

**Resolution 2017-18.P**

**Resolution to Approve New Major, Energy & Power Electronics Systems, in Bachelor of Science in Electrical Engineering**

Recommended by the Commission on Undergraduate Studies and Policies

First Reading: February 26, 2018

Reviewed/ Waived by Faculty Senate:

Second Reading:

Approved by University Council:

Approved by President:

First effective date to declare Major: Spring 2018

First effective date to graduate: Winter 2020

**Whereas**, a well-established number of faculty in the Electrical and Computer Engineering Department (ECE) in the College of Engineering have international reputation, active research agendas, outreach activities, and teaching responsibilities in the areas of Energy & Power Electronics Systems; and

**Whereas**, the ECE Department has a well-established and broad set of technical elective courses that provide students with the opportunity to gain further knowledge and experience in many different aspects of Electrical and Computer Engineering, and the new Major in Energy & Power Electronics Systems establishes a required set of courses of the Energy & Power Electronics Systems area while maintaining a robust curriculum within the same accredited Electrical Engineering Degree; and

**Whereas**, a strong number of students continue to select Energy & Power Electronics Systems technical elective courses indicating a continued interest in the studies of Energy & Power Electronics Systems; and

**Whereas**, the establishment of the Major in Energy & Power Electronics Systems enables the ECE Department and the interested students to more clearly guide and establish educational objectives that align with societal, industrial and governmental needs; and

**Whereas**, Energy & Power Electronics Systems studies prepares students for a wide range of advanced degree studies, or makes them more marketable with potential employers seeking students with this specific knowledge; and

**Whereas**, the Major in Energy & Power Electronics Systems will provide for more curricular flexibility and specialization within the ECE Department, as well as a wider opportunity to participate in cross-disciplinary initiatives across the university.

**Therefore, let it be resolved** that the Major in Energy & Power Electronics Systems be approved for addition to the Bachelor of Science in Electrical Engineering effective Spring 2018 and the proposal forwarded through University governance and the President for approval.
