- Senior capstone design projects and undergraduate research in all engineering departments are eligible as engineering electives if the project focuses on the environmental impacts of engineering. See program advisor for **advance** approval of projects.
- In planning your schedule, consider carefully the prerequisites associated with each class as well as which semester(s) the class is offered. Prerequisites are controlled by individual departments if you have questions.

FOOTNOTES:

¹MSE 2034 does not have the same environmental content as MSE 2044 and is not approved for the minor

²CLE Area 2 course

³Prerequisites and non-major enrollment restrictions are particularly limiting for these courses for non-majors

⁴Cross-listed courses cannot be double-counted as both an engineering and non-engineering course

⁵CLE Area 7 course

GENERAL NOTES:

- Check prerequisites for each course carefully as these are determined by each department individually
- All courses must be taken on the letter grade (A/F) option. A minor GPA of 2.00 for the 18 credits of the minor is required.
- Other courses, including study abroad, may be substituted on a case-by-case basis with approval from the Green Engineering Director and College of Engineering Associate Dean of Academic Affairs. For instance, NR 3954 Study Abroad may be substituted when concerned directly with the environment and sustainability.
- 1xxx level courses will generally not be considered for substitution for the minor.
- Dr. Sean McGinnis, Director of Green Engineering (2090 Torgersen Hall), will act as an advisor for all students pursuing a Green Engineering minor. (Email – smcginn@vt.edu, Website – www.eng.vt.edu/green)
