining a profitable architecture practice to achieve design goals. Methods and technologies for delivering projects. Leadership and professional communication skills, including oral, written, and visual presentations, negotiations and conflict resolution, and interpersonal communication in collaborative teams, interviews, and public meetings. Pursuing licensing, specialization, and/or nontraditional career trajectories. Change and future practice forms.
Prerequisite(s): ARCH 3016
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4055 - Environment and Building Systems (3 credits)
A design oriented study of environmental forces, environmental impacts of the built environment, and related building environmental control, life safety and service systems, with concern for the human psycho-physical impacts of building form and systems performance.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4056 - Environment and Building Systems (3 credits)
A design oriented study of environmental forces, environmental impacts of the built environment, and related building environmental control, life safety and service systems, with concern for the human psycho-physical impacts of building form and systems performance.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4075 - Building Structures (3 credits)
Building structures in steel, timber, and reinforced concrete; design of typical components: beams, slabs, columns, beam-columns, connections, and foundations; design of retaining walls; the resistance of buildings to gravity and lateral force action; building stability; floor/roof framing systems; design of simple buildings.
Prerequisite(s): ESM 3704
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4076 - Building Structures (3 credits)
Building structures in steel, timber, and reinforced concrete; design of typical components: beams, slabs, columns, beam-columns, connections, and foundations; design of retaining walls; the resistance of buildings to gravity and lateral force action; building stability; floor/roof framing systems; design of simple buildings.
Prerequisite(s): ESM 3704
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4114 - Ideas, Concepts, and Representations of Architecture (3 credits)
Disciplinary study of ideas, concepts, and representations that have shaped architecture across time (Common Era). Emphasis on ideational constructs and their varied modes of transmission (from textual to oral communications, drawings to images, buildings to models) in relation to the projecting of architecture. Architectural theories and their transmission as cultural productions reflective of societal, ethical, intellectual, environmental, and technological contexts. Presentation and reflection upon architectural discourse itself through written and oral communication.
Prerequisite(s): ARCH 3015 and ARCH 3116
Pathway Concept Area(s): 1A Discourse Advanced, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4124 - Advanced Topics in Architecture History & Theory (3 credits)
Advanced design theory, history, critique, study, and representation. How history, politics, technology, and economics affect architecture and the built environment. Architectural significance. Architectural social, economic, and cultural content. Direct observation, reading, and discourse in architectural criticism. Course may be repeated with different content 2 times for a maximum of 9 credit hours.
Prerequisite(s): (ARCH 3204 or ARCH 4114) and ARCH 3304
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

ARCH 4144 - Advanced Building Structures I (3 credits)
Study of long-span building structures. Introduction to geometry, form, and structure of folded and bent surfaces. Study of space grid geometry, close-packing systems, and cellular tensegrity. Approximate design of folded plate structures, single and double curvature shells, single and double layer space frames, suspension roofs, tents, and pneumatic structures.
Prerequisite(s): ARCH 4075 and ARCH 4076
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4154 - Advanced Building Structures II (3 credits)
Study of highrise structures ranging from building slabs and blocks, terraced buildings, and skyscrapers to towers. The complexity of load action including wind, earthquake, and hidden loads. The effect of building height, form, and proportion on force action; considerations of stability and redundancy. Preliminary design of masonry buildings, core structures, suspension buildings, braced skeletons, rigid frames, interstitial systems, staggered truss buildings, tubes and hybrid structures.
Prerequisite(s): ARCH 4075 and ARCH 4076
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4224 - Advanced Topics in Building Science and Technology (3 credits)
Advanced topics in building technology, systems, materials, construction, assembly and details. Develop expertise that couples quantitative and qualitative dimensions using tools, methods, science, processes of the given field through study, reflection, application and dissemination of findings. Norms of communicating findings. Applying research findings to design. May be repeated 1 time with different content for a maximum of 6 credit hours.
Prerequisite(s): ARCH 3404
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

ARCH 4324 - Advanced Topics in Architectural Media and Methods (3 credits)
Advanced topics in architectural media, materials, and processes as tools for analysis, documentation, and presentation of the designed environment. Relationship between media characteristics and processes, applied to a wide range of media types and areas of study. Selection of appropriate tools and workflows. Managing and maintaining toolsets and workspaces. Forms of design research and innovation. Iterative design and evaluating outcomes. Creative practice and discourse. May be repeated 1 time with different content for a maximum of 6 credit hours. Design Lab/Studio (1H, 3L, 3C).
Prerequisite(s): ARCH 3504
Instructional Contact Hours: (1 Lec, 3 Lab, 3 Crd)
Repeatability: up to 6 credit hours

ARCH 4414 - Advanced Environment Building Systems (3 credits)
Advanced studies of environment and building systems, including development in building systems, urban systems, service systems, construction systems, materials and component systems, psycho-physical considerations, systems analysis, and computer technology. May be repeated for a maximum of 9 credit hours in varied options offered.
Prerequisite(s): ARCH 4055 and ARCH 4056
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)
Repeatability: up to 9 credit hours

ARCH 4424 - Advanced Topics in Architecture and Praxis (3 credits)
Advanced topics in the practice of architecture related to designing, planning, and managing the built environment. Innovative knowledge, frameworks, and models for an increasingly just, adaptable, and built environment and profession. Alternative approaches to defining, creating, and value for clients, communities, and employees. May be repeated 1 time with different content for a maximum of 6 credit hours.
Prerequisite(s): ARCH 4044
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

ARCH 4434 - Architectural Lighting Design (3 credits)
Advanced level lecture course focused on lighting. Impact on, need for and measurement of light for humans and the built and natural environments. Selection of color, light sources, equipment and controls. daylight integration. Lighting design, visualization and calculations through hand and digital methods. Evaluation of lighting system energy efficiency and cost. Presentation of lighting design.
Prerequisite(s): ARCH 4055 and ARCH 4056
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4514 - Thesis Inquiry (3 credits)
Student-led, design thesis project research articulated by an aggregated, reflective record of the first semester design work of ARCH 4515-4516 (Architecture V) through an appropriate array of representational means, such as writing, models, images, and drawings. Schematic, critical compilation of ideational and physical process includes critique, evaluation, and presentation of historical, contextual, professional, ethical, and aesthetic considerations; conceptual and theoretical foundations; development of the project's parameters and its design. Course contact to credit hour structure: Lecture (1H, 1C), Lab (3L, 1C), Design Lab/Studio (1.5L, 1C).
Prerequisite(s): ARCH 4004 and ARCH 4014
Corequisite(s): ARCH 4515
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 3 Lab, 2 Lab, 3 Crd)

ARCH 4515 - Architecture V (6 credits)
Advanced design and research to produce an architectural project. Demonstration of a conceptual and professional position through a work of architecture. 4515: Student-led focus on identifying research field; probing professional interests; developing conceptual and project parameters; proposing and evaluating design through varied means of public dialogue, critique, and self-reflection. 4516: Emphasis on resolution of project, formal documentation and presentation of work, communication of conceptual position, and assertion of professional trajectory. Hybrid Lecture (1H,1C), Lab (12L, 4C), Design Lab/Studio (2L, 1C) (1H,14L,6C)
Prerequisite(s): ARCH 4004 and ARCH 4014
Corequisite(s): ARCH 4514
Instructional Contact Hours: (1 Lec, 14 Lab, 6 Crd)

ARCH 4516 - Architecture V (6 credits)
Advanced design and research to produce an architectural project. Demonstration of a conceptual and professional position through a work of architecture. 4515: Student-led focus on identifying research field; probing professional interests; developing conceptual and project parameters; proposing and evaluating design through varied means of public dialogue, critique, and self-reflection. 4516: Emphasis on resolution of project, formal documentation and presentation of work, communication of conceptual position, and assertion of professional trajectory. Hybrid Lecture (1H,1C), Lab (12L, 4C), Design Lab/Studio (2L, 1C) (1H,14L,6C)
Prerequisite(s): ARCH 4514 and ARCH 4515
Corequisite(s): ARCH 4524
Instructional Contact Hours: (1 Lec, 14 Lab, 6 Crd)

ARCH 4524 - Thesis Documentation (3 credits)
Formal documentation of the architectural design thesis, a terminal design project with a conceptual and professional position in the final, fifth year of the professional degree program. Thesis project, process, concept, research, and ethical position presented through drawings, images, and writings. Preparation of portfolio quality document demonstrating architectural ability within discipline and profession. Course contact to credit hour structure: Lecture (1H, 1C), Lab (3L, 1C), Design Lab/Studio (1.5L, 1C).
Prerequisite(s): ARCH 4514 and ARCH 4515
Corequisite(s): ARCH 4516
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ARCH 4705 - Qualifying Design Seminar (3 credits)
Exploratory overview of selected theories and issues relevant to the design and use of the environment. 4705: Emphasis on history, human behavior, and environmental context as it relates to architecture. 4706: Presentation and discussion of the nature of principal construction materials in relation to building design. Characteristics of primary structural materials: wood, steel, concrete, masonry; environmental control systems; supporting technologies. Not for credit for majors holding a first professional degree in architecture.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4706 - Qualifying Design Seminar (3 credits)
Exploratory overview of selected theories and issues relevant to the design and use of the environment. 4705: Emphasis on history, human behavior, and environmental context as it relates to architecture. 4706: Presentation and discussion of the nature of principal construction materials in relation to building design. Characteristics of primary structural materials: wood, steel, concrete, masonry; environmental control systems; supporting technologies. Not for credit for majors holding a first professional degree in architecture.
Instructional Contact Hours: (3 Lec, 3 Crd)

ARCH 4715 - Qualifying Design Laboratory (9 credits)
4715: Design laboratory in which student and faculty teams explore the nature of problems and potentials with which architecture is concerned, and experimentally develop methods and process through which existing contexts are transformed into new conditions. 4716: Provides introduction to basic concepts of building structures, materials, and enclosure systems, and appropriate site and climate responses. Not for credit for majors holding a first professional degree in architecture.
Instructional Contact Hours: (3 Lec, 18 Lab, 9 Crd)

ARCH 4716 - Qualifying Design Laboratory (9 credits)
4715: Design laboratory in which student and faculty teams explore the nature of problems and potentials with which architecture is concerned, and experimentally develop methods and process through which existing contexts are transformed into new conditions. 4716: Provides introduction to basic concepts of building structures, materials, and enclosure systems, and appropriate site and climate responses. Not for credit for majors holding a first professional degree in architecture.
Instructional Contact Hours: (3 Lec, 18 Lab, 9 Crd)

ARCH 4904 - Professional Studies (1 credit)
Instructional Contact Hours: (1 Lec, 1 Crd)

ARCH 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

ARCH 4994H - Undergraduate Research (1-19 credits)

Pathways Concept 6 - Critique and Practice in Design and the Arts		
ARCH 4514	Thesis Inquiry (6A) [4]	3
ARCH 4524	Thesis Documentation (6D) [4]	3
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select three credits in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07) [5]		3
Subtotal		45
Total Credits		**160**

1. **Prerequisite/Corequisite:** Some courses listed on this checksheet may have prerequisites and/or corequisites; please consult the University Course Catalog or check with your advisor.
2. The Bridge Experience is the application of academic knowledge and skills to a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre-approval of a 3900 bridge plan is required after the first year. Register for the semester that corresponds with the beginning of the Bridge Experience.
3. It is recommended that free elective credits be taken at the 2000-level and higher.
4. ARCH 4514 Thesis Inquiry and ARCH 4524 Thesis Documentation each satisfy 3cr. Arts / 3 cr. Design under Pathways to Gen. Ed. Concept 6.
5. Critical Analysis of Identity & Equity in the US may be double counted with another core outcome.

Industrial Design

Our Website (http://www.industrialdesign.arch.vt.edu/)

Overview

As described by the Industrial Designers Society of America, "Industrial Design (ID) is the professional service of creating and developing concepts and specifications that optimize the function, value and appearance of products and systems for the mutual benefit of both user and manufacturer.

Industrial designers develop these concepts and specifications through collection, analysis and synthesis of data guided by the special requirements of the users, client and manufacturer. They are trained to prepare clear and concise recommendations through drawings, models and verbal descriptions.

Industrial design services are often provided within the context of cooperative working relationships with other members of a development group. Typical groups include management, marketing, engineering and manufacturing specialists. The industrial designer expresses concepts that embody all relevant design criteria determined by the group.

The industrial designer's unique contribution places emphasis on those aspects of the product or system that relate most directly to human characteristics, needs and interests. This contribution requires specialized understanding of visual, tactile, safety and convenience criteria, with concern for the user. Education and experience in anticipating psychological, physiological and sociological factors that influence and are perceived by the user are essential industrial design resources."

The internationally recognized program at Virginia Tech, fully accredited by the National Association of Schools of Art and Design, prepares individuals to enter this dynamic field through a rigorous curriculum and an experienced, dedicated faculty.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree in Industrial Design.

Satisfactory progress requirements toward the degree can be found on the major checksheet by visiting the University Registrar website at http://registrar.vt.edu/graduation-multi-brief/index1.html.

- Industrial Design Major (p. 596)

Associate Professor of Practice and Chair: Martha Sullivan
Associate Professors: W. Green and B. Kennedy
Assistant Professors: J. Hauptman and E. Morshedzadeh
Adjunct Professor: B. Kirkland
Professor Emeritus: R. Kemnitzer and E. Dorsa

Undergraduate Course Descriptions (IDS)

IDS 1114 - Play to Make (3 credits)
Transdisciplinary practice in an inclusive, collaborative environment, through the lens of design, technology and creative expression, to describe and evaluate the convergence between art, technology, and human experience in the arts, sciences, humanities, and engineering. Exploration of play for creation of ideas and artifacts (including, but not restricted to multimedia narratives, learning simulations, immersive/performative experiences, and data exploration). Inclusive collaboration with peers and practicing professionals in diverse fields. Critical consideration of art and design and the impacts on history, society, cultures, individuals, and communities. Collaborative research, design, creation, and exhibition of a transdisciplinary project to identify and address a global challenge.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 2015 - Industrial Design Laboratory II (5 credits)
Introduction to the discipline of Industrial Design. Emphasis on form generation, including: design theory, problem solving methodologies, conceptualization of ideas, and aesthetic sensibility. Secondary emphasis on skill development in 2 and 3 dimensions: awareness of materials and manufacturing processes, storyboarding, model making, written documentation of design process, and verbal presentation. IDS 2015 is taught in conjunction with IDS 3224: Topics in Design Competencies: Workshop and IDS 2065: Visual Design.
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (3 Lec, 7 Lab, 5 Crd)

IDS 2016 - Industrial Design Laboratory II (6 credits)
Introduction to the discipline of Industrial Design. Emphasis on form generation, including: design theory, problem solving methodologies, conceptualization of ideas, and aesthetic sensibility. Secondary emphasis on skill development in 2 and 3 dimensions: awareness of materials and manufacturing processes, storyboarding, model making, written documentation of design process, and verbal presentation. IDS 2015 is taught in conjunction with IDS 3224: Topics in Design Competencies: Workshop and IDS 2065: Visual Design.
Prerequisite(s): IDS 2015
Instructional Contact Hours: (3 Lec, 9 Lab, 6 Crd)

IDS 2034 - Design Visualization (3 credits)
Visual communication, modes of representation techniques, freehand drawings, perspectives, axonometric techniques, computer modeling, and form analysis. Presentation of ideas through rapid sketching and communicating resolved designs through detailed hand drawings. Development of portfolio and skills to choose appropriate methods for tasks.
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 2044 - Human Factors (3 credits)
This course examines human factors as it informs the design process, and as a tool to maximize the physical and psychological aspects of design toward the establishment of a human centered design. Frameworks of industrial design philosophy, research methods, standards and data, human issues, cultural context, and design outcomes.
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 2114 - History of Industrial Design (3 credits)
Broad movements in the history of art and industrial design. Application and analysis of art and design elements, principles, and composition techniques. Materials, processes, and innovations in art and design in context of culture, geography, and perspective.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 2124 - History of Modern Industrial Designers (3 credits)
Introduction to modern industrial design. Elements, principles, and composition techniques in art and design. Major movements from the 20th-century and how the values, ideals, and styles of designers influence the evolution of design. Comparative study of objects, design theory, and methodologies related to the changes in the profession and global perspectives.
Pathway Concept Area(s): 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 2214 - IDS Studio for Minors (6 credits)
Introduction to the discipline and the critical elements that contribute to the complexity of a work of design. Emphasis on intellectual discipline, skills development, communication of ideas, materials research, and a self-motivated search for critical issues. For registered Industrial Design Minors only.
Instructional Contact Hours: (3 Lec, 9 Lab, 6 Crd)

IDS 2304 - Computer Aided Industrial Design (3 credits)
An introduction to computer aided two and three- dimensional design and modeling as applied in industrial design using both solid and surface software modeling techniques.
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

IDS 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

IDS 3015 - Industrial Design Laboratory III (6 credits)
Introduction to systematic processes in design. Introduction and application of Human Factors and systematic planning methods in the development of industrial products in the areas of work, education and health. Development of professional presentation skills and methods.
Prerequisite(s): IDS 2016
Instructional Contact Hours: (3 Lec, 9 Lab, 6 Crd)

IDS 3016 - Industrial Design Laboratory III (6 credits)
Introduction to systematic processes in design. Introduction and application of Human Factors and systematic planning methods in the development of industrial products in the areas of work, education and health. Development of professional presentation skills and methods.
Prerequisite(s): IDS 3015
Instructional Contact Hours: (3 Lec, 9 Lab, 6 Crd)

IDS 3124 - Materials and Processes (3 credits)
Current design processes, materials, manufacturing processes, techniques, and equipment used in the design of products for mass and rapid production. Variety of materials and manufacturing processes available to the industrial designer for mass production impact his/her design process. Emphasis placed on the relationship of processes and equipment, to the environment and the end user. Includes concepts of material science. Practical issues of material selection and application, process selection, and specification.
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 3204 - Topics in Professional Development (1-19 credits)
Issues of practicing in an industrial design professional environment: public speaking, portfolio presentation, client/civic engagement (service learning), interdisciplinary teamwork and leadership in the development process of industrial products. Repeatable with instructor permission. Variable credit and duration.
Instructional Contact Hours: Variable credit course
Repeatability: up to 99 credit hours

IDS 3224 - Topics in Design Competencies (1-19 credits)
Issues of industrial design competencies and expertise required in a professional design environment, for example: software; model making (both hand making and digital rapid prototyping); workshop (wood, metal and plastics); specialized product design areas (packaging, furniture or exhibit design). Repeatable with instructor permission Variable credit and duration.
Instructional Contact Hours: Variable credit course
Repeatability: up to 99 credit hours

IDS 3234 - Topics in Design Theory (1-19 credits)
Issues of industrial design theory required for advancement in a professional design environment, for example: Product Semantics; Design Ethics; EcoDesign/Sustainability; Universal Design. Repeatable with instructor permission. Variable credit and duration.
Instructional Contact Hours: Variable credit course
Repeatability: up to 99 credit hours

IDS 3514 - Design Research (3 credits)
The course looks at the question of research and the ongoing exercise of re-definition for designers using examples of current design research corporations.
Prerequisite(s): IDS 2016
Instructional Contact Hours: (3 Lec, 3 Crd)

IDS 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

IDS 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

IDS 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

IDS 4015 - Industrial Design Laboratory IV (6 credits)
Detailed analysis, research and application of human factors to the design of equipment, work spaces and environments. Design and construction of full scale, interactive models and spaces. Introduction to group activities. Emphasis on the needs, the production and marketing factors of special populations, such as the elderly and disabled.
Prerequisite(s): IDS 3016
Instructional Contact Hours: (3 Lec, 9 Lab, 6 Crd)

IDS 4016 - Industrial Design Laboratory IV (6 credits)
Detailed analysis, research and application of human factors to the design of equipment, work spaces and environments. Design and construction of full scale, interactive models and spaces. Introduction to group activities. Emphasis on the needs, the production and marketing factors of special populations, such as the elderly and disabled.
Prerequisite(s): IDS 4015
Instructional Contact Hours: (3 Lec, 9 Lab, 6 Crd)

IDS 4044 - Professional Practice and Entrepreneurship (2 credits)
Focus on assembling multidisciplinary teams to engage in the process of bringing a product to market, building a business around a core competency in design, the structure of a design office, and the development and protections of intellectual property. Pre-requisite: Senior standing or permission of instructor.
Prerequisite(s): IDS 2015
Instructional Contact Hours: (2 Lec, 2 Crd)

IDS 4094 - Startup: Commercialization of Innovation (3 credits)
Work in interdisciplinary teams in an experiential environment replicating modern innovation environments. Engage in real world innovation commercialization opportunities. Individual experiences and projects involving actual inventions, innovations, technologies, intellectual property (e.g. patents) and market opportunities. Integrate design thinking, scientists, entrepreneurs, advisors and other potential collaborators. Create a representation of a plan for a minimum viable product for an innovative product or service based on customer and market feedback.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ENGE 4094, MGT 4094

IDS 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

IDS 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

IDS 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course
Repeatability: up to 99 credit hours

IDS 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

IDS 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course
Repeatability: up to 99 credit hours

IDS 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Subtotal		45
Total Credits		**124**

Footnotes

1. The Bridge Experience is the application of academic knowledge and skills to a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre-Departmental approval of 3900 plan anytime after the first year. Register for the semester that corresponds with the beginning of the Bridge Experience.

2. Six credit hours from any of the Topics courses are required for completion of degree; two of the six credit hours must be used for these subtopics: Portfolio (1 credit) and Workshop (1 credit). The subtopic courses are short, however, the time and credit hours may vary depending on the subject. Subtopic offerings may be repeated with instructor's permission. The following are examples of subtopics offered:
IDS 3204 Topics in Professional Development | Portfolio; Service Learning (client/civic engagement); Public Speaking; Social Entrepreneurship
IDS 3224 Topics in Design Competencies | Software; Model Making; Workshop (wood, metal, plastics); Design Visualization; Packaging, Furniture, or Exhibit Design
IDS 3234 Topics in Design Theory | Product Semantics; Ethics; Sustainability; Universal Design; Cross-Cultural Design

3. Professional elective requirements can be fulfilled from various courses throughout campus. The following subjects at 3000 or 4000 level are approved as professional electives: IDS, ARCH, ITDS, LAR, ART, SOC, AHRM, PSYC, COMM, CS, ENGE, ENGL, HUM, DRS, MGT, MKTG, PHIL, RED, SBIO, STS. Enrollment is based on space available and prerequisites student has completed.

Satisfactory Progress Towards Degree

The University requires every department to establish benchmarks by which their majors can demonstrate that they are making satisfactory progress towards a degree. In addition to successful completion of the University requirements (See Satisfactory Progress in Academics chapter of the Undergraduate Catalog), in the case of Industrial Design, the student must have completed ARCH 1015 Foundation Design Laboratory and ARCH 1016 Foundation Design Laboratory with a minimum grade point average of 2.00. If a student receives below a "C-" in IDS 2015 Industrial Design Laboratory II, IDS 2016 Industrial Design Laboratory II, IDS 3015 Industrial Design Laboratory III, IDS 3016 Industrial Design Laboratory III, and IDS 4015 Industrial Design Laboratory IV, students will not be able to progress to the next semester of design laboratory and the course will need to be repeated.

Restricted Major Requirements

Students who apply to the Industrial Design major through the internal major change process must meet the following requirements prior to entering the major.

1. Minimum 2.5 gpa in all courses prior to entering the summer design lab
2. Apply for summer design lab; Interview for summer design lab
3. Faculty review of summer work and grade of "C-" or better in ARCH 1015 & ARCH 1016 for admission to the Industrial Design major

Graduation Requirements

GPA Requirements

If a student's in-major GPA drops below 2.30, IDS courses with a grade below 2.0 must be repeated to elevate the in-major GPA to 2.50 before continuing in the degree. In-major GPA is calculated on all IDS courses. A minimum in-major 2.30 GPA in IDS courses and a minimum overall 2.00 GPA is required for graduation.

Prerequisites

Some courses listed on this check sheet may have pre-/co-requisites; please consult the University Course Catalog or check with your advisor.

Foreign Language Requirement

Language Requirement

Students who do not successfully complete at least 2 units of a single language, classical language, or American Sign Language during high school must successfully complete 6 semester hours of a single college level language or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the undergraduate catalog for details.

Interior Design

Our Website (https://archdesign.caus.vt.edu/itds/)

Overview

The interior design program at Virginia Tech is dedicated to improving quality of life through design excellence, professionalism, and public service. With a curriculum that equally respects the importance of creative skill, history, building technology, ethics, innovation, and business practice, our graduates have the ability and confidence needed to immediately contribute to the profession.

Students in the interior program begin their studies in the foundation design laboratory during the first two semesters with architecture, landscape architecture and industrial design students. From the beginning, both an independent and team approach to design solutions is encouraged.

In their professional studies students are challenged to think critically in their design of space and to develop solutions that not only enhance quality of life, but also protect the health, safety, and welfare of users as prescribed in the various codes and regulations that govern the work of interior designers. This philosophy is the core of our program. It establishes a foundation upon which each student graduates with creative ingenuity and professional responsibility.

Our CIDA accredited program prepares future designers for licensure and practice. A degree from a CIDA accredited program is increasingly important as a requirement for professional certification and licensing of Interior Designers in the United States. Graduating from a CIDA accredited program is the first step in a three-part process in achieving certification or licensing as an interior designer in various states. The last two steps are to complete two years of assistantship as an interior designer and then passing the National Council for Interior Design Qualification (NCIDQ) examination. A CIDA accredited degree, work experience and passing the NCIDQ exam satisfy the requirements in Virginia for recognition as a "Certified Interior Designer."

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree in Urban Affairs and Planning.

Satisfactory progress requirements toward the degree can be found on the major checksheet by visiting the University Registrar website at http://registrar.vt.edu/graduation-multi-brief/index1.html.

- Interior Design Major (p. 599)

Chair: B. Whitney
Associate Professors: G. Tew[4,2], E. Tural, and B. Whitney
Assistant Professors: A. Tural, E. Elgewely, Y. Zhou
Associate Professor Emeritus: B. Parsons, H. Renard

Undergraduate Course Descriptions (ITDS)

ITDS 1114 - Design Appreciation (3 credits)
Introduction to fundamental design concepts, design methods and the history of design. Examples drawn from architecture, interior design, industrial design, graphic design as well as vernacular craft and design traditions. Key concepts from art, literature and philosophy are discussed in relation to design theory.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 1224 - Introduction to Interior Design (3 credits)
Introduction to the elements and principles of interior design, the discipline and practice of interior design. Case studies from interior design practice. Design thinking, language of design, career paths, contemporary issues, global issues, presentation and drawing techniques and sketchbook preparation.
Pathway Concept Area(s): 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 2044 - Interior Design I (6 credits)
First in a series of six studios. Foundation level interior design studio. Exploration and development of interior spaces emphasizing spatial volume, human factors, elements and principles of design, and presentation techniques. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Prerequisite(s): ARCH 1016
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ITDS 2054 - Interior Design II (6 credits)
Spatial relationships continue as a priority from ITDS 2044 and become more advanced. Programs of required spaces are introduced in design projects along with issues of human behavior and perception and color. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Prerequisite(s): ITDS 2044
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ITDS 2134 - Materials and Methods in Interior Design (3 credits)
Properties and appropriate use of materials in design and construction of building interiors. Floor, wall, and ceiling materials, and materials used in furnishings and equipment are included. Special attention is given to the health effects and environmental impact of material choices in interior design.
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 2224 - Interior Design Graphic Communication (3 credits)
Exploration and development of advanced presentation techniques appropriate for communicating interior design concepts. Special attention is given to utilizing digital media as support for visual and verbal communication.
Prerequisite(s): ITDS 2114
Corequisite(s): ITDS 2144
Instructional Contact Hours: (6 Lab, 3 Crd)

ITDS 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ITDS 3044 - Interior Design III (6 credits)
Exploration and development of interior spaces emphasizing corporate office use, branding of interior environments, and building system integration. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Prerequisite(s): ITDS 2054
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ITDS 3054 - Interior Design IV (6 credits)
Design process, space planning and code compliance with advanced understanding of appropriate concepts for integrating furniture, fixtures, equipment, color, and finish materials in design solutions. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Prerequisite(s): ITDS 3044
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ITDS 3114 - Sustainable Design and Biophilia (3 credits)
Sustainable design concepts and theories. Ethical considerations of biophilia, biomimicry, cradle-to-cradle, and other emerging ways of addressing environmental sustainability. Use of biophilia to guide decision making in the built environment. Use of core green building concepts including water use, energy use, sustainable sites and materials. Review of Green Building standards.
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 3125 - History of Interiors (3 credits)
Survey of significant developments in the design of interiors, furniture, and materials culture with a focus on western civilization. Style, scale, material culture of each period. Social, economic, technological and political influences on design. Significant designers and craftsmen. 3125: 3000 BC through the 19th century European. Egypt, Greece, Rome, Renaissance, Baroque, Rococo, Neoclassical. 3126: Colonial America through 21st century including Modern design. Bauhaus, DeStijl, Post-War, Post-Modern, Eastern influences.
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 3126 - History of Interiors (3 credits)
Survey of significant developments in the design of interiors, furniture, and materials culture with a focus on western civilization. Style, scale, material culture of each period. Social, economic, technological and political influences on design. Significant designers and craftsmen. 3125: 3000 BC through the 19th century European. Egypt, Greece, Rome, Renaissance, Baroque, Rococo, Neoclassical. 3126: Colonial America through 21st century including Modern design. Bauhaus, DeStijl, Post-war, Post-Modern, Eastern influences.
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 3175 - Building Systems for Interior Design (3 credits)
Overview of building systems as they relate to the design of building interiors. 3175: overview of building construction including structural systems and materials, code information and thermal concepts related to building systems. 3176: lighting for buildings, sustainable design guidelines, integration of building systems.
Prerequisite(s): ITDS 2044
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 3176 - Building Systems for Interior Design (3 credits)
Overview of building systems as they relate to the design of building interiors. 3175: overview of building construction including structural systems and materials, code information and thermal concepts related to building systems. 3176: lighting for buildings, sustainable design guidelines, integration of building systems.
Prerequisite(s): ITDS 2044 and ITDS 3175
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 3184 - Construction Documents for Interior Design (3 credits)
An overview of construction documents: drawings and specifications. Development of a set of construction documents for a small commercial interior.
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 3954 - Study Abroad-Interior Design (1-19 credits)
Instructional Contact Hours: Variable credit course

ITDS 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ITDS 4044 - Interior Design V (6 credits)
High-level spatial quality and design solution. Exploration and development of interior spaces for a variety of project types. Focus on collaboration and team work. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Prerequisite(s): ITDS 3054
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ITDS 4054 - Interior Design VI (6 credits)
Senior Thesis studio requiring the integration of research and the design of a self-generated project. Course contact to credit hour structure: Lecture (1H,1C), Lab (6L, 2C), Design Lab/Studio (5L,3C).
Prerequisite(s): ITDS 4044 and ITDS 4224
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

ITDS 4224 - Design Research for Interiors (3 credits)
Project Programming and Design Research Methods in Interior Design. Evaluate and apply design research. Methods in design research, evidence-based design, and neuroscience.
Corequisite(s): ITDS 4044
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 4554 - Contemporary Interior Design Practice (3 credits)
Study of social, economic, political, and technological issues that influence contemporary interior design practice.
Prerequisite(s): ITDS 3126
Instructional Contact Hours: (3 Lec, 3 Crd)

ITDS 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ITDS 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ITDS 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ITDS 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Interior Design Major

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
ITDS 2044	Interior Design I	6
ITDS 2054	Interior Design II	6
ITDS 2134	Materials and Methods in Interior Design	3
ITDS 3044	Interior Design III	6
ITDS 3054	Interior Design IV	6
ITDS 3125	History of Interiors	3
ITDS 3126	History of Interiors	3
ITDS 3175	Building Systems for Interior Design	3
ITDS 3176	Building Systems for Interior Design	3
ITDS 3184	Construction Documents for Interior Design	3
ITDS 4044	Interior Design V	6
ITDS 4054	Interior Design VI	6
ITDS 4224	Design Research for Interiors	3
ITDS 4554	Contemporary Interior Design Practice	3
Subtotal		60
Professional Elective Courses		
ARCH 1015	Foundation Design Laboratory (required)	6
ARCH 1016	Foundation Design Laboratory (required)	6
Select one of the following:		3
ITDS 3114	Sustainable Design and Biophilia	
ITDS 3954	Study Abroad-Interior Design	
ITDS 4964	Field Study	
ITDS/ARCH/IDS/LAR/ART 2XXX-4XXX [1]		
Subtotal		15
Free Electives		
Select remaining credits of free electives		3
Subtotal		3
Pathways to General Education		
Pathways Concept 1 - Discourse		

ENGL 1105	First-Year Writing (1F)	3
ENGL 1106	First-Year Writing (1F)	3
COMM 2004	Public Speaking (1A)	3
Pathways Concept 2 - Critical Thinking in the Humanities		
ART 2385	Survey of the History of Western Art	3
or ART 2386	Survey of the History of Western Art	
Select three credits in Pathway 2 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G02)		3
Pathways Concept 3 - Reasoning in the Social Sciences		
SOC 1004	Introductory Sociology	3
Select three credits in Pathway 3 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G03)		3
Pathways Concept 4 - Reasoning in the Natural Sciences		
Select six credits in Pathway 4 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G04)		6
Pathways Concept 5 - Quantitative and Computational Thinking		
Choose one of the following sequences of foundational math courses:		*6*
MATH 1014 & MATH 1025	Precalculus with Transcendental Functions and Elementary Calculus	
Or		
MATH 1025 & MATH 1026	Elementary Calculus and Elementary Calculus	
Or		
MATH 1535 & MATH 1536	Geometry and Mathematics of Design and Geometry and Mathematics of Design	
Select three credits in Pathway 5a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05A)		3
Pathways Concept 6 - Critique and Practice in Design and the Arts		
ITDS 1224	Introduction to Interior Design	3
Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A)		3
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Satisfied by completion of SOC 1004. If double counting 3 additional credit hours of electives will be required.		
Subtotal		42
Total Credits		**120**

[1] Students can choose any course at the 2000 level or above in ITDS, ARCH, IDS, LAR, or ART with permission of the Interior Design Program Chair.

Satisfactory Progress

- Students must maintain a 2.0 minimum GPA (in all courses taken at Virginia Tech) to continue in the program.
- Students must maintain an overall 2.5 minimum in all in major courses. (This includes all courses with an ITDS pre-fix, and ARCH 1015 Foundation Design Laboratory-ARCH 1016 Foundation Design Laboratory). If a student's GPA drops below a 2.5 in ITDS courses, courses with below a 2.5 must be repeated to elevate the GPA to 2.5 before continuing in the degree. A grade of "C-" or better is required in ITDS 2044 Interior Design I, ITDS 2054 Interior Design II, ITDS 3044 Interior Design III,ITDS 3054 Interior Design IV, ITDS 4044 Interior Design V, and ITDS 4054 Interior Design VI.

Graduation Requirements

GPA

- Students must maintain a 2.0 minimum GPA (in all courses taken at Virginia Tech) to continue in the program.
- Students must maintain an overall 2.5 minimum in all in major courses. (This includes all courses with an ITDS pre-fix, and ARCH 1015-ARCH 1016). If a student's GPA drops below a 2.5 in ITDS courses, courses with below a 2.5 must be repeated to elevate the GPA to 2.5 before continuing in the degree. A grade of "C-" or better is required in ITDS 2044 Interior Design I, ITDS 2054 Interior Design II, ITDS 3044 Interior Design III, ITDS 3054 Interior Design IV, ITDS 4044 Interior Design V, and ITDS 4054 Interior Design VI.

Prerequisite Statement

Some courses as part of this degree may have pre- or co- requisite requirements; please consult the university course catalog or check with your academic advisor.

Foreign Language Requirement

Language Requirement

Students who do not successfully complete at least 2 units of a single language, classical language, or American Sign Language during high school must successfully complete 6 semester hours of a single college level language or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the undergraduate catalog for details.

Landscape Architecture

Our Website (http://www.lar.vt.edu)

Overview

Landscape Architecture encompasses the design, analysis, planning, management, and stewardship of sustainable environments. Landscape architects design across a wide spectrum of projects: parks and gardens, community design, urban design and planning, green infrastructure, and regional planning, as well as at the scale of watersheds and natural systems. The work of the profession is grounded in the natural and social sciences, draws inspiration from nature and the arts, and is implemented through innovative design, site engineering, construction, land management, and environmental technologies. The Landscape Architecture Program guides students as they address some of the most important challenges of our time: climate change; healthy living and empathetic design; urbanization; just and livable cities; re-imagining water, food, energy and transportation systems; green infrastructure; remediation of spoiled and disturbed sites; and preservation and conservation of critical natural and cultural resources. We believe the work of landscape architecture is at the critical intersection of natural and cultural systems, and that the profession is the most consequential of the design arts in the 21st century.

The core of the academic program is a rigorous sequence of design studios that allows students to explore a broad range of landscape architectural issues, contexts, and project types. Studios are accompanied by discussion, lecture, and laboratory courses that provide systematic and comprehensive coverage of the emerging body of knowledge related to technology, design theory, landscape ecology, and human/environment interaction. Off-campus options include a summer

travel studio, a semester study at other academic institutions, as well as an independent studies and professional internships.

The Bachelor of Landscape Architecture (B.L.A.) is a four-year first-professional degree program fully accredited by the Landscape Architecture Accreditation Board. Graduates have a wide range of employment and professional opportunities including work in private practice, multidisciplinary firms, public agencies and municipalities, non-governmental organizations and non-profits.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree in Landscape Architecture. Landscape Architecture majors must attain a C- or better in their studio and technology courses to advance to the next courses in these sequences.

Satisfactory progress requirements toward the degree can be found on the major checksheet by visiting the University Registrar website at http://registrar.vt.edu/graduation-multi-brief/index1.html.

- Landscape Architecture Major (p. 604)

Program Chair: Terry Clements[2]
Professors: T. Clements and M. Kim
Associate Professors: C. L. Bohannon and N. Heavers,
Professor Emeritus: D. Bork, B. Johnson, and P. Miller

Undergraduate Course Descriptions (LAR)

LAR 1014 - Landscape Architecture Foundation Design Laboratory (6 credits)
Immersive, interactive learning environment, design concept and process development, self and peer assessment. Design studies in two and three dimensions across multiple scales, landscape systems, foundational design theories, principles of spatial design and techniques used to create landscape spaces, systematical exploration and communication of ideas through visual, physical, and oral communications.
Prerequisite(s): ARCH 1015
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 1254 - Environment and Natural Systems (3 credits)
Introduction to the environment, natural systems with emphasis on their relationship to urban sustainability and resilience: natural elements, structures, patterns, natural systems, ecology, and landscape ecology. Impact of human actions and decisions on the environment and natural systems from global to local scale. Application of relevant theories and methods related to the environment and natural systems in planning and design.
Pathway Concept Area(s): 4 Reasoning in Natural Sci., 5F Quant & Comp Thnk Found., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 1264 - Seeing, Understanding and Representing Landscape and the Built Environment (3 credits)
Exploration of the natural and built environment through observation, interpretation and graphic representation of the landscape. Development of a range of graphic strategies and techniques with an emphasis on design thinking, iteration, and ethical issues expressed in the natural and built environment.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 2015 - Landscape Architecture Design Studio: Place and Process (6 credits)
Basic theory, principles, and methods of landscape design and site planning. 2015: Design theory involving two and three dimensional compositions. Mass/space relationships, principles of spatial design and techniques used to create landscape space. 2016: Design theory relating to landscape design and site planning. Design of small scale spaces in which the analysis of site, context and the requirements of human use are brought together in a creative synthesis.
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 2016 - Landscape Architecture Design Studio: Place and Process (6 credits)
Basic theory, principles, and methods of landscape design and site planning. 2015: Design theory involving two and three dimensional compositions. Mass/space relationships, principles of spatial design and techniques used to create landscape space. 2016: Design theory relating to landscape design and site planning. Design of small scale spaces in which the analysis of site, context and the requirements of human use are brought together in a creative synthesis.
Prerequisite(s): LAR 2015
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 2025 - Landscape Architecture Design Studio Place, Process and People (6 credits)
Landscape design and site planning including design processes, design communication, community-based design, case study methods, landscape performance. 2025: planning, programming and design of places, analysis of site, context and design for human use, and natural systems in creative design syntheses. 2026: master plan and site-scale planning and design incorporating multiple program elements with emphasis on social, cultural and natural systems infrastructure of neighborhoods and communities. Course Contact to Credit Hour Structure: Lecture (1H,1C), Lab (6L, 2C) Design Lab/Studio (5L, 3C). (1H, 11L, 6C)
Prerequisite(s): LAR 1014
Corequisite(s): LAR 2164
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 2026 - Landscape Architecture Design Studio Place, Process and People (6 credits)
Landscape design and site planning including design processes, design communication, community-based design, case study methods, landscape performance. 2025: planning, programming and design of places, analysis of site, context and design for human use, and natural systems in creative design syntheses. 2026: master plan and site-scale planning and design incorporating multiple program elements with emphasis on social, cultural and natural systems infrastructure of neighborhoods and communities. Course Contact to Credit Hour Structure: Lecture (1H,1C), Lab (6L, 2C) Design Lab/Studio (5L, 3C). (1H, 11L, 6C)
Prerequisite(s): LAR 2025
Corequisite(s): LAR 3154
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 2154 - Landscape Architecture History (3 credits)
Historical development of designed landscapes and landscape architecture with emphasis on western and select non-western cultures. Thematic focus on design theories, the social constructions of nature and relationships with land, ideology of landscape, experience of landscape by different social groups and cultures, landscape ethics, and parallels between site and urban design.
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 2164 - Landform Function and Aesthetics (4 credits)
Design principles and technology related to the creation of landforms for functional, aesthetic, and environmental purposes. Landform grading techniques for integrating soils, water, vegetation, transportation systems, and structures through the design and construction processes. Evaluating landform performance for landscape resilience. Design Lab/ Studio.
Prerequisite(s): LAR 1264
Instructional Contact Hours: (1 Lec, 5 Lab, 4 Crd)

LAR 2254 - Social and Cultural Landscapes (3 credits)
Introduction to experiential and cultural content of designed landscapes. Physiological, functional, and psychological factors that affect experience of the landscape. Study of cultural values, attitudes, and philosophies that have shaped historic and contemporary landscapes.
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 2554 - Leadership for Global Sustainability (3 credits)
Leadership principles and humanities perspectives that help examine and engage global sustainable development challenges such as climate change, food-water-energy nexus, rising middle class, circular economy, and environmental justice. Topics include collaboration, stories, conflict resolution, self-awareness, bias, equity, religion, hubris, globalism, and moral naturalism. Examine trade-offs among economic, environmental, and social dimensions of sustainable development. Integration and application of disciplinary topics including ethics, ecology, evolution, anthropology, economics, religion, aesthetics, and risk management.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 3 Reasoning in Social Sciences, 10 Ethical Reasoning, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: FREC 2554, NR 2554

LAR 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LAR 3015 - Intermediate Landscape Design and Construction Documents (6 credits)
Development of intermediate site planning and design knowledge skills. 3015 focuses on site/project scale planning and design with emphasis on greenfield development sites and models of conversation oriented design/development.
Prerequisite(s): LAR 2016
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 3016 - Intermediate Landscape Design and Construction Documents (6 credits)
3016 focuses on site/project scale planning and design involving multiple program elements with a focus on urban and suburban redevelopment and densification. Emphasis is given to the social, cultural and natural systems infrastructure of neighborhoods and communities.
Prerequisite(s): LAR 3015
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 3044 - Land Analysis and Site Planning (3 credits)
Concepts, principles, and processes of land analysis and evaluation for physical planning and design. Approaches to spatial problem solving with an emphasis on data collection, evaluation, and synthesis using applicable technologies such as Geographic Information Systems (GIS). Analysis and synthesis of natural and socio-cultural systems at varying scales in the site planning and design process using Geodesign method.
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 3154 - Watershed Sensitive Site Design and Construction (4 credits)
Examines soil and water resource issues related to landscape architectural site planning and design. Key topics include watershed sensitive site design, estimation and management of storm water runoff, rainwater conservation, design of open channel conveyances for site planning applications, and erosion and sedimentation control. Prerequisite: LAR 2164 or consent of instructor
Prerequisite(s): LAR 2164
Instructional Contact Hours: (2 Lec, 4 Lab, 4 Crd)

LAR 3164 - Design in Detail: Materials, Methods and Assembly (4 credits)
Landscape construction knowledge and practices integrating concepts of design detailing with material selection, sustainable construction methods, and environmental performance. Concepts of landscape performance in material use and human interaction, effects on the built environment, and technical documentation.
Prerequisite(s): LAR 2164
Instructional Contact Hours: (2 Lec, 3 Lab, 4 Crd)

LAR 3264 - People Community and Place (3 credits)
Advanced course focusing on landscape/behavior interactions and implications for the design of outdoor environments at site and community scales for sustainable communities. Systems approach to engage various community design program elements, including social, land use, physical infrastructure, public space, movement, energy, and natural systems, in place-making strategies for diverse populations. Methods of community participation and engagement used in community-based design practices. Pre: Junior standing.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

LAR 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LAR 4004 - History and Theory of Landscape Architecture II (3 credits)
This course studies theoretical and practical developments in landscape architecture and related arts through investigation and analysis of design theory and philosophy, and built form. Pre: 2004 or permission of instructor.
Prerequisite(s): LAR 2004
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 4014 - Design and Construction Documentation (6 credits)
Landscape architectural project-based design and construction documentation. Site design integrating experiential learning, programming, schematic design, design development, construction documentation, construction cost estimation, and technical specifications. Construction principles and practices in preparation of site design and set of construction documents. Community-based principles and practices for site design development. Lecture (1H,1C), Lab (6L, 2C) Design Lab/Studio (5L, 3C) (1H, 11L, 6C).
Prerequisite(s): LAR 2164 and LAR 3154 and LAR 3164
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 4034 - Evolution of the American Landscape (3 credits)
Examine and interpret physical changes in the rural and urban landscapes of the United States as they reflect cultural values; technologic innovations; immigration patterns; the roles of diverse professions over time; changing views of use, conversation and preservation of national resources; and expectations for places of live, work and play using an iterative writing process and reflective course discussions.
Pathway Concept Area(s): 1A Discourse Advanced, 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 4084 - Landscape Design and Planning Studio (3-6 credits)
Advanced design studio addresses current land design and planning issues including global climate change across contexts and spatial scales using complex problem-solving methods of a geodesign framework. Domestic and international precedents, theories, guidelines, and regulations. Development and communication of consensus-based comprehensive plans and designs that address sustainability and resilience issues caused by climate change and others. Use of collaborative community-based design practices. Non-Majors - Lecture (1H, 1C), Lab (6L, 2C). Majors — Course Contact to Credit Hour Structure: Lecture (1H, 1C) Lab (6L, 2C) Design Lab/Studio (5L, 3C). Variable credit course. (1H, 6-11L, 3-6C)
Prerequisite(s): LAR 4014
Pathway Concept Area(s): 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 6-11 Lab, 3-6 Crd)

LAR 4094 - Senior Project (3-6 credits)
Advanced landscape architectural design capstone course using applied research requiring development of a landscape architecture project selected and completed by the student under the direction of a faculty advisor. Landscape architecture theories and issues; design principles and processes, technological tools and communication strategies to develop and implement a comprehensive design study or independent design project in the context of specific concerns of the built environment. Repeatable for a maximum of 9 credit hours. 3 credit hour course - Lecture (1H, 1C), Lab (6L, 2C). 6 credit hour course - Course Contact to Credit Hour Structure: Lecture (1H, 1C), Lab (6L, 2C), Design Lab/Studio (5L, 3C). Variable credit course. (1H, 6-11L, 3-6C)
Prerequisite(s): LAR 4014 and LAR 4084
Instructional Contact Hours: (1 Lec, 6-11 Lab, 3-6 Crd)
Repeatability: up to 9 credit hours

LAR 4134 - Landscape Representation (3 credits)
2D and 3D hand and digital drawing modes and representational techniques used in landscape design explorations and visual presentations. Study and application of landscape representations. Visual communication of landscapes, landscape change, hydrologic patterns, ecologic processes, and human systems related to design, planning and management of the built environment across geographic and site scales. Design Lab/Studio.
Instructional Contact Hours: (1 Lec, 3 Lab, 3 Crd)

LAR 4154 - Design Studies of the Built Environment (3-6 credits)
Design study of built environment using comparative case studies of relationships between society and culture and the physical and built environments, as seen across scales. Design and use analysis and documentation of elements of the physical environment; exploration of interface between building, people, and landscape systems. Independent case study research project includes on-site field investigations, design research and final documentation of findings. Pre: Junior standing. 3 credit hour course - Design Lab (5L, 3C). 6 credit hour course - Design Lab (9L, 6C) Variable credit. Design Lab/Studio. (5-9L, 3-6C)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 5-9 Lab, 3-6 Crd)

LAR 4244 - Professional Practice in Landscape Architecture (3 credits)
Comparative study of career options, professional practice types in landscape architecture including current and future practices. Introduction to firm organizational structure, business models, organizational culture and project management. Review of laws, regulations, contracts, financial and business planning, professional ethics and societal forces impacting design processes and work from project inception to built outcomes. Portfolio and resume development.
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 4254 - Theories of Landscape Architecture (3 credits)
Critical examination of theories relevant to landscape architectural design and the inter-relationship between theory and practice. Evolution of theory with respect to built works. Overview of concurrent design theories and philosophies in the related arts. Pre-requisite: Senior standing or instructors permission.
Instructional Contact Hours: (3 Lec, 3 Crd)

LAR 4304 - Topics in Landscape Architecture (3 credits)
Topics in landscape architecture history, theory and design methods is an advanced course focusing upon issues facing the professional practice of landscape architecture today. Special emphasis on methods of analysis and interpretation including application of creative techniques, analogous thinking, computer-aided procedures and information handling in landscape architecture design and practice. Pre: 3015 and 3016 or permission of instructor. May be repeated with different content for a maximum of 12 credits.
Prerequisite(s): LAR 3015 and LAR 3016
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 12 credit hours

LAR 4324 - Landscape Architecture Technology III-Construction Documents (4 credits)
This course provides the link between landscape architectural design and construction documentation. Landscape technology covered in preceding technology courses is combined with information on construction principles and practices in the preparation of landscape architectural construction drawings and technical specifications.
Prerequisite(s): LAR 4244
Instructional Contact Hours: (2 Lec, 4 Lab, 4 Crd)

LAR 4554 - Creating the Ecological City (3 credits)
Multidisciplinary, team oriented, problem-solving approaches to creating cities that foster healthy interconnections between human and ecological systems. Analysis of problems from practical and ethical perspectives in the context of the diverse knowledge bases and values of decision-makers. Formation and utilization of integrated design teams to solve complex urban design and planning problems at a variety of scales. Senior standing.
Prerequisite(s): HORT 2134 or FREC 2134
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BSE 4554, FREC 4554, HORT 4554, SPIA 4554

LAR 4705 - Landscape Design and Planning (6 credits)
Theories, methods, techniques, and tools relating to the planning and design of sites, communities, and regional landscapes. 4705: Development of design ability through the study of: two- and three-dimensional design, principles and elements of spatial composition, theories and techniques for planning and design of sites, and design communication techniques. Investigation of natural and man-made physical factors and cultural factors, and human needs. Creative design synthesis. 4706: Evaluation of land resources and the allocation of land uses within large complex sites and regional landscapes. Theories and techniques of site planning and community design. Research of natural, cultural and physical conditions. Application of geographic information systems. Assessment of community development and land planning concepts. Proposing land-use and management strategies at community and regional landscape scales. Identification and application of community-based design practices. Pre: 4705 for 4706. Course Contact to Credit Hour Structure: Lecture (1H,1C), Lab (6L, 2C) Design Lab/Studio (5L, 3C). (1H, 11L, 6C)
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 4706 - Landscape Design and Planning (6 credits)
Theories, methods, techniques, and tools relating to the planning and design of sites, communities, and regional landscapes. 4705: Development of design ability through the study of: two- and three-dimensional design, principles and elements of spatial composition, theories and techniques for planning and design of sites, and design communication techniques. Investigation of natural and man-made physical factors and cultural factors, and human needs. Creative design synthesis. 4706: Evaluation of land resources and the allocation of land uses within large complex sites and regional landscapes. Theories and techniques of site planning and community design. Research of natural, cultural and physical conditions. Application of geographic information systems. Assessment of community development and land planning concepts. Proposing land-use and management strategies at community and regional landscape scales. Identification and application of community-based design practices. Pre: 4705 for 4706. Course Contact to Credit Hour Structure: Lecture (1H,1C), Lab (6L, 2C) Design Lab/Studio (5L, 3C). (1H, 11L, 6C)
Prerequisite(s): LAR 4705
Instructional Contact Hours: (1 Lec, 11 Lab, 6 Crd)

LAR 4964 - Field Work (1-19 credits)
Instructional Contact Hours: Variable credit course

LAR 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LAR 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LAR 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

LAR 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Landscape Architecture Major

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
LAR 1014	Landscape Architecture Foundation Design Laboratory	6
LAR 2025	Landscape Architecture Design Studio Place, Process and People	6
LAR 2026	Landscape Architecture Design Studio Place, Process and People	6
LAR 4014	Design and Construction Documentation	6
LAR 4084	Landscape Design and Planning Studio	6
LAR 4094	Senior Project	3
LAR 4094	Senior Project	6
Subtotal		39
Major Requirements		
ARCH 1015	Foundation Design Laboratory	6
LAR 1254	Environment and Natural Systems	3
LAR 1264	Seeing, Understanding and Representing Landscape and the Built Environment	3
LAR 2154	Landscape Architecture History	3
LAR 2164	Landform Function and Aesthetics	4
LAR 3044	Land Analysis and Site Planning	3
LAR 3154	Watershed Sensitive Site Design and Construction	4
LAR 3164	Design in Detail: Materials, Methods and Assembly	4
LAR 3264	People Community and Place	3
LAR 4034	Evolution of the American Landscape	3
LAR 4154	Design Studies of the Built Environment	6
LAR 4244	Professional Practice in Landscape Architecture	3
LAR 4254	Theories of Landscape Architecture	3
Subtotal		48
Restricted Electives		**6**
Earth Science Elective		
Select one of the following:		
GEOS/CSES/ GEOG 3304	Geomorphology	
ENSC 3134	Soils in the Landscape	
FREC 4354	Forest Soil and Watershed Management	
CSES 3114	Soils	
Plant Science Electives		
Select one of the following:		
HORT 3325	Woody Landscape Plants	
HORT 3326	Woody Landscape Plants	
FREC 2314 & FREC 2324	Forest Biology and Dendrology and Dendrology Laboratory	
Subtotal		6
Pathways to General Education		

Pathways Concept 1 - Discourse		
ENGL 1105	First-Year Writing (1F)	3
ENGL 1106	First-Year Writing (1F)	3
LAR 4034	Evolution of the American Landscape (1A (Major Req. Course)) [1]	
Pathways Concept 2 - Critical Thinking in the Humanities		
Select six credits in Pathway 2 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G02)		6
Pathways Concept 3 - Reasoning in the Social Sciences		
LAR 3264	People Community and Place (Major Req. Course)	
Select three credits in Pathway 3 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G03)		3
Pathways Concept 4 - Reasoning in the Natural Sciences		
GEOS 1004	Earth Science: Our Past, Present, and Future	3
LAR 1254	Environment and Natural Systems (Major Req. Course)	3
Pathways Concept 5 - Quantitative and Computational Thinking		*3*
Select two of the following:		
MATH 1014	Precalculus with Transcendental Functions	
or MATH 1536	Geometry and Mathematics of Design	
MATH 1025	Elementary Calculus	
or MATH 1536	Geometry and Mathematics of Design	
LAR 3044	Land Analysis and Site Planning (5A (Major Req. Course))	
Pathways Concept 6 - Critique and Practice in Design and the Arts		
LAR 1264	Seeing, Understanding and Representing Landscape and the Built Environment (Major Req. Course)	
LAR 2154	Landscape Architecture History (Major Req. Course)	
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select from any approved Ident & Equity Course [2]		3
Total Credits		**120**

[1] LAR 4034 Evolution of the American Landscape can count as either Pathways 1a or 2.

[2] May be double-counted with another Pathways approved core concept course.

Prerequisites

Some courses listed on this checksheet may have prerequisites and/or corequisites; please consult the University Course Catalog or check with your advisor.

Restricted Major Requirements

Students who make application to Landscape Architecture through the change of major process must meet the following requirements prior to entering the major.

1. Minimum 2.0 overall GPA prior to ARCH 1015, and
2. Application Interview with Landscape Architecture Program Chair.

Graduation GPA Requirement

In-major GPA and an overall GPA: A 2.0 GPA is required for graduation.

Policy 91 Requirements

Satisfactory progress toward degree: In addition to successful completion of the University requirements, all students must achieve a minimum 2.0 GPA by the end of the semester in which the 50th credit hour is attempted. All students must receive a C- or higher in all Core Degree Required Courses and technology courses (LAR 2164 Landform Function and Aesthetics, LAR 3154 Watershed Sensitive Site Design and Construction, LAR 3164 Design in Detail: Materials, Methods and Assembly and LAR 3044 Land Analysis and Site Planning).

Foreign Language Requirement

Complete 1105-1106 foreign language (e.g., FR, GR, SPAN) grouping or the equivalent.

Music

Our Website (http://www.performingarts.vt.edu)

Overview

The Virginia Tech Music program provides high-quality training to a select number of Music majors as well as ensembles and courses for large numbers of non-music majors. The curriculum offers an excellent liberal arts education with a low professor/student ratio combined with the library, computer facilities, and cultural interaction that only a major comprehensive university can provide. Learning is enhanced by the use of music technology across the curriculum and innovative programs such as laboratory ensembles and extensive teaching experiences in the Music Education program. Together with traditional degree programs in Performance, Music Education, Technology, Composition, and Creative Technologies.

Virginia Tech faculty artists and scholars have performed and lectured at conventions, in music festivals, and on concert series throughout the United States and in Canada, Europe, Asia, and South America. Each year, internationally known guest artists join forces with our faculty to perform world caliber performances on campus.

Prospective Music majors must successfully complete an audition/interview. To receive information concerning auditions and scholarship opportunities, contact the chairperson:

Music Scholarship and Audition Committee
School of Performing Arts
195 Alumni Mall (0141)
Henderson Hall, Room 247
Blacksburg, Virginia 24061-0240

Scholarship support is available. Please also refer to the School of Performing Arts website for more details.

The major in Music, leading to a B.A., emphasizes four areas of music: music education; performance; technology and composition. In addition to fulfilling the Curriculum for Liberal Education and the core curriculum requirements of the College of Architecture, Arts, and Design, the Music major must pursue a concentration in one of the above areas of emphasis. There are nine primary options available to Music majors. These are:

- 84-Credit Music Education Option (see website for details)
- 51-Credit Performance - Liberal Arts Option
- 78-Credit Performance - Professional Vocal Option

- 78-Credit Performance - Professional Instrumental Option
- 78-Credit Composition - Professional Option
- 54-Credit Creative Technologies in Music Option
- 52-Credit Music Technology - Liberal Arts Option
- 78-Credit Music Technology - Professional Option

In addition, all Music majors must meet a minimum level of piano proficiency no later than two semesters prior to graduation. Music majors are expected to attend a minimum number of concerts and recitals. Additional curriculum and policy information is available in the Handbook for Music Majors on the School of Performing Arts website.

There are four options available as a minor in Music, including a general Music minor, a Music Production, Technology, and Composition minor, a Music (Technology Emphasis) minor, and a Music (Jazz Studies) minor. The minor in music consists of courses selected from performance, history/literature, and theory/composition. For the exact requirements, interested students should contact:

Tammy Henderson
Virginia Tech
246 Henderson Hall
Blacksburg, Virginia 24061-0240
tammyh@vt.edu

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree in music.

Satisfactory progress requirements toward the B.A. in Music can be found on the major checksheet by visiting the University Registrar website at https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

- Music Major with Composition Option (p. 614)
- Music Major with Creative Technologies in Music Option (p. 616)
- Music Major with Music Education Choral/General Option (p. 618)
- Music Major with Music Education Instrumental Option (p. 619)
- Music Major with Performance Liberal Arts Option (p. 621)
- Music Major with Performance Professional Instrumental Option (p. 623)
- Music Major with Performance Professional Vocal Option (p. 625)
- Music Major with Technology Liberal Arts Option (p. 626)
- Music Major with Technology Professional Option (p. 628)

Director, School of Performing Arts | Music | Theatre | Cinema: J. Loeffert

Chair: J. Crafton
Professors: D. Bigler, I.I. Bukvic, W. J. Crone, and J. Loeffert
Associate Professors: J. Crafton, C. Nichols, A. Stevens, B. Thorsett, A. Weinstein, A. Wyatt, and H. Yoo
Assistant Professors: C. Campo-Bowen, , M. Elmer, J. Irrera, K. Loeffert, E. McLain, E. O'Leary, R.J. Masters, and D. Shapiro
Collegiate Assistant Professors: M. Wilkens-Reed

Professor of Practice: E. Lyon

Assistant Professors of Practice: A. Cowan, K. Hutchins, and P. Middleton

Senior Instructors: E. Lantz, M. E. Dunston

Instructors: J. Bean, J. Berrios, C. Pace, and C. Reep
Visiting Assistant Professors: B. Newcomer

Visiting Instructors: D. Gonzalez

A/P Faculty: A. Bank
Professors Emeritus: V. Burnsed, K. Holliday, J. Husser, D. Jacobsen, and D. Widder
Academic Advisor: D. Hopkins

Undergraduate Course Descriptions (MUS)

MUS 1004 - School of Performing Arts First Year Experience (1 credit)
Orientation to the School of Performing Arts philosophy and the resources of the School, the College, and the University. Cultivate a common intellectual, analytical, and creative conversation among first-year students. Enhance student participation in the creative and scholarly life of the Schools programs. Foster a sense of community and understanding across disciplines.
Instructional Contact Hours: (1 Lec, 1 Crd)
Course Crosslist: TA 1004

MUS 1005 - Theory Fundamentals (3 credits)
Fundamental elements of music theory. 1005: Introduction to elements of music theory. Musical notation, scales of various global traditions, foundations of tonality; intervals, triads, dominant seventh chords, rhythm, meter, cadences, harmonic analysis. Composition with species counterpoint and the twelve-bar blues progression. Aural recognition of musical sounds through ear training. 1006: More complex harmonic and rhythmic processes. Increase complexity of intervals, chords, rhythms, progressions and score reading. Introduce transposition and vocabulary for timbre and textural discussion. Aural recognition of more advanced musical sounds through ear training. Fluency in terms and conventions for western art music, rock, hip-hop. Composition of original music.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 1006 - Theory Fundamentals (3 credits)
Fundamental elements of music theory. 1005: Introduction to elements of music theory. Musical notation, scales of various global traditions, foundations of tonality; intervals, triads, dominant seventh chords, rhythm, meter, cadences, harmonic analysis. Composition with species counterpoint and the twelve-bar blues progression. Aural recognition of musical sounds through ear training. 1006: More complex harmonic and rhythmic processes. Increase complexity of intervals, chords, rhythms, progressions and score reading. Introduce transposition and vocabulary for timbre and textural discussion. Aural recognition of more advanced musical sounds through ear training. Fluency in terms and conventions for western art music, rock, hip-hop. Composition of original music.
Prerequisite(s): MUS 1005
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 1104 - Music Appreciation (3 credits)
Survey of the art of music encompassing a variety of music styles and historical eras in both the western and non- western world. Students will develop strategies to contextualize music, via listening, from the perspective of the listener, composer, and performer.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 1114 - Listening in the Digital Age (3 credits)
An introduction to musical access and listening in the digital age. Introduces basic elements of music and the creative process together with important musicians and their works. Explores historical, social, and cultural forces and trends that influence the creation and interpretation of various musical styles, including classical, blues, jazz, popular, and world music.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 1124 - Living a Musical Life (3 credits)
Embrace a wide variety of music and ways to make music. Learn about the health benefits of lifelong music-making. Units include regional, national, and international traditions in historical, political, and cultural contexts. No prior musical training required.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 1134 - Music of the Americas (3 credits)
Musical traditions in the American continent, with a specific focus on Latin-American and Latinx musics. Introduction to music from different traditions across nations and social-historical contexts. Critical engagement with broad social concepts from cultural, political, and historical perspectives. Development of listening and writing skills.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2025 - European-American Music Theory (3 credits)
Fundamental elements of music and conventions of genre and style in a global context. 2025: pitch & harmony, rhythm & meter, timbre, texture, and movement. Emphasis on rote learning of pitch notation, intervals, key signatures, chords vs non-chord tones, and pitch collections. Methods to analyze harmony, phrase structure, and meter. Develop vocabulary for timbre and texture. Basic skills of score reading and transposition. 2026: form, as well as more complex harmonic and rhythmic processes, such as harmonic rhythm, syntax and metric dissonance. Increase complexity of score reading to include larger ensembles. In-depth study of genre, considering elements of harmony, rhythm & meter, and form in European and North-American classical, jazz, and popular musics.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2026 - European-American Music Theory (3 credits)
Fundamental elements of music and conventions of genre and style in a global context. 2025: pitch & harmony, rhythm & meter, timbre, texture, and movement. Emphasis on rote learning of pitch notation, intervals, key signatures, chords vs non-chord tones, and pitch collections. Methods to analyze harmony, phrase structure, and meter. Develop vocabulary for timbre and texture. Basic skills of score reading and transposition. 2026: form, as well as more complex harmonic and rhythmic processes, such as harmonic rhythm, syntax and metric dissonance. Increase complexity of score reading to include larger ensembles. In-depth study of genre, considering elements of harmony, rhythm & meter, and form in European and North-American classical, jazz, and popular musics.
Prerequisite(s): MUS 2025
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2045 - Sightsinging Laboratory (1 credit)
Study and practice of techniques involved in the sight reading and sightsinging of printed music. Majors and minors only.
Corequisite(s): MUS 2025
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 2046 - Sightsinging Laboratory (1 credit)
Study and practice of techniques involved in the sight reading and sightsinging of printed music. Majors and minors only.
Prerequisite(s): MUS 2045
Corequisite(s): MUS 2026
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 2054 - Introduction to Music Technology (2 credits)
History, theory, and applications of music technology. Techniques for notating music and for recording and editing audio, using computer software and digital audio equipment. Consent Required. Design lab.
Instructional Contact Hours: (3 Lab, 2 Crd)

MUS 2055 - Audio Technology For Music (3 credits)
Develops basic understanding of audio technology for musical applications, focusing on todays digital audio recording and editing technologies including microphone use, live recording, and studio session recording. Develops critical listening skills through lab experimentation and recording. Pre: 2054 and permission of instructor required.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2056 - Audio Technology For Music (3 credits)
Develops basic understanding of audio technology for musical applications, focusing on todays digital audio recording and editing technologies including microphone use, live recording, and studio session recording. Develops critical listening skills through lab experimentation and recording. Pre: 2054 and permission of instructor required.
Prerequisite(s): MUS 2055
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2065 - Music Composition (2 credits)
Organizing the basic elements of music: pitch, rhythm, timbre, articulation, and dynamics. Composing pieces for solo instruments and duos. Preparing scores and parts, for performances and recordings of the compositions. Knowledge of basic music theory required. Consent Required.
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 2066 - Music Composition (2 credits)
Composing for specific instruments and combinations of instruments. Exploring traditional and extended technique. Organizing the structure of a piece based on recurrence, development, variation, priority, and perspective of musical material, for trio adn quartet or a larger ensemble. A grade of C or better in prerequisite.
Prerequisite(s): MUS 2065
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 2115 - Survey of Western Music (3 credits)
Survey and study of the historical evolution of Western art music. MUS 2115: classical music from Antiquity into the Classical era. MUS 2116: classical and other music from the Romantic era through the 20th century to music of today. Investigation of the materials of music. Exploration of music as it both reflects and impacts history, including historical considerations of gender, race, culture, and other extramusical factors. Relevance of historical and contemporary music to our society today.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2116 - Survey of Western Music (3 credits)
Survey and study of the historical evolution of Western art music. MUS 2115: classical music from Antiquity into the Classical era. MUS 2116: classical and other music from the Romantic era through the 20th century to music of today. Investigation of the materials of music. Exploration of music as it both reflects and impacts history, including historical considerations of gender, race, culture, and other extramusical factors. Relevance of historical and contemporary music to our society today.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2124 - Music Traditions in Appalachia (3 credits)
Survey and study of music traditions in Appalachia. Investigation of the formal elements of this music, including instruments and musical terms and forms. Exploration of style as a reflection of many cultural influences. Study of the impact and development of these traditions in contemporary musical practices.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: APS 2124

MUS 2134 - Disability Culture & the Arts (3 credits)
Disability as an identity, community, and culture through a study of music and the arts. Overview of the disability rights and disability justice movements in the United States, as told through music, film, literature, and performance art. Analyze creative works, confront obstacles to inclusion, and discover disability cultural values. No previous musical training required.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 2214 - Class Applied Piano (1 credit)
Group piano lessons for beginners or for students at an early stage of keyboard development. May be repeated for 1 credit. Consent required.
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 2 credit hours

MUS 2224 - Class Applied Voice (1 credit)
Group voice lessons for beginners or for students at an early stage of vocal development. May be repeated for 1 credit. Consent required.
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 2 credit hours

MUS 2234 - Class Applied Strings (1 credit)
Group string lessons for beginners or for students at an early stage of string development. May be repeated for 1 credit. Consent required.
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 2 credit hours

MUS 2244 - Class Applied Woodwinds (1 credit)
Group woodwind lessons for beginners or for students at an early stage of woodwind development. May be repeated for 1 credit. Consent required.
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 2 credit hours

MUS 2254 - Class Applied Brass (1 credit)
Group brass lessons for beginners or for students at an early stage of brass development. May be repeated for 1 credit. Consent required.
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 2 credit hours

MUS 2264 - Class Applied Percussion (1 credit)
Group percussion lessons for beginners or for students at an early stage of development. May be repeated for 1 credit. Consent required.
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 2 credit hours

MUS 2274 - Music Education Lab Ensemble (1 credit)
Music education laboratory ensemble. Performance techniques, teaching methods, management procedures, materials and literature for school music ensembles. May be repeated for credit.
Instructional Contact Hours: (1 Lab, 1 Crd)

MUS 2284 - Piano Accompanying (2 credits)
Examine and practice the skills necessary for successful piano accompanying. Develop keyboard skills such as sightreading, transposition, choral score reading, and harmonization. Learn principles of accompanying vocal repertoire, instrumental repertoire, including large ensemble repertoire; adapt orchestral reductions for piano. Instructor consent required.
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 2314 - Woodwind Techniques I - Flute, Clarinet, Saxophone (1 credit)
Instruction in basic performing skills and practices for woodwind instruments (flute, clarinets, saxophone). Study of pedagogy for woodwind instruction in K-12 music education settings. Survey of repertoire, resources, and materials for use in woodwind instruction.
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 2324 - Woodwind Techniques II - Oboe and Bassoon (1 credit)
Instruction in basic performing skills and practices for woodwind instruments (oboe, bassoon). Study of pedagogy for woodwind instruction in K-12 music education settings. Survey of repertoire, resources, and materials for use in woodwind instruction.
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 2334 - High Brass Techniques (1 credit)
Instruction in basic performing skills and practices for high brass instruments (trumpet and horn). Study of pedagogy for teaching brass in K-12 music education settings. Survey of repertoire, resources, and materials for use in brass instruction.
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 2344 - Low Brass Techniques (1 credit)
Instruction in basic performing skills and practices for low brass instruments (trombone, euphonium, and tuba). Study of pedagogy for teaching brass in K-12 music education settings. Survey of repertoire, resources, and materials for use in brass instruction.
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 2364 - Introduction to Music Education (2 credits)
Principles and practices fundamental to music learning and teaching. Philosophical bases for teaching music. Major educational learning theories (e.g., behaviorism, cognitivism, social constructivism, multiple intelligences, spiral learning theory, Bloom's taxonomy, etc.). Pedagogical approaches, culturally responsive teaching, and technology integration in the music classroom. Field observation for real world public-school music instruction.
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 2514 - Individual Applied Voice (1-3 credits)
Individual instruction in voice. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2515 - Vocal Diction (1 credit)
An introduction to principles of vocal diction for singing using the International Phonetic Alphabet and standard foreign-language pronunciation techniques.
Instructional Contact Hours: (1 Lab, 1 Crd)

MUS 2516 - Vocal Diction (1 credit)
An introduction to principles of vocal diction for singing using the International Phonetic Alphabet and standard foreign-language pronunciation techniques.
Instructional Contact Hours: (1 Lab, 1 Crd)

MUS 2524 - Individual Applied Keyboard (1-3 credits)
Individual instruction in keyboard. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2534 - Individual Applied Violin (1-3 credits)
Individual instruction in violin. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2544 - Individual Applied Viola (1-3 credits)
Individual instruction in viola. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2554 - Individual Applied Cello (1-3 credits)
Individual instruction in cello. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2564 - Individual Applied Bass (1-3 credits)
Individual instruction in bass. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2574 - Individual Applied Flute (1-3 credits)
Individual instruction in flute. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2584 - Individual Applied Oboe (1-3 credits)
Individual instruction in oboe. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2594 - Individual Applied Clarinet (1-3 credits)
Individual instruction in clarinet. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2604 - Introduction to Arts Marketing (3 credits)
An introduction to the theories and practice of marketing and building community engagement as applied to arts activities and professional not-for-profit arts organizations, through a survey of standard marketing approaches, examination of current practices in the field, and direct hands-on experience.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: TA 2604

MUS 2614 - Individual Applied Saxophone (1-3 credits)
Individual instruction in saxophone. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2624 - Individual Applied Bassoon (1-3 credits)
Individual instruction in bassoon. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2634 - Individual Applied Horn (1-3 credits)
Individual instruction in horn. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2644 - Individual Applied Trumpet (1-3 credits)
Individual instruction in trumpet. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2654 - Individual Applied Trombone (1-3 credits)
Individual instruction in trombone. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)

MUS 2664 - Individual Applied Baritone (1-3 credits)
Individual instruction in baritone. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2674 - Individual Applied Tuba (1-3 credits)
Individual instruction in tuba. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2684 - Individual Applied Percussion (1-3 credits)
Individual instruction in percussion. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2734 - Individual Applied Composition (1-3 credits)
Individual instruction in composition. May be repeated. Consent and audition required.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 2754 - Individual Applied Recording (1-3 credits)
Individual instruction through directed experiential learning of music recording and production. Integration of critical listening, acoustics, audio recording, and signal processing with music theory and performance. An emphasis on hands-on exploratory research in the use of instruments, acoustics, and microphone techniques combined with traditional methods and emerging technologies to capture and produce recordings of musical performances and works in a natural and effective manner. Permission required. May be repeated for a maximum of 8 hours.
Prerequisite(s): MUS 2055
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 8 credit hours

MUS 2815 - Jazz Improvisation (2 credits)
Fundamental principles of jazz improvisation. Topics include interval relationships, chord identification, modes and modality, blues and ii-V-I chord progressions. Pre: Permission of instructor required.
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 2816 - Jazz Improvisation (2 credits)
Fundamental principles of jazz improvisation. Topics include interval relationships, chord identification, modes and modality, blues and ii-V-I chord progressions. Pre: Permission of instructor required.
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 2974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 3024 - Counterpoint (3 credits)
Study of the development and aesthetics of contrapuntal techniques throughout the common practice period.
Prerequisite(s): MUS 3026
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3025 - European-American Music Analysis (3 credits)
Extended compositional techniques in late-nineteenth and twentieth-century music, and analysis of larger works. 3025: chromatic harmony, twentieth-century techniques of pitch organization (e.g., set theory), grouping and displacement dissonance, large-scale musical forms. Analysis complemented by model composition and performance to demonstrate mastery of theoretical concepts and stylistic competency. 3026: synthesis of analytical techniques while navigating musical ambiguity in complete works of various sizes (miniatures to multi-part). Analytical observations connected to expressive or narrative meaning in musics from various styles and genres. Refine ability to write about music through research project.
Prerequisite(s): MUS 2026
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3026 - European-American Music Analysis (3 credits)
Extended compositional techniques in late-nineteenth and twentieth-century music, and analysis of larger works. 3025: chromatic harmony, twentieth-century techniques of pitch organization (e.g., set theory), grouping and displacement dissonance, large-scale musical forms. Analysis complemented by model composition and performance to demonstrate mastery of theoretical concepts and stylistic competency. 3026: synthesis of analytical techniques while navigating musical ambiguity in complete works of various sizes (miniatures to multi-part). Analytical observations connected to expressive or narrative meaning in musics from various styles and genres. Refine ability to write about music through research project.
Prerequisite(s): MUS 3025
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3034 - Form and Analysis in the Common-practice Period (3 credits)
Domains of rhythm and meter, harmony, and cadence as related to musical form. Score-based and aural analysis of formal functions of common theme-types and large-scale forms in selected works from the mid-eighteenth through nineteenth centuries using William Caplin's theory. Identification of deviations from stylistic norms. Analysis complemented by model composition to demonstrate mastery of theoretical concepts and stylistic competency.
Prerequisite(s): MUS 3026
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3035 - Advanced Class Piano (1 credit)
Develop keyboard skills such as sightreading, harmonization, transposition, learn all scales/arpeggios and important keyboard progressions. A grade of C or better required in prerequisite.
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 3036 - Advanced Class Piano (1 credit)
Continued development of keyboard skills. Advanced transposition, harmonization, and sightreading, open score reading, and real-world application of skills acquired throughout keyboard study. A grade of C or better required in prerequisite.
Prerequisite(s): MUS 3035
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 3044 - Orchestration & Analysis (3 credits)
An introduction to the craft of scoring and arranging of music for full orchestra. Analysis of scores, small projects and a full orchestration project.
Prerequisite(s): MUS 3026
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3045 - Advanced Ear Training (1 credit)
3045: Hearing chromatic chord function in melodic and harmonic contexts. Sight-singing chromatic melodies and performing chromatic progressions. Aurally recognizing musical form (binary, ternary, strophic). Discovering markedness in common practice era music and recognizing commonalities with and differences from other music cultures A grade of C or better required in prerequisite. 3046: Hearing chord function in advanced chromatic melodic and harmonic contexts. Sight-singing advanced chromatic melodies and performing highly chromatic progressions. Aurally recognizing musical form (sonata, rondo, other forms). Hypothesizing about evolution of style and articulating intertextual experience. A grade of C or better required in prerequisite.
Prerequisite(s): MUS 2046 and MUS 2026
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 3046 - Advanced Ear Training (1 credit)
Prerequisite(s): MUS 3045
Instructional Contact Hours: (3 Lab, 1 Crd)

MUS 3054 - Introduction to Vocal/choral Arranging (3 credits)
Techniques of arranging music for vocal/choral ensembles. Emphasis on transcription from recordings to develop rhythmic, melodic, and harmonic dictation skills. Discussion, transcription, listening, small writing exercises, final project.
Prerequisite(s): MUS 3035 and MUS 3036
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3055 - Music and Media Production (3 credits)
Develops advanced knowledge of music production through practical application of music recording and production technologies, including advanced microphone techniques, critical listening, and critical artistic evaluation skills. Individual and group production projects. Hands-on experience with a variety of expressive media technologies including CD and DVD production in a collaborative, inter- disciplinary team approach.
Prerequisite(s): MUS 2056
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3056 - Music and Media Production (3 credits)
Develops advanced knowledge of music production through practical application of music recording and production technologies, including advanced microphone techniques, critical listening, and critical artistic evaluation skills. Individual and group production projects. Hands-on experience with a variety if expressive media technologies including CD and DVD production in a collaborative, interdisciplinary team approach.
Prerequisite(s): MUS 3055
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3064 - Digital Sound Manipulation (3 credits)
Cross-disciplinary study of recording technology and its effects on music. Aesthetics of electronic music. Recording and editing digital sound. Visual programming for live sound synthesis and processing. Acoustic compilers for programmatic sound processing and synthesis. Individual creative applications of tools learned in class. Team-based work on creative projects. Emphasis on intercultural and global use of creative music technologies.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3065 - Computer Music and Multimedia Design (3 credits)
A two-semester study of interactive multimedia composition and performance software as a foundation for creative work and research endeavors. Also provides an in-depth study of digital sound synthesis, algorithmic creation of multimedia content, and the design of audio-visual interactive systems using latest technologies. Must meet pre-requisite or have permission of the instructor
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3066 - Computer Music and Multimedia Design (3 credits)
A two-semester study of interactive multimedia composition and performance software as a foundation for creative work and research endeavors. Also provides an in-depth study of digital sound synthesis, algorithmic creation of multimedia content, and the design of audio-visual interactive systems using latest technologies. Must meet pre-requisite or have permission of the instructor
Prerequisite(s): MUS 3065
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3074 - Topics in Music Analysis (3 credits)
Contemporary methods of music analysis. Readings from landmark music theory texts and top music theory journals. Analysis of complementary music. Formulating unique research projects to demonstrate mastery of theoretical frameworks. May be repeated 2 times with different content for a maximum of 9 credit hours.
Prerequisite(s): MUS 3026
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

MUS 3114 - Symphonic Literature (3 credits)
Study of representative works of symphonic music from the eighteenth, nineteenth, and twentieth centuries, with corollary readings in the history of musical ideas. Consent required.
Prerequisite(s): MUS 3026 and MUS 3174
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3124 - 20th Century Music Literature (3 credits)
An introduction to music in Europe and America since 1945; supplementary study in the aesthetics of contemporary music. Consent required.
Prerequisite(s): MUS 3026 and MUS 3174
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3134 - Vocal Music Literature (3 credits)
Covers vocal music of Europe and America, especially music composed the eighteenth century. Examines differences in style and forms of choral and solo-vocal expression characteristic of the Baroque, Classic, Romantic, and Modern eras. Discusses issues of vocal performance practice. Ability to read music required.
Prerequisite(s): MUS 3026 and MUS 3174
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3144 - Early Music Literature (3 credits)
Covers vocal and instrumental music from the Middle Ages to the eighteenth century. Examines differences in style and forms of expression characteristic especially of Medieval, Renaissance, and early Baroque music. Discusses issues of performance practice. Ability to read music required.
Prerequisite(s): MUS 3026 and MUS 3174
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3154 - Piano Literature (3 credits)
Study of representative works of keyboard repertoire from the 17th century to the works of contemporary composers. Extensive stylistic analysis and discussion of performance practice. Pre: consent required.
Prerequisite(s): MUS 3026 and MUS 3174
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3164 - History of Electronic Music (3 credits)
Seminal electronic music works in historical context. Electronic music practices of the 20th and 21st centuries. The technologies of electronic music. Analysis of electronic music. Historical origins and trends in electronic music. Connections between experimental and popular electronic music forms.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3164H - History of Electronic Music (3 credits)
Seminal electronic music works in historical context. Electronic music practices of the 20th and 21st centuries. The technologies of electronic music. Analysis of electronic music. Historical origins and trends in electronic music. Connections between experimental and popular electronic music forms.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3174 - Music as Global Culture (3 credits)
Musical traditions from around the globe as both artistic production and cultural practice. Expose students to music from both non-Western and Western traditions. Connect cultural context to musical meaning. Critical engagement with different musics and their histories.
Prerequisite(s): MUS 2026
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3184 - Histories of Music I: Music in the European and American Traditions (3 credits)
Examination of the development of different musical genres in Europe and the Americas from approximately 1600 to 1918. Consideration of historical and sociocultural context. Introduction of a diverse array of styles and genres. Critical engagement with social, cultural, and historical issues and their relation to music. Development of historical research skills, facility with writing about music, and practical applications.
Prerequisite(s): MUS 3174
Pathway Concept Area(s): 2 Critical Thinking Humanities, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3194 - Histories of Music II: Music in the 20th and 21st Centuries (3 credits)
Musical traditions and developments in the twentieth and twenty-first centuries, with emphasis on music (voice, acoustic, and electronic) in the United States and increasing globalization. Introduction of students to music from both non-Western and Western traditions. Critical engagement with formalized and vernacular musics through sociopolitical concepts (race, gender, etc.). Research into music in the twenty-first century United States. Development of both historical and ethnographic research skills. Writing about music.
Prerequisite(s): MUS 3174
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3214 - Teaching Music in the Elementary School (3 credits)
Methods of teaching elementary school music. Emphasis on Kodaly, Orff, and traditional music textbook series approaches to teaching music in elementary schools. Pre: Instructor permission and successful completion of sophomore music continuation exam.
Corequisite(s): MUS 4964
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3225 - Conducting (3 credits)
An introduction to the practice and theory of ensemble conducting and leadership. 3225: Basic conducting skills, and choral conducting. 3226: Intermediate conducting skills, and instrumental conducting. Consent required.
Prerequisite(s): MUS 3026
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3226 - Conducting (3 credits)
An introduction to the practice and theory of ensemble conducting and leadership. 3225: Basic conducting skills, and choral conducting. 3226: Intermediate conducting skills, and instrumental conducting. Consent required.
Prerequisite(s): MUS 3225
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3234 - Piano Pedagogy (3 credits)
Examination of principles and practice of piano pedagogy. Covers teaching methods, materials and literature for the independent studio teacher. Pre: consent required.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3244 - Vocal Pedagogy (3 credits)
Exploration of historical and modern treatises. Implementation of technical methods to build vocal technique. Experimentation with biofeedback in pedagogical context. Practical application of pedagogical methods. Pre: Successful completion of continuation exam.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3314 - Instrumental Ensemble Music (1 credit)
Instruction and participation in instrumental music performance ensembles under direction of members of the music faculty. Attention to technical proficiency, stylistic elements, musical design and interpretation in the works to be performed. Addresses ethical obligations and practice in a music ensemble setting. May be repeated for a combined maximum of 8 hours. Consent and audition required.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 8 credit hours

MUS 3414 - Choral Ensemble Music (1 credit)
Instruction and participation in choral music performance ensembles under direction of members of the music faculty. Attention to technical proficiency, stylistic elements, musical design and interpretation in the works to be performed. Addresses ethical obligations and practice in a music ensemble setting. May be repeated for a combined maximum of 8 hours. Consent and audition required.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lab, 1 Crd)
Repeatability: up to 8 credit hours

MUS 3814 - Jazz History (3 credits)
A survey and analysis of jazz music, including traditional jazz, big band, bebop, rhythm and blues, free jazz/avant garde, fusion, and hip-hop. Exploration of historical, social, and cultural forces and trends that influence the creation and interpretation of jazz music.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 3815 - Advanced Jazz Improvisation (2 credits)
Topics will include in-depth analysis of the great improvisers in multiple genres with a focus on developing professional-level skills.
Prerequisite(s): MUS 2816
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

MUS 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 4014 - Topics in Advanced Electroacoustic Research (3 credits)
Rotating advanced research topics in electroacoustic music. Sonification, spatialization, algorithmic music, electronic music instrument design, digital performance ensembles, and advanced computer music composition. Repeatable with different content up to a maximum of 12 credit hours.
Prerequisite(s): MUS 3066 and MUS 3164
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 12 credit hours

MUS 4014H - Topics Adv Electroacoustic Res (3 credits)
Rotating advanced research topics in electroacoustic music. Sonification, spatialization, algorithmic music, electronic music instrument design, digital performance ensembles, and advanced computer music composition. Repeatable with different content up to a maximum of 12 credit hours.
Prerequisite(s): MUS 3066 and MUS 3164
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 12 credit hours

MUS 4055 - Music Technology Senior Seminar (1 credit)
Weekly seminars in music technology with group discussion of progress in current student projects, the current state of artistic and business practices in the recording industry, and guest lecturers drawn from the professional world.
Prerequisite(s): MUS 3056
Instructional Contact Hours: (1 Lec, 1 Crd)

MUS 4056 - Music Technology Senior Seminar (1 credit)
Weekly seminars in music technology with group discussion of progress in current student projects, the current state of artistic and business practices in the recording industry, and guest lecturers drawn from the professional world.
Prerequisite(s): MUS 3056
Instructional Contact Hours: (1 Lec, 1 Crd)

MUS 4124 - Special Topics in Music History and Literature (3 credits)
Specific, in depth study of one of several topics in music history and or literature.
Prerequisite(s): MUS 3174
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 4174 - Topics in Musicology (3 credits)
Examine topics in historical musicology and their interdisciplinary resonance. Examination of primary sources, top musicology journals, and monographs as appropriate. Historical and technical analysis of music. Investigation of historical and sociocultural context of music. May be repeated 2 times with different content for a maximum of 9 credit hours.
Prerequisite(s): MUS 3174
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

MUS 4204 - Secondary General and Choral Music Education Methods (3 credits)
This course examines philosophical, planning, administrative, organizational, instructional methods, assessment of student learning and cultural performances necessary to manage and teach secondary general and choral music programs.
Prerequisite(s): MUS 3214
Instructional Contact Hours: (3 Lec, 3 Crd)

MUS 4214 - Instrumental Methods: Elementary (2 credits)
Develop skills and practices to direct an elementary instrumental music program in a school setting. Learn practices, procedures, and strategies for leading rehearsals and lessons, developing curriculum, assessing student learning, and administering a school instrumental program.
Prerequisite(s): MUS 2364
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 4224 - Instrumental Methods: Secondary (2 credits)
Develop skills and practices to direct an instrumental music program in a middle or high school setting. Learn practices, procedures, and strategies for leading rehearsals and lessons, developing curriculum, assessing student learning, and administering a school instrumental music program.
Prerequisite(s): MUS 2364
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 4234 - Topics in Music Education (2 credits)
Study of specialized areas of pedagogy, instruction, administration, and classroom management in music education. Prepares students to lead specialized ensembles and courses in school music contexts. Course can only be taken one time for credit toward degree requirements.
Prerequisite(s): MUS 2364
Instructional Contact Hours: (2 Lec, 2 Crd)

MUS 4514 - Advanced Individual Applied Voice (1-3 credits)
Individual instruction in voice at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2514
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4524 - Advanced Individual Applied Keyboard (1-3 credits)
Individual instruction in keyboard at an advanced level. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2524
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4534 - Advanced Individual Applied Violin (1-3 credits)
Individual instruction in violin at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2534
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4544 - Advanced Individual Applied Viola (1-3 credits)
Individual instruction in viola at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2544
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4554 - Advanced Individual Applied Cello (1-3 credits)
Individual instruction in cello at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2554
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4564 - Advanced Individual Applied Bass (1-3 credits)
Individual instruction in bass at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2564
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4574 - Advanced Individual Applied Flute (1-3 credits)
Individual instruction in flute at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2574
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4584 - Advanced Individual Applied Oboe (1-3 credits)
Individual instruction in oboe at an advanced level. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2584
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4594 - Advanced Individual Applied Clarinet (1-3 credits)
Individual instruction in clarinet at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2594
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4614 - Advanced Individual Applied Saxophone (1-3 credits)
Individual instruction in saxophone at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2614
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)

MUS 4624 - Advanced Individual Applied Bassoon (1-3 credits)
Individual instruction in bassoon at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2624
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4634 - Advanced Individual Applied Horn (1-3 credits)
Individual instruction in horn at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2634
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4644 - Advanced Individual Applied Trumpet (1-3 credits)
Individual instruction in trumpet at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2644
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4654 - Advanced Individual Applied Trombone (1-3 credits)
Individual instruction in trombone at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2654
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4664 - Advanced Individual Applied Baritone (1-3 credits)
Individual instruction in baritone at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2664
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4674 - Advanced Individual Applied Tuba (1-3 credits)
Individual instruction in tuba at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2674
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4684 - Advanced Individual Applied Percussion (1-3 credits)
Individual instruction in percussion at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2684
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4734 - Advanced Individual Applied Composition (1-3 credits)
Individual instruction in composition at an advanced level. Majors only. May be repeated. Performance continuation exam required.
Prerequisite(s): MUS 2734
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)

MUS 4744 - Advanced Individual Applied Conducting (1-3 credits)
Individual instruction in conducting at an advanced level. May be repeated. Consent required.
Prerequisite(s): MUS 2744
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 3 credit hours

MUS 4754 - Advanced Individual Applied Recording (1-3 credits)
Individual instruction through directed experiential learning in music recording and production at an advanced level. Integration of critical listening, acoustics, audio recording, signal processing, audio mixing, and audio mastering with music theory and performance. An emphasis in hands-on exploratory research in the use of instruments, acoustics, microphones, recording, and production techniques combined with traditional methods and emerging technologies to capture and produce recordings in an artistic manner suitable for use in a senior portfolio. Permission required. May be repeated for a maximum of 12 hours.
Prerequisite(s): MUS 2754
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 12 credit hours

MUS 4764 - Advanced Individual Applied Electroacoustics (1 credit)
Individual instruction and completion of a major project in electroacoustic composition, performance, or research, at an advanced level. Repeatable up to three times for a maximum of 3 credit hours.
Prerequisite(s): MUS 3064 and MUS 3066
Instructional Contact Hours: (1 Lec, 1 Crd)
Repeatability: up to 3 credit hours

MUS 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

MUS 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Music Major with Composition Option

Program Curriculum

Code	Title	Credits
Degree Core Requirements		
MUS 2025	European-American Music Theory	3
MUS 2026	European-American Music Theory	3

MUS 2045	Sightsinging Laboratory	1
MUS 2046	Sightsinging Laboratory	1
MUS 3025	European-American Music Analysis	3
MUS 3026	European-American Music Analysis	3
MUS 3035	Advanced Class Piano	1
MUS 3036	Advanced Class Piano	1
MUS 3045	Advanced Ear Training	1
MUS 3046	Advanced Ear Training	1
MUS 3174	Music as Global Culture	3
Subtotal		21
Major Requirements		
MUS 2054	Introduction to Music Technology	2
Subtotal		2
Option Required Courses		
Advanced Music Theory		
Select two of the following:		6
MUS 3024	Counterpoint	
MUS 3044	Orchestration & Analysis	
MUS 3054	Introduction to Vocal/choral Arranging	
Advanced Music History		
MUS 3184	Histories of Music I: Music in the European and American Traditions	3
MUS 3194	Histories of Music II: Music in the 20th and 21st Centuries	3
Advanced Music History Literature		
Select one of the following:		3
MUS 3114	Symphonic Literature	
MUS 3124	20th Century Music Literature	
MUS 3134	Vocal Music Literature	
MUS 3144	Early Music Literature	
MUS 3154	Piano Literature	
MUS 3164	History of Electronic Music	
MUS 4174	Topics in Musicology	
Composition		
MUS 2065	Music Composition	2
MUS 2066	Music Composition	2
MUS 2734	Individual Applied Composition	2
MUS 2734	Individual Applied Composition	2
MUS 4734	Advanced Individual Applied Composition (repeatable course taken four times for two credits each time)	8
Performance (Lower Division) [1]		
Select six hours (taken twice for two credits and twice for one credit) of the following:		6
MUS 2514	Individual Applied Voice	
MUS 2524	Individual Applied Keyboard	
MUS 2534	Individual Applied Violin	
MUS 2544	Individual Applied Viola	
MUS 2554	Individual Applied Cello	
MUS 2564	Individual Applied Bass	
MUS 2574	Individual Applied Flute	
MUS 2584	Individual Applied Oboe	
MUS 2594	Individual Applied Clarinet	
MUS 2614	Individual Applied Saxophone	
MUS 2624	Individual Applied Bassoon	
MUS 2634	Individual Applied Horn	
MUS 2644	Individual Applied Trumpet	
MUS 2654	Individual Applied Trombone	
MUS 2664	Individual Applied Baritone	
MUS 2674	Individual Applied Tuba	
MUS 2684	Individual Applied Percussion	
Technology		
Select six hours of the following:		6
MUS 3064	Digital Sound Manipulation	
MUS 3065	Computer Music and Multimedia Design	
MUS 3066	Computer Music and Multimedia Design	
Performance (Ensemble)		
Select four credits of the following (repeatable courses to be taken four times for one credit each time):		4
MUS 3314	Instrumental Ensemble Music	
MUS 3414	Choral Ensemble Music	
Performance (Related)		
MUS 3225	Conducting	3

Satisfactory Progress Toward Degree

To comply with the "Satisfactory progress toward degree" requirement, students must complete the following by the end of the semester in which they attempt 54 hours.

Code	Title	Credits
Continuation Exam Requirement		
MUS 2025	European-American Music Theory	3
MUS 2026	European-American Music Theory	3
MUS 2045	Sightsinging Laboratory	1
MUS 2046	Sightsinging Laboratory	1
MUS 3025	European-American Music Analysis	3
MUS 3026	European-American Music Analysis	3
MUS 3174	Music as Global Culture	3

MUS 3314	Instrumental Ensemble Music (two hours)	1
or MUS 3414	Choral Ensemble Music	

Graduation Requirements

To fulfill graduation requirements in the major, all courses used to fulfill requirements in the major must be completed with a grade of C or better. None of these courses may be repeated more than once for the purposes of raising the grade to C or better.

An overall and in-major GPA of 2.0 or higher is required. All Music courses are used in calculating the major GPA except MUS 1005 Theory Fundamentals, MUS 1006 Theory Fundamentals, MUS 1104 Music Appreciation, MUS 2115 Survey of Western Music, and MUS 2116 Survey of Western Music.

Prerequisites

Some courses listed on this check sheet may have pre-/co-requisites; please consult the University Course Catalog or check with your advisor.

Foreign Language Requirement

Students who do not successfully complete at least 2 units of a single language, classical language, or American Sign Language during high school must successfully complete 6 semester hours of a single college level language or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the undergraduate catalog for details.

Graduation Requirements

To fulfill graduation requirements in the major, all courses used to fulfill requirements in the major must be completed with a grade of C or better. None of these courses may be repeated more than once for the purposes of raising the grade to C or better.

An overall and in-major GPA of 2.0 or higher is required. All Music courses are used in calculating the major GPA except MUS 1005 Theory Fundamentals, MUS 1006 Theory Fundamentals, MUS 1104 Music Appreciation, MUS 2115 Survey of Western Music, MUS 2116 Survey of Western Music.

Prerequisites

Some courses listed on this check sheet may have pre-/co-requisites; please consult the University Course Catalog or check with your advisor.

Foreign Language Requirement

Students who do not successfully complete at least 2 units of a single language, classical language, or American Sign Language during high school must successfully complete 6 semester hours of a single college level language or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the undergraduate catalog for details.

Music Major with Technology Professional Option

Code	Title	Credits
Degree Core Requirements		
MUS 2025	European-American Music Theory	3
MUS 2026	European-American Music Theory	3
MUS 2045	Sightsinging Laboratory	1
MUS 2046	Sightsinging Laboratory	1
MUS 3025	European-American Music Analysis	3
MUS 3026	European-American Music Analysis	3
MUS 3035	Advanced Class Piano	1
MUS 3036	Advanced Class Piano	1
MUS 3045	Advanced Ear Training	1
MUS 3046	Advanced Ear Training	1
MUS 3174	Music as Global Culture	3
Subtotal		21
Major Requirements		
MUS 2054	Introduction to Music Technology	2
Subtotal		2
Option Required Courses		
Advanced Music Theory		
Select six credits from the following:		6
MUS 3024	Counterpoint	
MUS 3034	Form and Analysis in the Common-practice Period	
MUS 3044	Orchestration & Analysis	
MUS 3054	Introduction to Vocal/choral Arranging	
MUS 3074	Topics in Music Analysis	
Advanced Music History		
MUS 3184	Histories of Music I: Music in the European and American Traditions	3
MUS 3194	Histories of Music II: Music in the 20th and 21st Centuries	3
Advanced Music History Literature		
Select three credits from the following:		3
MUS 3114	Symphonic Literature	
MUS 3124	20th Century Music Literature	
MUS 3134	Vocal Music Literature	
MUS 3144	Early Music Literature	
MUS 3154	Piano Literature	
MUS 4174	Topics in Musicology	
Performance (Lower Division)		
Select four credits (repeatable course, taken four times for one credit each time) of the following:		4
MUS 2514	Individual Applied Voice	
MUS 2524	Individual Applied Keyboard	
MUS 2534	Individual Applied Violin	
MUS 2544	Individual Applied Viola	
MUS 2554	Individual Applied Cello	
MUS 2564	Individual Applied Bass	
MUS 2574	Individual Applied Flute	
MUS 2584	Individual Applied Oboe	
MUS 2594	Individual Applied Clarinet	
MUS 2614	Individual Applied Saxophone	
MUS 2624	Individual Applied Bassoon	
MUS 2634	Individual Applied Horn	
MUS 2644	Individual Applied Trumpet	
MUS 2654	Individual Applied Trombone	
MUS 2664	Individual Applied Baritone	
MUS 2674	Individual Applied Tuba	
MUS 2684	Individual Applied Percussion	
Performance (Upper Division)		
Select three credits (repeatable course, taken three times for one credit each time) of the following:		3
MUS 4514	Advanced Individual Applied Voice	
MUS 4524	Advanced Individual Applied Keyboard	
MUS 4534	Advanced Individual Applied Violin	
MUS 4544	Advanced Individual Applied Viola	
MUS 4554	Advanced Individual Applied Cello	
MUS 4564	Advanced Individual Applied Bass	
MUS 4574	Advanced Individual Applied Flute	
MUS 4584	Advanced Individual Applied Oboe	
MUS 4594	Advanced Individual Applied Clarinet	
MUS 4614	Advanced Individual Applied Saxophone	
MUS 4624	Advanced Individual Applied Bassoon	
MUS 4634	Advanced Individual Applied Horn	
MUS 4644	Advanced Individual Applied Trumpet	
MUS 4654	Advanced Individual Applied Trombone	
MUS 4664	Advanced Individual Applied Baritone	
MUS 4674	Advanced Individual Applied Tuba	
MUS 4684	Advanced Individual Applied Percussion	
Performance (Ensemble)		

Select six credits (repeatable course, taken six times for one credit each time) of the following:		6
MUS 3314	Instrumental Ensemble Music	
or MUS 3414	Choral Ensemble Music	
Technology		
MUS 2055	Audio Technology For Music	3
MUS 2056	Audio Technology For Music	3
MUS 3055	Music and Media Production	3
MUS 3056	Music and Media Production	3
Technology (Extended)		
MUS 4055	Music Technology Senior Seminar	1
MUS 4056	Music Technology Senior Seminar	1
MUS 2754	Individual Applied Recording	3
MUS 4754	Advanced Individual Applied Recording	2
Select one of the following:		*3*
MUS 2604	Introduction to Arts Marketing	
MUS 3064	Digital Sound Manipulation	
MUS 4014	Topics in Advanced Electroacoustic Research	
MUS 4964	Field Study (P/F only)	
TA 2164	Scene Design Lab	
Subtotal		50
Free Electives		
Select remaining credit hours to fulfill remaining credits required for graduation:		14
Subtotal		14
Other Requirements		
Department will process transaction when requirements have been met:		
Keyboard Proficiency		
Continuation Exam		
Convocation and Concert Attendance		
Senior Project		
Pathways to General Education		
Pathways Concept 1 - Discourse		
Select six credits in Pathway 1f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G01F)		6
Select three credits in Pathway 1a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G01A)		3
Pathways Concept 2 - Critical Thinking in the Humanities		
Pathway 2 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G02) fulfilled by completing MUS 3184 and MUS 3194		
Pathways Concept 3 - Reasoning in the Social Sciences		
Select six credits in Pathway 3 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G03)		6
Pathways Concept 4 - Reasoning in the Natural Sciences		
Select six credits in Pathway 4 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G04)		6
Pathways Concept 5 - Quantitative and Computational Thinking		
Select three credits in Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F)		3
Select three credits in Pathway 5a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05A)		3
Select three credits in Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F) or Pathway 5a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05A)		3
Pathways Concept 6 - Critique and Practice in Design and the Arts		
Select three credits in Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D)		3
Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A) fulfilled by completing MUS 3314		
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07) fulfilled by completing MUS 3194 [1]		
Subtotal		33
Total Credits		**120**

[1] May be double counted with another concept

Satisfactory Progress Toward Degree

In addition to University requirements, students must complete the following by the end of the semester in which they attempt 54 credit hours.

Code	Title	Credits
Continuation Exam requirement		
MUS 2025	European-American Music Theory	3
MUS 2026	European-American Music Theory	3
MUS 2045	Sightsinging Laboratory	1
MUS 2046	Sightsinging Laboratory	1
MUS 3025	European-American Music Analysis	3
MUS 3026	European-American Music Analysis	3
MUS 3174	Music as Global Culture	3
MUS 3314	Instrumental Ensemble Music (two hours)	1
or MUS 3414	Choral Ensemble Music	

Graduation Requirements

GPA Requirements

To fulfill graduation requirements in the major, all courses used to fulfill requirements in the major must be completed with a grade of C or better. None of these courses may be repeated more than once for the purposes of raising the grade to C or better.

An overall and in-major GPA of 2.00 or higher is required. All Music courses are used in calculating the major GPA except MUS 1005 Theory Fundamentals, MUS 1006 Theory Fundamentals, MUS 1104 Music Appreciation, MUS 2115 Survey of Western Music, and MUS 2116 Survey of Western Music.

Prerequisites

Some courses listed on this check sheet may have pre-/co-requisites; please consult the University Course Catalog or check with your advisor.

Foreign Language Requirement

Students who do not successfully complete at least 2 units of a single language, classical language, or American Sign Language during high school must successfully complete 6 semester hours of a single college level language or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the undergraduate catalog for details.

School of Visual Arts

Our Website (http://www.sova.vt.edu)

Overview

The School of Visual Arts (SOVA) offers studio-based programs in the visual arts balanced with the study of the history, theory, and criticism of visual and material culture. The faculty includes both practicing artists and scholars of art history. The School emphasizes new digital media as well as traditional artistic media. SOVA offers B.F.A. degrees in Graphic Design, Creative Technologies, and Studio Art; a B.A. in Art History, a minor in Art History and a minor in Visual Arts.

SOVA provides a variety of exhibitions and art events. The Armory Art Gallery exhibits work by national and regional artists and provides students and regional artists the opportunity to create and show wide-ranging experimental work. The Collaboration for Creative Technologies in Arts and Design (CCTAD) is a cross-disciplinary initiative with Art, Music, Computer Science and Communications. The Digital Arts and Animation Studio (DAAS) is designed to facilitate this new concentration.

FourDesign, a University Service Center, provides students with vital professional design experience. Student interns work in a team environment under the direction of FourDesign faculty to produce design work for clients, providing professional and entrepreneurial experience rarely available to undergraduates. Through visiting artists and scholars, the School also brings students and members of the art community into dialogue with artists and critics of international prominence.

SOVA participates in the University's Education Abroad program, which is open to students at the sophomore level or above and combines classroom study with travel-study tours in Europe, Cuba, and Latin America.

Foundations of Art and Design is a year-long, entry-level intensive program that prepares students for advanced study in the visual fields of integrative Studio Art, Creative Technologies and Graphic Design. The two-semester, 1000-level curriculum is made up of 15 credit hours covering principles of art and design, drawing, and digital imaging proficiency. Completion of the entire Foundation program is required of B.F.A. students prior to taking SOVA courses that are 2000 level or higher.

The investigation and unification of dexterity, contextual dialogue, and presentation skills are at the heart of the Foundations of Art and Design program at SOVA. Rather than isolating craft at the foundational level of study, whole elements of visual language are fostered equally. This unified approach to art and design studies aim to develop:

- Innovation and creative leadership skills
- Visual logic through multimedia
- Confidence with digital and analog crossover
- Traditional awareness applicable to contemporary tools of production

Studio Art, Creative Technologies, and Graphic Design candidates must be currently enrolled or have passed three foundation courses (ART 1204 Principles of 2D Art and Design, ART 1404 Principles of Drawing and ART 1604 Principles of 4D Art & Design). Acceptance is contingent on successfully passing all three of these courses. The Studio Art, Creative Technologies, and Graphic Design review committees (comprised of SOVA Faculty) screen student work for outstanding qualities in artistic ability, creativity, presentation skills and overall motivation.

Bachelor of Fine Arts in Studio Art

The SOVA Studio Art program offers classes in painting, drawing, sculpture, and photography. We aim to prepare artists for the digitally enhanced world by integrating emerging technologies into a contemporary fine arts experience. Our students have access to cutting edge technologies like laser cutters, CNC routers and 3D printers, and are taught in an environment that encourages them to explore these tools in conjunction with traditional mediums. Students and faculty conduct research and create work that spans disciplinary boundaries. Our flexible undergraduate curriculum provides opportunities for students to achieve interdisciplinary breadth through electives in Graphic Design, Creative Technologies, and other areas of personal interest.

Situated within a nationally recognized research institution, SOVA attracts students and faculty who value the study of art in a broad cultural and intellectual context. The B.F.A. degree in Studio Art equips emerging artists with critical thinking skills, visual and cultural literacy, and tools to communicate their ideas. We also promote the professional skills and habits necessary to build and sustain a self-directed studio practice. Our program is uniquely positioned to provide students with the skills and opportunities to explore the impact of art and technology on our lived experience.

Graduates of the Studio Art program apply their creative skills in a variety of careers. Some become professional artists, exhibiting at national galleries and museums, or pursue commercial careers in photography, painting, illustration, and sculpture. Others seek their Master of Fine Arts (M.F.A.) in specific studio disciplines or post-graduate degrees in related arts fields such as Material Culture, Art Therapy, Art Education, Exhibition Design, and Art Conservation. Our alumni have gone on to become professional artists, university professors, K-12 teachers, and pursue careers in galleries and museums.

The Bachelor of Fine Arts degree in Studio Art is a 78 credit-hour program. Each faculty member is dedicated to teaching, research, and outreach within his or her specific fields. The connection from professional practice to studio classroom is essential in creating applicable learning environments.

The goal of the program is to develop culture-enriching leaders and innovative visual artists. Completing an integrated path of study in the Studio Art program will result in a B.F.A. degree that is applicable to the demands of the visual arts industry.

Bachelor of Fine Arts in Creative Technologies

The Creative Technologies program focuses on computer-based digital arts, including animation, creative coding, interactive installations, etc. Classes are taught by active artists and scholars with experience integrating emerging creative technologies into new media art contexts as well as applications in industry.

The Creative Technologies concentration consists of 75 credit hours, with 21 required credits and additional elective offerings that can be clustered so that students obtain specialization in immersive virtual environments, code and form or the moving image.

In the Creative Technologies program, students learn cutting-edge software in a creative environment, preparing them for employment in industry or further studies in graduate school.

Bachelor of Fine Arts in Graphic Design

The Graphic Design program is notable for its practical and applied approach to design thinking. Students concentrating in Graphic Design develop conceptual abilities, problem solving skills, and the technical know-how required by a fast-paced, competitive field. Graphic Design demands individual creativity, teamwork skills, and adaptability to changing markets and technologies. The Graphic Design program at Virginia Tech prepares students for the job market with practical experience, professional portfolio preparation, and an understanding of user-experience design. Graduates of the program may find themselves working in design agencies, UI/UX, product and packaging design, and advertising design. Coursework in animation, web design, and interaction allows students to explore emerging technologies.

Entry into this program is restricted and requires successful completion of specific criteria. Students accepted into Graphic Design begin the course sequence in the spring semester of their first year. From that point on, the course sequences are uniquely tailored to Graphic Design students, which emphasize typography, design, and applied technologies.

Bachelor of Arts in Art History and Visual Culture

This program is oriented toward the history of western art, although courses are frequently offered on non-western topics. The foundation for the study of art history in SOVA is a two-semester survey of the history of art. At the intermediate level, there are fourteen courses offered on a regular basis, ranging from ancient Egyptian art and architecture to Art Since 1900, and including archaeology, arts of China and Japan, and the history of graphic design. Upper-level courses are designated as special topics courses. In recent years, they have ranged from the Seven Wonders of the World to Japanese prints to the History of Photography to the Preservation of Historic Interiors.

The major in Art History and Visual Culture is a 42-credit degree. In addition to the two semester Survey of the History of Art (ART 2385 Survey of the History of Western Art-ART 2386 Survey of the History of Western Art), students are required to take five courses at the 3000-level. The five courses are chosen from a list of four historical categories, ensuring students study art and architectural history over a broad historical range. In addition, majors are required to take ART 4484 Topics in Art Criticism and Methodology and three upper-level topics classes (ART 4384 Topics in Art History).

To provide a broader context for the history of art, majors are also required to take a history course and a humanities course (focusing on broad cultural and historical periods). To ensure some 'hands on' experience, they are also required to take either ART 1204 Principles of 2D Art and Design or ART 1404 Principles of Drawing. The program encourages students to take advantage of opportunities to study abroad and to serve as interns in cultural organizations, especially museums and historical sites.

Minor in Art History

The minor in art history is an 18-credit degree. It consists of the two-semester Survey of the History of Art (ART 2385 Survey of the History of Western Art-ART 2386 Survey of the History of Western Art) and two courses at the 3000-level and two at the 4000-level.

Visual Arts Minor

Hosted by the School of Visual Arts with collaboration from numerous departments across Virginia Tech, the interdisciplinary Visual Arts Minor leads students to explore art as a lens through which to view society. It encourages the cultivation of visual intelligence—through both study and practice-based approaches in studio art—relevant to our increasingly visual, media-saturated world and demanded in a variety of STEM and humanities fields. Students learn flexible visual skills and how to apply them to multiple disciplines inside and outside their major, such as business, medicine, law, and the natural sciences. The result is a comprehensive understanding of art and the built environment in a global context, as they intersect with the complexities of historical and contemporary society.

Requirements for the Minor include four core courses—ART 1104 Language of Visual Arts, ART 1004 Topics in Studio Art for Non-Majors, ART 2385 Survey of the History of Western Art/ART 2386 Survey of the History of Western Art, ART 4104 Interpretation of Visual Arts—and two elective courses in the social sciences, totaling 18 credit hours.

- Art Major with Art History Option (p. 639)
- Creative Technologies Major (p. 641)
- Graphic Design Major (p. 643)
- Studio Art Major (p. 645)

Interim Director - School of Visual Arts: A-M. Knoblauch
Chair – Foundation Program: J. Hand
Chair – Studio Art: M. Borowski
Chair – Creative Technologies: R. Weaver
Chair – Graphic Design: M. Dee
Chair – Art History: M. Moseley
Manager – Visual Arts and Society Minor: J. Jewitt
Curator – Armory Gallery: D. Sim
Professor: E. Standley
Associate Professors: S. Blanchard, M. Dee, T. Head, A-M. Knoblauch, M. Moseley, T. Tucker
Assistant Professors: M. Borowski, Z. Duer, M. Drum, P. Finley, N. King, A. Lechner, K. Meaney, A. Ronan, W. Santos Lages, R. Weaver
Collegiate Associate Professor: J. Jewitt
Collegiate Assistant Professor: L. Duffield, H. Okumura, A. Salisbury
Associate Professor of Practice: J. Joiner
Instructors: B. Bannan, J. Hand, J. Rosenthal, D. Sim
Adjunct Instructors: D. Choi, D. Dennis, M. Miller
Professor Emeritus/Emerita: S. Bickley, C Burch-Brown, T. Capone, D. Crane, K. Concannon, B. Fields, R. Kass, B. Van Hook
Associate Professor Emerita: M. Casto, S. Paterson

Undergraduate Course Descriptions (ART)

ART 1004 - Topics in Studio Art for Non-Majors (3 credits)
Variable introductory topics on practice-based studio art, ranging from 2D, 3D and Digital Imaging concentrations. Multiple projects with emphasis on media specific creations using introductory studio practices, practice-based technical and conceptual knowledge to achieve expressive communication. Analyze and critique creative works within historical and cultural context. May be repeated with different topics, for a maximum of 12 credit hours. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). COURSE FEE: $60.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 1104 - Language of Visual Arts (3 credits)
Introduces key formal structures across the broad variety of disciplines in the visual arts and built environment, including: architecture, painting, sculpture, photography, and film. Considers global objects and sites from an intercultural perspective, examining how various formal elements impact our experience and function to construct meaning for audiences. Writing informed arts criticism grounded in local and regional cultural resources. RESOURCE CHARGE.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 1204 - Principles of 2D Art and Design (3 credits)
Elements and methods fundamental to two-dimensional art and design. Investigates formal elements and principles of two-dimensional design including shape, color, balance, rhythm, hierarchy, and unity. Exploration of analog and digital strategies in image making through iterative, hands-on processes. Interpretation of historical and contemporary two-dimensional art and design from around the globe to discover communication strategies in an intercultural context. Application of formal analysis and interpretive strategies through critique. Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE. (1H,5L,3C)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 1214 - Principles of 3D Art and Design (3 credits)
Elements and methods fundamental to three-dimensional art and design. Investigates formal elements and principles of three-dimensional design including line, plane, form, mass, space, scale and surface. Exploration of analog and digital strategies in three-dimensional object making through iterative, hands-on processes. Interpretation of historical and contemporary three-dimensional art and design from around the globe to discover communication strategies in an intercultural context. Application of formal analysis and interpretive strategies through critique. Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE. (1H,5L,3C)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 1234 - Topics in Visual Communication Design for Non-Majors (3 credits)
Variable introductory topics on visual communication design, ranging from contemporary issues in design to development of formal design skills. Multiple projects with emphasis on problem-solving with an awareness of target audiences from various backgrounds, historical and cultural contexts, and STEEP (Social, Technological, Economical, Environmental, and Political) principles. Explores knowledge of design principles and vocabulary using a range of materials and methodologies. Examines needs of diverse users, applied via digital translations and appropriate software. May be repeated for up to a maximum of 12 credit hours with varying or different topics. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Pathway Concept Area(s): 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 1304 - Gateway to Art and Design (1 credit)
First Year Experience course for students seeking entry into BFA degree program. Developing a successful path of study in the School of Visual Arts BFA degree using advising resources; introduction to professional and ethical visual arts practices through presentations with local and regional artists; visits to local and regional galleries; presentations by university faculty and staff related to the BFA. Introduction to visual thinking using the Virginia Tech Common Book and preparation for portfolio review. Art History majors are not required to take the course.
Corequisite(s): ART 1204, ART 1404, ART 1604
Instructional Contact Hours: (1 Lec, 1 Crd)

ART 1334 - Themes in Visual Arts and Cultures (3 credits)
Introduction to thematic topics spanning historical and contemporary world cultures through the lens of the visual arts and material culture. Ten themes to be addressed each semester, each approached through a range of different periods, cultures, media, and artistic traditions, and complemented by culture-specific textual sources. Sample themes might include art and political propaganda, art and technology, art and sustainability, art and death, etc. Does not count towards the art history major.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 1404 - Principles of Drawing (3 credits)
Elements, methods and skills fundamental to drawing. Investigates formal elements fundamental to drawing such as line, space, form, value and texture, through drawing tools and methods. Emphasis on controlled use of common drawing media for representational and expressive purposes. Examination of multiple intercultural viewpoints through exercises and discussion investigating topics that vary by semester. Application of formal analysis and interpretive strategies through critique. Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE. (1H,5L,3C)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 1414 - Drawing II: Life Drawing (3 credits)
Drawing the human figure from life. Emphasis on observation, construction, and anatomy. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE.
Prerequisite(s): ART 1404 and ART 1204 and ART 1604
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 1504 - Contemporary Art and Practice (3 credits)
Methods and practices fundamental to the making of contemporary visual art. Non-discipline-specific investigation of self-expression, meaning, and content through iterative, practice-based exercises. Development of personal artistic practice through the lens of contemporary art and its historical precedents. Exploration of various processes such as representation, abstraction, assemblage, performance, installation, mark making, digital, and time-based, or interactive experiences as means to self-expression and interpretation of meaning. Examination of multiple worldviews and global challenges addressed in contemporary art. Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). (1H, 5L, 3C)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 1604 - Principles of 4D Art & Design (3 credits)
Elements and methods fundamental to digital art and design as well as time-based media. Investigation of formal elements specific to four-dimensional design including time, motion, and sound and skills sets in vector and raster graphics and video editing. Exploration of iterative process in digital image making. Interpretation of historical and contemporary digital art and time-based media from around the globe to discover communication strategies in an intercultural context. Examination of multiple worldviews and global challenges addressed in and relevant to digital art and time-based media such as surveillance and questions of privacy. Application of formal analysis and interpretive strategies through critique. Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE. (1H, 5L, 3C)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 1614 - Principles of Visual Communication Design (3 credits)
Introduction to design theory, practice, and visual communication skills. Projects, applied problem solving, reading assignments, and open critiques incorporate graphic competencies and vocabulary specific to the field of visual communication design. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 1984M - Special Study (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: Variable credit course

ART 2385 - Survey of the History of Western Art (3 credits)
Survey of the visual arts and architecture from prehistoric times to the present day with emphasis on Western Europe including functions of visual arts and architecture, terms of visual literacy and methods of formal visual analysis. 2385: Focus on prehistoric time to the thirteenth century including Paleolithic, Neolithic, Ancient Near Eastern, Egyptian, Aegean, Greek, Roman, Byzantine, medieval and early Gothic art. 2386: Focus on late Gothic through present day including Renaissance, Baroque, 19th (Romanticism to Post-Impressionism) and 20th centuries (cubism to postmodernism).
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 2386 - Survey of the History of Western Art (3 credits)
Survey of the visual arts and architecture from prehistoric times to the present day with emphasis on Western Europe including functions of visual arts and architecture, terms of visual literacy and methods of formal visual analysis. 2385: Focus on prehistoric time to the thirteenth century including Paleolithic, Neolithic, Ancient Near Eastern, Egyptian, Aegean, Greek, Roman, Byzantine, medieval and early Gothic art. 2386: Focus on late Gothic through present day including Renaissance, Baroque, 19th (Romanticism to Post-Impressionism) and 20th centuries (cubism to postmodernism).
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 2434 - Introduction to Creative Code (3 credits)
Introduction to computer programming tools within a critical aesthetic context. Tools may include software such as Processing and Unity. Application of foundational programming techniques to artwork creation. Consideration of computational and quantitative technologies and processes ethically, culturally, and artistically. Algorithmic thinking, and examination of existing computer-generated artworks to infer algorithmic basis. Consideration of the ethics of algorithmic systems in our culture and media. Course contact to credit hour structure: Design Lab/Studio.
Prerequisite(s): ART 1604
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (5 Lab, 3 Crd)

ART 2514 - Drawing Concepts (3 credits)
Exploration of drawing practices that reflect expansions in the discipline through examination of the work of contemporary artists and discussion of recent historical precedents. Examination of multiple viewpoints through readings and discussion investigating notions of identity, culture, and social reality. Development of personalized visual language and content through iterative drawing processes. Application of formal analysis and interpretive strategies through critique. Includes traditional and experimental techniques; representational, abstract, and nonobjective approaches to drawing. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab Studio (2L,1C). RESOURCE CHARGE.
Prerequisite(s): ART 1404
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2524 - Introduction To Painting (3 credits)
Exploration of painting practices within a studio-focused environment as they relate to art and design in contemporary culture as well as historical methods. Development of foundational painting skills and an understanding of various painting media. Deliberate practice of visual language and formal ideas using painting media with a focus on material, line, shape, color, and two-dimensional composition. Interpretation of visual culture through the application of critical analysis methods. Encompasses observation-based techniques, experimental processes, and abstract approaches. Lecture (1H,1C), Lab (3L, 1C), Design Lab/Studio (2L, 1C). (1H, 5L, 3C). RESOURCE CHARGE: $75
Prerequisite(s): ART 1204 or ART 1404 or ART 1414
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2554 - Introduction To Sculpture (3 credits)
Introduction to the tools, techniques, and concepts of sculpture. Development of visual style, three-dimensional composition and communication through iterative assignments. Application of formal analysis and interpretive strategies through critique. Exploration of genres and practices of sculpture by analyzing contemporary examples and historical precedents. Examination of diverse viewpoints through readings and discussions on the role of sculpture in identity, culture, and politics. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L, 1C), Design Lab/Studio (2L, 1C). (1H, 5L, 3C). RESOURCE CHARGE.
Prerequisite(s): ART 1214
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2565 - Typography (3 credits)
Foundational study of Typography as it relates to Visual Communication Design including historical and contemporary context. Study of the formal principles of typographic design of both printed and digital matter. Overall focus on letterforms, design structures, and grid systems. Pre: Admittance to Visual Communication Design Program. 2566: Intermediate study of Typography as it relates to Visual Communication Design including advanced file management used with a variety of projects involving Typographic Composition. Pre: 2565. 2565: I, II. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2566 - Typography (3 credits)
Intermediate study of Typography as it relates to Visual Communication Design including advanced file management used with a variety of projects involving Typographic Composition. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 1614 and ART 2565
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2566H - Typography (3 credits)
Intermediate study of Typography as it relates to Visual Communication Design including advanced file management used with a variety of projects involving Typographic Composition.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2575 - Introduction to Graphic Design (3 credits)
Introduction to the theory and practice of graphic design as a means of visual communication, exploring problem-solving as applied to design concepts and execution. Studio assignments relating to society, industry, community, and commerce, with emphasis on digital/electronic applications. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE.
Prerequisite(s): ART 1614 and ART 2565
Corequisite(s): ART 1414
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2576 - Introduction to Graphic Design (3 credits)
Introduction to the theory and practice of graphic design as a means of visual communication, exploring problem-solving as applied to design concepts and execution. Studio assignments relating to society, industry, community, and commerce, with emphasis on digital/electronic applications. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE.
Prerequisite(s): ART 1614 and ART 2565 and ART 2566 and ART 2575
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2604 - Introduction to Creative Technologies (3 credits)
Introduction to the formal elements, skills, tools and methods of productions used in Creative Technologies to make art/media works. These art works/media works include: sound, video narratives/short films, 2D animation, code/procedural artworks that exhibit meaning and relevance to contemporary society. Integrate, articulate and defend positions on ethical issues to make work that is relevant to the world we live in. Design Lab/Studio.
Prerequisite(s): ART 1604
Pathway Concept Area(s): 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (5 Lab, 3 Crd)

ART 2664 - Introduction to Photography (3 credits)
Introduction to the tools, techniques, and concepts of digital photography. Development of visual style, two-dimensional composition, and visual communication through iterative assignments. Application of formal analysis and intercultural interpretation of photographs through class critique as well as historical and contemporary examples. Examination of diverse viewpoints through readings and discussions on the role of photography in identity, culture, and politics. Course contact hour structure: Lecture (1H,1C), Lab (3L, 1C), Design Lab/Studio (2L, 1C). (1H, 5L, 3C). RESOURCE CHARGE.
Prerequisite(s): ART 1204 or ART 1604
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 2704 - 3D Computer Animation (3 credits)
ntroduction to the basic principles of 3d-computer animation including modeling, texture mapping, lighting, and motion. Course contact to credit hour structure: Design Lab/Studio (5L, 3C) RESOURCE CHARGE.
Prerequisite(s): ART 1604
Instructional Contact Hours: (5 Lab, 3 Crd)

ART 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 3004 - Topics in Art History (3 credits)
Rotating topics from all periods of art history with a particular emphasis on non-Western art, such as Japanese, Chinese, pre-Columbian, sub-Saharan, Native American, or Islamic art and architecture. Lecture and/or undergraduate seminar format. May be repeated for credit with different content for a maximum of 9 credits.
Prerequisite(s): ART 2385 or ART 2386
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

ART 3024 - History of Global Print Culture (3 credits)
Global print culture with an emphasis on visual arts and design forms across geographies in cultural contexts. Compares diverse print cultures from their inceptions through today, across historical traditions of East Asia, Mexico, United States, the Islamic world, and Europe. History, social meaning, issues of equity, race, and identity. Print culture's inception through today connects contemporary digital world to its conceptual and material origins.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3034 - Survey of Latin American Art and Architecture (3 credits)
A broad chronological survey of the visual arts and architecture of Latin America with a focus on South, Central, and North America from the rise of ancient indigenous cultures through today. Pre-Columbian iconography, styles, and cultural contexts of Olmec, Inca, Maya, and Aztec societies. European contact and colonial influence in South and Central Americas of the New World. Modern and contemporary art in these regions, with an emphasis on Latinx diaspora visual culture in the United States.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3044 - Art and Architecture of India (3 credits)
Survey of the arts, architecture, and contributions to design history from the subcontinent of India. Iconography and visual elements of Jain, Hindu, Buddhist, Islamic, and Sikh traditions in terms of key works of art, architecture, and design. Interpreted within contexts of religion, historical events, social status, patronage, race, and colonialism. Considers the influence of India's art, architecture, and design histories from antiquity through diasporas today, including US South Asian communities.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3054 - Islamic Art and Architecture (3 credits)
Survey of the visual arts and material culture produced in Islamic cultures from its origins in the 7th century CE (Common Era) through the contemporary period. Focus on analyzing transnational exchanges and influences that shape the visual and material culture of Islamic regions including architecture, the graphic arts, painting, ceramics, and textiles within cultural, geographic, political, and religious contexts. Includes artifacts and architecture from Iraq, Iran, the Arabian Peninsula, Egypt, Turkey, India, Spain and notable sites from North Africa and Central Asia.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3064 - Arts of China and Japan (3 credits)
An introduction to Chinese and Japanese art from the Neolithic to the present. The influence of philosophy, religion and social organizations on the development of the visual arts in China and Japan. Considers a range of media including painting, sculpture, calligraphy, ceramics, prints, and architecture in contexts of Imperial and post-Imperial patronage.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3074 - Egyptian Art and Architecture (3 credits)
Introduction to Egyptian art and architecture from the Predynastic through the Late Period with emphasis on the major monuments of Egyptian sculpture, painting and architecture. Emphasis on Egyptian art in the context of the unique landscape of the Nile River and surrounding desert, the art of contemporary cultures in the eastern Mediterranean world, and the history of archaeological exploration within the region.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3084 - Greek Art and Architecture (3 credits)
Painting, sculpture, and architecture of the Greeks, ca. 1000-31 B.C. Emphasis on correlation of archaeological remains with literary sources, and on the development of the arts in relation to cultural environments of the archaic, classical, and Hellenistic periods.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3114 - Creative Coding for Creativity and Innovation (3 credits)
Introduction to computer programming tools within a critical aesthetic context. Creation and analysis of generative and algorithmic artwork as well as consideration of how works derived from logical rulesets, algorithms, and the artful application of randomness can communicate human feelings and ideas. Consideration of ethics of algorithmic systems in our culture and media, and creating art works to address those issues and influence opinion. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L, 1C), Design Lab/Studio (2L, 1C).
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 3174 - Introduction to Archaeology (3 credits)
Introduction to archaeology focusing on a history of the discipline of archaeology with an emphasis on Mesopotamia and the Mediterranean world. Evolution of field inquiry and techniques in the context of major historical personages and excavations in Egypt, Greece, Italy and Syro-Palestine, as well as contemporary global and ethical issues surrounding the preservation and protection of archaeological artifacts, particularly with regards to the role they serve and their use and misuse as non-renewable global objects of cultural heritage and cultural identity.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3184 - Roman Art and Architecture (3 credits)
Survey of Roman art including painting, sculpture and architecture from ca. 750 BCE to 350 CE. Emphasis on diverse artistic themes connecting visual and material culture with contemporary political and cultural circumstances and the impact of Roman imperial expansion on regional cultures. Historical impact of Roman artistic achievements and activities.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3284 - Medieval Art and Architecture (3 credits)
Artistic traditions of the medieval world from the fourth to fifteenth centuries with a focus on diverse cultural exchanges between Byzantine east and Latin west, along with Islamic contact. Stylistic, thematic, and formal developments in sculpture, painting, textiles, metalwork, architecture, book arts within social, political, and religious contexts.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3384 - Renaissance Art and Architecture (3 credits)
A chronological survey of Renaissance art analyzing painting, sculpture, the graphic arts, and architecture. Develops visual literacy through an evaluation of major stylistic and thematic trends within the study of historical context, artistic techniques and processes, iconography, patronage, economy, religion, political structures, and emerging sciences.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3484 - Baroque and Rococo Art and Architecture (3 credits)
Art and architecture of the seventeenth-century Baroque and eighteenth-century Rococo with with an emphasis on form, style, and cultural contexts for painting, sculpture, and architecture. A study of major artists, themes, styles, and technical artistic processes in Italy, Spain, Flanders, Holland, England, France in contexts of global expansion. Seventeenth-century visual culture in its historical, religious, economic, social, and ethical contexts.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 10 Ethical Reasoning, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3504 - Topics in Digital Art and Design (3 credits)
Rotating topics that explore the computer as an artistic medium and design tool. Intermediate level. The student will encounter as interdisciplinary approach to the use of the computer, as aesthetic ideas are presented and various digital techniques are applied. Stresses use and manipulation of original images created by the student, employing a combination of digital and traditional methods. May be repeated with different content for a maximum of 12 credits. Course contact to credit hour structure: Design Lab/Studio (5L, 3C) Resource Charge.
Prerequisite(s): ART 2604
Instructional Contact Hours: (5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 3514 - Topics In Drawing (3 credits)
Rotating topics in drawing media, approaches, and theories. All topics will be devoted to promoting individual student creativity, mastery of drawing means and techniques, and further understanding of graphic concerns. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). May be repeated for a maximum of 9 hours with different topics. RESOURCE CHARGE.
Prerequisite(s): ART 2514
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 9 credit hours

ART 3524 - Topics In Painting Media (3 credits)
Rotating topics in painting techniques, disciplines, and theory emphasizing individual creative development and skilled approaches to technical problem-solving in visual art and design. Intermediate level. May be repeated for a maximum of 12 credits. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 2524
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 3554 - Topics In Sculpture (3 credits)
Rotating topics that will focus on specific technical processes and applications of three dimensional problem solving in the visual arts. The course will stress techniques and issues found in contemporary 3D art and design. Emphasizes intensive studio practice through a series of individual projects related to the topics. FEES REQUIRED. May be repeated for a maximum of 12 credits. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 2554
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 3564 - Topics in Photography (3 credits)
Rotating topics in photographic materials, methods and philosophies. All topics promote individual students creativity, master of photographic techniques and further understanding of the medium. May be repeated with different topics for a maximum of 12 credits. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE.
Prerequisite(s): ART 2664
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 3565 - Intermediate Graphic Design I and II (3 credits)
Intermediate design layout, technical and concept development, and communication skills. First semester emphasizes advanced and new software relevant to the design, advertising, and printing industry. Second semester focuses on typography, professional pre-press, electronic printing and color separation processes. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE.
Prerequisite(s): ART 1614 and ART 2565 and ART 2566 and ART 2575 and ART 2576
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 3566 - Intermediate Graphic Design II (3 credits)
Intermediate design layout, technical and concept development, and communication skills. First semester emphasizes advanced and new software relevant to the design, advertising, and printing industry. Second semester focuses on typography, professional pre-press, electronic printing and color separation processes. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). FEE REQUIRED.
Prerequisite(s): ART 1614 and ART 2565 and ART 2566 and ART 2575 and ART 2576 and ART 3565
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 3574 - Topics In Graphic Design (3 credits)
Rotating topics in graphic design, for the intermediate level student. This course will encourage visual problem-solving, conceptual development, clarity and individuality of expression. May be repeated for a maximum of 12 credits. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 2576
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 3584 - Nineteenth Century European Art: Neoclassicism to Post-Impressionism (3 credits)
European art and material culture of the nineteenth-century. A chronological study of the major artists, artistic movements and styles from neoclassicism to post-impressionism. Analysis of works using key critical and philosophical texts. Emphasis on the role of gender, race, ethnicity and colonialism in the production of art and material culture.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3604 - Topics in New Media Art (3 credits)
Rotating topics explore the computer as an artistic medium and design tool. An interdisciplinary approach to the use of a computer. Aesthetic ideas and application of digital techniques. Use and manipulation of original images created by the student, employing a combination of digital and traditional methods. May be repeated for a maximum of 12 credits. Course contact to credit hour structure: Design Lab/Studio (5L, 3C). RESOURCE CHARGE.
Prerequisite(s): ART 2604
Instructional Contact Hours: (5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 3674 - History of Photography (3 credits)
A chronological history of photography, from its invention in the nineteenth-century to the emergence of digital technology. Emphasis on historical, sociological, cultural, and global contexts. Addresses terminology and visual analysis, inventions, individual photographers, famous photographs, and issues of inclusion and critical discourse.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3684 - African-American Art (3 credits)
African-American art and material culture, from its beginnings in the tribal traditions of Africa to its contemporary manifestations. A chronological study of the major artists, movements and styles. Analysis of works using key critical and philosophical texts. Emphasis on the role of gender, race, and ethnicity in the production of art and material culture.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3704 - Topics in Computer Animation (3 credits)
Rotating topics that explore the artistic and design potential of computer animation. Using current digital techniques and methods, focus is on the creation and manipulation of virtual character designs. Students will use an interdisciplinary aesthetic approach to investigate computer animation concepts. May be repeated for credit maximum of 12 credits. Course contact to credit hour structure: Design Lab/Studio (5L, 3C). RESOURCE CHARGE.
Prerequisite(s): ART 2704
Instructional Contact Hours: (5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 3774 - History of Modern Graphic Design (3 credits)
A chronological survey of the history of modern graphic design, from the mid-19th century to 1980.
Prerequisite(s): ART 2386
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3784 - European and American Art Since 1900 (3 credits)
European and American Art since 1900. A chronological survey of painting and sculpture from neo-impressionism through post-modernism.
Prerequisite(s): ART 2386
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3854 - Professional Studio Practices (3 credits)
An overview of professional studio art practices, concepts, marketing strategies and promotional materials. The international exhibition system and current educational opportunities, employment and career options in the visual arts are presented. Preparing of written materials and documenting artwork, building a professional portfolio for presentation to potential employers, art galleries and exhibitions are stressed. Pre: Bachelors of Fine Arts (BFA) majors only.
Prerequisite(s): ART 1504
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3884 - American Art to 1914 (3 credits)
American art and material culture from Pre-Columbian past to the early 20th century. A chronological study of the major artists, artistic movements, and styles. Analysis of works using key critical and philosophical texts. Emphasis on the role of gender, race, and ethnicity in the production of art and material culture.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

ART 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 3954B - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 3984 - Special Study (19 credits)
Instructional Contact Hours: (19 Lec, 19 Crd)

ART 4014 - History Lab: Creative Technologies, Hidden Histories, Informal Learning (3 credits)
Application of creative technologies to visualize hidden histories in transdisciplinary experiential learning projects. Training in creative technologies, informal learning techniques, interpretation of marginalized histories, and digital cultural heritage design. Consideration of ethical questions involving the representation of diverse social identities, traditions, and histories. Pre: Sophomore Standing.
Pathway Concept Area(s): 6D Critique & Prac in Design, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: EDCI 4014, HIST 4014

ART 4104 - Interpretation of Visual Arts (3 credits)
Capstone seminar for the Pathways Minor in the Visual Arts and Society. Introduces methodologies, theories, and interpretive strategies commonly used to analyze the visual arts and architecture. Focuses on various critical case studies of global objects and sites ranging from the prehistoric to contemporary periods in the fields of: painting, sculpture, architecture, photography, and film. Assignments explore regional arts resources in these media and develop discursive skills employed in written and oral presentations. Considers ethical and political issues surrounding interpretation of art, as well as attendant epistemological challenges. Pre: Six credits of social sciences from Pathways Minor in the Visual Arts and Society checksheet.
Prerequisite(s): ART 1104
Pathway Concept Area(s): 1A Discourse Advanced, 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 4184 - Museum Studies: Theory and Practice (3 credits)
Examines the history, theory and practice of museums. Explores the role of the museum in society and traces the foundations upon which these public, cultural, and educational institutions are built. Focus on contemporary museum management, administration, interpretation, collection policy, as well as how museums pertain to historic preservation and public cultural exhibitions.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 4284 - Museum Ethics and Cultural Preservation (3 credits)
Advanced art history elective. Role of ethics in institutions that preserve cultural heritage. Practical and philosophical dilemmas and controversies relevant to contemporary problems in cultural preservation. Ethical challenges of governance, acquisition, collecting, audience, copyright, conservation, the politics of display, and censorship, among current topics.
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 4384 - Topics in Art History (3 credits)
Advanced art history elective. Rotating topics from all periods of art history, selected to complement offerings at the 3000-level. Topics such as Greek Sculpture, Roman Painting, Renaissance and Baroque Sculpture, Cubism, and Fauvism indicated by timetable. Lecture and/or undergraduate seminar format. May be repeated for credit for a maximum of 18 credits.
Prerequisite(s): ART 2385 or ART 2386
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 18 credit hours

ART 4484 - Topics in Art Criticism and Methodology (3 credits)
Advanced art history elective. Rotating topics in the criticism of art and the methodology of art history and criticism, selected to complement offerings at the 3000-level. Topics such as the History of Art Criticism from Baudelaire to the Present, New Methods in Renaissance and Baroque Art History, and the Theory of Art from various periods, indicated by timetable. Lecture and/or undergraduate seminar format. May be repeated for credit with different content to a maximum of 9 credits.
Prerequisite(s): ART 2385 or ART 2386
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

ART 4504 - Topics in Multimedia Studio (3 credits)
This studio course investigates computer-based multimedia in the visual arts and applied design. Video, photography, computer art and design may be used with traditional media and communication vehicles. May be repeated for a maximum of 9 credits. Two 3000-level courses required. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 2576 or ART 2604 or ART 3564
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 9 credit hours

ART 4514 - Interarts Studio (3 credits)
This studio course will investigate new approaches to art-making and new genres, such as performance art and site-specific installation. Interdisciplinary basis for course may incorporate traditional studio practices and media in the visual arts, music and theatre arts, and appropriate technology in computer, video, and film. May be repeated for a maximum of 12 credits with different topics. 3000-level course in Studio or Art History or departmental approval. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 12 credit hours

ART 4524 - Pictorial Arts Studio (3 credits)
Rotating topics in the two dimensional arts, at an advanced level. All topics will challenge the student to develop stronger, independently generated work of portfolio quality. May be repeated for a maximum of 9 credits with different topics. 3000-level Painting or Drawing course required. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE
Prerequisite(s): ART 3524 or ART 3514
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 9 credit hours

ART 4534 - Topics in Applied Art and Design Studio (3 credits)
Rotating topics about functional art and design. Students will use appropriate materials, tools, and processes in the creation of functional artworks, such as furniture, tiles, tableware, etc. Function and design aesthetics emphasized. May be repeated for a maximum of 9 credits with different topics. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE
Prerequisite(s): ART 3544
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 9 credit hours

ART 4544 - Computer Animation Studio (3 credits)
Advanced animation course focusing on the creation of short films, demo reels, and expressive computer animated films. Students enrolled in this course are expected to complete one large project during the semester. May be repeated with different course content for up to nine credit hours. Course contact to credit hour structure: Design Lab/Studio (5L, 3C)
Prerequisite(s): ART 3704
Instructional Contact Hours: (5 Lab, 3 Crd)
Repeatability: up to 9 credit hours

ART 4554 - Spatial Arts Studio (3 credits)
Advanced level, rotating topics in the three dimensional arts. All topics will challenge the student to develop stronger, independently generated work of portfolio quality. May be repeated for a maximum of 9 credits with different topics. 3000-level Ceramics, Sculpture or Applied Art course required. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE
Prerequisite(s): ART 3554
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 9 credit hours

ART 4564 - Exhibition Design And Display (3 credits)
This course will focus on the display and presentation of visual art, for student-designed exhibitions. Provides experience in the public art arena, and practical k arena, and practical knowledge about planning, designing, and mounting an exhibition. Pre: 3000-level Studio or Art History course required.
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 4574 - Advanced Visual Communications (3 credits)
A further refinement of design theory and practice, and communication skills. Emphasis on the conceptual development of expanded project formats, and individual creativity. This class will provide a principal opportunity for building a viable portfolio. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C). RESOURCE CHARGE 6 credits of Art 3574 required.
Prerequisite(s): ART 4504
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 4575 - Advanced Visual Communication Design (3 credits)
Refinement of design theory, practice, and communication skills. Emphasis placed on methodologies and strategies for developing a personal identity, website, and/or multimedia portfolio. Development of professional brand identity through web design, design of business cards, letterhead, envelopes, and electronic media. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 1614 and ART 2565 and ART 2566 and ART 2575 and ART 2576 and ART 3565 and ART 3566 and ART 4584
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 4576 - Advanced Visual Communication Design (3 credits)
Refinement of design theory, practice, and communication skills. Emphasis placed on methodologies and strategies for developing a personal identity, website, and/or multimedia portfolio. Development of professional brand identity through web design, design of business cards, letterhead, and electronic media. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 1614 and ART 2565 and ART 2566 and ART 2575 and ART 2576 and ART 3565 and ART 3566 and ART 4584 and ART 4575
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 4584 - Advanced Typography (3 credits)
Advanced study of Typography as it relates to Visual Communication Design including historical and contemporary context. Terminology and advanced applications of Typography, complex grid systems, experimental typographic methods, and material studies. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Prerequisite(s): ART 1614 and ART 2565 and ART 2566 and ART 2575
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)

ART 4684 - Topics in Museums and Collections (3 credits)
Advanced art history elective. Variable topics related to the study of museums and collections from a global perspective. Topics such as the Natural History Museum, Introduction to Curatorial Studies, Conservation and Collections Management, Race and Colonialism in Museum Exhibitions, and Censorship in Cultural Institutions, indicated by timetable. Lecture and/or undergraduate seminar format. May be repeated 2 times with different content for a maximum of 9 credit hours.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

ART 4754 - Internship (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 4804 - New Media Art Theory (3 credits)
Exploration of new media theory in relationship to contemporary arts practice. Overview and application of new media art aesthetics, strategies, trends, and socio-cultural aspirations. The course will examine theoretical writings and creative work from prevailing technologically-based disciplines.
Prerequisite(s): ART 2385 and ART 2386
Instructional Contact Hours: (3 Lec, 3 Crd)

ART 4894 - Senior Studio (3 credits)
Preparation and presentation of concentrated studio work under faculty supervision, culminating in solo exhibition and/or formal portfolio. May be extended over two semesters with final grade assigned on completion. Or may be repeated for a total of 6 credits at a maximum of 3H, 3C per semester. Senior standing and consent of department head required. Course contact to credit hour structure: Lecture (1H,1C), Lab (3L,1C), Design Lab/Studio (2L,1C).
Instructional Contact Hours: (1 Lec, 5 Lab, 3 Crd)
Repeatability: up to 6 credit hours

ART 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 4974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

ART 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Art Major with Art History Option

Program Curriculum

Select one course in History [9]		3
Select one course in Religion and Culture from list B below		3
Select twelve credit hours from the following:		12
ART 4184	Museum Studies: Theory and Practice	
ART 4284	Museum Ethics and Cultural Preservation	
ART 4384	Topics in Art History [7]	
ART 4684	Topics in Museums and Collections	
ART 4964	Field Study	
ART 4974	Independent Study	
ART 4994	Undergraduate Research	
Subtotal		21
Restricted Electives [11]		
Select five additonal courses from the below clusters, at least one course from each cluster.		15
Cluster 1		
Select one of the following:		
ART 3074	Egyptian Art and Architecture	
ART 3084	Greek Art and Architecture	
ART 3174	Introduction to Archaeology	
ART 3184	Roman Art and Architecture	
Cluster 2		
Select one of the following:		
ART 3284	Medieval Art and Architecture	
ART 3384	Renaissance Art and Architecture	
ART 3484	Baroque and Rococo Art and Architecture	
Cluster 3		
Select one of the following:		
ART 3584	Nineteenth Century European Art: Neoclassicism to Post-Impressionism	
ART 3684	African-American Art	
ART 3884	American Art to 1914	
ART 3674	History of Photography	
ART 3774	History of Modern Graphic Design	
ART 3784	European and American Art Since 1900	
Cluster 4		
Select one of the following:		
ART 3024	History of Global Print Culture	
ART 3034	Survey of Latin American Art and Architecture	
ART 3044	Art and Architecture of India	
ART 3054	Islamic Art and Architecture	
ART 3064	Arts of China and Japan	
ART 3094		
Subtotal		15
Free Electives		
Select additional courses to fulfill the 120 credit hours required.		18
Subtotal		18
Pathways to General Education		
Pathways Concept 1 - Discourse		
Select six credits in Pathway 1f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G01F)		6
Select three credits in Pathway 1a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G01A)		3
Pathways Concept 2 - Critical Thinking in the Humanities		
Select six credits in Pathway 2 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G02)		6
Pathways Concept 3 - Reasoning in the Social Sciences		
Select six credits in Pathway 3 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G03)		6
Pathways Concept 4 - Reasoning in the Natural Sciences		
Select six credits in Pathway 4 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G04)		6
Pathways Concept 5 - Quantitative and Computational Thinking		
Select six credits in Pathway 5f (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05F)		6
Select three credits in Pathway 5a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G05A)		3
Pathways Concept 6 - Critique and Practice in Design and the Arts		
Select three credits in Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D)		3
ART 2386	Survey of the History of Western Art	3
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select three credits in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07) . Pathways 7 may be double counted with either Pathways 2, 3, or 6a to avoid taking any additional credit hours.		3
Subtotal		45
Total Credits		**120**

1. Courses taken to fulfill Core Bachelor of Art requirements cannot also fill Pathways requirements
2. For Creative Technologies majors
3. For Studio majors
4. For Art/Art History majors
5. For Graphic Design majors
6. Students must take no fewer than six of the total required hours from the 4000-level cluster options as Art History designated courses
7. ART 4384 Topics in Art History may not double count as a major and degree core requirement.
8. With permission of the art history program chair
9. May not be HIST 1025 Introduction to European History or HIST 1026 Introduction to European History
10. Students must take no fewer than 9 of the total required hours from the 3000-level cluster options as Art History designated courses

RLCL 1904	Religion and Culture In Asia	
RLCL 2444	Greek and Roman Myth	
RLCL 2504	Introduction to American Studies	

GPA Requirements and Progress towards Degree

Students must maintain an overall GPA of 2.0 and an in-major GPA of 2.0. Upon having attempted 72 semester hours (including transfer, AP, advanced standing and credit by exam) an Art History student must have completed at least 6 credits towards this major with a 2.0 overall GPA and have a minimum of a 2.0 in-major GPA. All major requirements and restricted electives count towards the in-major GPA.

Graduation Requirements

Pathways General Education Requirements

Students are responsible for completing the Pathways Education requirements that are in effect when they enter the university. The university requires students to complete course work from all seven areas of the Pathways General Education.

Foreign Language Requirement

Students who do not successfully complete at least two units of a single foreign language, classical language or American Sign Language during high school must successfully complete six semester hours of a single college level foreign language or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the undergraduate catalogue for details.

Satisfactory Progress Toward Degree

The University requires every department to establish benchmarks by which their majors can demonstrate that they are making satisfactory progress toward a degree. In addition to the University requirement for satisfactory progress (See Satisfactory Progress in Academics chapter

of Undergraduate Catalogue), in the case of the Creative Technologies major, these benchmarks are:

1. Students must earn a C- or better in required Foundations courses (ART 1204 Principles of 2D Art and Design, ART 1214 Principles of 3D Art and Design, ART 1404 Principles of Drawing, ART 1504 Contemporary Art and Practice, ART 1604 Principles of 4D Art & Design).
2. Upon having attempted 72 semester hours (including transfer, AP, advanced standing and credit by exam) an Art student must have completed at least 6 credits towards this major with a 2.0 overall GPA and have a minimum 2.0 in-major GPA.
3. Students must successfully complete their BFA exhibition (ART 4894 Senior Studio).

Prerequisites

This check sheet contains elective courses that may have prerequisites not listed on this checksheet. Please see your advisor or consult the Undergraduate Course Catalog for more information.

Graduation Requirements

Pathways General Education Requirements

Students are responsible for completing the Pathways General Education requirements that are in effect when they enter the university. The university requires students to complete course work from all seven areas of the Curriculum for Pathways General Education Curriculum for Liberal Education.

GPA Requirements

Students must maintain a 2.0 GPA. In-major GPA requires a grade of C- or better to successfully complete an ART course. In-major GPA is calculated on all ART courses.

Foreign Language Requirement

Students who do not successfully complete at least two units of a single foreign language, classical language or American Sign Language during high school must successfully complete six semester hours of a single college level foreign language or classical language at the college level. Such semester hours are in addition to those normally required for graduation. Please see the undergraduate catalog for details.

Satisfactory Progress Toward Degree

The University requires every department to establish benchmarks by which their majors can demonstrate that they are making satisfactory progress toward a degree. In addition to the University requirement for satisfactory progress (See Satisfactory Progress in Academics chapter of Undergraduate Catalogue), in the case of the Graphic Design major, these benchmarks are:

1. Students must maintain a C- or better in required Foundations courses (ART 1204 Principles of 2D Art and Design,ART 1214 Principles of 3D Art and Design , ART 1404 Principles of Drawing, ART 1604 Principles of 4D Art & Design).
2. Upon having attempted 72 semester hours (including transfer, AP, advanced standing and credit by exam) an Art student must have completed at least 6 credits towards this major with a 2.0 overall GPA and have a minimum 2.0 in-major GPA.
3. Students must successfully complete their BFA exhibition (ART 4576 Advanced Visual Communication Design).

Prerequisites

This check sheet contains elective courses that may have prerequisites not listed on this checksheet. Please see your advisor or consult the Undergraduate Course Catalog for more information.

Graduation Requirements

Pathways General Education Requirements

Students are responsible for completing the Pathways General Education requirements that are in effect when they enter the university. The university requires students to complete course work from all seven areas of the Curriculum for Pathways General Education.

GPA Requirements

Students must maintain a 2.0 GPA. In-major GPA requires a grade of C- or better to successfully complete an ART course. In-major GPA is calculated on all ART courses.

Foreign Language Requirement

Students who do not successfully complete at least two units of a single foreign language, classical language or American Sign Language during high school must successfully complete six semester hours of a single college level foreign language or classical language at the college level. These semester hours are in addition to those normally required for graduation. Please see the course catalog for details.

Satisfactory Progress Toward Degree

The University requires every department to establish benchmarks by which their majors can demonstrate that they are making satisfactory progress toward a degree. In addition to the University requirement for satisfactory progress (See Satisfactory Progress in Academics chapter of Undergraduate Catalogue), in the case of the Studio Art major, these benchmarks are:

1. Students must maintain a C- or better in required Foundations courses (ART 1204 Principles of 2D Art and Design, ART 1214 Principles of 3D Art and Design, ART 1404 Principles of Drawing, ART 1504 Contemporary Art and Practice, ART 1604 Principles of 4D Art & Design).
2. Upon having attempted 72 semester hours (including transfer, AP, advanced standing and credit by exam) a Studio Art student must have completed at least 6 credits towards this major with a 2.0 overall GPA and have a minimum 2.0 in-major GPA.
3. Students must successfully complete their BFA exhibition (ART 4894 Senior Studio).

Graduation Requirements

Pathways General Education

Students are responsible for completing the Pathways Education requirements that are in effect when they enter the university. The university requires students to complete course work from all seven areas of the Pathways General Education.

GPA Requirements

Students must maintain a 2.0 GPA. In-major GPA requires a grade of C- or better to successfully complete an ART course. In-major GPA is calculated on all ART courses.

Foreign Language Requirement

Students who do not successfully complete at least two units of a single language, classical language or American Sign Language during high school must successfully complete six semester hours of a single college level foreign language or classical language at the college level. Such

semester hours are in addition to those normally required for graduation. Please see the undergraduate catalogue for details.

Theatre and Cinema

Our Website (http://www.performingarts.vt.edu)

Overview

The curriculum in Theatre and Cinema is designed to provide the student with the essential approaches necessary to develop an informed understanding of Theatre and Cinema literature and its practice. As such, the three basic aspects of the disciplines (the theoretical, the historical, and the practical) are emphasized.

A program in Theatre Arts leading to the B.A. is offered. In addition to fulfilling the core curriculum requirements of the College of Architecture, Arts, and Design and the Curriculum for Liberal Education, general majors who choose the general degree option must complete a minimum of 48 hours in theatre arts. Students who choose a degree option in Performance, Design, or a Cinema major, must complete a minimum of 57 hours.

A minor course of study in Theatre or Cinema may be chosen with the guidance of the student's advisor.

Limited scholarship support is available.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the General Education (Curriculum for Liberal Education) (see "Academics (p. 9)") and toward the degree in Theatre Arts.

Satisfactory progress requirements toward the B.A. in Theatre Arts can be found on the major checksheet by visiting the University Registrar website at http://registrar.vt.edu/graduation-multi-brief/index1.html.

Undergraduate Course Descriptions (CINE)

CINE 2054 - Introduction to Cinema (3 credits)
Introduction to cinema as a medium for artistic communication. Interpretation and analysis of films to understand designs, ideas and values in artistic and cultural contexts. Basic elements of cinema structure and cinema terminology, phases of cinema production, cinema style of individual directors, creative work of cinematography, production design, and editing, ideological and social meaning in cinema, demographics of visual representation, cinemas economic marketplace. Ethical values and conflicts as found in given films, and ethical reasoning as part of the analysis of cinema.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 10 Ethical Reasoning
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

CINE 2064 - Introduction to Cinema Production (3 credits)
Introductory filmmaking course. Thematic conception and story construction, writing, producing, directing, cinematography, sound recording, and editing.
Instructional Contact Hours: (3 Lec, 3 Crd)

CINE 3184 - Cinema Production Topics (1-9 credits)
Rotating topics in cinema production. Designed for majors in the Department of Theatre and Cinema who have foundational training in areas of cinema production. May be repeated for credit with different course content up to a maximum of nine credit hours.
Prerequisite(s): CINE 3214 or CINE 3224
Instructional Contact Hours: (1-9 Lec, 1-9 Crd)
Repeatability: up to 9 credit hours

CINE 3214 - Fiction Cinema Production (3 credits)
Intermediate-level fiction film production course. Foundational cinema production skills, dramatic storytelling techniques, intermediate directing, team- based ownership and responsibility, and project management.
Prerequisite(s): CINE 2054 and CINE 2064
Instructional Contact Hours: (3 Lec, 3 Crd)

CINE 3224 - Documentary Cinema Production (3 credits)
Intermediate-level, non-fiction, film production course for students seeking non-fiction documentary film production skills and experience. Emphasizes the application and advancement of foundational skills, the ethics of documentary filmmaking, story development and project management.
Prerequisite(s): CINE 2054 and CINE 2064
Instructional Contact Hours: (3 Lec, 3 Crd)

CINE 3444 - African American Images in Film (3 credits)
Explores race and representations of African American images in film, from multiple disciplinary perspectives. Focuses on the social, political, economic, and historical milieu in which black film emerged and evolved. Examines gender issues in filmmaking. Reviews different genres, including race films, colorblind representations, and black exploitation films, and the appropriation of black representation and black images in film in the United States and elsewhere. Includes methods of film analysis, such as historical, master narrative structure, and archival research.
Prerequisite(s): AFST 1714
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AFST 3444

CINE 3514 - American Cinema Genres (3 credits)
Close visual and cultural study of classic film genres with emphasis on cinematic styles and narrative conventions which unify the genre and which are found in representative films; exploration of genre films as symbols of American culture and society. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

CINE 3524 - The Cinema Director (3 credits)
Close thematic and visual analysis of the films of prominent cinema directors; emphasis on cinematic structure and development and evolution of their work. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits.
Prerequisite(s): TA 2054 or CINE 2054
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

CINE 3534 - Avant-Garde Cinema (3 credits)
Close visual and cultural study of the avant-garde and experimental tradition in the first half-century of American and European cinemas; emphasis on interrelations of cinema with avant-garde movements in other arts, including literature, music, dance, theatre, painting, and photography
Prerequisite(s): CINE 2054
Instructional Contact Hours: (3 Lec, 3 Crd)

CINE 3544 - Literature and Cinema (3 credits)
Works of literature and the films into which they have been transformed; emphasis on differences between media.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ENGL 3544

CINE 4084 - Cinema History (3 credits)
Aesthetic, economic, social and technological history of world cinema; film theory as it relates to the history of cinema. Junior standing required.
Prerequisite(s): CINE 2054
Instructional Contact Hours: (2 Lec, 3 Lab, 3 Crd)

CINE 4144 - Topics in Cinema Studies (3 credits)
Critical issues in cinema. Aesthetic, social, political, and economic contexts for films that embody or critique assumptions of historical periods. Analysis of ethnocentric and cultural biases in cinema. Identifying issues of identity and equity in films. Theories and ethics of representation. May be repeated 2 times with different content for a maximum of 9 credits.
Prerequisite(s): CINE 2054
Pathway Concept Area(s): 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 9 credit hours

CINE 4534 - Underground Cinema and Culture (3 credits)
Close visual and cultural study of underground cinema and culture from the 1940s through the 1970s; emphasizes the interrelations of cinema with countercultural movements in other arts, including literature, music, dance, theatre, painting, and photography; focuses on the post-war avant-garde, the emergence of film societies, the neorealist and new wave cinemas, challenges to censorship laws, and the emergence of cult and midnight movies.
Prerequisite(s): CINE 2054
Instructional Contact Hours: (3 Lec, 3 Crd)

Undergraduate Course Descriptions (DANC)

DANC 2004 - Anatomy for Performers (3 credits)
An experiential course merging the artistic, experiential, and conceptual understanding of the human body, and how all of its elements work together to produce motion and the sense of being. Study of the anatomical structures of the body through an experiential lens of motion and sensory perception. Introduction of the concepts of kinesiology through the study of bone, joint, tissue, muscular, and organ structures. Emphasis on holistic perspectives of the body through active listening, ethical reasoning, healthy self-image, and attention to practices of equitable embodied identity. Lecture, demonstration, and experience-based partnering work that draw from a variety of somatic traditions including yoga, pilates, Body-Mind Centering, release technique, Alexander and Feldenkrais techniques, Gyrotonic/Gyrokinesis, and mediation. Designed for performers in the arts, athletes, martial artists, or any students wishing to study the body from an experiential lens.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

DANC 2014 - Introduction to Dance History (3 credits)
Survey of dance history as an art form with global scope. Language of dance criticism and dance writing practices. International dance forms and the emergence and development of 20th and 21st century modern and post-modern concert dance in the United States from the confluence of European folk and court dances, ballet, African and Caribbean influences, and other American cultural dynamics. Emphasis on ethical and aesthetic modes of viewing dance performance with attention to issues of gender and sexuality, race and ethnicity, ability, class, and identity.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 7 Identity & Equity in U.S., 10 Ethical Reasoning, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

DANC 2024 - Introduction to Dance Techniques (3 credits)
Beginner-level studio dance course. Introduction of movement techniques, improvisation/composition, performance, experiential anatomy, and an overview to concepts in dance history. Development of flexibility, strength, coordination, rhythm, and vocabulary in the modern idiom. Concepts of time, space, energy, and choreographic form presented through set movement exercises, improvisation, and a final compositional project. Training in a variety of movement vocabularies including modern/contemporary, ballet, and cultural dance forms. May be repeated once with different content for a maximum of 6 credits. Design Lab/Studio.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (5 Lab, 3 Crd)
Repeatability: up to 6 credit hours

DANC 2104 - Moving Body, Moving Mind (3 credits)
Methods of working intentionally towards cultivating optimal brain states. Mind/body practices to develop connections between contemporary neuroscience, movement, and meditative practices. Studies in the intersection of consciousness, movement, and thought. Introduction to yoga, meditation, authentic movement, experiential anatomy, and somatic work. Emphasis on holistic perspectives of the body through active listening, ethical reasoning, healthy self-image, and attention to the practices of intentional embodiment.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: HNFE 2104

DANC 3024 - Intermediate/Advanced Dance Techniques (3 credits)
Intermediate/advanced level course in movement techniques. Training in a variety of movement vocabularies including modern/contemporary, ballet, and cultural dance forms. Improvisation/composition, performance, concepts in anatomy/kinesiology, and 21st century contemporary dance forms. Development of flexibility, strength, coordination, rhythm, vocabulary in the modern idiom, and focused study of partnering concepts from a variety of hybrid forms. Concepts of time, space, energy, and choreographic form presented through set movement exercises and two compositional projects. May be repeated 3 times with different content for a maximum of 9 credits. Design/Lab Studio.
Prerequisite(s): DANC 2024
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (5 Lab, 3 Crd)
Repeatability: up to 9 credit hours

Undergraduate Course Descriptions (FA)

FA 2004 - Creativity and the Artistic Experience (3 credits)
Examine how the arts intersect with our daily lives. Compose and create basic examples of abstraction and 20th century modernism. Trace the global influences and roots of our current culture. Explore the science of acoustics and its effect on performing spaces. Discuss the process of an arts performance. Apply themes of improvisation, creativity and how we process beauty. Investigate emerging brain science as it relates to art, beauty and pleasure. Identify the unique ways of knowing embodied in the arts distinct from scientific measurements. No prior knowledge of visual, theatrical or musical arts needed.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

Undergraduate Course Descriptions (TA)

TA 1004 - School of Performing Arts First Year Experience (1 credit)
Orientation to the School of Performing Arts philosophy and the resources of the School, the College, and the University. Cultivate a common intellectual, analytical, and creative conversation among first-year students. Enhance student participation in the creative and scholarly life of the Schools programs. Foster a sense of community and understanding across disciplines.
Instructional Contact Hours: (1 Lec, 1 Crd)
Course Crosslist: MUS 1004

TA 2014 - Introduction to Theatre (3 credits)
Appreciation and understanding of theatre as a living, collaborative art form through historical and intercultural perspectives, readings of key texts and analysis of scripts, and explorations of all elements of the theater making process, including playwriting, directing, acting, and design.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2024 - Introduction to Acting (3 credits)
Introductory performance class in acting skills and theories as a participant (actor) and observer (audience) for the non-major. Includes performances of dramatic literature/ improvisation for live audience, creating character biography and script analysis, historical and intercultural contexts, and techniques in constructive criticism that incorporate interpretive strategies.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 6A Critique & Practice in Arts, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2044 - Contemporary African American Theatre (3 credits)
Contributions of U.S. Black theatre artists; intersectional identities; performances spaces and society; critical race theory; dramatic storytelling; cultural behaviors; racial discrimination.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: AFST 2044, ENGL 2044

TA 2104 - Fundamentals of Theatre and Production (3 credits)
Introduction to theatre vocabulary and understanding of the theatrical process, theatre aesthetics, theatrical modes of expression, basic script analysis, production analysis, theory and practice of collaboration, theatre organizations, history and operations of professional theatres. (T & C majors and minors only).
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2114 - Script Analysis (3 credits)
Understanding of drama as an element of theatre with focus on the process of script analysis for theatrical production.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2134 - Acting Lab (3 credits)
An introduction to the process of acting, through a variety of laboratory experiences, beginning with basic performance skills and culminating in the performance experience. Emphasis is on improvisation, terminology, physical action, script analysis, characterization, and rehearsal and performance techniques. Limited to Theatre & Cinema Majors.
Instructional Contact Hours: (6 Lab, 3 Crd)

TA 2144 - Foundations of Movement and Voice (3 credits)
An introduction to the process of acting, through a variety of laboratory experiences, beginning with basic performance skills and culminating in the performance experience. Emphasis is on various methods of performance style and analysis, theater movement and body conditioning, and vocal awareness and production. Limited to Theatre & Cinema Majors.
Prerequisite(s): TA 2134
Instructional Contact Hours: (6 Lab, 3 Crd)

TA 2164 - Scene Design Lab (3 credits)
An introduction to the processes, technologies, and aesthetics of scene design for theatrical productions and analysis of playscripts. Students develop workshop drawing, conceptual design and vision, and collaborative skills related to scene design, and exploration is focused in historical and contemporary theatre practice. A range of design problems will offer opportunity to learn various design approaches and provide practice with different media and means of design expression. Design Lab.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

TA 2174 - Costume Design Lab (3 credits)
Introduction to the processes, technologies, and aesthetics of costume design for theatrical productions and analysis of playscripts. Focus on developing workshop drawings, conceptual design and vision, and collaborative skills related to costume design, with special emphasis on historical and contemporary theatre practice. Various design approaches, different media, and a range of design problems are introduced. Design Lab/Studio.
Instructional Contact Hours: (2 Lec, 2 Lab, 3 Crd)

TA 2204 - Creative Dance (3 credits)
Study of the expressive elements of movement and dance. Basic choreographic procedures and small group work to design dances that emphasize particular movement concepts. Experience in music and movement of diverse dance cultures. Documentation of the pathways of dances in floorplans and written reflections on the creative processes.
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2224 - Intermediate Performance Intensive (3 credits)
This course provides the Theatre & Cinema major, who desires a rigorous exploration of acting, a forum for application of the techniques and skills learned. These skills will be strengthened and applied through observation of and participation in scene and monologue work. Focus will be placed on basic skills and concepts necessary to creative, truthful, and believable performance of selected scenes, including use of voice and body, imagination, relaxation, sense and emotion memory, and script analysis. Limited to Theatre & Cinema Majors.
Prerequisite(s): TA 2134 and TA 2144
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2404 - Introduction to Applied Collaborative Techniques (3 credits)
Introduction to principles of collaboration in applied theatre for non-majors. Situational awareness, intrapersonal and interpersonal awareness, audience engagement, effective storytelling, team creativity and conflict resolution, and communicating across difference in public and professional settings.
Pathway Concept Area(s): 1A Discourse Advanced, 6A Critique & Practice in Arts, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2414 - Stage and Lighting Technology (3 credits)
A practical study of the technologies and specialized equipment employed in the construction, rigging and running of theatrical production; the planning and organization involved in mounting these productions; the tools, materials and techniques used to realize theatrical design and build scenery; and the fundamentals of stage lighting.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 2604 - Introduction to Arts Marketing (3 credits)
An introduction to the theories and practice of marketing and building community engagement as applied to arts activities and professional not-for-profit arts organizations, through a survey of standard marketing approaches, examination of current practices in the field, and direct hands-on experience.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: MUS 2604

TA 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2974H - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 2984G - Special Study (1-19 credits)
Pathway Concept Area(s): 7 Identity & Equity in U.S.
Instructional Contact Hours: Variable credit course

TA 2984M - Special Study (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: Variable credit course

TA 3014 - Theatre Production Lab (1-3 credits)
Production experiences in the areas of performance, design and theatre technology, management, and writing. May be repeated for a maximum of nine credits.
Instructional Contact Hours: (1-3 Lab, 1-3 Crd)
Repeatability: up to 9 credit hours

TA 3024 - Intermediate Acting for Non-Theatre Major (3 credits)
Performance class in acting skills, theories, and genres. Designed for non-theatre arts majors. Builds on fundamentals and theory learned in Introduction to Acting. Includes body and voice awareness, performance of specific genres, and expanded acting theory and analysis.
Prerequisite(s): TA 2024
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3104 - Sound Technology Topics (3-6 credits)
Rotating topics in theatre sound technology and sound design. Designed for advanced theatre arts and cinema majors who have foundational training in areas of theatre technology and design. May be repeated 2 times with different content for a maximum of 9 credit hours. Design Lab.
Prerequisite(s): TA 2414
Instructional Contact Hours: (1 Lec, 3-8 Lab, 3-6 Crd)
Repeatability: up to 9 credit hours

TA 3105 - History of Drama and Theatre (3 credits)
History of drama and theatre from primitive ritual to the present day and its relationship to the social, economic, and political forces from age to age. 3105: primitive, Greek, Roman, Medieval, Renaissance, and Asian. 3106: Restoration, eighteenth, nineteenth, and twentieth centuries. Junior standing required.
Prerequisite(s): TA 2114
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3106 - History of Drama and Theatre (3 credits)
History of drama and theatre from primitive ritual to the present day and its relationship to the social, economic, and political forces from age to age. 3105: primitive, Greek, Roman, Medieval, Renaissance, and Asian. 3106: Restoration, eighteenth, nineteenth, and twentieth centuries.
Prerequisite(s): TA 2114
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3114 - Scenography Topics (9 credits)
Rotating topics in scenography and related specific design applications. Designed for theatre arts majors who have foundational training in areas of theatre design. May be repeated for credit.
Prerequisite(s): TA 2164
Instructional Contact Hours: (9 Lec, 9 Lab, 9 Crd)
Repeatability: up to 9 credit hours

TA 3124 - Costume Design and Technology Topics (1-9 credits)
Rotating topics of costume design and costume technology. Designed for advanced theatre arts majors who have foundational training in all areas if theatre design. May be repeated for credit.
Prerequisite(s): TA 2174
Instructional Contact Hours: (1-9 Lec, 1-9 Crd)
Repeatability: up to 9 credit hours

TA 3134 - Lighting Topics (1-9 credits)
Rotating topics in lighting design and technology. Designed for advanced theatre arts majors who have foundational training in all areas of theatre arts. May be repeated for credit. (Variable credit)
Prerequisite(s): TA 2414
Instructional Contact Hours: (1-9 Lec, 1-9 Crd)
Repeatability: up to 9 credit hours

TA 3144 - Theatre Technology Topics (9 credits)
Rotating topics in design and theatre technology. Designed for advanced theatre arts majors who have foundational training in all areas if theatre technology and design. May be repeated for unlimited number of credit hours.
Prerequisite(s): TA 2414
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3154 - Acting Topics (9 credits)
Rotating topics in performance skills and theories. Designed For advanced theatre arts majors who have foundational training in acting, voice and movement. May be repeated for credit.
Prerequisite(s): TA 2224 and TA 2144
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3164 - Voice and Speech Topics (9 credits)
Rotating topics in voice and speech skills, and theories and practice in performance. Designed for advanced theatre arts majors who have foundational training in acting, voice and movement. May be repeated for credit.
Prerequisite(s): TA 2224 and TA 2144
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3174 - Movement Topics (9 credits)
Rotating topics in theatre movement, dance for the theatre and theories of physical expression in the performing arts. Designed for advanced theatre arts majors who have foundational training in acting voice and movement. May be repeated for a maximum of 9 credit hours.
Prerequisite(s): TA 2144 and TA 2224
Instructional Contact Hours: (9 Lec, 9 Crd)
Repeatability: up to 9 credit hours

TA 3315 - Playwriting (3 credits)
A workshop course in the craft and art of playwriting which emphasizes the development of craft and the nurturing of vision and art. 3315: primary focus is on the writing of original scripts with additional attention paid to the work of influential playwrights and critics. 3316: primary focus is on the creative process of developing a play with the collaborative influences of a director, actors, designers, and other theatre professionals. Consent of instructor required.
Prerequisite(s): ENGL 1106 or ENGL 1204H or COMM 1016
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ENGL 3315

TA 3604 - Arts Management (3 credits)
The development of the not-for-profit arts organization, structures and characteristics of boards of directors, artistic missions and goals, funding, volunteer support, and fiscal control. Junior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3624 - Stage Management (3 credits)
The systems, procedures, forms, and duties of the stage manager in the professional, academic, and community theatre are explored in relationship to the production process and other theatre artists.
Prerequisite(s): TA 2104
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 3954F - Study Abroad (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts, 6D Critique & Prac in Design
Instructional Contact Hours: Variable credit course

TA 3954M - Study Abroad (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: Variable credit course

TA 3984M - Special Study (1-19 credits)
Pathway Concept Area(s): 6A Critique & Practice in Arts
Instructional Contact Hours: Variable credit course

TA 4014 - Contemporary Theatre Seminar (3 credits)
Issues and concerns in contemporary theatre; production philosophies and approaches, employment opportunities, career options, and preparation of portfolio and resume materials. Junior standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 4304 - Theatre Outreach (1-3 credits)
Participation in theatre projects or activities that focus on community and social issues. May be repeated for a maximum of six credits. Junior standing.
Instructional Contact Hours: (1-3 Lec, 1-3 Crd)
Repeatability: up to 6 credit hours

TA 4315 - Directing (3 credits)
Script analysis, theories, techniques, and practical applications of theatrical direction. 4315: Theories and aesthetics of directing, functions of the director, script analysis, basic principles and techniques of staging. 4316: Rehearsal techniques, style determination realism, and non-realism. Senior standing required.
Prerequisite(s): TA 2134 and TA 2114
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 4316 - Directing (3 credits)
Script analysis, theories, techniques, and practical applications of theatrical direction. 4315: Theories and aesthetics of directing, functions of the director, script analysis, basic principles and techniques of staging. 4316: Rehearsal techniques, style determination realism, and non-realism.
Prerequisite(s): TA 4315
Instructional Contact Hours: (3 Lec, 3 Crd)

TA 4704 - Professional Theatre Internship (9-15 credits)
Internship of one semester in acting, directing, management, design, or technical theatre or cinema with a professional equity company for selected advanced students; classroom, workshop, and production experiences. Minimum 9 credits, maximum 15 credits. Audition and consent.
Instructional Contact Hours: (9-15 Lec, 9-15 Crd)
Repeatability: up to 15 credit hours

TA 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

TA 4974H - Independent Study (1-19 credits)

Pamplin College of Business

Our Website (http://www.pamplin.vt.edu)

Overview

Range of Programs

The Pamplin College of Business offers a Bachelor of Science in Business degree, a Bachelor of Science in Business in Business Information Technology degree, a Bachelor of Science in Business in Finance degree, and a Bachelor of Science in Business in Management degree. Majors in Accounting and Information Systems; Business Information Technology; Cybersecurity Management and Analytics; Entrepreneurship, Innovation & Technology Management; Finance; Financial Planning and Wealth Management; FinTech and Big Data Analytics; Hospitality and Tourism Management; Human Resources Management; Management; Management Consulting and Analytics, Marketing; and Real Estate Finance are available. The College also offers a Bachelor of Science in Real Estate degree with majors in Real Estate for Commercial Properties and Real Estate for Residential Properties. On-campus enrollment is over 5,000 undergraduate and about 200 full-time graduate students in the MS-BA in Business Analytics, Master of Accounting and Information Systems, and Ph.D. programs resident in Blacksburg, VA. The college also enrolls approximately 140 Evening MBA, and about 50 MS-BA students in Hospitality and Tourism at Virginia Tech's campuses in greater Washington, D.C., metro area. In addition to offering the in-person Evening MBA program, the college offers a fully virtual Online MBA program. The OMBA program was launched in the summer of 2021 and enrolls a cohort of approximately 30 students once per year. Virginia Tech's Master of Information Technology (VT-MIT) is a 33-credit interdisciplinary degree program offered jointly by the College of Engineering and Pamplin College of Business. Designed for working professionals, the program is fully online, asynchronous, and offers a highly customizable curriculum in areas such as big data, data analytics, cybersecurity, health IT, and software development. The VT-MIT program also offers 10 graduate certificates that can be earned with the degree or as a stand-alone credential. In addition, the College also has about 50 students in the Executive Ph.D. in Business with residencies at the Falls Church and Blacksburg campuses.

Competitive Advantages of Pamplin

The college offers five distinct competitive advantages:

1. start in the business school from day one
2. graduate with a strong business foundation
3. get jobs (over 90% with a job in their field at graduation)
4. develop skills through hands-on experiences
5. connect with engaged alumni

Groundbreaking Research, Eminent Scholarship

Pamplin faculty members are tackling major issues in industry, finance, management practice, and information technology, to name a few areas. Their research has contributed to greater understanding of business issues, been cited in government hearings and court testimony, and played a role in policy making. Though sponsored research is not a central aspect of the research programs of business schools, several Pamplin faculty members have attracted national funding for their research, working as members of interdisciplinary teams. The college's departments are also regularly ranked among the nation's or world's top programs for scholarly productivity, based on article publication in the leading academic journals in their fields.

Centers

The college offers two centers devoted to helping students and corporations gain more knowledge. The Apex Systems Center for Innovation and Entrepreneurship helps students to learn, lead, and launch. Students will learn to be empowered with skills, tools, and information to create successful ventures. They will launch ventures through support and resources that will help them transform vision to reality. Finally, the center will lead the next generation of entrepreneurs and help them to have courage to build exceptional ventures. The Center for Business Intelligence and Analytics will assist with big data and harnessing analytic techniques to transform raw data into useful information for better business decisions.

Curriculum

The curriculum for the business degrees includes a broad liberal education and business core foundation of two years, followed by a college core in the fundamentals of business theory and concentration in one of the following majors:

- Accounting and Information Systems
- Business Information Technology
- Cybersecurity Management and Analytics
- Entrepreneurship, Innovation, and Technology Management
- Finance
- Financial Planning and Wealth Management
- FinTech and Big Data Analytics
- Hospitality and Tourism Management
- Human Resource Management

- Management
- Management Consulting and Analytics
- Marketing
- Real Estate Finance

The Blackwood Program in Real Estate offers a Bachelor of Science in Real Estate degree, with majors in Real Estate for Commercial Properties and Real Estate for Residential Properties. Real estate is integral to where one works, shops, lives and recreates. Thus, Real Estate courses integrate the material students learn in disciplinary courses such as finance, law, and property management through experiential learning within the academic program. The integration occurs though a university-industry partnership where real estate professionals are actively involved in students' education through guest lectures, mentoring experiences, and by providing internship opportunities.

Academic Advising

Academic advising is an important aspect of each student's college career. Students are assigned to a professional academic advisor to assist from entry in Pamplin until graduation. All business degree students are assigned to an advisor in Pamplin Undergraduate Programs, 1046 Pamplin Hall. Real Estate degree students are assigned to an advisor in the Blackwood Real Estate program, also located within Pamplin Hall.

Undergraduates are strongly encouraged to participate in extra-curricular activities, particularly the annual career fairs in September and January, ethics and leadership seminars, college international programs and study abroad, and the various events of the over 30 different student clubs in the college. Many of these programs provide critical insights into the careers for which students are preparing, as well as valuable opportunities for leadership.

Undergraduates are required to bring a computer to the university, as well as purchase university and Pamplin software bundles. The computer is used extensively in the curriculum. Purchase information and required configuration will be available each spring.

Facilities

Administrative and faculty offices for the college are located in Pamplin, Wallace, and Bishop-Favrao Halls. Our facilities also include study rooms, computer labs, conference rooms, a behavioral laboratory, kitchen laboratory, atrium filled with furniture conducive to studying and group work, and a student organization office center.

Accreditation

The college is a member of The Association to Advance Collegiate Schools of Business, AACSB International. All programs are accredited by the AACSB. Additionally, the ACIS program holds an accreditation from AACSB: AACSB Accounting Accreditation. The Finance department is accredited through the Certified Financial Planning Board of Standards, Inc.

General Requirements for Graduation

A minimum of 125 credit hours is required for graduation in the Bachelor of Science in Business, Bachelor of Science in Business in Business Information Technology, Bachelor of Science in Business in Finance, and Bachelor of Science in Business in Management degrees. The Bachelor of Science in Real Estate requires 120 credit hours.

Students must have an overall average and in-major GPA of 2.0 ("C") to graduate.

To ensure credit, a student desiring to take courses at another institution must secure approval from Pamplin Undergraduate Programs before registering for the course at another institution. Completion of the "Authorization to Take Courses Elsewhere" must be submitted online. The student will be notified of the outcome via email.

General university limitations on acceptability of transfer credit are shown elsewhere in this catalog.

Program for First Two Years

All business degree-seeking students generally take the same required courses for the first two years. Courses consist of business foundation courses as well as general education requirements and free electives. Pamplin enforces a strict policy of progress toward degree (Policy 91). Policy 91 states that students must complete the following courses with grades no lower than C- by the time they have attempted 72 credit hours (90 hours for transfer students): ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling-BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ACIS 2115 Principles of Accounting-ACIS 2116 Principles of Accounting, and ECON 2005 Principles of Economics-ECON 2006 Principles of Economics. Students who do not meet this progress towards degree requirement will be dismissed from their major.

Business Core

All business degree-seeking students complete a business core that creates a strong foundation in all aspects of business and includes coursework in accounting, economics, finance, marketing, management, information technology, and international business. All core courses require a grade of C- or better or else the course must be repeated. However, students at the university may only attempt a course three times.

Restricted Majors

ACIS, BIT, CFPF, CMA, EIT, FIN, FBDA, HTM, MCA, MGT,MHR, MKTG, and FREL are considered restricted majors and require application from students who did not start at VT enrolled in one of those majors. Students must complete certain business courses and obtain a minimum GPA for eligibility to apply to a restricted major. Applications are accepted online three times per year – January, May, and August.

Pamplin College of Business Minors

Business Minor

Real Estate students not double majoring in a business degree and students pursuing a major outside the Pamplin College may apply for a minor in business if they have a minimum 2.0 overall GPA and have completed the math requirement. The minor consists of approximately 46 credit hours of foundational coursework in various areas of business. To complete the minor in business, students must have a 2.0 GPA in all required courses.

The requirements to earn a minor in business can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Digital Marketing Strategy Minor

Digital marketing encompasses many areas of application, including mobile marketing, Internet marketing, e-commerce, and social media marketing. The Digital Marketing Strategy minor enables students to acquire knowledge and skills in online and digital business and digital product delivery, as well as development, analysis, and enhancement of a company's presences on the web, mobile, and social networks. The minor is open to all majors and requires 21 credit hours of coursework.

The requirements to earn a minor in digital marketing strategy can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Entrepreneurship-New Venture Growth Minor

The Entrepreneurship-New Venture Growth Minor is intended to focus on the knowledge and skills needed to create new ventures and lead their early growth. The objective is to provide students with the knowledge to convert ideas into business successes, particularly in the context of engineering and science-based technology commercialization.

The minor is open to students pursuing a major outside the Pamplin College of Business and Real Estate students not double majoring in a business degree and requires 18 credit hours of coursework.

The requirements to earn a minor in entrepreneurship can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Environmental, Social, and Governance Analytics Minor

Environmental, social, and governance policies and practices are increasingly a focus in the conduct of business and finance. The Department of Finance has developed an ESG minor to make students, especially Business majors, aware of environmental, social, and governance criteria that are used in evaluation of companies and investments. The minor will prepare students to understand the effect of ESG on investment performance, access to funding, and evaluation of corporate policies. The minor requires 24 credit hours, a grade of C or better in each relevant course, and that students maintain a GPA of at least 2.0 in the required course work.

Event and Experience Management Minor

The Hospitality & Tourism department's Pathway's minor in Event and Experience Management is available to all students across campus and provides options of emphasis in sales management or event operations management. The minor consists of 18 hours of study and provides students with content and practical experiences leading to professional growth opportunities in the event management industry. In the United States alone, there are over 18 million events and meetings organized every year creating career opportunities for students who aspire to design, plan and manage the execution of events or for those who prefer the challenge of sales and the techniques involved in building customer relationships through effective communication and interpersonal skills.

The requirements to earn a minor in event and experience management can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Finance Minor

Students pursuing a major outside the Pamplin College of Business and Real Estate students not double majoring in a business degree, may apply for a minor in Finance if they have a minimum 2.50 overall GPA, have completed 24 hours at Virginia Tech, and have completed the math requirement. The minor consists of 27 credit hours of coursework in Finance and supporting areas of business. To complete the minor in business, students must have a 2.0 GPA in all required courses.

The requirements to earn a minor in finance can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Global Business Practices to Improve the Human Condition

Any student at Virginia Tech can put Ut Prosim into action by completing the Minor in Global Business Practices (GBP) to Improve the Human Condition. This interdisciplinary minor will teach students how to address societal issues using sound business practices in an international setting. The GBP minor was designed for any Virginia Tech student with a GPA of at least 2.0. Students will complete coursework in Pathways 3, 5f, and 7. The 21-credit minor includes 12 credits of required core courses, 6 credits of elective courses concentrating in either the social change or prosperity track, and a 3 credit capstone experience.

The requirements to earn a minor in global business practices can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

International Business Minor

The International Business (IB) Minor was designed for all Virginia Tech students who wish to learn how to conduct business in an international setting. Students will be exposed to a wide variety of business, cultural, and global perspectives. The international business minor provides students with a rigorous foundation for success in today's global business environment. Freshman, sophomores, juniors, and seniors who have at least a 2.0 overall GPA are eligible for the International Business minor. The minor consists of 18 credit hours of course work, four years of a foreign language (may be satisfied from high school), and an approved international experience. Non-Pamplin students who wish to earn the minor must go on a Pamplin-specific study abroad or international internship.

The requirements to earn a minor in international business can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Leadership Centers and Minors

The **Business Leadership Center (BLC)** within the Department of Management provides multi-disciplinary, experiential education in the history, values, skills, and theory of organizational and team leadership. It acts as an educational center that coordinates programs to help students develop leadership skills that are necessary to excel and prosper in the workplace of the twenty-first century.

The 18-credit minor in Organizational Leadership is open to students in all majors who have at least a 2.5 overall GPA at Virginia Tech. It includes required courses in team and organizational leadership; elective courses that address a broad range of competencies in four areas, including Creativity and Innovation, Critical and Strategic Thinking, Intercultural Communications, and Holistic Thinking and Ethical Reasoning. and a required leadership experiential activity. For additional information, contact Mr. Ron Poff, Interim Business Leadership Center Director, (540) 231-1279, leadershipcenter@vt.edu.

The requirements to earn a minor in organizational leadership can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Housed within the Virginia Tech Corps of Cadets (VTCC), the mission of the Major General W. Thomas Rice Center for Leader Development is to foster the next generation of public leaders by integrating theory and practice through scholarly dialogue and experiential learning in the areas of leadership, civic responsibility, service, and moral values thus contributing to the development of informed and responsible individuals who are committed to making a difference in their nation and in the world. The Rice Center oversees the 22-credit leadership Minor Corps of Cadets (LMCC). This minor is only available to graduates of the VTCC. For more information on the minor in leadership, please contact the Rice Center for Leader Development at (540) 231-9455.

Professional Sales Minor

Sales positions are critical to all firms and sales positions are expected to increase by as much as 25% over the next several years. This has created strong competition among employers to recruit the very best graduates. The Professional Sales minor is designed to prepare students to excel in this highly lucrative field. The focus of the program is to provide students with critical communication, interpersonal, and presentation skills key to helping organizations build long-term customer relationships. These skills will be valuable not only to those pursuing sales careers but also to anyone aspiring to managerial positions - positions that involve presentation of plans and ideas, negotiations, and persuasion. This minor requires 21 credits to be completed with at least a 2.0 GPA overall and within the courses. The minor is open to all Virginia Tech students

The requirements to earn a minor in professional sales can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Real Estate Minor

The Real Estate minor allows students with a general interest in real estate to select a set of courses that will advance their knowledge the industry. The minor requires 28 credit hours in coursework across various disciplines including property management, finance, marketing, building construction, and real estate. The minor is open to all Virginia Tech students.

The requirements to earn a minor in real estate can be found on the University Registrar website https://www.registrar.vt.edu/graduation-multi-brief/checksheets.html.

Cooperative Education Programs in Business

The college participates in the Cooperative Education Program in which qualified students may alternate semesters of study in the major with semesters of professional employment. Additional information pertaining to the program is included in the "Academics (p. 9)" section of this catalog.

Graduate Programs in Business

Graduate instruction and opportunities for research are offered to students who have bachelor's degrees from accredited colleges. The college offers Master of Business Administration programs, and master's and Ph.D. degrees in all departments. All graduate students are required to attain a satisfactory score on the Graduate Management Admission Test (GMAT).

Preparation for Law

The four-year course work leading to the B.S. in Business degree in any major in the college provides a sound preparation for law school, and pre-law advisors from the Pamplin faculty are provided.

Accounting and Information Systems

Our Website (http://www.acis.pamplin.vt.edu)

Our Mission

The Department of Accounting and Information Systems in the Pamplin College of Business strives for excellence in fulfilling the three missions of a comprehensive land grant university by:

- Improving the accounting and information systems professions by conducting quality research and disseminating the results;
- Providing a world class accounting and information systems education to our students; and
- Delivering outreach services to accounting and information systems professionals and educators.

The department seeks to fulfill the teaching mission through programs which include:

Undergraduate Programs, where we seek to

- *Prepare students to enter the accounting and information systems professions with the skills and knowledge of business, information systems, and accounting concepts and practices.*

Masters of Accounting and Information Systems, where we seek to

- *Prepare students for professional careers with specializations in accounting analytics, audit, financial services, information systems, and taxation.*

Ph.D. Program in Business with a major in Accounting and Information Systems, where we seek to

- *Prepare students for academic careers in research and teaching.*

The Department of Accounting and Information Systems prepares students to become professionals in their chosen area of accounting and information systems. Faculty members in the department have chosen to specialize in selected areas of accounting or information systems and they teach and conduct research in these areas. All tenure track faculty members at the professorial ranks have Ph.D.s in accounting or information systems appropriate to the courses they teach, and many have professional certification in their areas of specialization. The faculty is committed to the education of accounting and information systems professionals who will be active participants in the information age, with increasing demand for data analytics skills.

The department's undergraduate program offers two majors. Both majors provide a fundamental education for careers in public accounting (CPA) firms, large and small corporations, government agencies, or nonprofit organizations.

- The **Accounting and Information Systems Major** is designed to help prepare graduates for the broadest range of accounting careers, including those in public accounting that require the CPA professional certification. This major has three options:
  - Accounting & Auditing
  - Tax Compliance & Planning
  - Accounting Information Systems & Controls
- The **Accounting & Business Analysis Major** is designed to provide students with flexibility to combine a core accounting education with a leading-edge specialty in accounting, business analytics, or another discipline.

The job titles vary greatly and include auditor, information systems auditor, forensic accountant, management accountant, tax professional, systems consultant, controller, financial data analytics specialist, and cost analyst. The demand for our graduates has been very strong throughout the department's history, and this strong demand continues.

Many graduates of our department desire to gain licensure and/or certification in their selected area of specialization. The Certified Public Accountant (CPA) license is highly respected and sought after in addition to being globally recognized. Students planning to take the CPA exam in Virginia are required to have a bachelor's degree from one or more accredited institutions with an accounting concentration or equivalent (as defined by the Virginia Board of Accountancy) and at least 120 semester credit hours (SCH). 150 SCH are ultimately required for CPA licensure. The best preparations is to earn a Master's degree in Accounting and Information Systems; however, Virginia Tech offers other options for meeting these requirements. If interested, students should discuss with their advisor and/or department's faculty. Students should be aware that education requirements vary by state (consult the state board of accountancy of interest). In addition to the CPA license, graduates of our programs sit for the Certificate in Management Accounting (CMA) exam, the Certified Internal Auditor (CIA) exam, the Certified Information Systems Auditor (CISA) exam, the Certified Fraud Examiner (CFE) exam, the Certified Financial Planner (CFP) exam, and others. Students planning to take one or more of these exams are advised to talk to the department's faculty during their junior year so that they may select the electives appropriate for the respective certification(s).

The department encourages its students to gain "real world" **experience** prior to graduation through an internship or by participating in the Cooperative Education Program. More information about these programs is available either from the department's faculty or Career Services.

The department also encourages **interaction with accounting and information systems professionals** by sponsoring three student organizations: Accounting Society; National Association of Black Accountants; and Beta Alpha Psi, the national honorary and professional society dedicated to the advancement of the accounting profession. These organizations and other campus groups provide multiple opportunities for developing leadership skills and interacting with accounting and information systems professionals.

The department encourages students to gain a **global perspective** of business through modules on international issues in our courses, by participation in the college's International Business Minor and/or by participating in one or more of the college's study abroad programs. Our

goal is to encourage our students to become well-rounded professionals who will become leaders in their chosen careers.

Lastly, many of the department's 7,000 plus alumni have generously contributed to a variety of scholarships for accounting and information systems majors. Each year the department awards over $500,000 in scholarships to our students.

Course Requirements

Students graduating from the Department of Accounting and Information Systems must have a minimum quality credit average (GPA) of 2.00 in upper-division (3000 and 4000 level) accounting and information systems courses (the in-major GPA) as well as an overall GPA of 2.00 for all courses taken at Virginia Tech.

During their sophomore year, students in the Accounting & Information Systems major must select one of the three options: Accounting & Auditing (AAA), Tax Compliance & Planning (TCP), or Accounting Information Systems & Controls (ASYS). These options are more fully described below. There are no options under the Accounting & Business Analysis (ABA) major.

Degree Requirements

The graduation requirements in effect during the academic year of admission to Virginia Tech apply. Requirements for graduation are listed under the Programs tab in the undergraduate catalog for the appropriate year of entry.

Accounting & Information Sytems Major - Accounting & Auditing Option (AAA)

The Accounting & Auditing Option prepares students for careers in the preparation, reporting, audit, analysis, and use of financial information. Graduates from the Accounting & Auditing Option go on to careers as accountants, auditors, chief financial officers, consultants, controllers, cost accountants, financial analysts, forensic accountants, partners, business owners, treasurers, etc.

Accounting & Information Systems Major - Tax Compliance & Planning Option (TCP)

The Tax Compliance & Planning Option prepares students for careers in individual and business tax planning, compliance, and consulting. Graduates from the Tax Compliance & Planning Option go on to careers as tax preparers, tax consultants, financial planners, partners, etc.

Accounting & Information Systems Major - Accounting Information Systems & Controls Option (ASYS)

The Accounting Information Systems & Controls Option is an innovative systems program designed to prepare students for careers in assurance and advisory services pertaining to corporate technologies as well as related business processes. Graduates from the Accounting Information Systems & Controls Option go on to careers as information systems auditors, information systems professionals in enterprise risk assurance services, forensic accountants, consultants, partners, etc.

Accounting & Business Analysis Major (ABA)

The Accounting & Business Analysis Major allows students to select electives in the field of accounting as well as related disciplines to build a specialized background in Accounting Analytics, Artificial Intelligence & Accounting, Sustainability Accounting, or other emerging areas in accounting. This major also supports traditional corporate accounting careers such as cost accountant, internal auditor, management consultant, budget analyst, etc.

- Accounting & Information Systems Major with Accounting & Auditing Option (https://catalog.vt.edu/undergraduate/pamplin-college-business/accounting-information-systems/bs-accounting-option-accounting-auditing/)
- Accounting & Information Systems Major with Tax Compliance & Planning Option (https://catalog.vt.edu/undergraduate/pamplin-college-business/accounting-information-systems/bs-accounting-option-tax-compliance--planning/)
- Accounting and Information Systems Major with Accounting Information Systems & Controls Option (https://catalog.vt.edu/undergraduate/pamplin-college-business/accounting-information-systems/bs-accounting-option-accounting-information-systems-controls/)

Head: Robert H. Davidson
Curling Visiting Professor: J.A. Pittman
John E. Peterson Professor: J.R. Joe
KPMG Professor: R. Barkhi
R. B. Pamplin Professor of Accounting and Information Systems: F. Belanger and R.H. Davidson
Thomas M. Wells and Kathy Dargo Professors: S. Bhattacharjee and J. J. Maher
University Distinguished Professor: F. Belanger
Wayne E. Leininger Professor: L.L. Lisic
Professors: S.D. Sheetz and L.G. Wallace
Associate Professors: A.A. Acito, J. Huang, S.E. Stein, L. Tan, D.P. Tegarden, and M.D. Vance
Assistant Professors: M.J. Erickson, M.K. Harding, S.M. Hillison, M.R. Lowry, and K. Walker
Collegiate Assistant Professors: D.P. Garner
Visiting Assistant Professor: M.A. Cobabe
Professors of Practice: D.R. Compton and N.A. Rogers
Associate Professors of Practice: J.M. Lacoste
Assistant Professors of Practice: R.A. Brassine, S.L. Ferris, G.J. Kogan, E.A. Martin, J.P. Sharp, and J.L. Shortt
Career Advisor: R. H. Davidson (231-6591)

Undergraduate Course Descriptions (ACIS)

ACIS 1004 - Accounting Foundations (3 credits)
Fundamentals of accounting, the language of business, including what accounting information is, how it is developed, how it is used and what it means. Financial Accounting including the application of accounting principles for real world, complex business transactions to classify these transactions, reflect their economic value, produce basic financial statements, evaluate financial position and make fundamental interpretations. Managerial Accounting including cost behaviors, budgeting and other management reporting to assist in internal decision making and performance analysis. Attention to accountants codes of ethics applied throughout. Emphasis placed on non-Business majors becoming informed users of accounting information. No credit will be given for ACIS 1004 if taken with or after ACIS 2115 or ACIS 2116.
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 1104 - Careers in Accounting and Information Systems (1 credit)
Overview of career options in the accounting field. Real life perspective from industry expert guest speakers. Career skills and training requirements. Job search strategies. Job search strategies. Job market analysis. Effective professional materials creation. Pass/Fail only.
Instructional Contact Hours: (1 Lec, 1 Crd)

ACIS 1504 - Introduction to Business Analytics and Business Intelligence (3 credits)
Foundational data analytics using Microsoft Excel. Utilizes the data analytics framework and many Excel functions to address various business problems. Introduction to big datasets, how to navigate them, and the many complexities of using them, including relevant ethical issues. Identification and construction of various data visualizations and charts to be used in presentations.
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ACIS 2024 - Small Business Accounting (3 credits)
Accounting to support starting and operating a small business. Includes setting up accounting records, creating budgets, pricing products and services, tracking revenues and expenses, planning for taxes, and accounting for borrowing, inventory, payroll, and long-term assets. Emphasis on performance evaluation using mathematical models including financial statements, budget variance models, and financial ratios. Accounting presented in compliance with Generally Accepted Accounting Principles (GAAP) and accountant's codes of ethics to support the prevention and detection of fraud.
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 2115 - Principles of Accounting (3 credits)
Introduction to financial and managerial accounting. 2115: Emphasis on the financial accounting cycle. Discusses accounting information uses, fraud, and internal controls. Analysis of financial statement elements: assets, liabilities, stockholders' equity, revenues, and expenses. 2116: Emphasis on budgeting and accounting information decision-making. Discusses management accounting and cost concepts. Use of job order costing and cost value profit relationships. Use of variable costing and segment reporting. Create external financial reporting documents.
Corequisite(s): ACIS 1504
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 2116 - Principles of Accounting (3 credits)
Introduction to financial and managerial accounting. 2115: Emphasis on the financial accounting cycle. Discusses accounting information uses, fraud, and internal controls. Analysis of financial statement elements: assets, liabilities, stockholders' equity, revenues, and expenses. 2116: Emphasis on budgeting and accounting information decision-making. Discusses management accounting and cost concepts. Use of job order costing and cost value profit relationships. Use of variable costing and segment reporting. Create external financial reporting documents.
Prerequisite(s): ACIS 2115
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 2124 - Nonprofit Accounting and Financial Management (3 credits)
Accounting to support nonprofit companies. Includes, setting up nonprofit accounting records, identifying internal controls, and tax considerations. Nonprofit tracking revenues and expenses, grants, borrowing, payroll, and long-term assets. Emphasis on nonprofit performance evaluation using mathematical models including financial statements, budget variance models, and financial ratios. Use of ethical framework decision-making. Evaluation of government funding sources. No credit will be given for ACIS 2124 if taken with or after ACIS 4124.
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 2504 - Introduction to Accounting Analytics (3 credits)
Design and creation of models used to perform accounting analytics. Cleansing, transformation, organization, analysis, and reporting of accounting data using analytics tools such as spreadsheets, programming, and accounting software applications. Display of accounting data using visualization techniques.
Prerequisite(s): ACIS 1504
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 2954 - Business Study Abroad (1-19 credits)
This course provides students with an international business experience. The course examines the accounting and information systems issues that impact the multinational business. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. Content will vary between semesters. Pre: Instructors consent and the completion of 24 semester hours with a minimum GPA of 3.0 or departmental consent. May be repeated for a maximum of 9 credit hours.
Instructional Contact Hours: Variable credit course
Repeatability: up to 9 credit hours

ACIS 3115 - Intermediate Financial Accounting (3 credits)
Intermediate financial accounting. 3115: In-depth analysis of basic concepts of external financial reporting. Includes asset and related transaction analysis and preparation of financial statements in accordance with generally accepted accounting principles. Discusses the historical development accounting theory and practice as well as discussion and exploration of international accounting standards and ongoing and potential developments in accounting practice. 3116: In-depth analysis of liability, equity, and tax related transactions and their subsequent impacts on financial reporting. Interpret financial accounting standards including requirements to adjust financial statements due to errors and corrections. Prepare the statement of cash flows in accordance with generally accepted accounting principles. Course credit will not be awarded for both ACIS 3115 and ACIS 4194.
Prerequisite(s): ACIS 2115
Corequisite(s): ACIS 2504
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 3116 - Intermediate Financial Accounting (3 credits)
Intermediate financial accounting. 3115: In-depth analysis of basic concepts of external financial reporting. Includes asset and related transaction analysis and preparation of financial statements in accordance with generally accepted accounting principles. Discusses the historical development accounting theory and practice as well as discussion and exploration of international accounting standards and ongoing and potential developments in accounting practice. 3116: In-depth analysis of liability, equity, and tax related transactions and their subsequent impacts on financial reporting. Interpret financial accounting standards including requirements to adjust financial statements due to errors and corrections. Prepare the statement of cash flows in accordance with generally accepted accounting principles. Course credit will not be awarded for both ACIS 3115 and ACIS 4194.
Prerequisite(s): ACIS 3115
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 3314 - Tax Impact on Decisions (3 credits)
Introduction to federal taxation for individuals and business entities with an emphasis on effective tax planning strategies. IRS tax compliance and discussion of other tax authorities. Individual tax overview includes filing status, gross income, exclusions, and deductions. Business tax overview includes business entity types, filing requirements, business income, deductions, accounting methods, property acquisitions, cost recovery, and property dispositions. Properly classify corporate operations to compute corporate taxable income.
Prerequisite(s): ACIS 3115
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 3504 - Accounting Systems and Controls (3 credits)
Examines system design concepts and methods including an understanding of basic control structures. Covers specific accounting cycles and computerized transaction processing systems. Analyzes controls for manual and computerized systems including database systems.
Prerequisite(s): ACIS 2115
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 3554 - Networks, Telecommunications and Security (3 credits)
Provides an introduction to computer networks and data communications in business. Topics include mechanisms for reliable data transfer, network topologies and technologies, and a comprehensive treatment of inter-networking. Additional topics include packet switching, and cloud, edge, and advanced networking. Security issues related to using computer networks are discussed, along with network design issues, and methodologies for network applications. Duplicates BIT 4554.
Prerequisite(s): BIT 2405 or ACIS 3504 or BIT 2164 or CS 2164 or PSCI 2164
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: BIT 3554

ACIS 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ACIS 4024 - Information Systems Audit and Control (3 credits)
An introduction to the fundamentals of information systems auditing and controls. Emphasis on information systems controls and general application controls. Employment of computer assisted audit tools, techniques, and reporting languages. Implementation of different types of audit approaches including on line and continuous auditing as well as fraud and forensic auditing. Exposure to risk assessment, system-based guidelines, and professional standards in the field of information systems auditing. Examination of the implementation and deployment of information systems.
Prerequisite(s): ACIS 3504 and ACIS 4414
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4114 - Advanced Financial Accounting (3 credits)
Detailed analysis of external financial reporting. Study of debt and equity investments, derivatives, and foreign currency. Proper application of Securities and Exchange Commission reporting regulations.
Prerequisite(s): ACIS 3116
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4124 - Governmental and Nonprofit Accounting (3 credits)
Detailed analysis of U.S. state and local governmental, nonprofit, and federal accounting. Focus on entity characteristics, regulatory environment, fund accounting, financial transactions, and financial statements.
Prerequisite(s): ACIS 3115
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4194 - Analysis of Financial Statements (3 credits)
Analysis of financial statements including how to interpret and assess a company's results of operations, financial condition, and cash flows. Construction and use of financial ratios for use in various contexts. Development of reports comparing financial performance across companies and over time to aid in evaluating investments in companies' debt or equity. Course credit will not be awarded for both ACIS 3115 and ACIS 4194.
Prerequisite(s): FIN 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4214 - Cost Planning and Control (3 credits)
The purpose of this course is to help the student develop an understanding of the role of accounting in the management process, an understanding of cost accounting systems, an understanding of cost behavior, an understanding of alternative accounting systems, and the usefulness of costs involved in non-routine decision-making.
Prerequisite(s): ACIS 2116 and ACIS 2504 and BIT 2406
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4344 - Tax for Financial Planners (3 credits)
Overviews income tax concepts relevant to financial planning for individuals who are investors, employees, and business owners. Topics include income tax fundamentals for individuals, taxation of the sale of property, taxation of business entities, taxation of trusts, and overview of the federal transfer tax on estates and gifts. Duplicates some material in ACIS 4314. Course credit will not be awarded for both ACIS 4314 and ACIS 4344.
Prerequisite(s): FIN 3104
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4364 - Taxation of Business Operations (3 credits)
Introduction to the tax issues for various operating models. Analysis from a tax perspective of formation, operation, distribution of earnings, business unit acquisitions and divestitures, and liquidation. Entity types discussed include partnerships, S Corporations, regular (C) Corporations and not for profit entities. Emphasis on how to report tax results to the applicable government(s) as well as the GAAP accounting of the tax results. Initial exposure to multistate taxation, the U.S. taxation of non-US activities, and estate and gift taxation.
Prerequisite(s): ACIS 3314
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4414 - Financial Statement Auditing (3 credits)
Study of external financial statement auditing, professional code of conduct, audit evidence considerations, internal control, fraud, and transaction cycles, and audit reporting.
Prerequisite(s): ACIS 3115 and ACIS 3504
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4444 - Forensic Accounting (3 credits)
This course provides students experience in forensic accounting, commonly used computer forensic software, forensic techniques, litigation support, fraud risk management, fraud investigation, and the related audit tools.
Prerequisite(s): ACIS 3115
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4454 - Artificial Intelligence in Accounting and Auditing (3 credits)
An introduction to Artificial Intelligence to address real-world problems in accounting and auditing. Receive hands-on experience applying AI tools and processes used in auditing and assurance through class discussions, case analyses, and projects. Topics covered include the application of AI tools for analysis of financial data and internal controls. Obtain a base level understanding of how to use AI in audit and business settings, how to evaluate the impact of AI use on audit quality, and how client use of AI impacts audit risk. Overview of client confidentiality, ethics, opportunities, limitations, and challenges associated with the use of AI in auditing settings.
Prerequisite(s): ACIS 4414 and ACIS 3115 and ACIS 3504
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4514 - Database Management Systems (3 credits)
Introduction to database management systems and their use in business. Topics covered include data modeling, normalization, SQL, transaction management and concurrency control, security issues, physical data organization, query optimization, hierarchical queries, distributed database management systems, object-oriented databases, client/server databases, multidimensional databases, data mining, data warehousing, and database administration.
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4544 - Applied Accounting Analytics (3 credits)
Application of analytics software and methodologies to address real-world based accounting activities. Examination of accounting scenarios to determine an appropriate analytic approach. Emphasis on commonly used accounting analytics software to apply the extract, transform, and load process on data. Implementation of analytics software to analyze accounting data, and evaluation and communication of the results through data visualizations.
Prerequisite(s): ACIS 2504 and ACIS 3115
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4654 - Accounting Analytics (3 credits)
Design and development of accounting systems using relational database management tools. Extraction and analysis of accounting data using queries, analytics, and visualization techniques. Application of accounting data analytics concepts using commercially available tools such as audit management software and current visualization tools. Proper preparation of data and use of analytics algorithms and visualization techniques to inform decision making.
Prerequisite(s): ACIS 2504 and ACIS 3504 and ACIS 3115
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4664 - Sustainability Accounting (3 credits)
Introduction to procedures for extracting and quantifying quality of corporate sustainability information and assessment of compliance with current accounting standards. Analysis of corporate sustainability data and impact on Financial Statements for corporate environmental and social justice decision-making. Introduction and differentiation of U.S. and international regulatory bodies promulgating sustainability standards. Discussion of disclosure components, frameworks, and standards concerning accounting and business-related sustainability information. Exploration of incremental decision usefulness of sustainability information for various stakeholders beyond traditional accounting financial statements. Presentation of attestation and assurance methodologies related to disclosed corporate sustainability accounting information.
Prerequisite(s): ACIS 3115 and ACIS 3504
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4684 - Information Systems Security and Assurance (3 credits)
An examination of the concepts, technologies, and applications of security and assurance in information systems. Topics include the security threats against information systems; tools used by intruders; computing platforms and security; encryption; securing the transaction and the server; audit tools to detect intrusions; responses to attacks; legal, ethical and international issues; and the future of information systems security and assurance.
Instructional Contact Hours: (3 Lec, 3 Crd)

ACIS 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

ACIS 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ACIS 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

ACIS 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Business Information Technology

Our Website (http://www.bit.vt.edu/)

Overview

The Department of Business Information Technology offers an undergraduate major in business information technology with options in computer-based decision support systems, operations and supply chain management, and cybersecurity management and analytics. The department also offers and staffs business courses such as business analytics and modeling, systems analysis, database management, and data governance, privacy and ethics. Specific Business Information Technology (BIT) courses are listed below.

The department participates in the Cooperative Education Program in which qualified students may alternate semesters of study with semesters of professional employment.

Business Information Technology

The curriculum in business information technology is designed to provide the student with expertise in the quantitative and technological aspects of management, specifically the extensive use of computers for solving business problems and making managerial decisions. The name business information technology implies the application of scientific principles and techniques, mathematics, and computing to the management function with the objective of increased efficiency and productivity. Thus, the student of business information technology not only learns various quantitative techniques and models to apply to managerial problems, but also a logical and scientific approach to managerial decision-making. The curriculum provides training both for individuals interested in pursuing careers in business or government and for individuals interested in pursuing graduate or professional degrees. Students majoring in business information technology may choose one of three options reflecting their particular career objectives and interests.

Option I - Decision Support Systems (BIT-DSS)

This option educates the student in the design, implementation, and use of computerized information systems, decision support systems, and artificial intelligence to support contemporary business managers in the decision-making process. Special emphasis is placed on increased productivity and effectiveness through the use of models, quantitative data, and analytics embedded within a computerized decision support system. Graduates of this program will be prepared to pursue careers in business and industry where information technology, data analytics and computer-aided decision-making is an essential component of the managerial function.

Option II - Operations and Supply Chain Management (BIT-OSM)

This option educates students in the management of activities directly related to the creation and distribution of goods and services. The curriculum of Option II is designed to provide students with expertise in the planning and control of business processes within a firm and across its global supply chain. Emphasis is placed on applying IT, analytics and process analysis skills to improve the quality and productivity of business firms and their supply chain partners. Graduates of this program will be prepared to pursue careers as operations managers, business process managers, project managers, supply chain analysts, and quality, logistics, inventory or procurement managers in business, industry, and government.

Cybersecurity Management and Analytics Major (BIT-Cyber for Northern Virginia)

This option emphasizes business processes and data analytics as applied to cybersecurity management. BIT-Cyber students will gain proficiency in the business management of cybersecurity within an organization, including knowledge management, setting cyber policies, risk management, incident business response, using data to understand attacks on business assets, and overall management of the cybersecurity function within a business. Graduates of the program will be prepared for jobs as analysts, auditors, managers and planners within the cybersecurity function.

- Business Information Technology Major with Computer-Based Decision Support Systems Option (p. 670)
- Business Information Technology Major with Operations and Supply Chain Management Option (p. 673)
- Cybersecurity Management and Analytics Major (p. 676)

Head: Q.J. Nottingham
Arthur Andersen & Co Alumni Professor: A. Wang
R. B. Pamplin Professor of Management Science: C.W. Zobel
Sonny Merryman Professor of Business Information Technology: L.Z. Khansa
Suzanne Parker Thornhill Professor of Business Information Technology: P.B. Lowry
Verizon Professor of Business Information Technology: V. Venkatesh
Professors: P. Ghandforoush, T.L. James, R.S. Russell, A.O. Vance, A.G. Wang
Associate Professors: A.S. Abrahams, I. Adjerid, J.K. Deane, B.J. Hoopes, Q.J. Nottingham, O. Seref
Assistant Professors: R. Aljafari, M.M. Gordon, A.Jang, J. Liu V. Mindel and W. Shen
Collegiate Professor: M.M.H. Seref, D.G. Simpson
Collegiate Associate Professor: A .Arnette, W.H. Baker, , J.M. Teets
Collegiate Assistant Professor: H. Zhang
Associate Professor of Practice: B.M. Fraticelli, J. Sudweeks
Assistant Professors of Practice: M. Flora, J.D. Kern, J.W. Monday, R. Raman, D.C. Simundza
Senior Instructor: L.L. Clark
Assistant Director of BIT-Cyber Program in Northern Virginia: K. Wrightsman
Career Advisor: Q.J. Nottingham (540-231-6596)

Undergraduate Course Descriptions (BIT)

BIT 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BIT 2104 - Careers in Business Information Technology (1 credit)
Career opportunities and job search strategies in the business information technology and operations fields with reference to the BIT courses that best help the student identify a career in his/her selected field. Includes career skills development and resume writing. Pass/Fail only.
Instructional Contact Hours: (1 Lec, 1 Crd)

BIT 2164 - Foundations of Contemporary Security Environments (3 credits)
Introduction to multiple analytical perspectives on contemporary security environments, including political, legal, ethical, technical, environmental and historical and cultural perspectives relative to the conception, design and implementation of security solutions, practices, and policies. Emphasizes applying and analyzing the effectiveness of diverse procedures, tools and policies used in security and privacy solutions, decision-making, risk management and operational policy to mitigate local, national, international and global threats.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 5F Quant & Comp Thnk Found., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CS 2164, PSCI 2164

BIT 2405 - Introduction to Business Statistics, Analytics, and Modeling (3 credits)
Introduction to basic statistical (inference) tools, analytics techniques, and modeling necessary in managerial decision-making. The decision-making aspect of the course, while utilizing quantitative/computational thinking, will emphasize ethical reasoning. Topics include, but are not limited to, descriptive statistics, elementary probability theory, sampling and sampling distributions, portfolio management, hypothesis testing, regression analysis, analysis of variance, big data, and data analytics.
Prerequisite(s): MATH 1524 or (MATH 1225 and MATH 1226)
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 2406 - Introduction to Business Statistics, Analytics, and Modeling (3 credits)
Overview of analytic models and solution techniques in decision science. Discussion of descriptive and predictive analytics goals and methods. In addition to overview of mathematical modeling and solution techniques, discussions will include considerations of adapting analytics methods to various global and ethical business applications. Students should develop skills and appreciation of the use of data and analytics for problem solving.
Prerequisite(s): BIT 2405 or (STAT 3005 and STAT 3006) or STAT 3604 or (STAT 3615 and STAT 3616) or STAT 4604
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 2554 - Linux, Shell Scripting, and Securing the OS for Business (3 credits)
Build foundational knowledge of the Linux operating system and file system concepts necessary for cybersecurity business professionals. Discuss the purpose, use, architecture, and navigation of the Linux file system. Build skill using a command line operating system for system administration and security management tasks. Employ file and directory management, process management, text manipulation, and permissions in the Linux operating system. Create shell scripts for process automation, configuration and process management, and security applications. Hands-on experience securing and hardening the Linux operating system.
Prerequisite(s): BIT 2405
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 2954 - Business Study Abroad (1-19 credits)
This course provides students with an international business experience. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. This course is intended for students who want to develop information technology or operations management related free electives. Pre: Instructors consent and the completion of 24 semester hours with a minimum GPA of 3.0 or departmental consent.
Instructional Contact Hours: Variable credit course

BIT 3414 - Operations and Supply Chain Management (3 credits)
Study of the process directly related to the creation and distribution of goods and services. Increasingly, these operations are taking place outside the boundaries of a traditional enterprise. This course teaches students how to analyze processes, ensure quality, create value, and manage the flow of information, products and services across a network of customers, enterprises and supply chain partners.
Prerequisite(s): BIT 2406 and ACIS 2116 and ECON 2006
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3424 - Introduction to Business Analytics Modeling (3 credits)
Introduction of modeling of problems encountered in business analytics. Statistical and optimization modeling, computer solution, and analysis of business problems. Uses spreadsheet and database software to facilitate the modeling and solution of these problems.
Prerequisite(s): BIT 2406
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3434 - Advanced Modeling for Business Analytics (3 credits)
Study of selected, advanced topics in decision modeling and business analytics. Emphasis on model formulation, solution techniques, interpretation of results and comprehensive approaches to problem-solving. Integer, multi-criteria, and non-linear programming as well as network analysis and heuristics. Includes case studies and use of Excel as the primary analytical tool.
Prerequisite(s): BIT 2406
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3444 - Advanced Business Computing and Applications (3 credits)
Study of selected advanced topics in business computing. Construction of business applications using an advanced application development environment such as Visual Studio.net. Coverage of computer terminology, HTML, and Internet applications. The course builds computer literacy and strong programming skills. Junior standing required.
Prerequisite(s): BIT 3424 and (CS 1054 or CS 1064 or CS 1114)
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3454 - Business Process Improvement (3 credits)
Examines the technical aspects of business process improvement focusing on improvement strategies, quality control, data analysis and mining, and maturity models. Emphasizes analytical techniques for business process design, control, and improvement.
Prerequisite(s): BIT 3414
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3464 - Enterprise Planning and Control Systems (3 credits)
The study of the design, analysis and implementation of enterprise-wide resource planning and control systems. The course examines decision support models for production planning, master scheduling, inventory control, shop floor control and related topics in planning and control. The course emphasizes the application of information technologies such as ERP, MRPII, CIM to operations planning and control.
Prerequisite(s): BIT 3414
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3474 - Data Management and Business Analytics in Python (3 credits)
Python for data wrangling and data analysis to support business decisions. Illustrate proficiency in Python, basic skills such as variables, functions, conditionals, loops, libraries, and data structures. Leverage Python skills to learn how to manage data. Learn how to clean, transform, and augment data, as well as how to use Python to obtain data, in particular to work with application programming interfaces (APIs) and do web scraping. Learn how to use Python to conduct data analysis and for plotting and visualization of data. Apply Python for time series data analysis and data modeling using libraries.
Prerequisite(s): CS 1064 and BIT 2406
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3484 - Advanced Business Analytics in Python and R (3 credits)
Python and R for advanced data analysis, including predictive analytics and machine learning, to support business decisions. Use Python and R to conduct exploratory data analysis. Learn how to handle data, sampling distributions, statistical experiments, and significance testing in Python and R. Apply simple and multiple linear regression and related concepts such as confidence intervals, dummy variables, correlation, multicollinearity, confounding variables, interactions and main effects, and outliers. Learn how to apply classification, specifically NaÏve Bayes, discriminant analysis, and logistic regression. Learn how to apply model evaluation techniques such as ROC curves, AUC, and lift. Introduction to and application of machine learning, including k-nearest neighbors, tree models, principal component analysis, and hierarchical clustering.
Prerequisite(s): BIT 3474
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3514 - Systems Analysis (3 credits)
Study of the current technologies for designing and developing computer-based business systems. Topics will include process, structural, behavioral, and conceptual data modeling methodologies such as Uniform Modeling Language (UML) and important design-related issues such as data flows and system capabilities. Design issues will be explored through class projects. This course duplicates BIT 4524.
Prerequisite(s): CS 1054 or CS 1064 or CS 1114
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3524 - Database Management and Design (3 credits)
Study of the design of databases and data structures for supporting business applications. Basic database structure and design, structured query language, database management systems, integration of backend database servers, data warehousing and mining, on-line analytical processing, and database application, security, and management. This course duplicates BIT 4514.
Prerequisite(s): BIT 2406
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3554 - Networks, Telecommunications and Security (3 credits)
Provides an introduction to computer networks and data communications in business. Topics include mechanisms for reliable data transfer, network topologies and technologies, and a comprehensive treatment of inter-networking. Additional topics include packet switching, and cloud, edge, and advanced networking. Security issues related to using computer networks are discussed, along with network design issues, and methodologies for network applications. Duplicates BIT 4554.
Prerequisite(s): BIT 2405 or ACIS 3504 or BIT 2164 or CS 2164 or PSCI 2164
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: ACIS 3554

BIT 3614 - Election Security (3 credits)
Election system and historical voting in the U.S., their inherent vulnerabilities, and how to locate and prepare against poor election security practices. Trust and cultural significance of voting in a democratic America. The election system security standards and regulations including the Virginia Department of Elections Voting Systems Security Policies, Standards, Guidelines, and Locality Election Security Standards (LESS). Threats, vulnerabilities, and attacks on election infrastructures and how they may be evaluated and mitigated. Security controls for voting systems, voter registration databases, and associated IT infrastructure and systems used to manage elections while exploring cybersecurity careers in the public sector. Prepares selected students for a summer internship supporting the Cyber Navigator Program with a specific Virginia Locality. Primarily designed for students majoring or minoring in cybersecurity, the course is open to all students of any major.
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3664 - Cybersecurity Management I (3 credits)
Focuses on building general cybersecurity knowledge with an emphasis on cybersecurity management. This course will teach students about the categories of security controls. Students will be introduced to the necessity of cybersecurity through an introduction to cybersecurity concepts (e.g., threats, vulnerabilities, risk) and using basic tools to identify cybersecurity weaknesses (security assessments, passive and active reconnaissance, and vulnerability scanning). Students will learn about security policies and risk assessments and will perform a risk assessment. Students will be introduced to types of social engineering and malware tools and techniques. This class will introduce the legal and ethical aspects of security and privacy and the tools used to protect data privacy. Students will also learn to develop policies and procedures to manage hosts and explore how to harden one. This course will also introduce students to the management of internet of things (IOT) and cloud technologies, human resources security, incident response and forensics, physical and infrastructure security, and cybersecurity resilience.
Prerequisite(s): BIT 2554 and (BIT 3554 or ACIS 3554)
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3674 - Cybersecurity Management II (3 credits)
Focuses on building general cybersecurity knowledge with an emphasis on the management and implementation of technical cybersecurity controls. This course will build knowledge of and teach students how to implement symmetric and asymmetric encryption. Students will learn about authentication and access controls and how to implement them, as well as understand and implement the network security protocols, standards, and applications that help support them. The course will also teach students how about database security practices and how to implement them, as well as build their understanding of firewalls, intrusion detection and prevention, buffer overflows, software security, wireless network security, and mobile security.
Prerequisite(s): BIT 3664
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

BIT 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BIT 4164 - Future of Security: Integrative Solutions for Complex Security Systems (3 credits)
Identification and analysis of complex, real-world security problems and threats to people, organizations, and nations across multiple domains, roles and future scenarios. Crisis communication, decision making tools, ethical principles and problem-solving methods to respond, assess options, plan, scope, and communicate before, during and after conflicts, disasters and attacks. Use of an experiential learning facility, and participation in a reality-based team simulation of cascading security and disaster events.
Prerequisite(s): PSCI 2164 or BIT 2164 or CS 2164
Pathway Concept Area(s): 1A Discourse Advanced, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: CS 4164, PSCI 4164

BIT 4424 - Business Information Visualization and Analytics (3 credits)
Basic perception and design principles and techniques for information visualization, with an emphasis on the application of visualization software for data exploration and the development of analytical skills for business. Includes hands-on exposure to information visualization and statistical software.
Prerequisite(s): BIT 2406
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4434 - Computer Simulation in Business (3 credits)
In-depth study of the application of computer simulation techniques to business decision making and process improvement. The theory of computer simulation and statistical analysis of results are included. Attention is focused on using simulation software stressing application to specific problems.
Prerequisite(s): BIT 3414
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4444 - Web-Based Decision Support Systems (3 credits)
Study of current technologies for designing and constructing interactive, Internet-based systems for supporting business decisions. Topics may include the operation of the Internet, server-side programming, client-side programming, server-side scripting, XML, XHTML, database integration, COM, CGI, and others. Design issues will be explored through a class project.
Prerequisite(s): BIT 3444
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4454 - Business Analysis Seminar in IT (3 credits)
Comprehensive treatment of Decision Support Systems (DSS) as managerial tools, particularly in an e-commerce environment. Emphasis is at the builder and user level. A primary emphasis is on problem solving through the integration of various quantitative techniques as well as on IT concepts. The course includes a comprehensive project using state-of-the-art software.
Prerequisite(s): BIT 3434 and BIT 4444 and BIT 3524
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4464 - Advanced Supply Chain Management (3 credits)
Advanced study of efficient methods for streamlining the production and delivery of products and services across functions, enterprises and global boundaries. Topics include the facilities, functions, technologies, and activities involved in creating and delivering products and services, especially in a digital marketplace. Designing and managing a network of suppliers across enterprises is discussed, along with the information systems, risk management and planning issues involved.
Prerequisite(s): BIT 3414
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4474 - Global Operations and Information Technology (3 credits)
This course includes concepts and issues critical in the globalization of business operations and information technology. Topics covered include the organization of global operations, cultural and national comparisons, planning global operations, facilities location, product development, technology transfer, global communication links, transborder data flow, international information systems, and other emerging operations and information technology issues.
Prerequisite(s): BIT 3414
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4484 - Project Management (3 credits)
Study of efficient methods for planning and controlling projects. Topics include project management and scheduling tools, project quality assurance, risk and cost control, resource constrained scheduling, definition and requirements analysis, task integration, and managing alliances. The application of information technology to project management and control is emphasized throughout the course.
Prerequisite(s): BIT 3414
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4544 - Artificial Intelligence, Machine Learning, and Deep Learning in BIT (3 credits)
Learn concepts and techniques related to artificial intelligence (AI), machine learning (ML), and deep learning (DL). Learn the fundamentals of AI, ML, and DL algorithms and how to apply them to problems of interest to majors in the business information technology (BIT) department. Understand and apply supervised (classification, regression) and unsupervised (clustering) machine learning, and applications of these techniques in business. Apply deep learning, for example, recurrent neural networks (RNN), generative adversarial networks (GAN), and convolutional neural networks (CNN).
Prerequisite(s): BIT 3484
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4604 - Data Governance, Privacy and Ethics (3 credits)
Examination of data analytics and automated decision making issues, across multiple technology contexts, through the lens of the humanities and ethics. Privacy, autonomy, data ownership, equality, and accountability. Decision making and exploration of questions of data ethics and data fairness throughout the data life cycle.
Prerequisite(s): BIT 2405 or CMDA 2014 or CS 1114 or CS 1054 or CS 1064
Pathway Concept Area(s): 2 Critical Thinking Humanities, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4624 - Cybersecurity Analytics for Business (3 credits)
Application of advanced analytics to cybersecurity in a business setting. Categorization of cyber threats and solutions. Data mining, visualization and machine learning applied to large data sets for anomaly detection, threat prediction, and incident response analysis. Investigation of adversarial machine learning. Selection of appropriate analytics techniques and security platforms. Consideration of business and ethical issues.
Prerequisite(s): BIT 3674 or BIT 4614 or CS 4264
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4644 - Digital Forensics and Incident Response Management (3 credits)
Focuses on building knowledge about the field of digital forensics and incident response. Students will learn about cybercrime and the digital forensics process. The course will build knowledge of, and teach students how to implement, digital forensics techniques and tools. Students will learn about file systems, and how to work with Windows, Linux, and Macintosh file systems and forensic tools to acquire and analyze forensic evidence. Students will learn how to apply forensic tools and techniques to network, mobile, internet of things (IOT), cloud, email, social media, and dark web data and services. The course will also build knowledge about how to manage incident response capabilities such as computer security incident response teams (CSIRTs), incident response planning, guidance for processing crime and incident scenes, and how to compile forensic reports and integrate forensically obtained knowledge into future incident response planning.
Prerequisite(s): BIT 3674
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4654 - Penetration Testing and Ethical Hacking for Business (3 credits)
Focuses on building competence in penetration testing for business. This course will teach principles of ethical hacking, such as system reconnaissance, enumeration, vulnerability scanning, and exploitation. Students will learn how to find and exploit vulnerabilities in web applications, operating systems, wireless networks, as well as perform social engineering and physical security assessments. Students will also perform penetration tests and learn to write reports for managerial audiences.
Prerequisite(s): BIT 3674
Instructional Contact Hours: (3 Lec, 3 Crd)

BIT 4854 - Analytics in Action (3 credits)
Problem-solving framework and analytic techniques for solving messy, unstructured, high-impact, real-world organizational/societal problems within an interdisciplinary, intercultural, experiential learning context. Definition of problem scope, objectives, need for change, ethical concerns, and diversity and inclusion issues; identification of stakeholders and their values; evaluation of decision tradeoffs; problem decomposition and hypothesis formulation; project planning and administration; data versus user requirements, ethical and inclusive decision making, data collection, preparation, and analysis; team roles and management; professional communication of insights, policy and action recommendations.
Corequisite(s): BDS 2005, CMDA 2014
Pathway Concept Area(s): 1A Discourse Advanced, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: MGT 4854

BIT 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

BIT 4964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BIT 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BIT 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

BIT 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

Business Information Technology Major with Computer-Based Decision Support Systems Option

Select three hours in Pathway 6a (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06A)		3
Select three hours in Pathway 6d (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G06D)		3
Pathways Concept 7 - Critical Analysis of Identity and Equity in the United States		
Select three hours in Pathway 7 (https://catalog.vt.edu/course-search/?attrs_pathways=attrs_pathways_G07) [3]		3
Subtotal		46
Total Credits		**125**

[1] Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

[2] Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

[3] Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

BIT DSS Electives

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation . Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs .

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps.html).

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation . Please refer to the Undergraduate Catalog for details.

Roadmap

First Year		
Fall Semester		**Credits**
ACIS 1504	Introduction to Business Analytics and Business Intelligence [1,2]	3

Total Credits		**125**

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/).

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting-ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling-BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics-ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting-ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling-BIT 2406 Introduction to Business Statistics, Analytics, and Modeling,ECON 2005 Principles of Economics-ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 BIT 4964 (Field Study) eligibility requirement: 2.5 minimum overall GPA. Each student is responsible for acquiring an appropriate internship. Enrollment in the field study course requires approval of the BIT field study coordinator. More information is available at https://bit.vt.edu/academics/undergraduate-programs/cyber/internship.html

4 Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in- major GPA are noted with a # footnote.

Overview

Finance is a specialty that works with the development, allocation and use of monetary resources within established legal and ethical frameworks, while understanding and mitigating the associated risks. Money is a critical component of the economic system and its flow is the sustaining force of the U.S. and global economy. Therefore, in working with how governments, corporations, intermediaries, and households utilize their financial assets finance professionals are an integral part of how the economy perpetuates the standard of living that we enjoy.

Traditionally there are three separate but related fields within finance:

1. corporate financial management or "business finance" which focuses on the internal decisions of companies to raise funds and invest in corporate assets;
2. investment management which focuses on the purchase and sale of stocks and bonds or their derivatives by individuals and institutions; and
3. financial services management, which focuses on the management and regulation of institutions and the role that financial institutions play in the economy.

The undergraduate program in Finance meets the requirements of students who desire specialized careers in financial management. Students gain expertise in finance, analytics, and accounting that are essential for success as a financial professional. The case-oriented focus of coursework requires students to apply their knowledge and strengthen their oral and written communication skills. The department offers majors in Finance, Financial Planning and Wealth Management, FinTech and Big Data Analytics, and Real Estate Finance. Students in the

Finance major select one or more options among Corporate Financial Management, Financial Accounting, Financial Risk Management, or Investment Management and Chartered Financial Analyst (CFA).

The curriculum offers courses in finance, insurance, and business law, but majors only in finance-related fields of study.

Degree Requirements

Students declare their major in Finance or one of three specialized finance majors:

- Financial Planning and Wealth Management
- FinTech and Big Data Analytics
- Real Estate Finance (double-major required)

Students who pursue a Finance major select different combinations of elective courses to fulfill the requirements of one or more of the four options offered. The four options are:

- Corporate Financial Management
- Financial Accounting
- Financial Risk Management
- Investment Management and Chartered Financial Analyst (CFA)

- Finance and Real Estate Major (p. 684)
- Finance Major with Corporate Financial Management Option (p. 687)
- Finance Major with Financial Accounting Option (p. 691)
- Finance Major with Financial Risk Management Option (p. 694)
- Finance Major with Investment Management and Chartered Financial Analyst Option (p. 697)
- Financial Planning and Wealth Management Major (p. 700)
- FinTech and Big Data Analytics Major (p. 703)

Wells Fargo Professor in Financial Risk Management: S. Mansi
Emeritus Professors: J. Hiller, A. Keown, D. Klock, R. Lytton, G. Morgan, D. Patterson, J. Pinkerton, D. Shome, and G.R. Thompson
Associate Professors: R.S. Billingsley, J.C. Easterwood, R. Edelen, B. Paye and J. Xu
Assistant Professors: G. Leonard, M. Lithell, A. MacKinlay, A. Pecora, N. Tran, and P. Ye
Assistant Professors and Russell & Arlene Oliver Junior Faculty Fellows: T. Beason and F. Cabezón
Assistant Professor and Stephen & Karen Jones Junior Faculty Fellow: Y. Tellez
Visiting Assistant Professor: F. Hood
Professors of Practice: S. Beach, M. Kender, C. Kennedy, D. Rodriguez and C. Spicer
Associate Professor of Practice: B. Hart and J. Malone
Assistant Professors of Practice: W. Coleman, B. Hart, J. Lineberry, and E. Wikle
Adjunct Professors: D. Anderson, M. Fleenor, E. Johnsen, E. McClanahan, J. Powell, A. Price and J. Showalter

Undergraduate Course Descriptions (FIN)

FIN 2114 - Investments and Financial Literacy (3 credits)
Examines budgeting; taxes; long- and short-term borrowing; credit card debt; student loan debt; ethical issues in both lending and investments; insurance; the investment process; the financial markets; investing in common stock, bonds, and mutual funds; major financial decisions, and retirement planning. Coverage of time value of money and risk and return will provide fundamental tools for valuation and financial decision-making.
Pathway Concept Area(s): 5F Quant & Comp Thnk Found., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 2164 - Survey of Finance and Career Planning (1 credit)
Career opportunities and job search strategies in the finance field with reference to the finance courses that best help the student identify a career in his/her selected field. Pass/Fail only.
Instructional Contact Hours: (1 Lec, 1 Crd)

FIN 2954 - Business Study Abroad (1-19 credits)
This course provides students with an international business experience. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. Pre: Instructors consent and the completion of 30 SH with a minimum GPA of 3.0 or departmental consent.
Instructional Contact Hours: Variable credit course

FIN 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FIN 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FIN 3054 - Legal and Ethical Environment of Business (3 credits)
This course examines the legal and ethical environment in which businesses operate. Topics include legal systems, dispute resolution, torts, contracts, agency, employment, business forms, property, ethical theories, decision-making and other selected subjects. Emphasis is placed on problem solving through the application of principles and reasoned analysis. Pre: Sophomore Standing.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3074 - Legal, Ethical, and Financing Issues for Entrepreneurs (3 credits)
Introduction of key legal, ethical, and financing topics for new ventures. Ethical decision making in entrepreneurial situations. Choosing among legal entities for financing and ownership goals. Company governance. Creating and protecting intellectual property. Identifying and choosing financing options for new ventures. Employment issues for entrepreneurial firms. Basics of contracts. Enterprise risk management and compliance. Exit strategies. Partially duplicates FIN 3054 (Legal and Ethical Environment of Business). Students may not receive credit for both courses. Sophomore Standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3104 - Introduction to Finance (3 credits)
Overview of financial decision-making process focusing on the creation of wealth. Topics covered include the time value of money, how stocks and bonds are valued, financial decision-making within a firm, an overview of financial markets, and investment banking. The course is designed for finance and non-finance majors.
Prerequisite(s): (ACIS 2115 and ECON 2005 and BIT 2405) or (ACIS 2115 and ECON 2005 and CMDA 2005) or (ACIS 2115 and ECON 2005 and STAT 3005) or (ACIS 2115 and ECON 2005 and STAT 3604) or (ACIS 2115 and ECON 2005 and STAT 3615 and STAT 3616) or (ACIS 2115 and ECON 2005 and STAT 4604) or (ACIS 2115 and ECON 2005 and STAT 4705 and STAT 4706) or (ACIS 2115 and ECON 2025H and BIT 2405) or (ACIS 2115 and ECON 2025H and CMDA 2005) or (ACIS 2115 and ECON 2025H and STAT 3005) or (ACIS 2115 and ECON 2025H and STAT 3604) or (ACIS 2115 and ECON 2025H and STAT 3615 and STAT 3616) or (ACIS 2115 and ECON 2025H and STAT 4604) or (ACIS 2115 and ECON 2025H and STAT 4705 and STAT 4706)
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3114 - Python/SQL for Data Analytics and Finance (3 credits)
A foundation in Python/SQL and the tools needed to implement a data-driven approach to financial problem solving. Emphasis on accessing external databases, merging databases, manipulating and transforming data, performing operations, generating an output or another dataset, and exporting in a readable or visual form. To prepare students to analyze datasets for making financial decisions.
Prerequisite(s): FIN 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3124 - Financial Planning for Professionals (3 credits)
Analysis of financial needs, from the context of the individual, household or small business owner, related to financial situation (cash management and use of debt), income taxes, risk management, retirement planning, investment planning, estate planning, and other special needs. Utilizes mathematical and computing skills. FIN 3134 may be taken prior to or concurrent with course. Sophomore Standing required.
Corequisite(s): FIN 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3134 - Financial Analytics (3 credits)
This course provides an understanding of the theory and practice of making financial decisions for corporations through the understanding of relevant data and applying computational and statistical methodologies to decision making. Topics include the time value of money, risk and return, security valuation, and interest rate determination. Some key concepts and computational and statistical modeling are completed in Excel. Pre: Sophomore standing.
Prerequisite(s): FIN 3104
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3144 - Investments: Debt, Equity and Derivatives (3 credits)
Risk, return and portfolio modeling theory, knowledge of financial securities and markets and the information and data contained within them. Introduction to mutual funds, financial securities, and markets. Application of financial computation and modeling through portfolio analysis, market efficiency and performance evaluation, bond valuation, term structure of interest rates, interest rate risk, security analysis and stock valuation, options, Black-Scholes option pricing model, and futures. Pre: Sophomore standing.
Prerequisite(s): FIN 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3154 - Corporate Financial Analytics and Strategy (3 credits)
This course provides the understanding of the types of financial management decisions that firms make, the environment in which decisions are made, the available choices and decision criteria, and valuation consequences of these choices through financial analytical modeling. Determination of a firm's optimal debt- equity ratio, estimation of cost of capital, evaluation of capital investments, payout policies, merger and acquisition decision-making, and sources of financing with emphasis on identifying and mitigating potential agency conflicts. Pre: Sophomore standing.
Prerequisite(s): FIN 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3174 - Finance Career Strategies (1 credit)
Analysis and research of career opportunities in financial industry. Study of future trends in careers in financial industry. Development of short and long-term career goals. Building and developing a professional network. Identify types of finance interviews. Ethical negotiation of job offers.
Instructional Contact Hours: (1 Lec, 1 Crd)

FIN 3204 - Risk and Insurance (3 credits)
Surveys the concept of risk as it applies to the nuclear family and as a socio-economic force in society. Risk management techniques utilizing social and proprietary insurance to neutralize the effect of risks inherent in daily life: termination or suspension of earnings, liability exposures, and potential losses of real and personal property values. Sophomore Standing required.
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3254 - Credit Risk Analysis (3 credits)
Analysis of the risks inherent in credit/lending decisions. Pricing of loans, appropriate documentation, and monitoring of the creditworthiness of businesses and individuals. Emphasis on making credit decisions and structuring of credit agreements.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 3954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

FIN 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FIN 4004 - Wills, Trusts, and Estates (3 credits)
Examines the control of assets through the creation and use of trusts, and the control of property through estate planning. The course emphasizes financial planning through estate management both personally and as a part of a business plan.
Prerequisite(s): FIN 3054 or FIN 3074
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4014 - Cyberlaw and Policy (3 credits)
Cyber law, ethics, and policy in a changing world. National and international methods of regulation and protection of fundamental rights. Legal, ethical, and policy issues for Internet governance, speech, privacy, cybersecurity, surveillance, electronic commerce, intellectual property, and cyberwar. Examination of current issues and texts in light of fundamental ethical and legal principles and global discourse. Pre: Junior standing.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4024 - Legal and Regulatory Aspects of ESG (3 credits)
Examines the legal and regulatory issues raised by Environmental, Social, Governance (ESG) aspects of investments and corporate finance. Specific attention is given to ESG's effect upon traditional corporate law principles, reporting and regulatory frameworks.
Prerequisite(s): (FIN 3054 or FIN 3074) and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4104 - Retirement Planning (3 credits)
Overview of planning needs, products, and strategies used by financial professionals to help businesses, small business owners, and individuals choose and implement an effective retirement plan. Must have prerequisite or permission of instructor.
Prerequisite(s): (FIN 3124 and ACIS 4344) or (FIN 3134 and ACIS 3314)
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4114 - Financial Planning Technology and Modeling (3 credits)
Use of professional software applications that support financial planning analyses, plan preparation, wealth management, and client relationships. Principles of personal investment portfolio research, construction, and performance applied to comprehensive financial planning and wealth management.
Prerequisite(s): FIN 3124 and FIN 3144
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4124 - Client Relationship Management (3 credits)
Investigation of socio-psychological factors and communication/interviewing strategies that foster trust-based relationships essential to the success of financial advisors and other financial service professionals. Graduate students are expected to have completed AAEC 3104 or FIN 3124 or an equivalent course or may enroll with permission of the instructor.
Prerequisite(s): FIN 3124
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4134 - Financial Planning Applications (3 credits)
Integration of financial planning content in the resolution of client situations in the context of ethical and compliant workplace practices. Utilizes a case analysis approach applying financial planning processes and procedures. Graduate students are expected to have similar background from equivalent courses or professional experience or may enroll by permission of the instructor. ACIS 4344 or FIN 4004 taken simultaneously with the course can be substituted for the prerequisites.
Prerequisite(s): FIN 3124 and FIN 3144 and FIN 3204 and ACIS 4344
Corequisite(s): FIN 4104, FIN 4114, FIN 4004
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4144 - International Financial Management (3 credits)
Explores the environmental challenges facing the financial manager of a multinational corporation and the tools and techniques developed to meet such challenges.
Prerequisite(s): FIN 3104 or FIN 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4154 - Real Estate Finance (3 credits)
This course introduces the fundamentals of both real estate financing and investment. Conventional mortgages as well as more creative financing methods will be analyzed. The secondary market for mortgages and relevant institutional factors also will be examined. Investment analysis of real estate will be viewed in a capital budgeting framework; appropriate tax law will be discussed as it affects real estate cash flows.
Prerequisite(s): FIN 3134
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4204 - Environmental, Social, and Governance Financial Analytics (3 credits)
Environmental, Social and Governance (ESG) factors impacting corporate investment and financing decisions. Analytical tools for incorporating ESG factors into various forms of financial analysis including capital budgeting, capital structure, financing decisions, and investment portfolio management.
Prerequisite(s): (FIN 3054 or FIN 3074) and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4214 - Financial Modeling in Excel (3 credits)
Concepts of finance applied to the construction of models in Excel. Construct models of financial statement to evaluate financial strategies for a firm; design risk/return models for investment portfolio strategies using equity and/or debt securities; build models to optimize bond portfolios including interest rate sensitivities, duration and convexity; develop models to analyze and dynamically hedge option and futures portfolios; assemble binomial tree models on American options; build simulation models to evaluate different types of options.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4224 - Fixed Income Securities: Analysis and Management (3 credits)
Analysis of fixed income securities, including corporate bonds, U.S. Treasury notes and bonds, municipal bonds, money market securities, and home mortgages. The analysis include interest rate risk, credit risk, bond valuation theory, and the valuation of embedded options in the bond contract. Theories of the term structure of interest rates are presented. Must have a grade of C or better in prerequisites of FIN 3144 and 3154.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4225 - Analytics for Fixed Income Securities and Portfolio Management (3 credits)
4225: Management of fixed income securities in an experiential setting. Bond pricing and investment. Credit analysis and portfolio strategies in fixed income. Introduction to advanced analytical techniques in bond and portfolio analytics. Conduct research on individual companies, industries, and countries. Membership in BASIS (Bond And Securities Investing by Students). Must have a B- or better in prereq. Pass/Fail Only.
Prerequisite(s): FIN 3134
Corequisite(s): FIN 4224
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4226 - Analytics Fixed Inc. Port Mgmt (3 credits)
4226: Advanced management of fixed income portfolios in an experiential setting. Advanced credit analysis and modeling. Advanced analytical techniques for bonds and portfolios. Lead research teams. Research macroeconomic and international capital trends. Execute reports for internal and external distribution, especially for the clients. Membership in BASIS (Bond And Securities Investing by Students). Must have a B- or better in prereq. Pass/Fail Only.
Prerequisite(s): FIN 4224 and FIN 4225
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4234 - Venture Capital and Investment Banking (3 credits)
Explores the venture capital cycles of fund-raising, investing in portfolio firms, and exiting the investment. Focuses on the role of investment banking in the exiting of investments by taking the portfolio firms public through initial public offerings. Includes a conceptual component and an applied component in which the case method is used. Must have a grade of C or better in prerequisites of FIN 3144 and 3154.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4244 - Asset Valuation and Corporate Governance (3 credits)
The effect of corporate governance on asset-valuation. Case oriented course focusing on the valuation of non-financial assets such as projects, business units, private and public firms. Topics include method of comparables, discounted cash flow methods and the real options approach to valuation. Examines the external and internal governance mechanisms for preserving and enhancing the value of a firm. Must have a grade of C or better in prerequisites of FIN 3144 and 3154.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4254 - Bank Management and Financial Services (3 credits)
The functions of financial service providers and the risks inherent in the provision of banking and other financial services. Regulatory background and issues. Case oriented course. Must have a grade of C or better in prerequisites of FIN 3144 and 3154.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4255 - Credit Corps Lending Practicum (3 credits)
Credit underwriting of commercial loans in an experiential setting. Project work spans two semesters. 4255: First project and basic management of cash flows on legacy portfolio of loans. Credit analysis of middle market companies leading to recommendations for lending to such companies. Research on individual companies, their industries, or on commercial real estate projects. Research on relative loan pricing, trends in leverage loan markets. Professional-level presentation of loan recommendations. Exhibit the highest ethical standards and confidentiality and maintain a high level of responsibility, initiative, and performance. 4256: Finalization of first 4255 project as needed. Continuation of credit analysis and research applied to companies in different three-digit industry code, advanced credit risk and financial modeling, loan portfolio management on legacy loans including takedown/paydown of revolving lines. Reporting for internal distribution and for sponsor.
Prerequisite(s): FIN 3254 and FIN 4254 or FIN 4244
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4256 - Credit Corps Lending Practicum (3 credits)
Credit underwriting of commercial loans in an experiential setting. Project work spans two semesters. 4255: First project and basic management of cash flows on legacy portfolio of loans. Credit analysis of middle market companies leading to recommendations for lending to such companies. Research on individual companies, their industries, or on commercial real estate projects. Research on relative loan pricing, trends in leverage loan markets. Professional-level presentation of loan recommendations. Exhibit the highest ethical standards and confidentiality and maintain a high level of responsibility, initiative, and performance. 4256: Finalization of first 4255 project as needed. Continuation of credit analysis and research applied to companies in different three-digit industry code, advanced credit risk and financial modeling, loan portfolio management on legacy loans including takedown/paydown of revolving lines. Reporting for internal distribution and for sponsor.
Prerequisite(s): FIN 4255
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4264 - Managing Risk with Derivatives (3 credits)
The types, payoff, and pricing of derivative securities and contracts and their application in managing financial risks faced by corporations. Topics include options, forwards, futures and swaps; managing foreign currency risk, interest rate risk, stock price risk, and commodity price risk; and risk management techniques. Must have a grade of C or better in prerequisites of FIN 3144 and 3154.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4274 - Equity Securities: Analysis and Management (3 credits)
Advanced valuation and analysis of equity securities with case applications. Critical analysis of advanced equity asset pricing models. Analysis of advanced equity portfolio management techniques, equity portfolio performance measurement, and equity portfolio performance attribution analysis. Identification and analysis of market anomalies and recent developments in equity analysis. Must have grade of C or better in prerequisites of FIN 3144 and 3154.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4275 - Analytics for Equity Securities and Portfolio Management (3 credits)
Selection and management of equity securities in an experimental setting. Analysis, selection, and investment in common stocks. Introduction to advanced analytical techniques in equity evaluation and portfolio analytics. Research individual companies, industries, economic sectors, and national and global macroeconomic trends. Use appropriate software to develop financial models. Present buy and sell recommendations for actual execution in the portfolio. Maintain a high level of fiduciary responsibility. Pass/Fail only. Membership in SEED (Student-Managed Endowment for Educational Development).
Prerequisite(s): FIN 3134
Corequisite(s): FIN 4274
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4276 - Analytics for Equity Securities and Portfolio Management (3 credits)
Advanced management of equity portfolios in an experiential setting. Equity valuation and investing in equity securities. Advanced equity valuation analysis and modeling. Conduct and take a leadership role on teams that research individual companies, industries, and sectors. Research macroeconomic and international capital trends. Lead a team to present buy and sell recommendations for the portfolio and/or construct reports on equity topics. Present buy and sell recommendations for actual execution in the portfolio. Exhibit the highest ethical standards. Mentor new SEED analysts. Pass/Fail only. Membership in SEED (Student- Endowment for Educational Development).
Prerequisite(s): FIN 4274 and FIN 4275
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4284 - Free Markets, Individual freedom, and Economic Welfare (3 credits)
Course exposes students to various viewpoints on the role free markets can and do play in promoting individual freedom. Allocation of scarce resources, and in enhancing welfare. Explores the strengths and weaknesses of capitalism by critically evaluating the relationship between the economic efficiency achieved by capitalism and the attainment of welfare objectives. Other topics include current items such as globalization, price controls, income equality, outsourcing, corporate pricing power though monopoly/oligopoly, and government regulation of the economy.
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4294 - Commodity Invt. Portfolios (3 credits)
Application of fundamental commodity analysis and valuation techniques utilized to create a commodity investment portfolio in an experiential setting. Analysis, selection, and advanced analytical techniques in domestic and international agricultural, energy and metal commodities applied to a simulated investment in a commodity portfolio. Maintain a high level of fiduciary responsibility through developing, maintaining, and interpreting portfolio performance on a daily basis.
Prerequisite(s): FIN 3134 and FIN 3144
Instructional Contact Hours: (3 Lec, 3 Crd)

FIN 4314 - Field Projects in Finance (3 credits)
Finance-related business projects with external clients, which will include gathering and analyzing data, understanding relevant financial issues in a business context, formulating recommendations, and presenting analyses and recommendations in oral and written form. May be repeated once with different content for a maximum of 6 credit hours.
Prerequisite(s): FIN 3134 and FIN 3144 and FIN 3154
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

FIN 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

FIN 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

FIN 4984 - Special Study (1-19 credits)
Special Study
Instructional Contact Hours: Variable credit course

FIN 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

FIN 4994H - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics,

Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

[2] Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, MGT 2314 Introduction to International Business or HTM 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business or FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs, REAL 2044 Professional Development in Real Estate, REAL 3024 Applied Real Estate Development, REAL 3034 Real Estate Market Analysis, BIT 3414 Operations and Supply Chain Management, MGT 4394 Strategic Management, REAL 4075 Commercial Real Estate Studio).

[3] FIN/REAL substitutions:

- MGT 1104 Foundations of Business substitutes for REAL 1004 Discovering Real Estate requirement.
- BIT 2405 Introduction to Business Statistics, Analytics, and Modeling substitutes for REAL 2034 Real Estate Data Analysis requirement.
- REAL 2044 Professional Development in Real Estate substitutes for ACIS 2504 Introduction to Accounting Analytics.
- MGT 3404 Principles of Management satisfies the "REAL choose one elective".
- FIN 4154 Real Estate Finance substitutes for REAL 3044 Financing Real Estate Projects requirement.

[4] ENGL 1105 First-Year Writing - ENGL 1106 First-Year Writing can substitute for COMM 1015 Communication Skills - COMM 1016 Communication Skills. However, students who make this substitution must also take COMM 2004 Public Speaking

[5] Students may use PSYC 1004 Introductory Psychology to satisfy the requirement if they meet the Pathway 7: Critical Analysis of Identity & Equity in the U.S. requirement with a different required course.

[6] Graduation requirement: Students must achieve a grade of C or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy.

[7] Students who receive a grade of C- in FIN 3134 Financial Analytics may enroll concurrently in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy while re-taking FIN 3134 Financial Analytics

[8] Students may substitute ACIS 3115 Intermediate Financial Accounting for ACIS 4194 Analysis of Financial Statements.

[9] FIN 3054 Legal and Ethical Environment of Business and FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs are equivalent courses. Students may take either course to satisfy graduation requirements.

[10] REAL 4075 Commercial Real Estate Studio - REAL 4076 Commercial Real Estate Studio must be taken in sequence: Fall/Spring of the same academic year or Spring/Fall of the same calendar year.

[11] Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

[#] Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/)

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation . Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/).

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Department Information

Students in Finance and Real Estate (FREL) are required to pursue Real Estate for Commercial Properties (RELC) as a second major. The second major will be automatically added for FREL Students and does not require additional courses not listed on this checksheet.

Three Attempt Rule

In accordance with university policy, students are not allowed to take the same course more than three times. Please note that the Department of Finance will enforce this policy unless a special exception has been granted. If you are dropped from a course after you have taken it three times, please consult with your Pamplin academic advisor so that they can advise you of the next steps.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation . Please refer to the Undergraduate Catalog for details.

Roadmap

	Credits	**15**
	Total Credits	**125**

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, MGT 2314 Introduction to International Business or HTM 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business or FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs, REAL 2044 Professional Development in Real Estate, REAL 3024 Applied Real Estate Development, REAL 3034 Real Estate Market Analysis, BIT 3414 Operations and Supply Chain Management, MGT 4394 Strategic Management, REAL 4075 Commercial Real Estate Studio).

3 FIN/REAL substitutions:

- MGT 1104 Foundations of Business substitutes for REAL 1004 Discovering Real Estate requirement.

- BIT 2405 Introduction to Business Statistics, Analytics, and Modeling substitutes for REAL 2034 Real Estate Data Analysis requirement.
- REAL 2044 Professional Development in Real Estate substitutes for ACIS 2504 Introduction to Accounting Analytics.
- MGT 3404 Principles of Management satisfies the "REAL choose one elective".
- FIN 4154 Real Estate Finance substitutes for REAL 3044 Financing Real Estate Projects requirement.

4 ENGL 1105 First-Year Writing - ENGL 1106 First-Year Writing can substitute for COMM 1015 Communication Skills - COMM 1016 Communication Skills. However, students who make this substitution must also take COMM 2004 Public Speaking

5 Students may use PSYC 1004 Introductory Psychology to satisfy the requirement if they meet the Pathway 7: Critical Analysis of Identity & Equity in the U.S. requirement with a different required course.

6 Graduation requirement: Students must achieve a grade of C or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy.

7 Students who receive a grade of C- in FIN 3134 Financial Analytics may enroll concurrently in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy while re-taking FIN 3134 Financial Analytics.

8 Students may substitute ACIS 3115 Intermediate Financial Accounting for ACIS 4194 Analysis of Financial Statements.

9 FIN 3054 Legal and Ethical Environment of Business and FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs are equivalent courses. Students may take either course to satisfy graduation requirements.

10 REAL 4075 Commercial Real Estate Studio - REAL 4076 Commercial Real Estate Studio must be taken in sequence: Fall/Spring of the same academic year or Spring/Fall of the same calendar year.

11 Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504, MATH 1524, ACIS 2115-2116, BIT 2405-2406, and ECON 2005-2006) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504, MATH 1524, ACIS 2115-2116, BIT 2405-
2406, ECON 2005-2006, MGT 1104, MGT or HTM 2314, MGT 3404, MKTG 3104, FIN 3104, FIN 3054 or FIN 3074, REAL 3024, REAL 3034, BIT 3414, MGT 4394, REAL 4075).

3 ENGL 1105 First-Year Writing-ENGL 1106 First-Year Writing can substitute for COMM 1015 Communication Skills-COMM 1016 Communication Skills. However, students who make this substitution must also take COMM 2004 Public Speaking.

4 Students may use PSYC 1004 Introductory Psychology to satisfy the requirement if they meet the Pathway 7: Critical Analysis of Identity & Equity in the U.S. requirement with a different required course.

5 Graduation requirement: Students must achieve a grade of C- or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy

6 Students who receive a grade of C- in FIN 3134 Financial Analytics may enroll concurrently in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy while re-taking FIN 3134 Financial Analytics.

7 REAL 4075 Commercial Real Estate Studio and REAL 4076 Commercial Real Estate Studio must be taken in sequence: Fall/Spring of the same academic year of Spring/Fall of the same calendar year.

8 Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Three Attempt Rule

In accordance with university policy, students are not allowed to take the same course more than three times. Please note that the Department of Finance will enforce this policy unless a special exception has been granted. If you are dropped from a course after you have taken it three times, please consult with your Pamplin academic advisor so that they can advise you of the next steps.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

Roadmap

First Year		
Fall Semester		**Credits**

FIN 3114	Python/SQL for Data Analytics and Finance [#]	3
FIN 4144	International Financial Management [#]	3
FIN 4214	Financial Modeling in Excel [8,#]	3

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, MGT 2314 Introduction to International Business or HTM 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business or FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 ENGL 1105 First-Year Writing - ENGL 1106 First-Year Writing can substitute for COMM 1015 Communication Skills - COMM 1016 Communication Skills. However, students who make this substitution must also take COMM 2004 Public Speaking.

4 Students may use PSYC 1004 Introductory Psychology to satisfy the requirement if they meet the Pathway 7: Critical Analysis of Identity & Equity in the U.S. requirement with a different required course.

5 Graduation requirement: Students must achieve a grade of C or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy.

6 Students who receive a grade of C- in FIN 3134 Financial Analytics may enroll concurrently in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy while re-taking FIN 3134 Financial Analytics.

7 FIN 3054 Legal and Ethical Environment of Business and FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs are equivalent courses. Students may take either course to satisfy graduation requirements.

8 Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

9 COMM 2004 Public Speaking is required for students who did not take COMM 1015 Communication Skills - COMM 1016 Communication Skills.

10 Students are encouraged to take FIN 2114 Investments and Financial Literacy.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting-ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling-BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics-ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

8 Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

9 Students cannot double count FIN 4244 Asset Valuation and Corporate Governance, FIN 4254 Bank Management and Financial Services, or FIN 4274 Equity Securities: Analysis and Management.

10 COMM 2004 Public Speaking is required for students who did not take COMM 1015 Communication Skills - COMM 1016 Communication Skills.

11 Students are encouraged to take FIN 2114 Investments and Financial Literacy.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/)

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/)

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Three Attempt Rule

In accordance with university policy, students are not allowed to take the same course more than three times. Please note that the Department of Finance will enforce this policy unless a special exception has been granted. If you are dropped from a course after you have taken it three times, please consult with your Pamplin academic advisor so that they can advise you of the next steps.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics,

Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 ENGL 1105 First-Year Writing - ENGL 1106 First-Year Writing can substitute for COMM 1015 Communication Skills - COMM 1016 Communication Skills. However, students who make this substitution must also take COMM 2004 Public Speaking.

4 Students may use PSYC 1004 Introductory Psychology to satisfy the requirement if they meet the Pathway 7: Critical Analysis of Identity & Equity in the U.S. requirement with a different required course.

5 Graduation requirement: Students must achieve a grade of C or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy.

6 Students who receive a grade of C- in FIN 3134 Financial Analytics may enroll concurrently in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy while re-taking FIN 3134 Financial Analytics.

7 FIN 3054 Legal and Ethical Environment of Business and FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs are equivalent courses. Students may take either course to satisfy graduation requirements.

8 Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

9 Seniors in the FNRM option are strongly encouraged to participate in the capstone experiential learning offered through FIN 4255 Credit Corps Lending Practicum - FIN 4256 Credit Corps Lending Practicum, Credit Corps/CREDIT, in the Fall and Spring semesters. Students must receive faculty approval to enroll in this professional lending experience to complete their major studies.

10 COMM 2004 Public Speaking is required for students who did not take COMM 1015 Communication Skills - COMM 1016 Communication Skills.

11 Students are encouraged to take FIN 2114 Investments and Financial Literacy.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/).

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Three Attempt Rule

In accordance with university policy, students are not allowed to take the same course more than three times. Please note that the Department of Finance will enforce this policy unless a special exception has been granted. If you are dropped from a course after you have taken it three times, please consult with your Pamplin academic advisor so that they can advise you of the next steps.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation . Please refer to the Undergraduate Catalog for details.

In accordance with university policy, students are not allowed to take the same course more than three times. Please note that the Department of Finance will enforce this policy unless a special exception has been granted. If you are dropped from a course after you have taken it three times, please consult with your Pamplin academic advisor so that they can advise you of the next steps.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation . Please refer to the Undergraduate Catalog for details.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of

Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting-ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling-BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics-ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, MGT 2314 Introduction to International Business or HTM 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business or FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 ENGL 1105 First-Year Writing-ENGL 1106 First-Year Writing can substitute for COMM 1015 Communication Skills-COMM 1016 Communication Skills. However, students who make this substitution must also take COMM 2004 Public Speaking

4 Students may use PSYC 1004 Introductory Psychology to satisfy the requirement if they meet the Pathway 7: Critical Analysis of Identity & Equity in the U.S. requirement with a different required course.

5 Graduation requirement: Students must achieve a grade of C or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy.

6 Students who receive a grade of C- in FIN 3134 Financial Analytics may enroll concurrently in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy while re-taking FIN 3134 Financial Analytics.

7 FIN 3054 Legal and Ethical Environment of Business and FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs are equivalent courses. Students may take either course to satisfy graduation requirements.

8 Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

9 COMM 2004 Public Speaking is required for students who did not take COMM 1015 Communication Skills-COMM 1016 Communication Skills.

10 Students are encouraged to take FIN 2114 Investments and Financial Literacy.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation . Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/).

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Department Information

The Financial Planning and Wealth Management major is a registered program of the CFP® Board. Completion of the Financial Planning and Wealth Management major satisfies the education requirement to take the CFP® examination without any additional coursework. Virginia Tech does not certify individuals to use the CFP® and Certified Financial Planner™. CFP® certification is granted solely by the Certified Financial Planner Board of Standards, Inc. to individuals who, in addition to completing an educational requirement such as this CFP Board-

Registered Program, have met ethics, experience, and examination requirements. See http://www.CFPBoard.org (http://www.cfpboard.org/)

Three Attempt Rule

In accordance with university policy, students are not allowed to take the same course more than three times. Please note that the Department of Finance will enforce this policy unless a special exception has been granted. If you are dropped from a course after you have taken it three times, please consult with your Pamplin academic advisor so that they can advise you of the next steps.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation . Please refer to the Undergraduate Catalog for details.

1. Policy 91: Pamplin students in a business degree program must complete ten business courses (MATH 1225 Calculus of a Single Variable + MATH 1226 Calculus of a Single Variable + MATH 2204 Introduction to Multivariable Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, STAT 3005 Statistical Methods - STAT 3006 Statistical Methods, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.
2. Graduation requirement: Students must achieve a grade of C- or higher in select business courses (MATH 1225 Calculus of a Single Variable + MATH 1226 Calculus of a Single Variable + MATH 2204 Introduction to Multivariable Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, STAT 3005 Statistical Methods - STAT 3006 Statistical Methods, BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 2314 Introduction to International Business or HTM 2314 Introduction to International Business, MGT 3304 Management Theory and Leadership Practice or MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business or FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).
3. ENGL 1105 First-Year Writing - ENGL 1106 First-Year Writing can substitute for COMM 1015 Communication Skills - COMM 1016 Communication Skills. However, students who make this substitution must also take COMM 2004 Public Speaking.
4. Math readiness exam (ALEKS PPL), eligible AP credit, or MATH 1214 Preparation for Calculus pre-requisite course required for enrollment.
5. Students may use PSYC 1004 Introductory Psychology to satisfy the requirement if they meet the Pathway 7: Critical Analysis of Identity & Equity in the U.S. requirement with a different required course.
6. FIN 3054 Legal and Ethical Environment of Business and FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs are equivalent courses. Students may take either course to satisfy graduation requirements.
7. Graduation requirement: Students must achieve a grade of C or higher in FIN 3134 Financial Analytics, FIN 3144 Investments: Debt, Equity and Derivatives, and FIN 3154 Corporate Financial Analytics and Strategy.

[8] Students who receive a grade of C- in FIN 3134 Financial Analytics may enroll concurrently in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy while re-taking FIN 3134 Financial Analytics.

[9] ACIS 2504 Introduction to Accounting Analytics pre-requisite is required for eligibility to enroll in ACIS 3115 Intermediate Financial Accounting.

[10] Students who receive a grade of C- in FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy may enroll concurrently in FIN 42XX courses while re-taking FIN 3144 Investments: Debt, Equity and Derivatives and FIN 3154 Corporate Financial Analytics and Strategy. A grade of C or higher in FIN 3134 Financial Analytics is required before enrolling in FIN 42XX courses.

[11] FIN 4314 Field Projects in Finance will provide an FBDA-specific capstone course for students of major. FBDA capstone coursework will be available only in Fall semesters. Courses listed in Spring of Year Three must be completed for students to be eligible to attempt FBDA FIN 4314 Field Projects in Finance coursework.

[12] Substitution of STAT 3005 Statistical Methods - STAT 3006 Statistical Methods, MATH 2204 Introduction to Multivariable Calculus, and FDBA Elective (12 Credit hours) by CMDA 2005 Integrated Quantitative Sciences - CMDA 2006 Integrated Quantitative Sciences (also 12 credit hours) is acceptable provided CMDA is able to accommodate FBDA students. In that case, Policy 91 and Graduation Requirements (Footnotes 1, 2 above) will be modified accordingly.

[13] "Python" programming language is recommended.

[#] Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/)

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/).

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Three Attempt Rule

In accordance with university policy, students are not allowed to take the same course more than three times. Please note that the Department of Finance will enforce this policy unless a special exception has been granted. If you are dropped from a course after you have taken it three times, please consult with your Pamplin academic advisor so that they can advise you of the next steps.

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

Hospitality and Tourism Management

Our Website (http://www.htm.pamplin.vt.edu)

E-mail: htmdpt@vt.edu

Overview

The undergraduate program in hospitality and tourism management prepares students for leadership positions in hospitality and tourism, one of the world's largest industries. The department, which is ranked as one of the best in the world, seeks to provide students with a balance of industry-focused educational opportunities with directed work experiences. All students will take courses in hospitality, finance, food and beverage operations, tourism management, lodging operations, revenue management, and events. Special emphasis is placed on developing analytical, decision-making, leadership and communications skills. The degree requires an industry field study experience. The department offers two majors: Hospitality and Tourism Management (HTM) and Event and Experience Management (EEMG); four options: HTM Analytics (HTMA), HTM Services Management (HTMS), HTM Entrepreneurship & Innovation (ENIN), and HTM Sustainability, Ethics, & Advocacy (SEA); and one pathways minor: Event and Experience Management (EEMG).

The curriculum is flexible, allowing students to pursue specific areas of emphasis. Recommended areas include hospitality operations, global tourism experiences, restaurant and food management, meetings and events, and club and resort management. We also offer a dual degree program with Real Estate which prepares students for the field of asset management or hotel brokerage.

The department offers a variety of international programs and study abroad experiences to give students an enhanced understanding of cultural diversity, experience in international business methods, and practical understanding of hotel and restaurant management in other countries. Through industry scholarships and internal fundraising activities, students are able to attend state, regional, and national hospitality and tourism meetings.

The department is strongly committed to the placement of it undergraduate and graduate students. Industry partners participate in on-campus interview sessions. Industry representatives visit the department during fall and spring semesters to interview students for both permanent placement and internships. HTM conducts a career fair each spring semester for companies offering both career and internships opportunities. Major employers recruit HTM graduates at Virginia Tech, including Marriott, Hyatt, Walt Disney World, Hilton, Compass, Four Seasons, Ritz Carlton, B.F. Saul Hotel Division, Interstate Hotels, Crestline Hotels and Resorts, Cvent, Great American Restaurants, and Panera Bread Company. HTM consistently enjoys one of the top job placement rates on campus for its graduates.

Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Pathways to General Education (see "Academics (p. 9)") and toward the degree in Hospitality and Tourism Management.

Satisfactory progress requirements toward the B.S. in Business can be found on the major checksheet by visiting the University Registrar website at http://registrar.vt.edu/graduation-multi-brief/index1.html.

- Event & Experience Management Major (https://catalog.vt.edu/undergraduate/pamplin-college-business/hospitality-tourism-management/event-experience-management/)
- Hospitality and Tourism Management Major (p. 710)
- Hospitality and Tourism Management Major with Analytics Option (p. 714)
- Hospitality and Tourism Management Major with Entrepreneurship and Innovation Option (p. 717)
- Hospitality and Tourism Management Major with Services Management Option (p. 720)
- Hospitality and Tourism Management Major with Sustainability, Ethics, & Advocacy Option (p. 723)

Head: Dr. Zheng "Phil" Xiang **Assistant Department Head**: Tom Duetsch **Director, MSBA-HTM Program**: Dr. Kristin Lamoureux **Undergraduate Program Coordinator:** Dr. Nancy McGehee **Graduate Program Coordinator:** Dr. Eojina Kim **Professors:** M. A. Khan, N.G. McGehee, J.L. Nicolau-Gonzalbez, M. Singal, and Z. Xiang. **Collegiate Associate Professor:** K. Lamoureux **Associate Professors:** E. Kim and F. Zach. **Assistant Professors**: S. Bernard Simpson **Professor of Practice:** T. Duetsch, S. Feigenbaum, C. Fitch, T. Warner, and D. Yanisko. **Visiting Professor:** M. Laughon **Adjunct Faculty:** E. Allen, S. Foster, P. Henderson, A. Hutchinson, M. Minarch, and L. Zwibak.

Undergraduate Course Descriptions (HTM)

HTM 1414 - Introduction to Hospitality and Tourism Management (3 credits)
Hospitality & Tourism industry segmentation, management structures and practices, the significance of service delivery, economic impact of tourism and career opportunities. Concepts examined through readings, case studies and industry gues speakers.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 2104 - Careers in Hospitality and Tourism (1 credit)
Provide students with an early start on understanding and identifying the many career options in the field of Hospitality and Tourism Management. In-depth focus on the different skills and training necessary for various career paths, including core hospitality and tourism management, hospitality and tourism business acumen, and hospitality and tourism strategy and innovation. Emphasize the importance of personal job search strategies and provide networking opportunities with leaders in the industry. Students will create professional materials, including resumes and online profiles. Serves as a foundational course in preparing students for career success in the Hospitality and Tourism Management field. Pass/Fail only.
Instructional Contact Hours: (1 Lec, 1 Crd)

HTM 2314 - Introduction to International Business (3 credits)
Fundamental concepts of international business. International business environment and how it affects decisions, the creation of competitive advantage in the multinational firm, and complexities of managing it. Why international businesses exist, drivers of international expansion, differences among countries in terms of political, legal, economic, technological and cultural dimensions, and the complexity of international business decisions. Causes and consequences of globalization, international trade, and analyzing the challenges of managing international business, with a focus on a number of industries, including hospitality and tourism. Operational, strategic, and ethical issues which are unique to multinational corporations.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: MGT 2314

HTM 2434 - Hospitality Sales (3 credits)
A comprehensive study of the management of the sales function and its role in the overall financial performance of hospitality operations.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 2454 - Global Travel & Tourism Management (3 credits)
Introduction to travel and tourism both domestically and abroad. Includes topics such as the history, sociology and psychology of tourism; the tourism system, including private industry, associations and governing bodies; measuring and predicting travel motivations, behavior, and demand; and management issues in a global context. Course concludes with an international travel research final project.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 2464 - Designing the Service Experience (3 credits)
An overview of the service industry, its historical and economic importance, social, psychological and cultural impacts and future trends. Emphasizes the unique characteristics and management challenges of service organizations.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 2474 - Introduction to Meetings and Convention Management (3 credits)
A study of the meetings and convention industry. Focus on the components and processes involved in developing and conducting meetings and conventions.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 2514 - Catering Management (3 credits)
Introduces students to various venues in which catering services can be offered, and presents an overview of the functions, processes, and controls found in successful catering management and operations; emphasis is placed on the sales/marketing aspects of the business.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 2954 - Hospitality and Tourism Study Abroad (3 credits)
This course provides students with an international hospitality and tourism management business experience. It is only offered as part of a program outside the United States. Students will learn from the structured educational experience developed by the faculty directing the study abroad program. This course can be taken twice for a maximum of six credit hours. Sophomore standing and a minimum GPA of 3.0 required.
Instructional Contact Hours: (3 Lec, 3 Crd)
Repeatability: up to 6 credit hours

HTM 2964 - Field Study (3 credits)
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 2974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 3044 - Private Club Management (3 credits)
Develop an understanding of the private club sector of the hospitality industry. Topic areas are divided into club fundamentals, revenue-generating operations within clubs and support functions/departments of club operations. Junior standing as well as background courses in basic financial management are suggested.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 3244 - Franchising and Ownership in the Services Industries (3 credits)
Theory and practice of franchising as a form of business ownership and a vehicle for entrepreneurship. Contemporary issues related to franchising in different segments of the services industries including hospitality and tourism. Legal aspects, financial viability, ethical issues, and agency relationships in franchising. Franchise concept development, franchisor-franchisee relationship, franchise agreements, family business, minority franchising, and international franchising. Pre: Junior standing.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 3414 - Chef Lab: Culinary Operations Management (4 credits)
Food and kitchen safety, hazard analysis, purchasing, recipe development, costing, and volume food preparation, in a commercial kitchen lab experience one day per week along with a two hour per week lecture. Design/Lab Studio. Pre: Sophomore standing.
Instructional Contact Hours: (2 Lec, 2 Lab, 4 Crd)

HTM 3424 - Event Management (3 credits)
Management of special events in the hospitality and tourism industry. Organizational functions necessary for designing a broad range of special events, using formal elements of design to deliver successful events through use of effectively designed floor plans, event flow and logistics, risk management and contingency planning as well as analyzing the factors that influence an events success. Examine ethical issues at play in the context of modern event planning and implementation. Study review processes, evaluation methods and techniques used in events management. Sophomore standing.
Pathway Concept Area(s): 6D Critique & Prac in Design, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 3444 - Hospitality Financial Management (3 credits)
The application of accounting, finance, and cost control principles to hospitality industry organizations. The focus of this course is to provide future food service and lodging organization managers with the ability to handle the unique problems regarding financial analysis and cost control in this industry.
Prerequisite(s): ACIS 2116 and ECON 2006
Corequisite(s): FIN 3104
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 3484 - Socio-Cultural Impacts of Tourism (3 credits)
A study of both historic and current impacts of tourism on family, community, culture, government, globalization, and the environment at the domestic and international levels. The course uses a sustainable tourism framework to examine the complex ways in which tourism both affects and is affected by modern society worldwide. Includes topics such as eco-tourism, volunteer tourism and space tourism.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 3524 - Lodging Management (3 credits)
Organization, function, and management of lodging operations. Current issues and management challenges in the lodging industry. Applications of revenue management to lodging systems. Pre: Sophomore standing
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 3900 - Bridge Experience (0 credits)
Application of academic knowledge and skills to in a work-based experience aligned with post-graduation goals using research-based learning processes. Satisfactory completion of work-based experience often in the form of internship, undergraduate research, co-op, or study abroad; self-evaluation; reflection; and showcase of learning. Pre: Departmental approval of 3900 plan.
Instructional Contact Hours: (0 Crd)

HTM 3954 - HTM Study Abroad (1-6 credits)
This course provides students with an international hospitality and tourism management business experience. Students will be required to apply their knowledge and skills from their Pamplin College of Business core courses within this course. Students will learn from the structured educational experience developed by the faculty directing the study abroad program. Pamplin College of Business majors must have been approved for upper division course- work.
Instructional Contact Hours: (1-6 Lec, 1-6 Crd)

HTM 3984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 4334 - Sustainable Entrepreneurship and Innovation in Hospitality & Tourism (3 credits)
Analysis of hospitality and tourism innovative and entrepreneurial enterprises to pursue sustainable growth. Analyze the sustainability of hospitality & tourism business ideas regarding growth opportunities considering societal, demographic, and environmental changes from a variety of sources. An examination of the key elements of sustainable entrepreneurship for hospitality and tourism enterprises that apply across a range of business models. Includes a field based, experiential learning project where teams collaborate to analyze data from multiple sources to develop and execute business ideas for existing or new enterprises. Pre: Junior standing.
Prerequisite(s): MGT 2064 or AAEC 2434
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4354 - Information Technology and Social Media in Hospitality and Tourism (3 credits)
Introduction to the strategic use of information technology (IT) in todays hospitality and tourism organizations. Includes the most current and widely used information systems in operation, management, and e-business in hospitality and tourism as well as identification, discussion and debate of the ethical issues associated with these systems. Study of social media as a marketing tool for hospitality and tourism businesses. Examine impacts of IT on organizations and the industry as a whole. Pre: Sophomore standing.
Pathway Concept Area(s): 5A Quant & Comp Thnk Adv., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4414 - Restaurant Management: Design and Innovation (3 credits)
Reviews organizational structures, terminology, and categories associated with restaurant management. Discusses principles of restaurant management, including concept design development, financial analysis, daily operations, and customer service. Focuses on emerging trends in technology and innovation. Case study discussions of current issues and challenges in the industry, development of comprehensive restaurant business plan, and "Training for Intervention Procedures" (TIPS) certification.
Prerequisite(s): HTM 3414
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4434 - Event and Experience Management Senior Workshop (3 credits)
Senior experiential learning workshop to integrate and apply ethics, research, and design concepts from past coursework by engaging in actual professional events and experiences. Explore and understand the complexity of planning, coordination, and evaluation of events and the impact on the human experience. Capstone for Pathways Minor in Event & Experience Management. Pre: Senior Standing; Registered for the Event and Experience Management Pathways Minor.
Prerequisite(s): HTM 3424
Pathway Concept Area(s): 7 Identity & Equity in U.S., 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4444 - Winery Tourism (3 credits)
The course focuses on the role of wine and wineries in tourism, wine marketing and management in the hospitality industry, and examines the components of a winery. Students must be 21 years of age due to the inclusion of wine tasting in the course. COURSE FEE: $18.
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4454 - Hospitality Revenue Management (3 credits)
Examines lodging and foodservices Revenue Management (RM) issues. Customer-centric approach, explores RM from various traditional academic perspectives, including economics, pricing, forecasting, consumer behavior, accounting, finance, and human resources. Management-oriented, emphasizes practical aspects of decision-making. Applies theoretical concepts through class discussion, group projects and individual assignments.
Prerequisite(s): HTM 3444
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4464 - Human Resources Management in the Hospitality Industry (3 credits)
An overview of the concepts of human resources management as applied to the specific environments within the hospitality industry.
Prerequisite(s): MGT 3304 or MGT 3404
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4474 - Hospitality & Tourism Law (3 credits)
Managerial approach to the law that applies to hotels, food-service establishments, events, and tourism; special focus on manager's duties to guests. Key concepts covered include contract and property law, licensing and permits, labor relations, risk management including food and beverage issues, safety and security, and liability and negligence.
Prerequisite(s): FIN 3054
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4484 - International Tourism (3 credits)
Survey of global travel and tourism issues, including trends and patterns of global tourism, flow models, constraints and obstacles to international travel, demand for travel and tourism, tourism supply distribution, destination competitiveness, tourist safety and security, international travel and tourism organizations, performance measures. Analysis of sustainable indicators in protected areas and world heritage sites, tourism statistics and trends.
Prerequisite(s): MKTG 3104 or MKTG 3104H
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4514 - Hospitality Market Data Analysis (3 credits)
Extraction and analysis of industry data on a selected market for development and presentation of the Market Study in a worldwide competition among other universities. In conjunction with a leading hospitality industry data provider, students have an opportunity to extract and analyze current industry data. Expands teamwork and communication skills through written and oral delivery of the study. Impact Analysis study of a recent current event on hotels, related and non-related travel sectors.
Prerequisite(s): HTM 3524 and HTM 3444 and HTM 4454
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4954 - Study Abroad (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 4964 - Field Study in HTM (3 credits)
Prerequisite(s): (HTM 3414 and HTM 3524) or (HTM 3414 and HTM 3444) or (HTM 3254 and HTM 3444)
Instructional Contact Hours: (3 Lec, 3 Crd)

HTM 4974 - Independent Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 4984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 4994 - Undergraduate Research (1-19 credits)
Instructional Contact Hours: Variable credit course

HTM 4444	Winery Tourism #	3
HTM 4484	International Tourism #	3

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 HTM 3484 Socio-Cultural Impacts of Tourism recommended (Event & Experience Management Pathways minor course)

4 HTM 3424 Event Management recommended (Event & Experience Management Pathways minor course)

5 HTM 4354 Information Technology and Social Media in Hospitality and Tourism recommended (Event & Experience Management Pathways minor course)

6 Students must take at least 6 credit hours of HTM electives at the 3000 or 4000 level.

7 ITDS 1114 Design Appreciation recommended (Event & Experience Management Pathways minor course)

8 Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as a pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement. HTM 4434 Event and Experience Management Senior Workshop recommended (Event & Experience Management Pathways minor course).

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/)

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Department Information:

Students in the HTM major may choose to pursue the Event & Experience Management Pathways minor.

Students in the HTM major cannot double major with the Event & Experience Management Major.

Foreign Language Requirement

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

1. Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.
2. Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).
3. HTM 3484 Socio-Cultural Impacts of Tourism recommended (Event & Experience Management Pathways minor course)
4. HTM 3424 Event Management recommended (Event & Experience Management Pathways minor course)
5. ITDS 1114 Design Appreciation recommended (Event & Experience Management Pathways minor course)
6. Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement. HTM 4434 Event and Experience Management Senior Workshop recommended (Event & Experience Management Pathways minor course).
7. HTM 4514 Hospitality Market Data Analysis is only offered in the Fall Semester.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/)

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Foreign Language Requirement

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

Total Credits		**125**

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 CSES 2244 Agriculture, Global Food Security and Health (fall only) or SPES 2004 Cannabis - Science, Industry, and Culture (spring only) strongly recommended.

4 FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs is strongly recommended instead of FIN 3054 Legal and Ethical Environment of Business

5 Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as a pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement. HTM 4434 Event and Experience Management Senior Workshop recommended (Event & Experience Management Pathways minor course).

6 HTM 3244 Franchising and Ownership in the Services Industries is typically offered in spring semesters only.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-Requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/)

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Foreign Language Requirement

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 CSES 2244 Agriculture, Global Food Security and Health (fall only) or SPES 2004 Cannabis - Science, Industry, and Culture (spring only) strongly recommended.

4 FIN 3074 Legal, Ethical, and Financing Issues for Entrepreneurs is strongly recommended instead of FIN 3054 Legal and Ethical Environment of Business.

5 Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as a pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement. HTM 4434 Event and Experience Management Senior Workshop recommended (Event & Experience Management Pathways minor course).

6 HTM 3244 Franchising and Ownership in the Services Industries is typically offered in spring semesters only.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 HTM 3484 Socio-Cultural Impacts of Tourism is recommended (Event & Experience Management Pathways minor course)

4 HTM 3044 Private Club Management is typically offered in spring semesters only.

5 HTM 3244 Franchising and Ownership in the Services Industries is typically offered in spring semesters only.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/)

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Foreign Language Requirement

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

1 Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

2 Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

3 GEOG 1115 Seeking Sustainability / NR 1115 Seeking Sustainability is typically offered in fall semesters only.

4 FREC 2124 Forests, Society & Climate is typically offered in spring semesters only.

5 HTM 4354 Information Technology and Social Media in Hospitality and Tourism is strongly recommended.

6 Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement.

7 HTM 2454 Global Travel & Tourism Management can only be taken as an elective if GEOG 1115 Seeking Sustainability / NR 1115 Seeking Sustainability is chosen in Year Two- Fall Semester.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Policy 91

University policy requires a student to make satisfactory academic progress towards a degree in order to remain enrolled at the institution (see footnote 1). Students are responsible for reading and understanding Policy 91 in accordance with Pamplin policies http://pampl.in/policy91 (http://pampl.in/policy91/).

Graduation Requirements

General Information

A total of **125 credit hours** is required for graduation. Any exceptions to this curriculum must be approved by the student's department head and Associate Dean for Pamplin Undergraduate Programs.

Pre-requisites

Students are responsible for ensuring they have met necessary pre-requisites for all courses. Please refer to the Undergraduate Catalog or academic advisor.

Transferring Courses

Requirements and procedures for transferring courses are available http://pampl.in/transfercreditsteps (http://pampl.in/transfercreditsteps/)

Overall and In-Major GPA

Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Foreign Language Requirement

Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six credit hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement may not count towards the minimum credit hours required for graduation. Please refer to the Undergraduate Catalog for details.

[1] Policy 91: Pamplin students in a business degree program must complete eight business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, and ECON 2005 Principles of Economics - ECON 2006 Principles of Economics) with a grade of C- or higher by 72 attempted credit hours (or 90 attempted credit hours for students with more than 18 transfer credits). Students who have not met the requirements will be notified upon reaching 72 (or 90) credit hours that they must complete the missing course(s) in the next term(s) of enrollment. Failure to do so may result in the student's dismissal from the business degree program. This policy is strictly enforced.

[2] Graduation requirement: Students must achieve a grade of C- or higher in select business courses (ACIS 1504 Introduction to Business Analytics and Business Intelligence, MATH 1524 Business Calculus, ACIS 2115 Principles of Accounting - ACIS 2116 Principles of Accounting, BIT 2405 Introduction to Business Statistics, Analytics, and Modeling - BIT 2406 Introduction to Business Statistics, Analytics, and Modeling, ECON 2005 Principles of Economics - ECON 2006 Principles of Economics, MGT 1104 Foundations of Business, HTM 2314 Introduction to International Business or MGT 2314 Introduction to International Business, MGT 3404 Principles of Management, MKTG 3104 Marketing Management, FIN 3104 Introduction to Finance, FIN 3054 Legal and Ethical Environment of Business, BIT 3414 Operations and Supply Chain Management, and MGT 4394 Strategic Management).

[3] GEOG 1115 Seeking Sustainability / NR 1115 Seeking Sustainability is typically offered in fall semesters only.

[4] FREC 2124 Forests, Society & Climate is typically offered in spring semesters only.

[5] HTM 4354 Information Technology and Social Media in Hospitality and Tourism is strongly recommended.

[6] Critical Analysis of Identity & Equity in the U.S. may be double-counted with another course (major, option, pathway, or free elective) that is designated as pathway 7. If this pathway is already met, students must take a free elective to meet the 125-credit hour requirement.

[7] HTM 2454 Global Travel & Tourism Management can only be taken as an elective if GEOG 1115 Seeking Sustainability / NR 1115 Seeking Sustainability is chosen in Year Two- Fall Semester.

Overall and In-Major GPA: Students must have an overall GPA of 2.0 and an in-major GPA of 2.0 to graduate. Courses used to calculate the in-major GPA are noted with a # footnote.

Management

Our Website (http://www.management.pamplin.vt.edu)

Overview

Students in the Management major are guided by world-class faculty to prepare for careers in industry-leading and highly successful organizations. Our courses build strong foundations in fundamental management processes and prepare students to drive and lead organizations to sustainable and profitable growth in an increasingly complex world. We equip students with the mindset, approaches, and tools to succeed in a global business environment and the ability to translate disruptive change into business opportunities. Our courses and curriculum emphasize critical thinking, innovative problem solving, data analytics, ethical reasoning, persuasive communication, diversity & inclusion and interpersonal and team effectiveness. These skills position Pamplin Management graduates for future success in a wide variety of high-paying careers or as entrepreneurs. We offer four majors: ,Entrepreneurship, Innovation & Technology Management (EIT), Human Resource Management (HRM) ,Management Consulting & Analytics (MCA), and Management (MGT).

Management majors add considerable value to the organizations that employ them. Great managers in any business act as force multipliers, increasing the output generated by the people they work with and the resources available to them. Management majors, their teams and their organizations do this by finding ways to help organizations work smarter. Our core curriculum helps students develop the awareness needed to identify new entrepreneurial opportunities, improve organizational processes, use analytics to support evidence-based decisions, and effectively manage projects in support of organizational change and improvement.

Students may choose to minor in Entrepreneurship and/or Organizational Leadership. Students can also participate in paid and for-credit internships, career-focused clubs and student-led extracurricular activities. An emphasis on developing employable skills is further supported by course-based and one-on-one career planning, as well as by proving mastery of skills through earning professional certifications.

Management Majors

These majors are designed to provide students critical skills targeted toward potential future career paths in the following areas.

MGT: Management

This major allows students to pave their own way through our management courses. This major supports personalized selection of emphasis. For example, students interested in Management and Sustainability can chose the Management Major and select a path of Department, College and University courses around managing sustainability issues. Students interested in Management and cybersecurity have the same option. In short, it can be a major for students with the drive to work in or for organizations and their own passion about how to do that.

EIT: Entrepreneurship, Innovation & Technology Management

Students develop an entrepreneurial mindset and the related organizational skills to identify problems that can be converted

into opportunities, attract and deploy resources in pursuit of those opportunities, and to lead through innovation in both new and established companies. This major is designed for students who are considering starting their own businesses or who want to play a key role in making existing businesses more innovative and entrepreneurial.

HRM: Human Resource Management

This major prepares general managers or individuals interested in a career in the human resources field with the knowledge and skills necessary to systematically manage people to achieve group and organizational objectives and to sustain organizational effectiveness. Students will gain knowledge and skills in areas such as HR strategy, recruitment, training & development, performance management, diversity & inclusion, and compensation & benefits. This major will not only prepare students for careers in Human Resource Management but will also equip future business managers and leaders with the talent management mindsets and tools necessary to acquire, retain, and manage people effectively.

MCA: Management Consulting & Analytics

Students develop knowledge, human-centric and analytical skills to break down complex strategic problems and develop robust and innovative solutions, enabling them to successfully pursue careers in management consulting. Critical skills and competencies taught in this major will also benefit future managers and leaders to drive success in a complex environment that relies heavily on data, analytics, project management and the power of high-performing teams.

Minors Offered Through the Department of Management

Students from majors across the university (including Management majors) may also earn any of two minors offered through the Department of Management. These minors are the Organizational Leadership minor and the Entrepreneurship - New Venture Growth minor.

Organizational Leadership Minor

The Pathways Minor in Organizational Leadership is open to all Virginia Tech students with at least a 2.5 GPA at Virginia Tech. The curriculum provides students with courses and experiences necessary to serve as more effective leaders within their organizations. Each student takes courses to improve their competencies across four areas: creativity and innovation; critical and strategic thinking; intercultural communication; and holistic thinking and ethical reasoning. Students also participate in a leadership field experience which enables them to develop areas specific to their own needs. The leadership minor consists for eighteen hours of study, including six hours of management courses, nine hours of electives, and three hours of experiential activity. As a Pathways minor, students can count courses within the minor toward a student's Pathways to General Education requirements.

Entrepreneurship - New Venture Growth Minor

The Entrepreneurship-New Venture Growth minor equips students with the knowledge and skills to create, build, and lead growth-oriented new ventures in technology-rich environments. The minor consists of eighteen credit hours of study and includes a variety of interdisciplinary courses that explore key topics such as business model design and analysis, technology/digital entrepreneurship, project management, and innovative product design and technology commercialization strategies.

- Entrepreneurship, Innovation & Technology Management Major (p. 733)
- Human Resource Management Major (p. 736)
- Management Consulting and Analytics Major (p. 739)
- Management Major (p. 741)

Pamplin Professors of Management: C. E. Devers and D. R. Gnyawali
Strickler Professor: C. Porter
Professor: K.D. Carlson
Visiting Professor: B. Tyler
Associate Professors: J. B. Arthur, D. J. Beal, W. J. Becker, D. E. Hatfield, R. A. Hunt, P. Kumar, K. A. Schnatterly, D. M. Townsend and A. K. Ward Bartlett
Assistant Professors: K. S. Awate, J. E. Lewis, M. Stallkamp, P. S. Thompson, and M. L. White
Collegiate Assistant Professor:
Collegiate Associate Professor: C. M. Courtney, J.J. Simpson, and C.C Tseng
Associate Professor of Practice: L. Anderson, D. R. Buengel, R. A. Hunt, E. C. Jamison, R. Poff, and D. J. Williamson
Assistant Professor of Practice: M. E. Deck, P. Kiratikosolrak, S. Matuszak, and W. A. Schaudt
Instructors: A. L. Beleny
Affiliated Faculty: M. Singal, D. Stone, and E. Stone-Romero
Emeritus Faculty: L. D. Alexander, T. W. Bonham, A. T. Cobb, J. L. French, J. R. Lang, R. M. Madigan, S. E. Markham, K. F. Murrmann, J. F. Robinson, J. M. Shepard, W. J. Smith, C. U. Stephens L. Teagarden, and R. E. Wokutch
Career Advisor: D. C. Cordova
Business Leadership Center Director: R. A. Poff
Integrated Security Education and Research Center Director: J. J. Simpson

Undergraduate Course Descriptions (MGT)

MGT 1064 - Entrepreneurs Residence Experience (3 credits)
Introduces students in the Innovate Living Learning Community to the various aspects of the entrepreneurial ecosytem at Virginia Tech and familiarizes them with common business terminology in the field. Discover the difference between ideas and entrepreneurial opportunities and relate current business events to topics in the course, including specific entrepreneurial opportunities. Provides weekly opportunities to interact with and learn from visiting entrepreneurs through various methods (i.e. fireside chats, dinners, and speaking events) to enhance learning outside of the classroom and build confidence in engaging with seasoned professionals. Discusses entrepreneurial ideas and current opportunities and applies learning to create and deliver an effective, individual startup concept pitch.
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 1104 - Foundations of Business (3 credits)
Introduces students to the free enterprise system and the various business functions, such as management, human resources, marketing, operations, accounting and finance, technology as well as to the different types of business such as manufacturing and service. Analyzes the various business functions to help improve understanding of career interests and opportunities, as well as to provide a basic understanding of how a company operates. Applies learning through a group project in which a micro-business is created and managed.
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 1935 - Fundamentals of Cadet Professional Leadership (2 credits)
1935: Foundational course of the Virginia Tech Corps of Cadets Citizen-Leader Program. Explores basic business etiquette and introduces the cadet to concepts of online professional identity, basic career preparation, resume writing, basic interviewing techniques and ways to create a healthy nutrition and physical fitness program. Includes a comprehensive physical fitness laboratory. Membership in the Corps of Cadets is required. 1936: Introduces methodologies for efficient and effective leadership, explores options for multiple career paths, basic business etiquette, opportunity to attend leadership conferences and field trips to local businesses. Prepares cadets for leadership positions in their sophomore year. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

MGT 1936 - Fundamentals of Cadet Professional Leadership (2 credits)
1935: Foundational course of the Virginia Tech Corps of Cadets Citizen-Leader Program. Explores basic business etiquette and introduces the cadet to concepts of online professional identity, basic career preparation, resume writing, basic interviewing techniques and ways to create a healthy nutrition and physical fitness program. Includes a comprehensive physical fitness laboratory. Membership in the Corps of Cadets is required. 1936: Introduces methodologies for efficient and effective leadership, explores options for multiple career paths, basic business etiquette, opportunity to attend leadership conferences and field trips to local businesses. Prepares cadets for leadership positions in their sophomore year. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

MGT 1945 - Fundamentals of Cadet Leadership (2 credits)
Foundational course of the Virginia Tech Corps of Cadet Leader Development Program. Explores self-understanding, personality types, active and passive followership, leadership and ethical theories. A laboratory introduces freshmen cadets to academic success strategies. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

MGT 1946 - Fundamentals of Cadet Leadership (2 credits)
Continued emphasis on self-understanding and followership. Introduces adversarial and positive leadership models, hazing statutes and leadership case studies. Prepares cadets for leadership positions in their sophomore year. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

MGT 1984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MGT 2064 - Foundations of Entrepreneurship (3 credits)
Introduction to the study and practice of entrepreneurship in a human-centered context. Examination of the influence of different cultures, institutions, and global factors and the role of human values, beliefs and behaviors on modes of entrepreneurial action. Application of theories and methods of entrepreneurial opportunity identification within the contexts of human behavior, social institutions and/or patterns of culture to generate ideas for new ventures and application of design-thinking theories and concepts in a field-based, experiential learning project to design, iterate and validate a value proposition and business model for a new venture.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 6D Critique & Prac in Design, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 2104 - Careers in Management (1 credit)
Career opportunities associated with the Management major's three options: Human Resource Management (HRM), Management Consulting and Analytics (MCA), and Entrepreneurship, Innovation and Technology (EIT). Analyzes the current job markets and opportunities for these career paths. Creating effective resumes and cover letters and researching and networking with targeted firms. Experience scenarios of informational, behavioral, case interviews, and elevator pitch presentations. Incorporate real life perspective through guest speakers who are industry experts and local field visits. Pre: Sophomore and Junior Management majors and business undecided only. Pass/Fail only.
Instructional Contact Hours: (1 Lec, 1 Crd)

MGT 2114 - Principles of Project Management (3 credits)
Broad and comprehensive overview of project management (PM) with emphasis on its application in organizations. Tools, techniques, and evaluative frameworks that are intended to solve problems and execute organizational strategy. Emphasizes project lifecycle and introduces multiple PM approaches and technologies. Change management evaluation and project manager role in implementing related strategies. Assessment of project financial performance, impact, and risk.
Prerequisite(s): MGT 1064 or MGT 1104
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 2204 - Global Business of Pop Culture (3 credits)
Analyze the global business of pop culture through a semester-long case study of a selected pop culture industry. Investigate how social, historical, political, and economic forces shape, and are shaped by, business-decision making at local and global scales. Emphasis on business-decision making by pop culture entities reflecting how they have (or have not) responded over time to changing power dynamics and inequity in the macroenvironment (e.g., reimagined social identities and expectations, accelerated globalization and market access, political unrest, etc.). Use project-based learning to assess past strategic decisions from multiple, intersecting perspectives (e.g., social, historical, political, economic, etc.) and make recommendations about market-based decisions.
Pathway Concept Area(s): 2 Critical Thinking Humanities, 7 Identity & Equity in U.S., 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 2314 - Introduction to International Business (3 credits)
Fundamental concepts of international business. International business environment and how it affects decisions, the creation of competitive advantage in the multinational firm, and complexities of managing it. Why international businesses exist, drivers of international expansion, differences among countries in terms of political, legal, economic, technological and cultural dimensions, and the complexity of international business decisions. Causes and consequences of globalization, international trade, and analyzing the challenges of managing international business, with a focus on a number of industries, including hospitality and tourism. Operational, strategic, and ethical issues which are unique to multinational corporations.
Instructional Contact Hours: (3 Lec, 3 Crd)
Course Crosslist: HTM 2314

MGT 2354 - Teams, Leadership, and Business: Cultivating Excellence (3 credits)
Explores a broad range of concepts and theories important for a basic understanding of team leadership, including organizational behavior, motivation, conflict management, business engagement and stakeholders. Semester-long, service-learning assignment and case analyses to evaluate practical applications of exceptional leadership practices and team skills. Examines different cultures and values found within a team and business and challenges of diversity and inclusion in team settings. Pre: Sophomore standing.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 2504 - Sustainable Business Management (3 credits)
Foundational study and practice of sustainability and social issues in a business management context. Uses the emerging environmental, social, and governance (ESG) framework to explore the historical context of sustainability in business, influential ESG stakeholders, business commitments towards "net zero" status, business' role in creating and mitigating environmental impact of greenhouse gas emissions (GHG's), profitability of sustainable businesses, relevant government policy and regulation, ESG measurement and reporting, innovation and competitive advantage, sustainable supply chain management, sustainable business models, embedding sustainability into strategy, and how managers conceptualize and initiate ESG programming.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 2614 - Foundations of Management Consulting and Data Analytics (3 credits)
Provides students with a fundamental understanding of management consulting as an industry, the consulting process, and success-factors for providing value-adding consulting services. Examines financial and other key concepts that successful management consultants need to master to provide insight and value to their customers. Provides a comprehensive overview of new and emerging technologies impacting the consulting industry and consulting skills in data analytics, data sense-making and data visualization.
Prerequisite(s): MGT 1104 or MGT 1064
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 2935 - Career Planning for Cadets (2 credits)
2935: Cadets in this class learn the basic of business networking, developing presentations, professional mentorship, personal finance, and investments, advanced nutrition and living a healthy lifestyle. A physical fitness laboratory complements the lecture. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

MGT 2936 - Career Planning for Cadets (2 credits)
2936: Cadets in the class learn about careers in public service, leadership through service learning, personal investment strategies, ethical business leadership, explore opportunities for public service, and participate in leadership conference. A physical fitness laboratory complements the lecture. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 2 Lab, 2 Crd)

MGT 2945 - Small Unit Leadership for Cadets (1 credit)
Prepares cadets for responsibilities as small unit leaders. Builds on the previous years knowledge to focus on skills and knowledge necessary to lead small units. Introduces cadets to the importance of communication, includes basic counseling techniques, disciplinary actions, conflict resolution, cadet regulations and leadership case studies. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 1 Crd)

MGT 2946 - Small Unit Leadership for Cadets (1 credit)
Prepares cadets for organizational leadership. Teaches skills and knowledge necessary to effectively lead a mid- level organization. Includes practical counseling techniques using the cadet counseling form, the leaders toolbox, the cadet disciplinary system, mentor program, and conflict resolution. Includes instruction on the Senior Sergeant Selection Process. Membership in the Corps of Cadets is required.
Instructional Contact Hours: (1 Lec, 1 Crd)

MGT 2954 - Business Study Abroad (1-19 credits)
This course provides students with an international business experience. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. This course is intended for students who want to take management-related free electives. Pre: Instructors consent and the completion of 24 semester hours with a minimum GPA of 3.0 or departmental consent.
Instructional Contact Hours: Variable credit course

MGT 2964 - Field Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MGT 2984 - Special Study (1-19 credits)
Instructional Contact Hours: Variable credit course

MGT 2984G - Special Study (1-19 credits)
Pathway Concept Area(s): 7 Identity & Equity in U.S.
Instructional Contact Hours: Variable credit course

MGT 2984O - Special Study (1-19 credits)
Pathway Concept Area(s): 5F Quant & Comp Thnk Found.
Instructional Contact Hours: Variable credit course

MGT 3064 - Cornerstones of Entrepreneurship and Innovation (3 credits)
Provides a cornerstone foundation for the understanding of entrepreneurship and the business innovation process exposing students to fundamental business concepts applied and integrated in these arenas. An examination of value creation through entrepreneurship and the rudiments of new ventures are provided helping students develop an entrepreneurial frame of mind and perspective. Pre: Completion of 45 credit hours and two CLE Area 5 courses.
Prerequisite(s): MGT 2064
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 3074 - Social Entrepreneurship (3 credits)
Provides a foundation for how social entrepreneurs use and combine resources to pursue opportunities that lead to social change and/or address social needs. An examination of the nature of social entrepreneurship and its various practices is provided, helping students develop an entrepreneurial frame of mind and prepare them to act as effective leaders of social change.
Prerequisite(s): MGT 2064
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 3084 - Digital Entrepreneurship, Innovation, and Product Development (3 credits)
Technology-based and digital entrepreneurship in startups, corporate, and public-sector organizations. Course activities in commercialization and resource mobilization strategies for the development of new digital technologies. Data-driven assessment and pursuit of entrepreneurial opportunities in digital environments, including cybersecurity, artificial intelligence, blockchain technologies, biotechnology, and other emerging new technologies.
Prerequisite(s): MGT 2064
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 3094 - Global Entrepreneurship (3 credits)
Global entrepreneurship and venture creation strategies in intercultural global perspectives. Identifies the global entrepreneurial core competencies, applies formal global thinking concepts, and uses integrative problem-solving tools in global entrepreneurial opportunity contexts. Analyze the value proposition of a new venture model across national boundaries. Builds framework for understanding the entrepreneurial process in global contexts. Blends theory with practical experiences in global business contexts to explore and research global entrepreneurial process and environment.
Prerequisite(s): MGT 2064
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 11 Intercultural&Global Aware.
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 3304 - Management Theory and Leadership Practice (3 credits)
Introduces the student to a broad range of concepts, theories and practices important for a basic understanding of management. Includes the functions of management, roles of managers in organizations, and tools and techniques for managing organizational performance. Focus on the global environment in which today's managers must effectively and ethically lead organizations. Pre: Sophomore standing.
Pathway Concept Area(s): 3 Reasoning in Social Sciences, 10 Ethical Reasoning
Instructional Contact Hours: (3 Lec, 3 Crd)

MGT 3324 - Organization Behavior (3 credits)
